ADMINISTRATION OF BENGAL, 1889-90.

SUMMARY.

TOURS OF THE LIEUTENANT-GOVERNOR.

On the 25th April 1889 the Lieutenant-Governor left Calcutta for Chittagong, and returned to the Presidency on the 5th May, during which time he discussed with the Commissioner and General Tregear the arrangements to be made for maintaining our position at Lungleh and for the operations to be undertaken in the ensuing cold weather. He also met the Assistant Political Agent of Hill Tipperah, and went carefully into the state of affairs in the Maharaja's territory.

On the 17th May Sir Stuart left for Darjeeling, visiting some of the tea gardens in the Terai *en route*, and remained in the hills till the 4th July. In July the scarcity and distress in Behar necessitated His Honour visiting the districts of Bankipore, Mozufferpore, and Durbhunga, whence he returned to Calcutta on the 8th August. After a short stay the Lieutenant-Governor again left Calcutta in the middle of August for the annual river tour. Sir Stuart proceeded to Eastern Bengal *via* the Sunderbuns, visiting Dacca, Backergunge, Serajgunge, and Bogra, and then paid a visit to Shillong *via* Dhubri and Gauhati, in order to discuss with the Chief Commissioner the questions in which both Governments were equally interested regarding the recruitment and emigration of tea coolies. From Assam the Lieutenant-Governor visited Rungpore and Dinagepore and made a detour to Moorshedabad, where the destruction of the Lalitakori embankment had caused much alarm and distress, and thence he again visited Mozufferpore in connection with relief operations, the prolongation of which had been rendered necessary by destructive floods. From Mozufferpore he went to Purneah, where floods and the threatened diversion of the Kosi required special attention, and from there he returned, *via* Kissengunge, to Darjeeling on the 21st September. In November Sir Stuart made a fortnight's tour in Sikkim, where he had an interview with the Raja and the Durbar of Tumlong, and returned to Calcutta, *via* Julpigoree on the 18th of the month. In the beginning of March 1890 disturbances among the Khols of the Chota Nagpore districts obliged the Lieutenant-Governor to visit Chota Nagpore, from whence he returned to Calcutta at the end of the month.

CHANGES IN ADMINISTRATION.

Only three very important changes in the administration of the various departments of Government in these provinces took place during the year. These were—first, the appointment of an Excise Commissioner for Bengal; second, the amalgamation of the Town and Suburbs of Calcutta, a measure the importance of which is shown by the great impetus it has given to the work of

municipal reform and improvement; and third, the reconstitution of the Calcutta Port Trust under Act III (B.C.) of 1890, which, however, did not receive the assent of the Governor-General until after the close of the year. There were also numerous minor changes which, as well as the three referred to above, will be treated of in the chapters concerning the different departments.

Under this head, however, may be noticed one other change which does not properly find a place under any other chapter. For thirty years the Chamber of Commerce had been agitating for a reduction in the number of public holidays, more especially of those at the time of the Doorga Poojah, and in the year under review they urged, in addition to the reasons previously advanced, that since the passing of the Negotiable Instruments Act, the Banks no longer felt it safe to transact any business on holidays gazetted under the Act; and they requested, therefore, that only holidays actually required to be devoted to necessary religious ceremonies should be gazetted under the Act, and that the other holidays should be made such by executive order for all offices save the few which were indispensable to the foreign trade of the port. This solution of the difficulty commended itself to the Local Government, and was accepted by the Government of India, and notifications were issued accordingly.

POLITICAL.

The most noticeable events of the past year in *Sikkim* were the appointment of a Political Agent at Guntok to assist the Maharaja in Council with his advice in the administration of affairs, the establishment of a Council for the conduct of ordinary, civil, criminal and revenue work, the settlement of unoccupied waste land and land occupied by monasteries, and the preservation of sal forests by bringing them under the direct control of the Durbar. The rainfall was heavier than usual, and the wheat and barley crops were damaged by hailstorms, but the outturn of the other crops was good. The season was not a healthy one, and fever, dysentery, and diarrhoea were prevalent, which is attributed to the excessive rainfall. There was very little crime during the year. No new lines of communication were opened out during the year beyond the extension of an existing road. In order, however, to appreciate the problem of administration in Sikkim, it is necessary never to lose sight of the fact that the aggregate revenues of the State amount to only Rs. 8,444, and that even out of this amount Rs. 6,000 was paid to the Maharaja as an allowance during the past year.

The *Bhutan* authorities were pressed to join the Thibetans during the military operations in Sikkim, but they abstained from doing so, and their relations with the British Government were satisfactory. Some inconvenience had been found to arise from the correspondence with Bhutan being conducted by the officials of Buxa, in Julpigoree, where the subsidy is paid, and by the Deputy Commissioner of Darjeeling, and the question what channel the correspondence should go through was under consideration, but was not disposed of during the year.

The unsatisfactory state of the administration of *Hill Tipperah* had for some years been a cause of anxiety to the Government, and particularly the absence of all accounts and the alienation of lands to creditors and others had given rise to apprehensions for its financial stability; and accordingly during the year under review negotiations were entered into which terminated satisfactorily, and His Highness the Maharaja adopted all the proposals made to

him, and selected Rai Uma Kanta Das Bahadur, the Assistant Political Agent of Hill Tipperah, for appointment as his Minister.

The rainfall was scanty, and the paddy crops are said to have suffered to some extent, but the ordinary crops were good, and jute cultivation, which was commenced in some parts of the plains, is said to have proved profitable. There was very little trade, as it is practically crushed out by the heavy duties and the absence of roads. The Revenue and Police administration have improved somewhat, and the Police now receive their pay more regularly; but it is said that much improvement cannot be looked for until their salaries are paid on a more liberal scale. There was a considerable number of deaths from cholera which broke out in several places, and this is attributed to the scanty rainfall. A large number of Chakmas (656 families) immigrated from the Chittagong Hill Tracts owing, it is said, to the demand for coolie labour caused by the Chin-Lushai Expedition, and the desire to escape such service.

The most important feature in the history of the *Tributary States of Orissa* during the year was a scarcity of food-grains caused by the partial failure of the crops in consequence of the irregularity and deficiency of the rainfall during the years 1887-88 and 1888-89. Of this and of the measures taken to give relief, an account is given under the head of Flood and Famine Relief. The public health was also much affected by this, and cholera and small-pox caused great havoc during the period of scarcity which lasted from April till November, when there was heavy rainfall, after which malarious fever appeared in an epidemic form, and the people suffered from it severely. The realisation of the land revenue was also necessarily affected, and the balances outstanding at the close of the year in the States under Government management were very heavy. The excise system of the State of Mourbhunj was improved by the abolition of the outstill farming system. Education again retrograded, and the number of schools fell from 1,182 to 1,128, and that of scholars from 15,153 to 14,407. This also is to be attributed to the deficient crops and the high prices of food-grains.

In the *Tributary and Political States of Chota Nagpore* the rainfall was sufficient and the crops generally good, but prices were as elsewhere high. The general health was good in all the States except Sirguja and Gangpur, where there were outbreaks of small-pox and cholera. It is said that the opposition to vaccination is giving way, and that vaccinators will probably be less hindered in their work in future. Education again retrograded, and although six additional schools were established, the number of scholars in all the States was only 1,219 against 1,329. Cattle disease was as usual prevalent, but steps have now been taken to stamp it out by the prompt segregation of the stricken animals and the burial of and the destruction of the hides of those that die. The statistics of crime call for no remark. Some long-standing disputes between the Raja of Bonai and the Gond Chief were brought to a satisfactory termination, and prompt measures were taken to quell the disturbances made by a band of Jashpur Karwas, who entered upon a series of plundering expeditions.

The important event of the year in connection with the *Chittagong Hill Tracts* was of course the Chin-Lushai Expedition, the operations of which were brought to a successful conclusion. A number of captives, who had been carried off in the Chongri Valley and Chima Valley raids, were recovered, and in addition to the permanent posts at Demagri, Burkal, and Ruma, and the newly established one at Lungleh, three temporary posts at Pyramid Hill, Joor-morong, and Keokhrading were occupied during the year. The frontier police

force performed their very arduous duties in connection with the expedition cheerfully and well, and the coolie corps from the Sonthal Pergunnahs is said to have been of great service. Two parties of Shendus who live to the south of Fort Lungleh, and whose country was not affected by the expedition, entered our territory apparently for raiding purposes, but patrol parties were immediately despatched and prevented any mischief being done. Trade again declined in consequence of the unsettled state of the country.

The relations of the *Kuch Behar* State with the British Government continued to be friendly and satisfactory.

SURVEY AND SETTLEMENTS.

There were under survey and settlement operations during the year 83 estates (*i.e.*, separate properties) which contained an area of 7,285 square miles, and were situated in 20 separate districts. Of these 51 are Government estates, with an area of 4,294 square miles, of which a resettlement of land revenue is being made; 9 are wards' estates, with a total area of 2,868 square miles, of which a survey with a record of rights and settlement of fair rents has been undertaken; and 23 are private zemindars' estates, with an area of 123 square miles, the owners of which applied for survey, record of rights, and settlement of rents, either on the ground of disputes existing between them and their tenants, or on the ground that they were new auction-purchasers and unable to ascertain the amounts of the rentals payable to them.

The greater part of the province of *Orissa* is temporarily settled, and the present settlement will expire in 1896-97, and accordingly a scheme was drawn up and approved for a survey and the preparation of a record of rights with a view to resettlement. The cost of survey and settlement is estimated at about 15 lakhs, and the increase to revenue at 7 lakhs or more. In pursuance of this scheme the transverse survey of 407 and the cadastral survey of 358 square miles were completed, the total cost to the end of the year being Rs. 24,872. The survey and record of rights of the *Western Dooars*, which was begun in the previous year, was carried on during the year under review. These Dooars cover 1,913 square miles, and during the field season 1889-90 it is reported that 782 square miles were traversed and that the 4-inch topographical survey of 118 and the cadastral survey of 304 square miles were completed at a total cost of Rs. 76,553. The settlement operations were delayed by the deputation of the Settlement Officer on other duty, and by his illness, which rendered it necessary that he should proceed on leave. The total cost of these settlement operations during the year was Rs. 21,303. The survey party in *Calcutta* was employed in surveying those houses which had not been previously surveyed owing to the absence of owners and various other causes, and in completing the survey of the boundaries of holdings and of streets, lanes, and ditches.

Altogether 163 original settlements and 381 resettlements were effected during the year. The settlement of the *Jellamoota estate* in Midnapore with its proprietors was concluded during the year, the net revenue payable by the proprietors being Rs. 1,26,753. The settlements of *Angul* and *Banki* were carried on during the year. In the case of the former estate the area under cultivation was found to have increased since the last settlement from 50,081 to 133,742 acres, which will eventually result in trebling the revenue hitherto paid. The total cost of the preparation of the record of rights and settlement of rents to 31st March 1890 was Rs. 40,363, or annas 1-10 an acre. In the

Banki estate 33 villages were assessed at a revenue of Rs. 5,823, being an increase of 30·7 per cent. Settlement operations, commenced in the previous year, were also carried on in the *Sonthal Pergunnahs* under the Sonthal Pergunnahs Settlement and Rent Regulations, and about 200,000 acres of cultivated and about 108,000 acres of uncultivated land were brought under the operations before the close of April 1890.

There were 52 applications for *survey and settlement under the Tenancy Act*, against 40 in the previous year. The operations under the Act extended over a vast area comprising Government, wards', and private estates in many districts and in every Division in which the Act was in force, and they affected a large number of tenants, aggregating at least four hundred thousand. In the estates the settlement of which had been completed or was approaching completion, an increase of rent and revenue amounting to more than a lakh of rupees was obtained with the consent of the ryots concerned, and there was no rioting or disorder, and the number of appeals to the Special Judges was exceedingly small. The cost of the professional survey has several times been in excess, but the cost of settlement operations has usually been less than the estimate, and on the whole the cost has been about 8 annas per acre.

GOVERNMENT ESTATES.

The current demand or rental of the *Government Estates* was Rs. 23,32,339, and the collections amounted to Rs. 24,87,163, which is 101 per cent. on the former sum. The year opened with an outstanding balance of Rs. 8,09,819, so that the total demand was Rs. 31,42,188, and as out of this, in addition to the amount collected, there were remissions aggregating Rs. 46,728, the outstanding arrear balance at the close of the year was Rs. 6,08,297. The percentage of current collections on current demand increased from 71·63 to 79·47, and that of arrear collections on arrear demand from 71·7 to 78·24. In eleven districts the collections exceeded 90 per cent. of the total demand, and in three of them the total demand was collected. Of the remaining districts, twenty showed an improved percentage and ten a falling off. In the case of estates under direct management the percentage of total collections to total demand increased from 69·61 to 78·44, and in the case of estates under farming leases the percentage increased from 76·43 to 80·89.

The total expenditure on miscellaneous *works of improvement* decreased from Rs. 83,291 to Rs. 57,004, but in addition to this sums aggregating Rs. 41,781 were expended on miscellaneous improvements in the Orphanage market in the 24-Pergunnahs, on repairs of granbheris and clearance of khals in estates in Midnapore, and in Darjeeling from the Darjeeling Improvement Fund. The experiments for the cultivation of new staples showed, as usual, a good many instances of failure, but one success is of more importance than many failures; and it is stated that an experiment for potato cultivation in the Alipore subdivision of the Julpigoree district ended most satisfactorily, and that the introduction of *boro* paddy into the Diamond Harbour subdivision has been attended with favourable results. Out of the sum of Rs. 2,72,108 placed at the disposal of the Board for the management and improvement of estates, the Accountant General reported that Rs. 2,71,696 had been expended: but these figures are liable to modification.

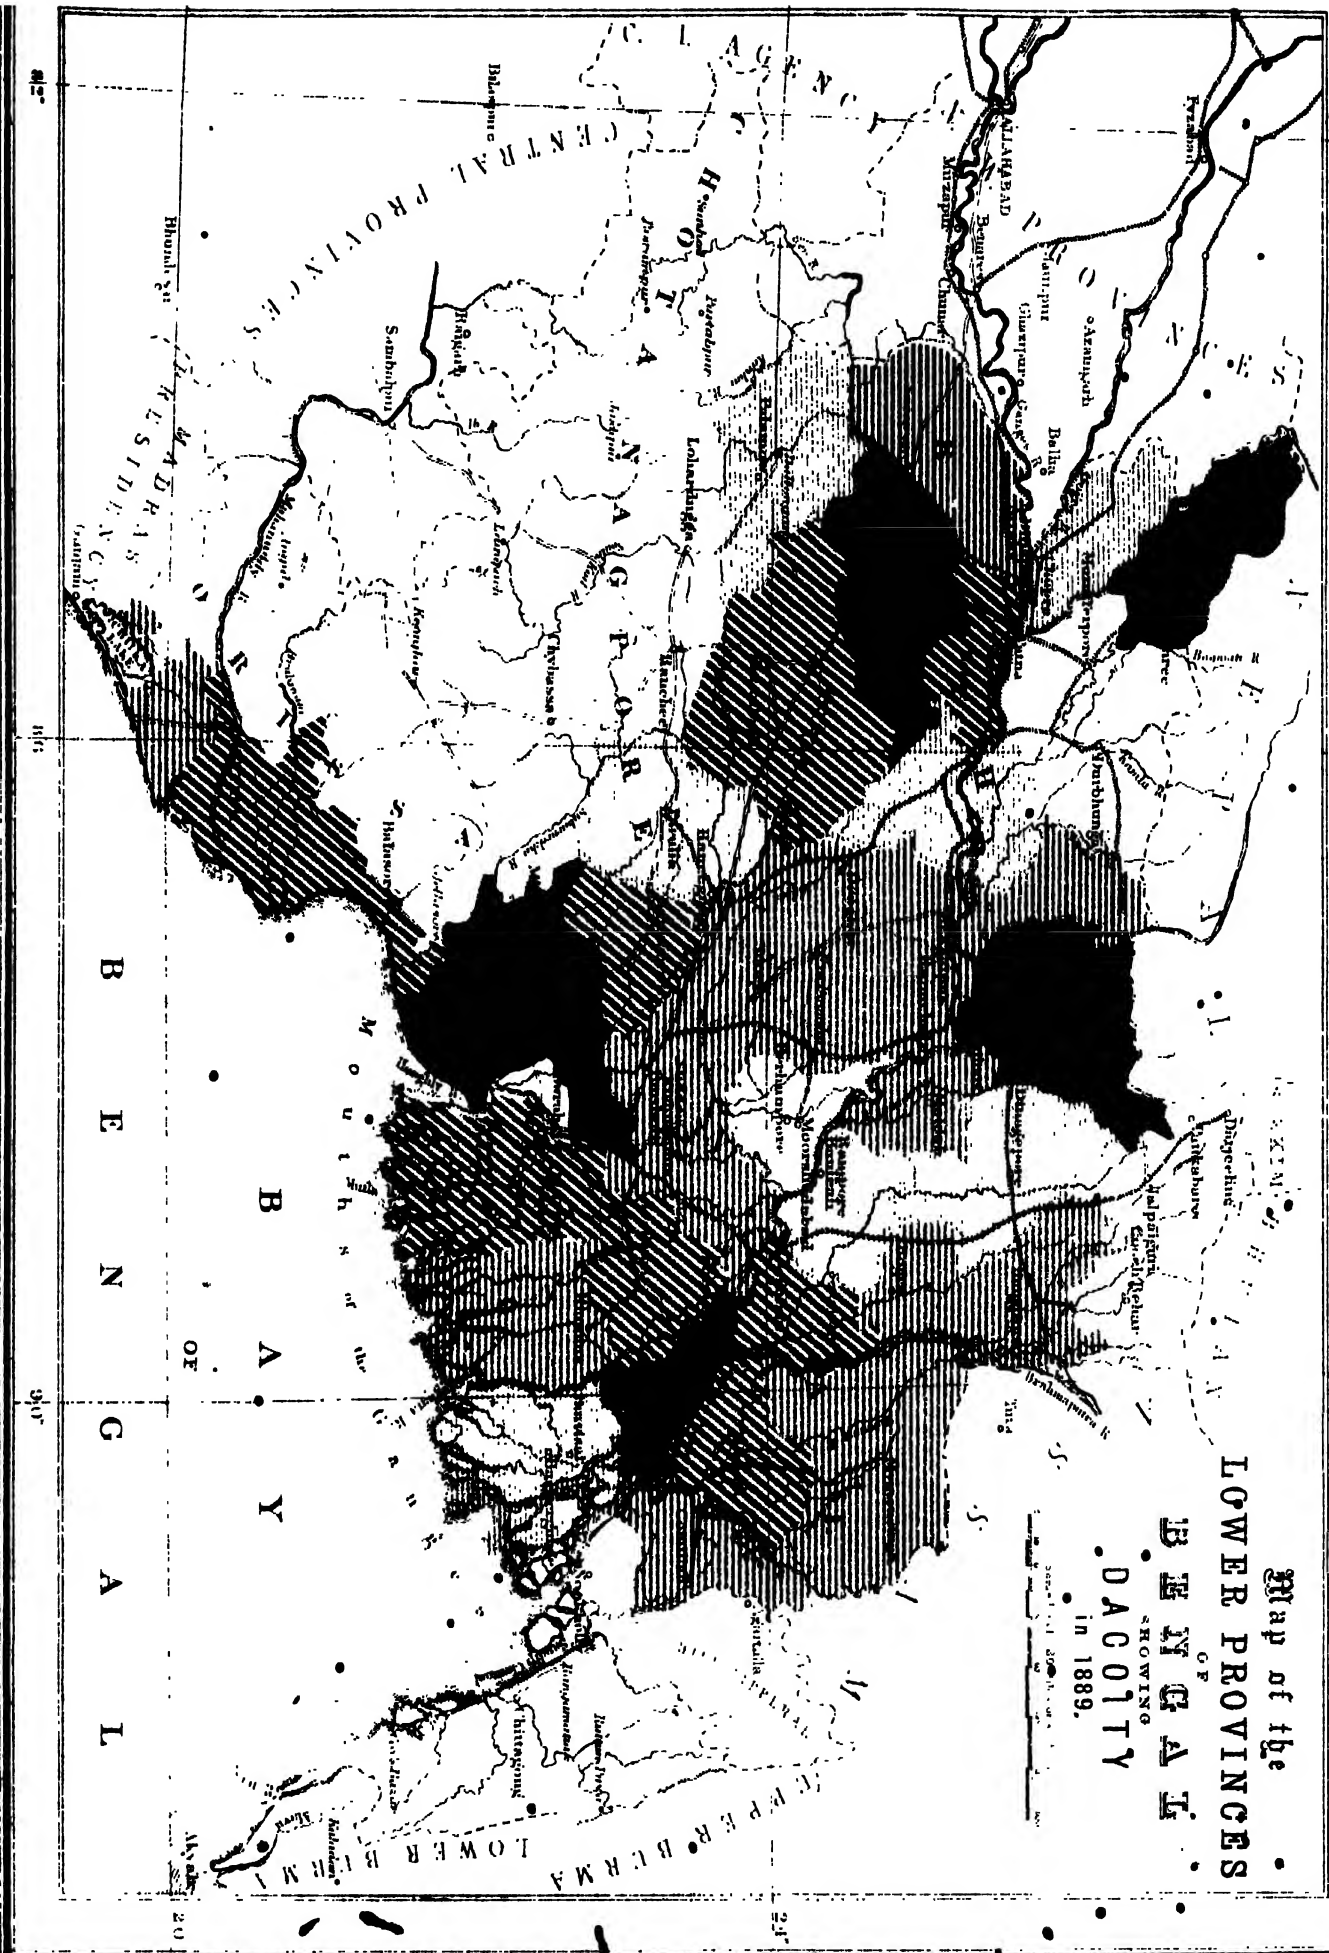

The *condition of the tenantry*, although, as noticed elsewhere, affected by drought and floods, was on the whole generally good.

WARDS' ESTATES.

The number of *private estates* under the management of the revenue authorities decreased from 148 to 147, and of these, 74 were wards' and 73 attached and other estates. The current demand slightly exceeds one crore, and the total collections exceeded the current demand by Rs. 2,74,728, a result the best ever attained, except in the year 1878-79. The balances outstanding have also been further reduced by granting remissions (which generally means writing off debts barred by limitation), so that they stood at 82 lakhs at the close of the year as compared with 108 at its commencement. The amount spent on *improvements* was Rs. 66,930, and although this slightly exceeded the expenditure of previous years, the Lieutenant-Governor considered that the expenditure on some properties had been deficient. The progress made in effecting surveys and records of right was satisfactory, and very great improvement was effected thereby. The number of *certificates* filed during the year decreased from 24,922 to 15,397, and the amount covered by them from Rs. 8,63,017 to Rs. 6,32,903. The *condition of the tenantry* is sufficiently shown by this and by the excellent collections to have been one of prosperity throughout the year, and is reported by the local officers to have been so. One most satisfactory event in connection with the administration of the estates was the settlement of the disputes relating to the succession to the Burdwan estate. The claims of Government on the estates were satisfied during the year with the exception of a very moderate balance; but apart from this and from the unusually good collections, the *financial results* of the year were not altogether satisfactory, as the debts due by the estates increased from 45 to 48 lakhs, while the cash balances diminished from 24 to 17 lakhs, and only four lakhs were invested or spent on the purchase of land.

COURSE OF LEGISLATION.

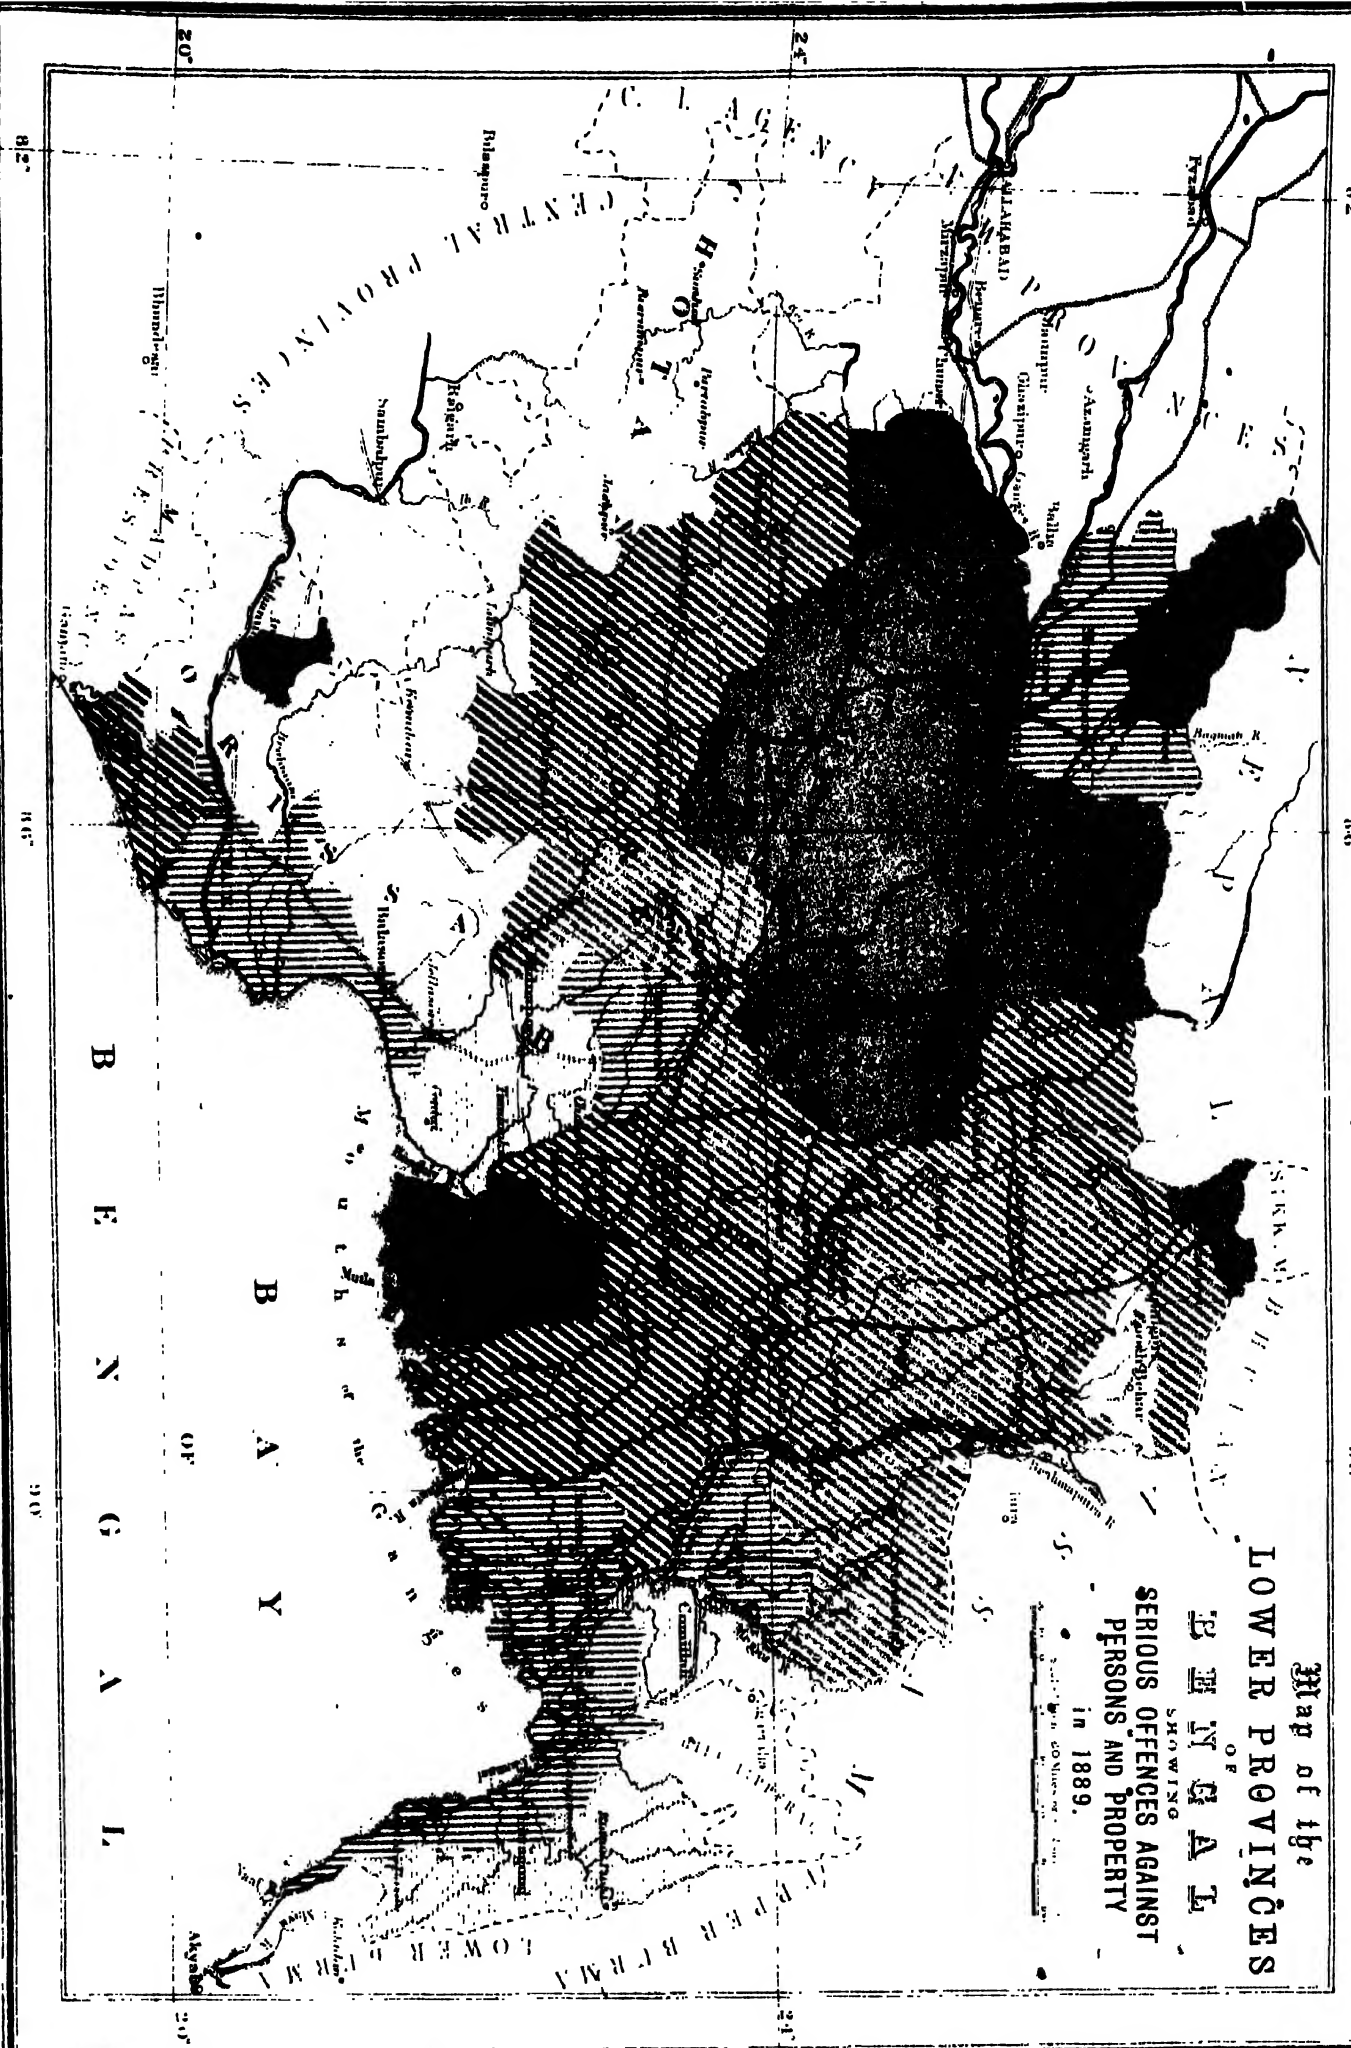

Three Bills, all of which received the assent of the Governor-General and passed into law during the year, were under the consideration of the *Legislative Council* of the Lieutenant-Governor during the session 1889-90. The first of these was merely for the purpose of amalgamating the Superannuation Funds of the Police Forces of Calcutta and the Suburbs, the latter having now been incorporated with the former; and the second, entitled an Act to amend the Bengal Vaccination Act, 1880, was to render applicable to the Suburbs certain rules and orders till then applicable only to Calcutta. The third Act, which was one to consolidate and amend the law relating to the port of Calcutta and to the appointment of Commissioners for the port, although mainly a consolidating measure, nevertheless made some important amendments in the existing law. The number of Port Commissioners was increased from 13 to 15; the manner in which the port property should be valued for purposes of municipal assessment was prescribed; provision was made for the institution of civil suits by persons debarred the use of private wharves or other works, or whose wharves or other works were removed by the Commissioners; some sections were introduced relating to the mode of preparing the budget and defining the liability of the Commissioners in respect of goods in their custody; and provision was also made for the grant of pensions to the port employés; the position and duties of the Port Police being at the same time more clearly defined.

POLICE.

The sanctioned *strength* of the Regular Police (inclusive of the Railway Police) was 23,456 officers and men at a cost of Rs. 41,76,502, and the Rural Police consisted of 171,141 men, who received as payment Rs. 55,88,891 in addition to the service lands held by them. These figures show a slight increase over those of the preceding year. The *conduct* of the Regular Police appears from the punishments inflicted to have slightly improved, for while the number of judicial punishments has remained exactly the same, the number of departmental punishments has decreased. The portion of the Police employed on town duties, however, in many places failed to perform their duties satisfactorily; and, in order to render this branch of the work more popular, a redistribution of the batta allowances was effected, and the system of employing local men as chowkidars in place of the Regular Police for the rural areas in towns was further extended. The conduct of the Rural Police was, as in previous years, most unfavourably reported on, and Colonel Ramsay, whose labours have, however, now merged in those of the Committee appointed to consider the general question of police reform, was placed on special duty at the end of the year in order to investigate certain points connected with the chowkidari system. It will, perhaps, be the most important portion of the Committee's duty to attempt to devise means of welding together more completely than has hitherto been done the Rural and the Regular Police.

There was an increase of 8,975 in the number of *cognizable cases* reported true, and of this increase 2,577 cases were under class III—Serious offences against person and property, or against property only, a result which is attributed to the distress caused by high prices. The number of offences of this class increased from 25,247 to 27,824, and it is with these offences that the police have hitherto been most unsuccessful in dealing. The percentage of convictions to true cases increased under every head except that of minor offences against the person; but, on the other hand, the percentage of convictions in sessions trials for the first time for many years fell below 50 per cent., the actual figures being 49·1, against 51·7 in 1888 and 56·0 in 1887, a result for which the districts of Pubna and Bogra, which are included in one sessions charge, were largely responsible. *Non-cognizable* offences rose from 112,006 in 1888 to 117,407, a difference of 5,401, which was due mainly to a larger number of prosecutions under the Municipal Act. There was a slight improvement in the percentage of cases decided at the first two hearings, but the percentage of cases remanded more than six times remained the same. The number of *bad characters* under police surveillance rose from 41,561 to 42,812; and as the increasing number is the chief obstacle to effective scrutiny, a system of classification was introduced, which, by making the duty lighter, will enable the police to devote more attention to habitual criminals. The number of *bad livelihood cases* tried in court was 1,083, and 811 cases were tried locally. The inordinate delay in disposing of some of these cases again attracted the attention of the Lieutenant-Governor, who repeated the remark made by him in 1887, that it is far better that a case should be taken up at once in court than that men should have charges hanging over their heads for months and months because it is not found convenient to depute an officer to the spot. The number of *reconvictions* rose from 1,640 to 1,915. The percentage of *cases declared false* fell slightly, but there were fewer prosecutions, and the results were poorer, although, as remarked by the Inspector-General of Police, there was certainly no room for deterioration.

In the *town and suburbs of Calcutta* the number of *cognizable* cases decreased from 38,335 to 33,064, the decrease being mainly under the head of street offences; while the number of *non-cognizable* cases increased from 25,328 to 27,319, which was due to an increase in the number of cases under the Conservancy Act. The total number of cases fell from 63,663 to 60,383; and at the same time the number of persons arrested and summoned fell from 69,377 to 56,762, the number of persons convicted from 61,865 to 49,003, and the percentage of convictions from 94·68 in cognizable and 71·12 in non-cognizable to 23·30 and 65·99 respectively. The value of the property stolen rose from Rs. 1,22,523 to Rs. 1,51,267, while the percentage of property recovered remained the same in the town, but in the suburbs fell from 43·89 to 35·06. In the *town* offences relating to coin fell from 13 to 5, and of 6 persons arrested in connection therewith, 4 were convicted and 2 were discharged. There were 4 cases of murder, against 6 in the preceding year, and in three of these the accused was sentenced to death, while in the fourth the accused absconded. True cases of burglary rose from 161 to 179, and the number of convictions from 95 to 119. The amount of property stolen was much smaller than in any of the preceding four years, but the percentage recovered was only 32·15 as compared with an average of 47·33 in those years. The barbarous practice of flaying goats alive was exposed, and prosecutions were instituted for the purpose of putting a stop to it. In the *suburbs* there were three cases of murder, in one of which the accused was sentenced to transportation for life, and three cases of culpable homicide in which, as in the murder cases, only one conviction was obtained, the accused being sentenced to transportation for ten years. There were 16 cases of grievous hurt, against an average of 25 in the five preceding years. There were in the town and suburbs 83 cases of *suicide*, against 84 in the preceding year. *Accidental deaths* diminished from 351 to 292. There was a large increase in the importation of *fire-arms* from 1,889 to 2,655, said to be due to the importation of a cheaper class of weapon. Thirty-one as against thirty-three fires occurred in the town, the suburbs, and Howrah, and in only one case was there loss of human life. The damage done was Rs. 1,38,490 against Rs. 12,53,480. The *strength* of the town and suburban police was 2,955, against 3,012 and 3,021, the averages of the quinquennial periods ending 1883 and 1888, and the *cost* was Rs. 6,10,980, against Rs. 5,78,846 and Rs. 6,15,844, the averages of the periods referred to. Out of 177 native officers in the year under report, 111, or 62·7 per cent., were able to read and write. The number of judicial punishments, of departmental punishments, and of dismissals were respectively 15, 801, and 56, the averages of the preceding five years being 24, 1,037, and 85 respectively. The percentage of police cases ending in conviction to cases investigated rose from 89·8 in the five years 1884—88 to 93·1 in 1889, and that of persons convicted in police cases to persons arrested by police from 94·5 to 97·7. Under class I, Offences against the State and public tranquillity, there was a decrease in the number of cases and in the percentage of convictions as compared with the preceding five years. Serious offences against the person (class II) also diminished slightly, and although the percentage of convictions fell from 59·2 in the five years ending 1883 to 56·5 in the next five years, it again increased to 60·1 in the year under review. Cases under class III (Serious offences against the person and property or against property only) increased largely from 201 and 288, the averages of the quinquennial periods ending 1883 and 1888, to 340 in the year under review, and the percentage of convictions increased also from 46·2 and 50·3 to

57·3. The number of true cases under class V, Minor offences against property, was 2,989, and the percentage of convictions 47·3—figures which show a slight increase as compared with the five years ending 1888, but a slight decrease as compared with the five years before that.

Twelve thousand two hundred and forty-one persons and 23,364 cattle were killed by *wild animals and snakes* in the year 1889, as against 10,281 persons and 24,112 cattle in 1888. Of the persons killed by animals, a third or more than a third each year are said to have been killed by tigers, and although their depredations have been attended with decreasing loss of life in Monghyr, they are still dangerous to a very serious degree in the districts of Gya and Lohardugga. There was a great increase in the number of deaths from wolves in the Patna Division, and especially in the district of Durbhunga, and the number of wolves killed in that Division increased from 370 in 1888 to 713 in 1889. The number of wild animals killed was 6,807 and the amount of the rewards paid was Rs. 16,011, as compared with 6,503 animals and Rs. 13,795 in 1888; and from these and similar figures for other years it appears that the system of rewards has not much real effect in the rate of extermination of wild beasts or in the depredations committed by them. The number of persons killed by venomous snakes increased from 8,946 to 10,681, the number of snakes killed from 39,326 to 41,189, while the amount paid as rewards fell from Rs. 3,587 to Rs. 3,439. The habits of the people, who cannot be induced to cut down the jungle that encumbers their homesteads, or to refrain from walking in that jungle with unprotected feet and legs in the dark or in the dusk of early morning, and the constantly recurring floods that drive snakes to the homesteads, both conduce to increase the mortality. Moreover, although in some parts of Bengal the natives, Hindus and Mahomedans alike, will kill every snake they see without thinking of a reward, in other districts the snakes are regarded as objects of veneration, and small rewards are ineffective. The question of taking special measures to reduce the mortality from snake-bite is now under the consideration of the Government of India, but for these and other reasons the Bengal Government has expressed an opinion that no further action is either necessary or desirable.

The sanctioned strength of the Frontier Police in the *Chittagong Hill Tracts* was 539, the same as in the previous year. As a result of the Lushai expedition, three new outposts—one permanent one at Lungleh, and two temporary ones at Lungsin and Joornorong—were opened, and in consequence two other temporary outposts had to be abolished and a third remained unoccupied. The number of admissions into hospital and the number of deaths diminished, but the number of days in which each patient remained in hospital increased. The officers and men are said to have rendered excellent service during the year, and to have cheerfully performed the arduous and responsible duties entailed on them in consequence of the disturbed state of the frontier.

CRIMINAL JUSTICE.

During the year under review the question of entrusting a larger share in the administration of criminal justice to benches of Honorary Magistrates came before the Lieutenant-Governor, and although the resolution containing Sir Steuart Bayley's orders on the subject was not published until the 28th August, that is, until the second half of the year, the results showed that effect was

already being given to the policy laid down by His Honour. Outside Calcutta the number of benches increased from 196 to 202, of which 77 as against 68 were independent, and the number of cases disposed of by them increased from 33,353 to 37,139. The number of Honorary Magistrates also increased from 1,647 to 1,673, and on the whole District Magistrates have reported favourably regarding their attendance and the work done by them. In Calcutta for the first time in 1888, and to a very much larger extent in 1889, unpaid Presidency Magistrates dealt with criminal business, sitting singly, and afforded considerable relief both to the regular magistracy and to the benches.

In its *Criminal Jurisdiction* 125 persons came under trial before the *High Court*, the average of the preceding five years being 147·6, and of these 87 were convicted, 26 were discharged or acquitted, the cases of 11 remained pending, and one prisoner died. The percentage of convictions to the total of convictions and acquittals was 77, a higher figure than in any of the preceding five years. In its *Appellate Jurisdiction* the Court dealt with the cases of 3,504 persons, in 1,239 of which the appeals or applications were rejected, while the sentences were confirmed in 873 cases, modified in 298, reversed in 832, and enhanced in 3 cases. A comparison with the figures of the preceding ten years shows that both the number of such cases which come before the Court and the percentage of cases in which the sentence is reversed have been increasing during that period, and that both attained their maximum during the year under review.

In *Courts of Session* the total number of persons under trial was 3,558 as compared with 3,454 in the previous year. The results of these trials have already been commented on under Police. There was no change in the system of trial by jury, and of the 286 cases which were tried in the five districts in which it is in force, 14 were referred to the High Court with the result that the verdict of the jury was modified in 1 case, reversed in 5, and upheld in 7 cases. There were 11,764 appeals as compared with 10,415 in 1888, and in 7,874 cases the appeal was rejected or the sentence confirmed, while it was modified in 1,267 and reversed in 2,034 cases.

In the *Courts of Magistrates* (inclusive of Presidency Magistrates) 250,103 persons were under trial, of whom 161,859 were convicted and 77,529 were discharged or acquitted. The percentage of convictions to the total of convictions and acquittals was 67·6, the lowest percentage in the previous ten years having been 67 and the highest 68·9. In the criminal courts of the *Sonthal Pergunnahs* 6,966 persons were under trial, of whom 3,670 were convicted and 2,986 were either discharged or acquitted.

One hundred and sixteen juveniles were sentenced to detention in a *Reformatory School* during the year as against 73 in 1888. The number of *whippings*, which had been falling for some years, increased from 953 to 1,350. The number of *witnesses* who attended the different courts was 449,740, against 429,465 in the preceding year, and of these, 436,778 were examined by Magistrates, 12,612 by Courts of Session, and 350 by the High Court.

There were 255 *European British subjects* brought to trial in the criminal courts, the average of the three preceding years being 228. Exactly three-fourths of these were in Chittagong, Darjeeling, the 24 Pergunnahs, and Howrah, and 72 per cent. of them were charged with breaches of special and local laws. Of the others, 12 were charged with theft, 10 with mischief, 7 with offences affecting life, and the remainder with minor offences under the Penal Code.

PRISONS.

The number of direct admissions was 33,542, which is the highest that has been recorded since 1879, and the daily average number of convicts rose from 12,378 in 1888 to 13,591 in 1889. The daily average number fell rapidly for some years previous to 1883, and advantage was taken of this decrease to effect a considerable saving by reducing 14 district jails to the status of intermediate jails, it being expected that provision would have to be made for only 11,000 prisoners. From 1883, however, the diminution (if allowance be made for the Jubilee releases) has been less marked, and has been nearly counteracted by the number of long-term prisoners received from Burmah, so that in 1889 the number was only 120 less than in 1883. It is probable, however, that but for the scarcity which prevailed in 1889, especially in the Patna Division, the number would have been considerably less. At the same time, in spite of this large number and of the available accommodation being reduced by a larger cubic space being allowed to each prisoner, there was ample accommodation for all the prisoners if they had been distributed over the different jails according to their capacity; and as it was, although there was some excess in a few of the jails where the extra prisoners were made to sleep in worksheds and other temporary structures, it was only in the Maldah and Palamow intermediate jails that there was any real overcrowding, and measures have now been taken to increase the sleeping accommodation at these two jails.

There was a considerable increase (from 2,143 to 2,434) in the number of prisoners sentenced to simple imprisonment, and the number of female convicts rose from 1,218 to 1,503. The question of identifying previous convicts still continues to present the same difficulty, and in spite of the care with which the rules were worked, the number of reconvicted prisoners fell from 3,612 to 3,561. It is now proposed that experiments should be made in the system of anthropometry which has recently proved so successful in Paris. The number of convicts who escaped was eleven, the smallest number on record, and seven of these, in addition to four who had escaped in previous years, were recaptured. This is very satisfactory, and corroborates what is said of the warder-guard, that there was a general improvement in their efficiency as well as in their appearance. The total number of under-trial prisoners increased from 28,154 in 1888 to 30,219 in 1889, and the daily average number from 1,255 to 1,379. Of these prisoners eleven escaped, six of whom remained at large at the close of the year.

As regards *prison discipline*, there was, in spite of the increase in the daily average population of the jails, a decrease in the number of offences committed from 29,064 in 1888 to 25,107 in 1889, the percentage to daily population falling from 234.8 to 184.8. The decrease occurred under every head of breach of jail discipline. The *expenditure* on jail buildings was Rs. 2,37,214, against Rs. 2,40,244 in the previous year, and with this sum additions and improvements were made to existing jails, and six new subsidiary jails and one new intermediate jail were constructed. Exclusive of this, the expenditure rose from Rs. 10,68,161 to Rs. 11,91,149, the increase being chiefly in dieting charges, which increased from Rs. 2,95,680 to Rs. 3,89,300, and being due partly to the larger daily average population and partly to the high prices paid for food-grains. The average cost per prisoner amounted to Rs. 79-4-5, against Rs. 77-12-8 in 1888. There is little to remark in the management of *Subsidiary Jails* beyond that fourteen prisoners escaped, of whom eight were recaptured,

and that the average cost per prisoner in these jails rose from Rs. 121-6-7 in 1888 to Rs. 122-5-6 in 1889, the increase being chiefly due to the high prices paid for articles of food.

The *death-rate* was 45·8 per mille as against 45 in 1888, and the absence of any improvement is attributed to the fact that the health of the prisoners admitted during the year had been greatly affected by the unusually high prices of rice and other food-grains.

The *Alipore Reformatory* opened in 1889 with 106 and closed with 108 boys. Twenty-eight were admitted during the year, while 22 were released, 2 died, and 2 escaped. There were no serious offences, and discipline was maintained with a smaller number of punishments than in 1888. The year was exceptionally healthy, and admissions to hospital fell from 2·43 to 1·70. Of 74 released boys, concerning whom reports were received, it appeared that 7, or 9·45 per cent., were in jail, 5 did not bear a good character, 1 was dead; and the remaining 61 boys, of whom only 2 followed the trades they had learned at school, were believed to be honest. In the manufactory printing was introduced with excellent effect, and yielded a profit of Rs. 1,086, and the net profits rose from Rs. 7,023 to Rs. 7,314, but these figures do not take account of the cost of the labour or of wear and tear of block. In the *Hazaribagh Reformatory* the number of boys confined rose from 223 to 267. The health of the school showed no improvement, although there were only two deaths, against five in the previous year, and the daily average of sick rose from 6·67 to 6·68. There was a slight decrease of all offences except stealing, which increased from 87 to 89. "Whippings" and "hand canings" increased in proportion to the population; but punishments by "fines and forfeiture of marks" decreased from 203 to 110. Reports were received regarding 115 boys, of which 75 were favourable, in 17 cases it was not known what had become of the boys, 5 boys had been reconvicted and sent to jail, 3 were looked upon with suspicion, 11 continued to work at the trades they had learned at school, and 4 had died. The manufacturing account shows a falling off, but the school is said to be in a better position in regard to its manufactures, as, in addition to carpentry and iron and tin work, the new industries of shoe-making, leather-tanning, and carpet-weaving have been started on a satisfactory basis.

CIVIL JUSTICE.

Inclusive of 448 cases pending from the previous year, there were 976 cases on the *Original Side of the High Court* for disposal, the average of the preceding three years being 960, and of the three years before that 1,312. The number disposed of was 401, against an average of 511 in the three years ending 1888, and of 616 in the three years ending 1885. The number of cases pending at the close of the year was 575, the averages of the two preceding triennial periods being 449 and 697. On the *Appellate Side* the High Court sat for 228 days and disposed of 4,636 appeals and applications, leaving 3,654 pending; the average figures of the preceding five years being 247 days, 5,991 cases disposed of, and 3,189 cases pending.

The number of original civil suits instituted in *Courts in the Interior* was 457,021, the number received on remand or review was 9,741, and the number determined was 461,298, leaving 83,239 pending. The number instituted is

greater than that in any previous year except 1887. There has, indeed, been a gradual and progressive increase with only very rare fluctuations during the last twenty years, and the returns of 1874 and 1881 alone showed any deviation from this progressive increase until 1887, and the smaller numbers of these two years only indicated temporary fluctuations, as the returns of the following years repeated the gradual advance. Pending the decision of the general question of the increase necessary to the strength of the Subordinate Judicial Service, the three Sub-Judges and the nineteen Additional Munsiffs temporarily sanctioned in 1887 continued to be employed, and during the year under review temporary sanction was also given to a further addition to the staff of seventeen Additional Munsiffs, thus bringing the total number up to thirty-six. The number of suits instituted in the *Calcutta Court of Small Causes*, which had steadily diminished from 31,074 in 1884 to 25,097 in 1888, increased to 26,396, the increase being in suits of all values, and chiefly on account of contracts in writing and for goods sold. The amount in litigation was Rs. 22,64,325, which exceeds that in any of the preceding five years. In *Mofussil Small Cause Courts* the number of suits instituted was less than in any of the preceding five years, being only 44,982, against 45,188 in 1888 and 53,927 in 1887. The falling off was most marked in 1888, and it was then explained that it was due to the jurisdiction of these courts being narrowed by the new Provincial Small Cause Courts Act and to the tendency of the Debtors Act of 1888 to discourage litigation.

The *total receipts* of the courts in stamps and cash amounted to Rs. 86,31,451, and the charges on account of salaries, establishment and contingencies to Rs. 48,88,262, which leaves a surplus of Rs. 37,43,189.

In the *Sonthal Pergunnahs* there was an increase in the number of cases instituted and disposed of and a slight decrease in the number of cases pending. The number instituted was 16,725, against an average of 17,592 in the previous five years; the number disposed of was 16,753, and the number pending was 3,002.

As regards *litigation of Government and the Court of Wards*, there was a distinct improvement in the year 1889-90. The Government was concerned in 454 and the Court of Wards in 720 cases, against 798 and 1,111, the averages of the preceding five years; and of these, apart from cases compromised, remanded and withdrawn, Government and the Court of Wards were successful in 85·7 and 90·7 per cent. respectively, the percentages obtained by taking the total number of cases of the preceding five years being 80·6 for Government and 83·1 for the Court of Wards.

REGISTRATION.

The year 1889-90 was one of remarkable progress, the increase in the number of registrations being 110,146, the largest increase yet recorded. As in the previous year, the increase occurred for the most part under the heads of compulsory and optional registrations affecting *immoveable* property. A comparison of the triennial period ending 1889-90 with that ending 1886-87 shows, however, a falling off of 40 per cent. in the number of such optional registrations, and this is attributed to the gradual introduction of the Transfer of Property Act and to a change in classification. Perpetual leases, which had fallen off in the two preceding years, increased to 76,390, which is, however, still below the number (78,766) in 1886-87. The Inspector-General explains these fluctuations

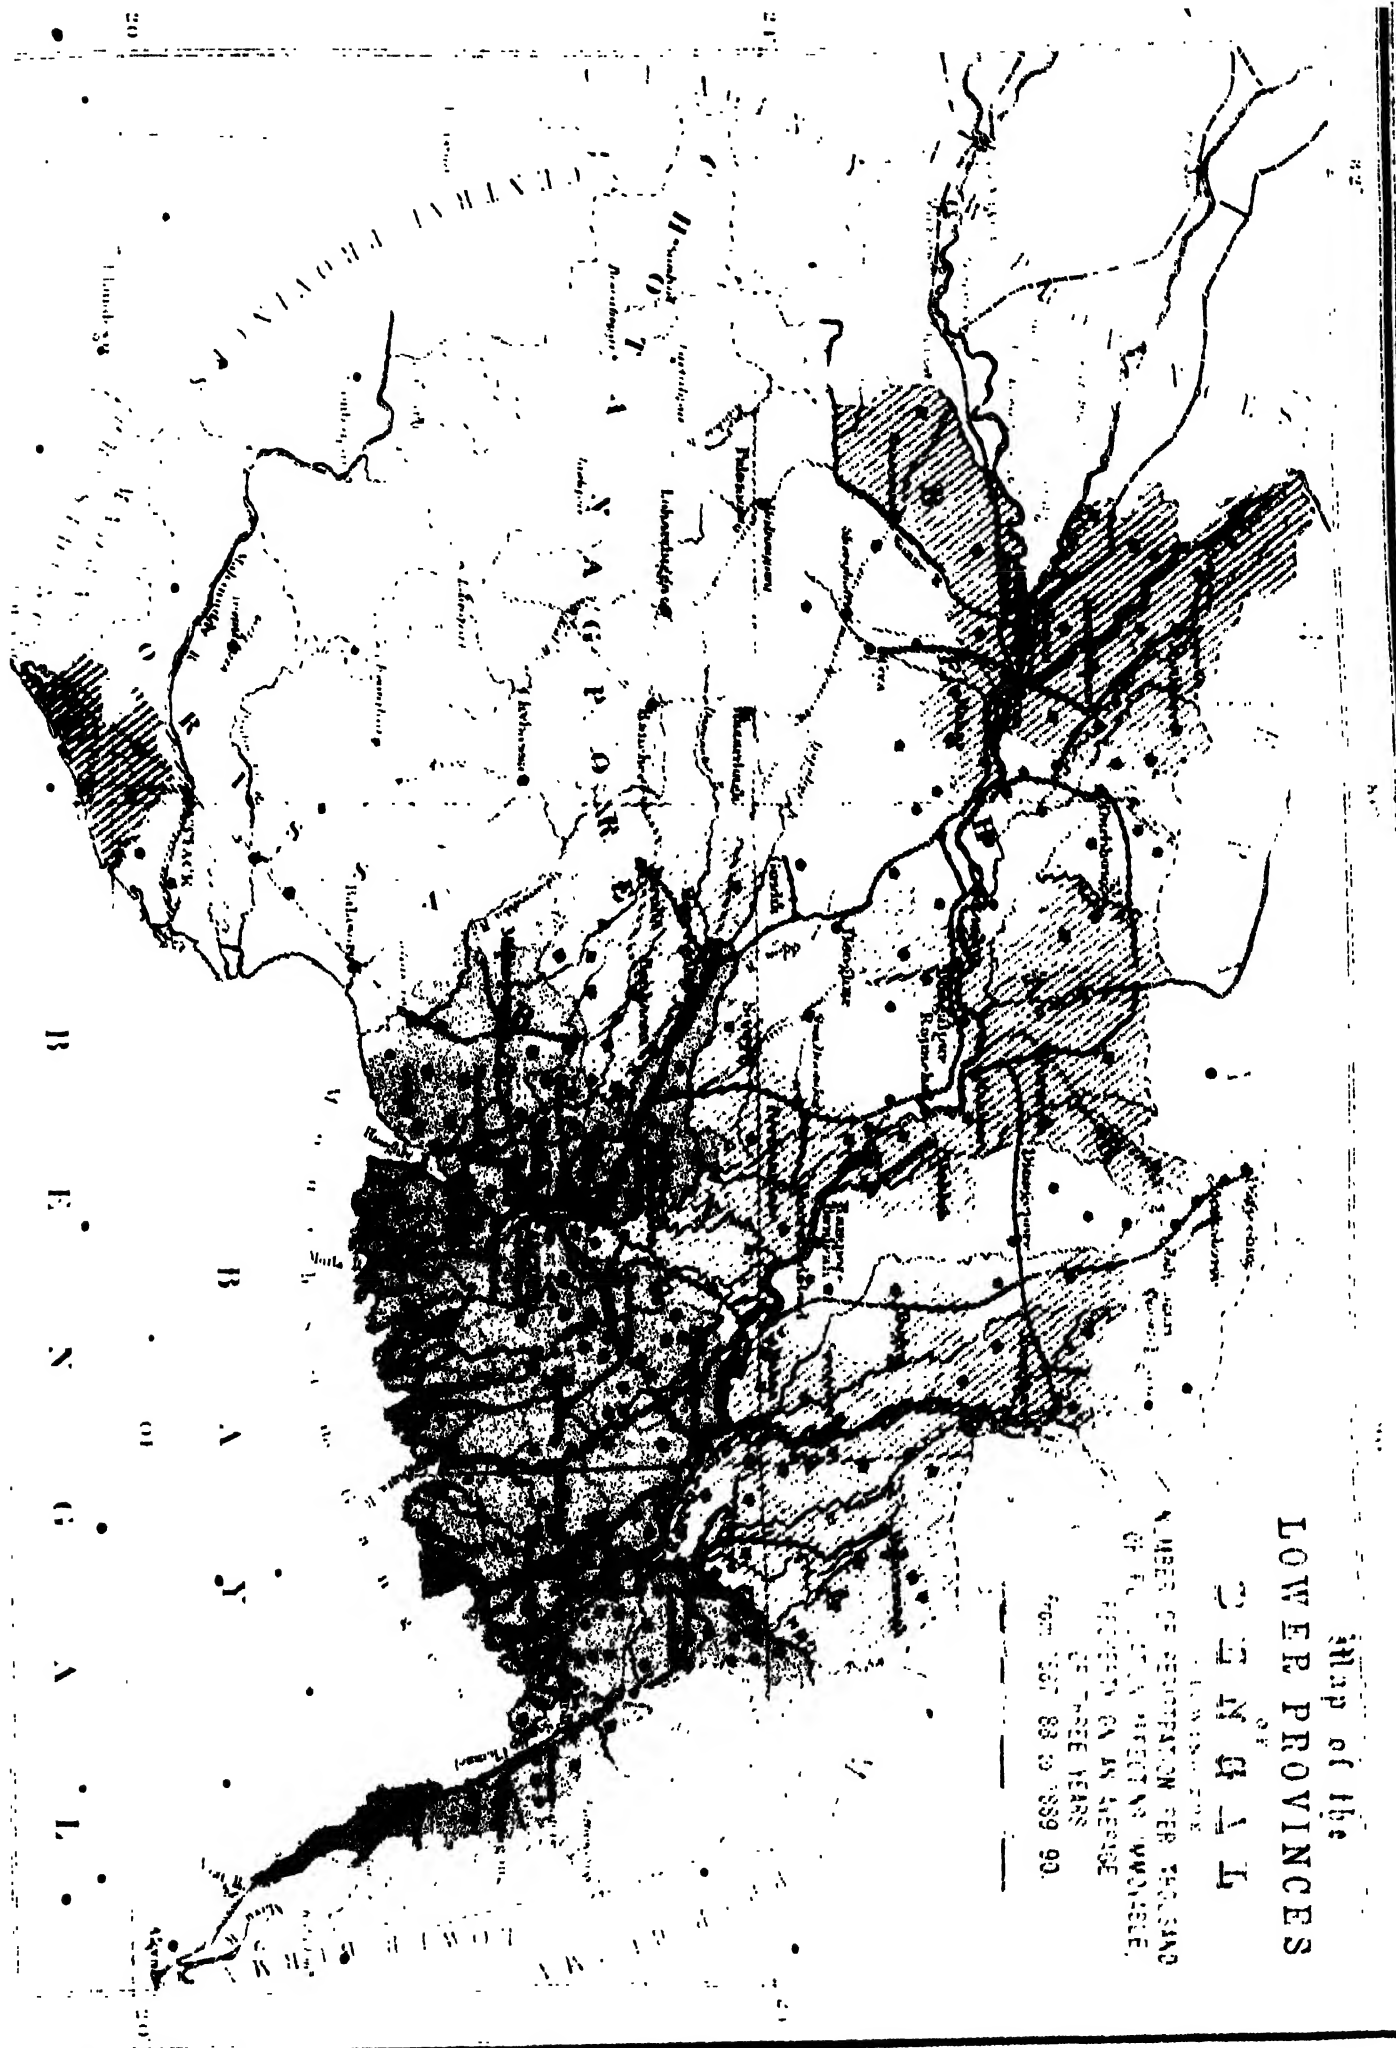

by distinguishing between leases granted by landlords to tenants and leases granted by tenants to sub-tenants, and he considers that in some districts the number of leases of the former kind which have been granted is so large that, as there is practically a limit to the number which can be granted, there is now necessarily a falling off. This view is borne out by the statistics of some of the districts. The number of instruments of *mortgage* of immoveable property increased from 144,184 in 1887-88 and 167,049 in 1888-89 to 207,562. The increase was general over the whole province. Transfers of *ryoti* holdings at fixed rates and of such holdings with rights of occupancy again showed an increase, the number being 112,715 as against 97,745. The increase is, as before, attributed to the facilities afforded by the Tenancy Act. The number of registrations under sections 12 and 18 of the Tenancy Act fell from 76,324 in 1887-88 to 47,391 in 1888-89 and 26,780 in 1889-90. This is ascribed not only to the reason assigned last year, the exclusion of deeds formerly erroneously registered, but to evasion of the Act owing to the unpopularity of the levy of landlords' fees under it. In 3,897 cases registrations were refused under section 71 of the *Indian Registration Act* as compared with 3,691 cases in the preceding year. One hundred and thirty persons were prosecuted, of whom 53 were acquitted, 63 convicted, and 14 were under trial at the end of the year.

The number of ceremonies registered under the *Mahomedan Marriage Registration Act* showed a slight falling off, being 8,215 as compared with 8,459 in 1888-89.

Twenty-one *companies* limited by shares, with an aggregate nominal capital of Rs. 84,11,000, were registered during the year. These were made up of four mills and pressing companies, two banking, one insurance, four trading, six tea, two mining, and two miscellaneous companies. Six companies also increased their capital by Rs. 3,08,400, and one company was registered under section 26 as an association not for profit. The total number of companies at the close of the year was 218 against 235, and the total receipts amounted to Rs. 8,953 and the expenditure to Rs. 636.

MUNICIPAL ADMINISTRATION AND LOCAL SELF-GOVERNMENT.

The year under review was the first after the amalgamation of the urban portion of the suburbs with the town proper, and the duties which devolved on the Commissioners of the *Calcutta Municipality* were therefore exceptionally onerous. The number of meetings, including general meetings and meetings of standing, special, and sub-committees, was no less than 282 as compared with 131 in the previous year; and 26 of the members attended 50 or more, and 7 attended over 100 of these meetings. Among the subjects under consideration were the new central road, the burning of the town refuse, the extension of the water-supply and drainage systems to the suburbs, the question of legislation for lepers, the protection of wild birds, the maintenance of a public library, the preparation of bye-laws, and the reorganization of establishments in the amalgamated area. The most important works done during the year were in connection with sanitation, drainage, and water-supply. The first section of the new central road was completed, a third pumping station was opened at Halliday Street to remedy the scarcity of water in the riparian and other wards, a survey for the drainage of the suburbs was undertaken, and a sum of Rs. 2,46,572 was expended on the

structural improvement and cleansing of bustees. Two new loans, one of 5 lakhs for water-supply, and one of 14 lakhs for water-supply and drainage, were raised during the year. The income of the Municipality during the year was Rs. 42,17,121, and the actual disbursements amounted to Rs. 41,27,831. The rate of mortality was the same as in the previous year, 26·9 per millo.

Two new *municipalities* were established during the year, and the municipalities of Assensole and the Suburbs of Calcutta were abolished, so that the total number at the close of the year was 147, as in the preceding year. The elective system was extended to the newly-formed ones, and was in force in all except 29 municipalities. The opening balance at the disposal of the municipalities was Rs. 3,46,402, the income was Rs. 26,47,502, the expenditure Rs. 26,31,468, and the balance at the close of the year was Rs. 3,62,436. On the subject of capital expenditure, the Lieutenant-Governor remarked that he was not disappointed with the manner in which municipalities had availed themselves of the more liberal policy inaugurated by Government, and he was quite sure that a very profitable use was being made of the loans already granted; but he would be glad to see the larger municipalities, especially those in Behar, more forward to appreciate the necessity of capital expenditure. On the whole, the opinion of local officers regarding the working of the municipalities was favourable, and His Honour, although he did not hesitate to indicate many important matters in regard to which there was urgent need of improvement, was at pains to make it clear that the year had been characterised by much good work and devotion to public duty.

Under the *Local Self-Government Act* there were 38 District Boards and 106 Local Boards; the area comprised within their jurisdiction was 109,391 square miles, and the total population, according to the census of 1881, was 57,185,307. The total number of members of District Boards was 797, of whom 460 were appointed by Government and 337 were elected. The elective system was in force in 58 Local Boards, and the total number of members of Local Boards was 1,203, of whom 768 were nominated by Government and 435 elected. The year under report witnessed the second general election of members of District and Local Boards which had completed their three years' term of existence, and the elections were on the whole successfully conducted. No Union Committees have yet been appointed, but a scheme for their gradual establishment has been submitted to the Government of India and is still under consideration.

The opening balance at credit of the District Boards was Rs. 18,28,843, the income amounted to Rs. 62,73,403, the expenditure to Rs. 61,72,210, and the closing balance was Rs. 19,30,006. There was a decrease in the receipts from pounds and ferries, but the decrease was in both cases more apparent than real, and was chiefly due to changes in the system of keeping accounts, to erroneous credits, &c. The Lieutenant-Governor considered that the management of ferries had not been unsatisfactory, and as regards pounds His Honour remarked that their management, in regard to which local bodies had now been vested with ample powers, was a good test of the efficiency of the executive administration of District Boards, and he therefore specially commended it to their attention. The cost of general administration increased from Rs. 2,46,732 to Rs. 2,58,533, the chief causes of which appear to be the transfer of the charges on account of the travelling allowance of members of District Boards from "Miscellaneous" to "Administration," and the increase in the percentage cost of audit and treasury establishments. The expenditure on account of education decreased from Rs. 10,30,809 to Rs. 10,04,110,

while that on public works increased from Rs. 34,65,541 to Rs. 37,32,219. In addition to the latter amount, there was an expenditure of Rs. 2,59,785 on public works under the head of Famine Relief, chiefly in the districts of Durbhunga and Mozufferpore.

The Lieutenant-Governor's opinion of the working of District Boards in Bengal was fully stated in the report for 1888-89, and the events of the year 1889-90 merely confirmed the views then expressed. Their dilatoriness in dealing with accounts and bills was remarked on by several officers, and another blemish noticeable was the occasional tendency of certain Boards towards factious criticism of, and opposition to, professional authority. But generally speaking, the Lieutenant-Governor considered that the record of the year had been a favourable one, that good work had again been done, and that all departments showed a satisfactory expansion; and His Honour expressed his opinion that it was no small tribute to the ability of the Chairmen of the Boards that they should have given effect to the policy of Local Self-Government in these provinces so efficiently and at the same time with so little friction.

MARINE.

The *Pilot Service* at the end of the year consisted of 60 pilots of all grades, the scale sanctioned in July 1888, and 17 leadsmen apprentices. No leadsmen apprentices were appointed during the year. The gross tonnage of the shipping visiting the port diminished from 4,486,301 to 4,453,767 tons, and the number of arrivals and departures from 2,671 to 2,056. The average tonnage remained the same, viz. 2,166·2 tons, but the size and draft of the steamers continued to increase, and 143 steamers drawing over 21 feet entered the port, against 120 in the preceding year. Cases of grounding and collision decreased from 50 and 12 to 39 and 5 respectively, but none of these casualties resulted in the loss of a vessel, and in only one was serious damage done. The collisions were all accidental, but in 10 of the grounding cases blame was attached to the pilot—in eight cases for want of judgment, in one case for inattention, and in one case for unskillfulness. The new pilot-brig *Fame* arrived at the beginning of the year, and the new steamer *Guide*, which has taken the place of the *Undaunted*, towards its close. A new steam-launch was also completed for the Port Officer after the close of the year.

The *short voyages* to and from Bengal ports to which the Native Passenger Ships Act of 1887 applies, are those between Calcutta and Chittagong, Burma, the Andamans, and the Orissa Ports, and between Chittagong and Burma. The most important of these are the Chandbally lines on account of the large number of pilgrims who go to and from Pooree. A feature of the trade is that the steamers nearly always leave Calcutta on Wednesday, that day being preferred by the Hindoo passengers. Next in importance is the Burma trade, and then come the trade between Chittagong and Burma and that between Chittagong and Calcutta. The traffic with the other ports is comparatively insignificant. The working of the Act as regards these voyages is said to be unsatisfactory on account of the overcrowding which may take place without exceeding the limits prescribed by the Act. The *long voyage* passenger traffic is practically confined to the conveyance of pilgrims to ports in the Red Sea. Two steamers conveying 778 passengers left Calcutta, and one of these occasioned much suffering to the pilgrims by failing to arrive in time for the Haj.

The number of *European seamen* who arrived in the port of Calcutta decreased from 22,705 to 20,662. The death-rate was 31·36 per mille as compared with 36·6, the mean of the preceding three years. The total number of casualties was 51 against 57, and of these 43 occurred in hospital.

The receipts of the *Calcutta Shipping Office* amounted to Rs. 29,157, and were higher than those of any of the previous nine years. The funds held in trust for European and native seamen increased from Rs. 47,736 to Rs. 60,018, the increase on account of European seamen being Rs. 7,892, and being due to the practice adopted by the Shipping Office during certain months when the number of unemployed seamen is large, of requiring each seaman at the time of his discharge to deposit a portion of his wages as security against his falling into distress. The number of desertions rose from 132 to 252, an increase attributed to the higher wages prevailing in the latter part of the year, which induced men to desert in order to re-engage on higher wages. The practice of inducing the seamen to sign agreements stipulating that in the event of their being discharged abroad their wages should be paid at a fixed rate of exchange, has now been stopped by a recent statute which requires that, notwithstanding anything entered in the agreement, the men's wages shall be paid at the current rate of exchange. To this change in the law is attributed the increase from £395 to £926 in the amounts remitted home by seamen's money-orders. Great care, it is said, is now taken by the authorities of the Shipping Office to protect seamen from imposition, and in four cases the masters of vessels were made to pay back money improperly obtained from those "serving under them."

Apart from the advances on account of the *Kidderpore Docks*, the gross debt of the *Calcutta Port Commissioners* on the 31st March 1890 amounted to Rs. 1,20,36,401. The debt due to Government was reduced by Rs. 1,29,534, and a sum of Rs. 1,21,000 was set aside for the repayment of the debenture loans. At the close of the year the advances from Government on account of the *Kidderpore Docks* amounted to Rs. 1,73,39,038, and the expenditure to Rs. 1,70,65,321. The revised estimate of the cost of the works is Rs. 2,64,01,605. Under Revenue Account the receipts amounted to Rs. 26,82,730, the expenditure to Rs. 25,90,391, and the closing balance to Rs. 3,78,647. The capital expenditure amounted to Rs. 1,83,302. The receipts from jetties showed an increase, which was, however, entirely due to the petroleum wharf. The receipts from the Tea House amounted to only Rs. 76,455, of which Rs. 17,542 was realised by letting out the ground floor for storing piece-goods and grain. There was a decrease of Rs. 30,521 in the net revenue derived from the tramways. There were nine accidents to vessels in charge of Assistant Harbour Masters, for seven of which the officers concerned were more or less to blame, but none of the accidents caused very serious damage. The Calcutta Port Act consolidating the previous Acts came into force on the 1st June 1890. Under it the Commission is composed of a Chairman, Vice-Chairman, and five Commissioners who are appointed by the Government, five Commissioners elected by the Bengal Chamber of Commerce, one by the Calcutta Trades' Association, one by the Commissioners of the Town of Calcutta, and one by such body as the Government may select as best representing the interests of the native mercantile community—the body at present selected being the Bengal National Chamber of Commerce.

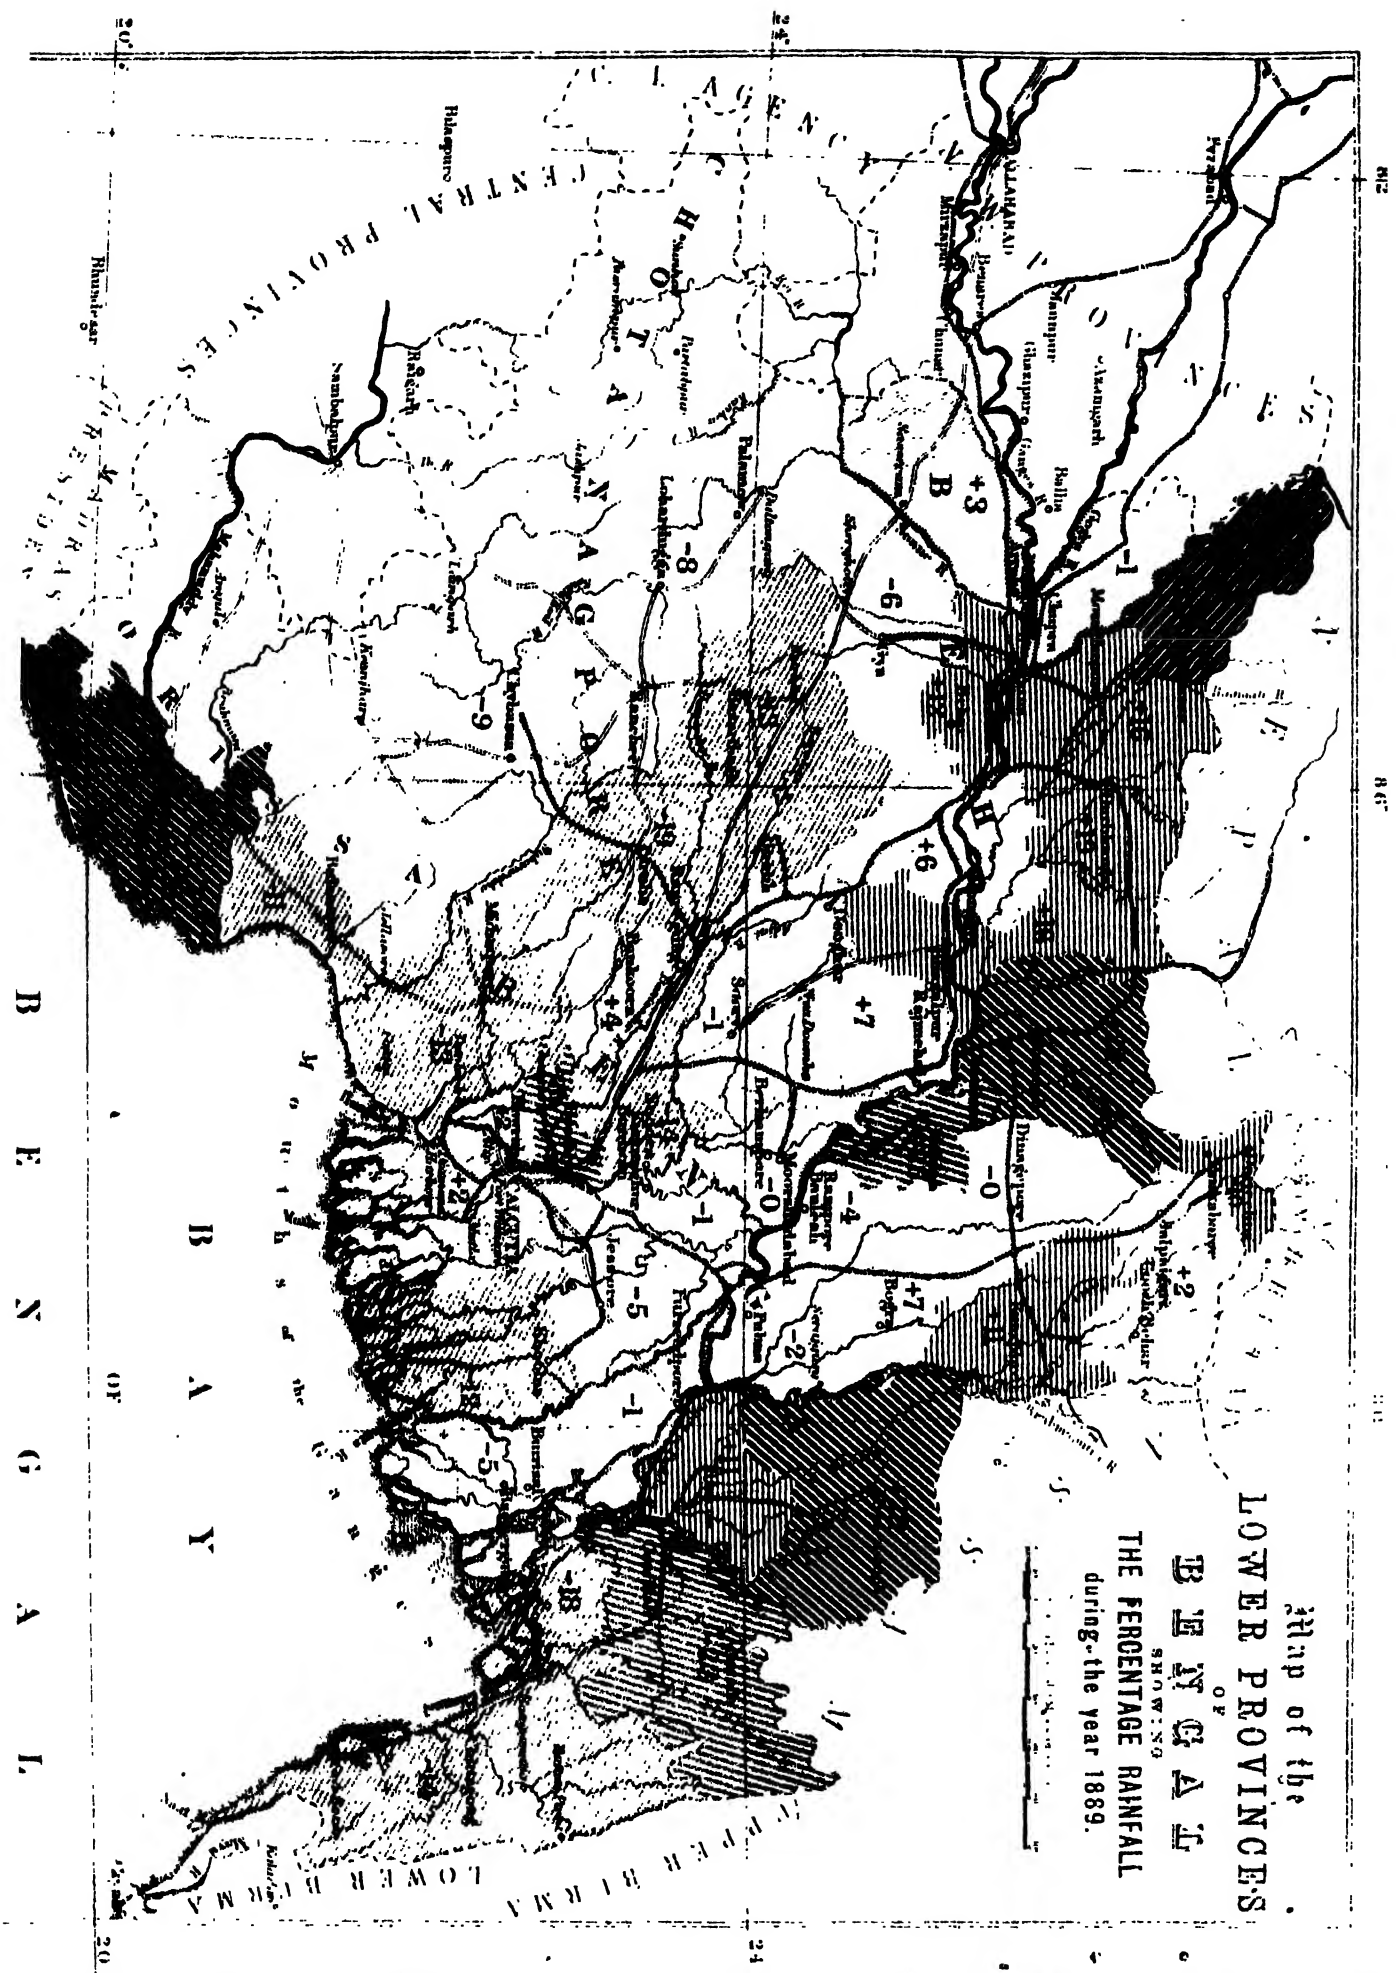

The management of the *Port and Port Fund of Chittagong* was made over to the Commissioners with effect from the 1st April 1889, and the management of the Pilot Service, with a contribution of Rs. 1,000, was also transferred

to them during the year. The number of arrivals and departures of foreign trading vessels decreased by 11, but their tonnage rose from 117,192 to 121,565. The decrease in number is attributed to the decline in the grain trade, while the increase in tonnage is due to the employment of larger vessels in the jute trade. The number of vessels trading with Indian ports increased by 17 per cent., and their total tonnage by 7·8 per cent. The grain trade fell off again during the year, but this was more than counterbalanced by the great improvement in the jute trade. The receipts of the *Chittagong Shipping Office* increased from Rs. 289 to Rs. 537, which was due to casualties to ships necessitating the discharge of their crews. The receipts of the Port Fund amounted to Rs. 56,218, the charges to Rs. 33,979, and the closing balance to Rs. 90,197. The Pilotage Fund opened with a debit balance of Rs. 2,938, the receipts amounted to Rs. 12,137, and the charges to Rs. 14,170, and the deficit at the close of the year was Rs. 4,970.

There was no change in the number of arrivals and departures of vessels at the three *Orissa ports*, but their tonnage increased from 296,250 to 345,006, but the port dues fell from Rs. 8,290 to Rs. 8,118 owing to the levy of the dues once in 60 days, in accordance with the provisions of the Indian Ports Act, 1889, instead of once in 30 days as before. The value of the trade increased from Rs. 1,13,28,885 to Rs. 1,21,38,631. There was, however, an actual falling off in the trade and shipping of Balasore, which is by much the most important of the three; but this was more than made up for by the very rapid development of trade at the other two ports, and more especially at False Point.

METEOROLOGY.

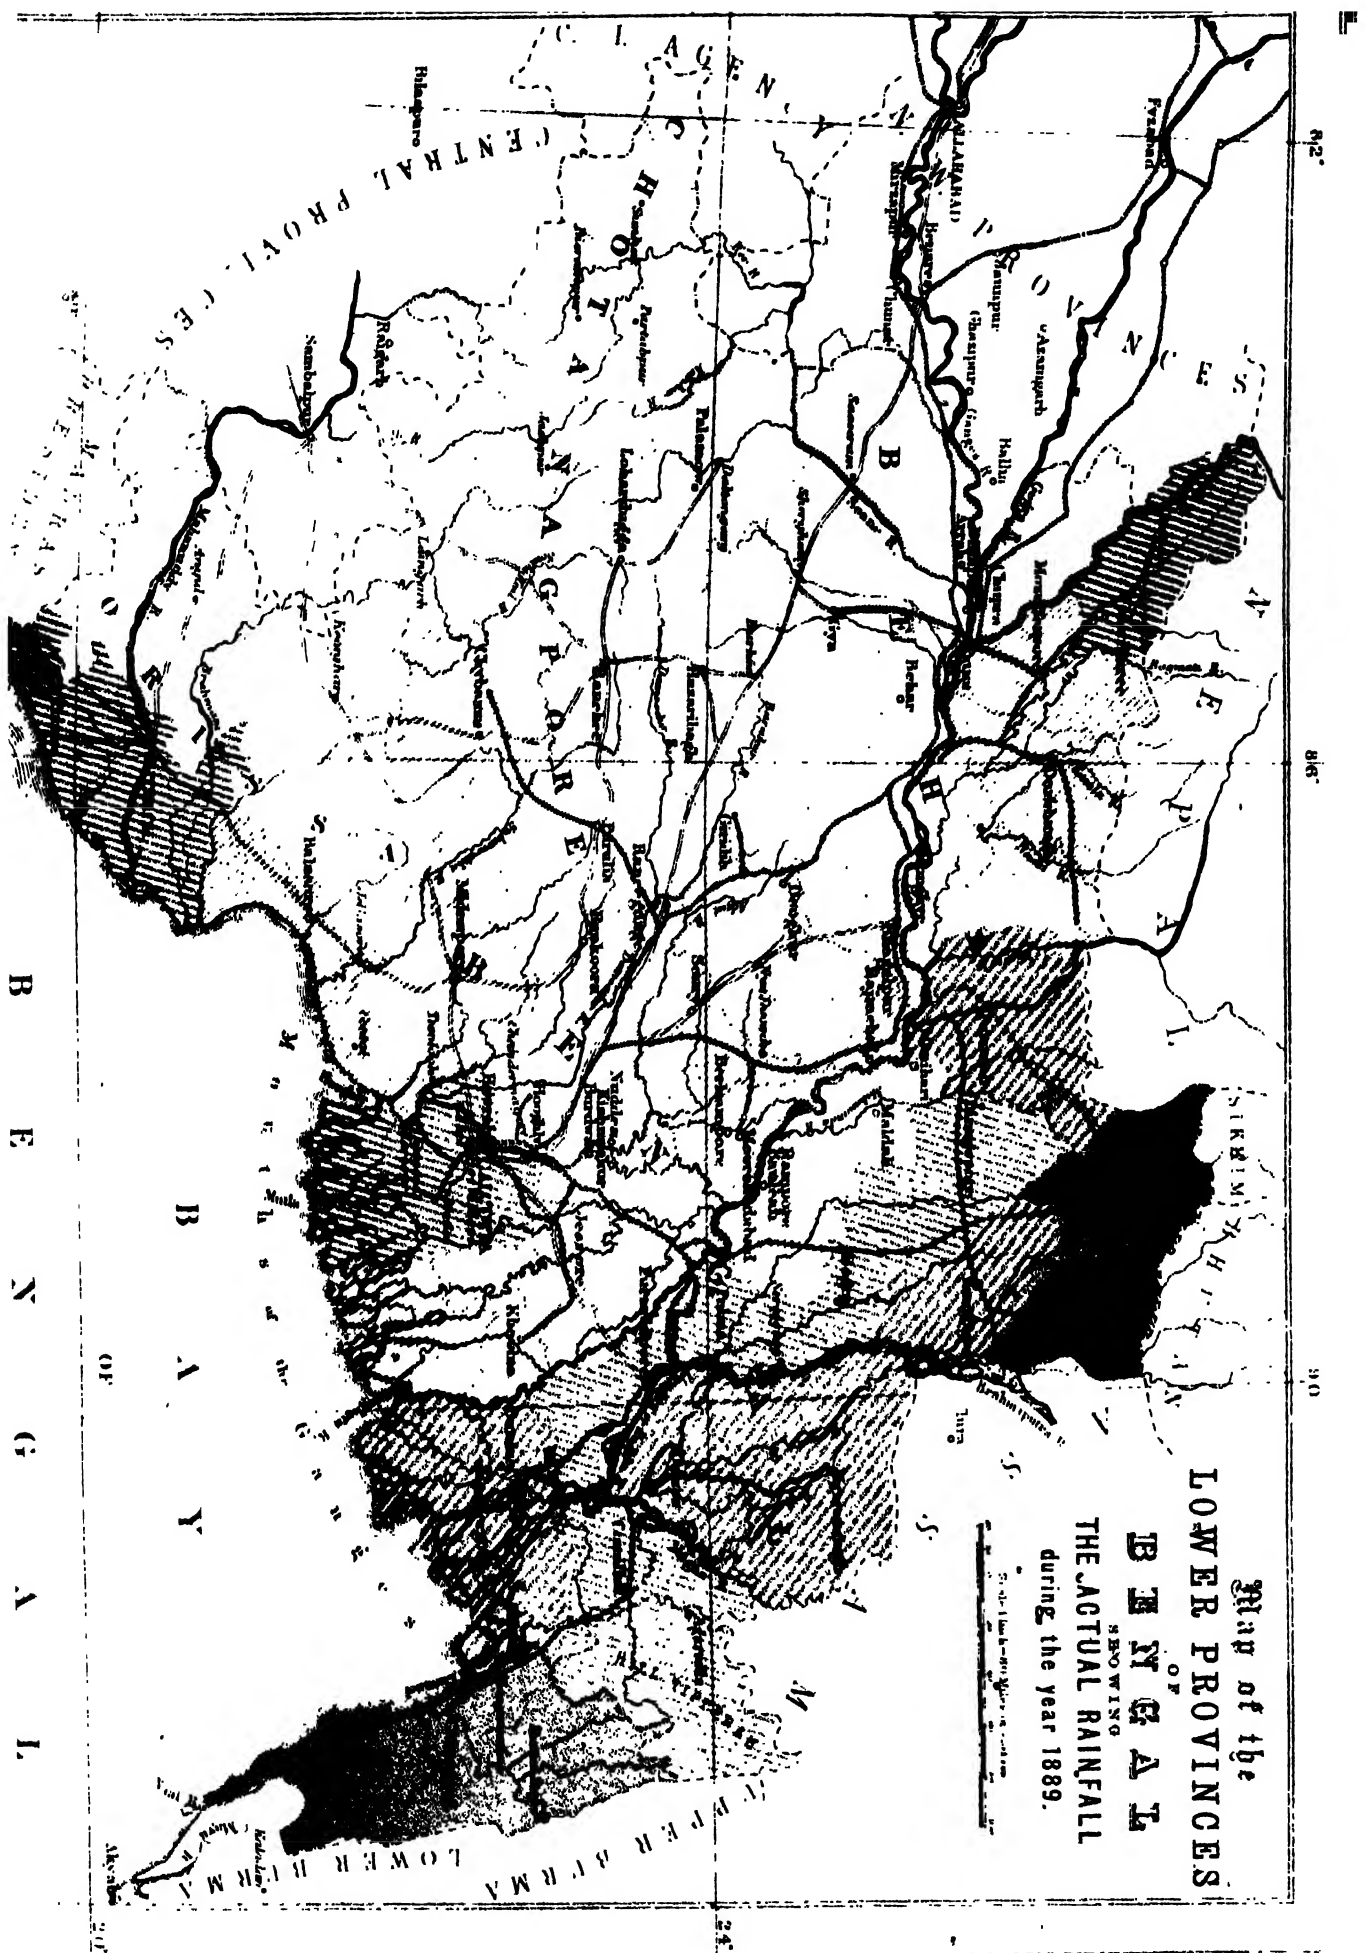

The work of the Meteorological Department largely consists in recording facts which in the present state of knowledge are isolated, and the chief questions which are interesting to the ordinary reader are the practical ones of the rainfall and the storm signal service. The rainfall of the year was not on the whole deficient, but it was very badly distributed throughout the year, and, as is related more fully under the head of Famine and Flood Relief, the deficient rainfall in the first part of the year and its excess in the second each did great damage, so much so as in some cases to compel Government to take active measures for the relief of the people, while in many others it greatly reduced the outturn of the crops; and, as the bad harvests of the previous year had necessarily been followed by a depletion of stocks, this raised the prices of food-grains to an unusual height, and consequently filled the jails and hospitals. In January and February the north winds were not so regular as in average years, but were varied by southerly and easterly winds, the sky was cloudy, and there was heavy rainfall accompanied by the usual atmospheric depressions. During these two and the next three months the temperature was several degrees above normal, and about the end of the first week in March the hot winds set in and continued throughout the hot season with a velocity considerably above the average, scorching up the opium and other crops, while the "nor'-westers," which alone bring rain at this season, were comparatively rare; and consequently the rainfall in the months of March, April, and May was everywhere extremely deficient, being in Orissa only 18, 26, and 75 per cent. respectively and in North Behar 23, 40, and 43 per cent. of that which usually falls. The first advance of the monsoon current was brought by a feeble cyclonic whirl which crossed the Orissa coast

REFERENCES.

Districts in which the Rainfall recorded in excess of the normal was more than—

about the 10th or 11th of June, and as it had advanced up the Bay at an unusually rapid rate, it brought the rains to the different parts of Bengal from three to five days earlier than usual. The rainfall in June was consequently above average in each of the meteorological divisions of Bengal, being comparatively greatest in North Behar, where it reached 72 per cent. above normal; the actual rainfall being 15 inches, against a normal fall of 8·73 inches. In July the rainfall was less than usual in every division except in North Bengal and North Behar; but in the latter place it was again excessive, being 3·72 inches, or 30 per cent. above normal, and occasioned severe floods and damage, an account of which is given in a subsequent chapter. In August, except in Orissa, where there was an excess of 1·86 inches, the rainfall was everywhere deficient, though not greatly so; but in September there was again an excess in North Bengal and in Behar, although elsewhere it was in that month deficient and fell in Orissa to little more than half the usual amount. In October there was abundant rain in Orissa, South-Western Bengal and Eastern Bengal, but elsewhere it was deficient, and in North Behar amounted to only ·28 inch, against the normal fall 3·58 inches. In the second week of November a cyclonic storm formed in the middle of the Bay and advanced to the Orissa coast, which it struck on the 20th, forcing a wave of moist wind over the southern part of Bengal, and occasioning an unusual fall of rain which was actually heavy in Orissa, South-West and East Bengal, and comparatively so elsewhere. In December there were no cold-weather storms in these provinces, and the rainfall was below the normal everywhere. In this month two cyclonic storms occurred in the south of the Bay, the first of which was of the usual character, forming in the south and advancing in a westerly direction across the extreme south of the peninsula; but the second was a most unusual storm, inasmuch as it occurred later in the year than any cyclonic storm has hitherto done. This latter storm was severe, and drifted in a north-westerly direction towards the North Madras coast.

The method of work introduced in 1889 was maintained, and as the changes and improvements then carried out were very thorough, the work of the department went on smoothly throughout the year 1889-90, and no change of any sort was required.

The *storm signal service* was maintained in a state of high efficiency, as was shown by the accuracy with which the movement of storms was followed in the Bay of Bengal. Storm signals were hoisted seven times on the Bengal and Orissa coasts. With a view to obtaining daily meteorological observations from the pilot brigs cruising at the Sandheads, a special code was devised by means of which the observations taken in the brigs could be reported by a single hoist of four flags in passing Saugor Island Lighthouse. In this connection it may be mentioned that on the representation of the Madras port authorities the Calcutta Meteorological Office now gives daily information of the weather in the Bay to the Port Officer of Madras.

ECONOMIC CONDITION OF THE PEOPLE, AND PRICES.

The crops were on the whole fairly good, though somewhat below average, but the rainfall was unevenly distributed throughout the year, and in some places they were much damaged by floods and drought. In the Chittagong and Chota Nagpore Divisions and in the Backergunge and Mymensingh districts of the

Dacca Division the rice crops were on the whole decidedly good, and the people benefited greatly by the high prices; in the Bhagulpore Division they are said to have been average, and in the Burdwan and Rajshahye Divisions somewhat below average; and in the Presidency Division, although the outturn was on the whole slightly better than in the previous year, yet the rainfall was badly distributed in every district, and there was some pressure in the Diamond Harbour, Lalbagh, and Jungipore subdivisions, and signs of scarcity were visible in the subdivisions of Magurah and Bongong. It was, however, only in the Patna and Orissa Divisions that matters became really serious. The measures for relief which it was found necessary to take in the Patna Division and in the Tributary Mehals of Orissa are detailed elsewhere, and here it is sufficient to remark that the condition of the people in the three districts of the Orissa Division was the reverse of prosperous, and that in Balasore, owing to deficiency in the rainfall, two-thirds of the crop perished in a tract of some 300 square miles, and it was only the unseasonable rainfall of October and November which averted a water famine. There were also, it may be remarked, floods in Moorshedabad, Purneah, Nuddea, Pubna, Bogra, and Bhagulpore, those in the three first districts being of considerable extent.

The condition of the agricultural classes as a whole was satisfactory, as appears not only from the reports of the local officers, but also from the decisive fact that the collections of cess, rent and revenue greatly improved; and it is certain that this prosperity must have been shared by the vast majority of them, for if any considerable portion had been very badly off, the prosperity of the others would not have enabled them to pay up, and collections would have suffered. From a perusal of the various divisional reports it would appear that the general impression was that the crops were on the whole better than those of the previous year, and that the high prices were due to the depletion of stocks consequent on the bad harvest of the previous year. Whether, however, the high prices were due to the bad harvest of the previous year or to the harvest of the year itself having been worse than was generally supposed, it is evident that all the hardship resulting therefrom was borne by the non-agricultural classes, and that the agricultural classes actually benefited. This is of course explicable by the well-known fact that a comparatively small diminution in the supply of a necessary of life may cause a very disproportionate rise in the price. The net decrease in rice exported by sea from Bengal was 4,25,050 maunds and of paddy 7,214 maunds; from Assam the imports of rice fell off from 5,55,954 to 2,45,121 maunds, but, on the other hand, the imports of paddy increased from 7,35,461 to 20,22,894 maunds; the exports of rice from Bengal by rail showed a net decrease of 6,93,941 maunds; and the net imports of rice from Nepal increased by 3,17,029, and those of paddy by 3,52,464 maunds. If paddy be taken at the usual estimate of one maund to 25 seers of rice, this gives a net decrease in exports of 21,54,931 maunds of rice, a quantity sufficient to feed a city of 300,000 persons for one year at the rate of $1\frac{1}{2}$ seers a day to each person. Still, large as this quantity is, it would not suffice to feed the whole population of Bengal at the same rate for a couple of days, and the effect of even so large a decrease in the net exports would therefore be slight compared with a serious diminution in the stocks of food held throughout the province. It is evident, therefore, that the view that the harvest was really better than in the preceding year, and that the high prices were caused by a depletion of stocks, is not irreconcilable with the fact that there was a large decrease in the net exports of rice.

FAMINE AND FLOOD RELIEF.

At the close of the year 1888-89 the condition in the three districts of North Behar which adjoin Nepal—Chumparun, Mozufferpore, and Durbhunga—was such as to cause grave anxiety. In the two critical months of September and October in that year the average rainfall in those three districts was only 5.44 inches, and this, although nearly two inches greater than the amount which fell in the corresponding months of 1873, the last year of scarcity, is yet less than half the normal amount. This deficiency of rainfall extended to the whole of Behar and affected the crops throughout the Division; but the only tract as to which real anxiety was felt was a strip of land over a thousand square miles in area which extended for about 90 miles along the Nepal frontier from Chumparun through Mozufferpore and Durbhunga into Bhagulpore, and in this tract even as early as January relief operations had commenced. The outturn of the harvest which followed did not fulfil expectations. The yield of opium and mangoes was deficient, while there was a marked deficiency in the *rabi* harvest of the province generally, and prices, both wholesale and retail, rose everywhere. In Chumparun and Mozufferpore the subsidiary crop of *cheena* failed entirely. The first part of May was marked by intense heat and drought, and in spite of a small quantity of rain which opportunely fell in the second part, the distress deepened as the season advanced, and the number of labourers employed on relief works increased to 45,966. It now became obvious that it would be necessary to provide employment, though on a reduced scale, throughout the rains and until the autumn crop was reaped, and Sir Stuart Bayley accordingly authorized the commencement of earthwork for the construction of a railway from Durbhunga to Sitamarhi, a survey of which had been completed, although the project was not yet sanctioned.

In the latter half of June and the first week of July rain fell abundantly and was nowhere deficient, but already in Chumparun some damage was caused by superabundance of rain; and although a break occurred in the second half of the month, it became evident towards its close that the damage caused by the long drought would be succeeded by damage of an opposite nature, and that there was little probability of escaping severe injury from floods. The tract on the borders of Nepal described above as chiefly affected by the drought, being high up, suffered little, and in Durbhunga the floods subsided rapidly; but Chumparun and Mozufferpore did not escape so easily, although much of the land was replanted when the floods subsided. Those two districts form a tract of country lying from north-west to south-east, which is bounded on the south-west by the Gunduk, while down the middle, passing near the sudder stations of both districts, flows the Bor Gunduk, a short distance north-east of which, and for a considerable distance parallel to it, flows the Bhagmati. The subdivision of Bettiah, which comprises the upper portion of Chumparun, was flooded by the Bor Gunduk and its tributaries, while in the south-west the Gunduk overflowed its banks; and in Central Mozufferpore the waters of the Bor Gunduk and the Bhagmati uniting washed away the entire crops from a tract of land about 27 miles in length and varying from one to three miles in breadth. On its northern bank also the Bhagmati cleared an area of 38 square miles, but the water drained off rapidly and much replanting was quickly effected, so that comparatively little damage was done. In Chumparun the Officiating Collector estimated that the crops had been

destroyed or extensively injured over a large tract, equivalent in the aggregate to their total destruction over an area of 117 square miles. So serious was the matter deemed that His Honour the Lieutenant-Governor twice visited the affected area—once in July and August and again in September; and it was not until the end of October that the last relief centres were closed, and the Commissioner reported that distress had disappeared everywhere and that prospects were good. Her Majesty's Secretary of State in referring to the measures taken commended the local officials, who, with the cordial assistance of the zemindars and planters, had enabled the people, by their promptitude and determination in dealing with the cases, to pass through an anxious time without loss of life or avoidable suffering.

There was scarcity also in the Tributary Mehals of Orissa, which include the Government estates of Angul and the Khondmals. These mehals, 19 in number, form a rough tract, chiefly composed of hills and jungle, between Orissa and Chota Nagpore, and have an area of about 16,066 square miles, or half that of Ireland, and a population of 1,630,004 souls. The land is for the most part owned and cultivated by Hindus; but in addition to these there are the Pariahs (*pahariah*, hillman), consisting of various aboriginal tribes and semi-Hinduized castes, such as the Khonds, Savars, Sonthals, &c., the descendants of the forest races by whom the uplands of Orissa were inhabited before the Aryan conquest, who comprise about one-fourth of the population of Orissa and of the Tributary Mehals. These, like the hill tribes on our frontier, were largely dependent on forest produce and on liberty to clear and cultivate the jungle; but the regulations of the Forest Department, and regulations introduced in imitation of them by the Tributary Chiefs, restricted the use of this resource. In the year 1888 the harvest was deficient, and the long drought which affected some parts of the mehals from October in that year to the following June, not only largely enhanced the prices of food-grains, but by preventing agricultural operations deprived many of employment. Their condition was also aggravated by the fact that cholera, perhaps connected in its progress with scarcity, and the use of bad food, interfered with trade and led to a rapid depletion of food-stocks, and that in some cases also the cultivators sold their grain, believing that they would subsequently be able to purchase more cheaply, which they were unable to do. At first the Superintendent of the Tributary Mehals did not fully realize the gravity of the situation, but subsequently vigorous measures were taken—the forest rules were suspended, relief-works were opened, gratuitous relief was given, and advances were made to such of the Rajas as required them. There was a break in the rains in the last fortnight of September which gave rise to some apprehension; but continuous rain fell during the first week of October and relief measures were then gradually stopped, and by the end of that month all cause for anxiety had ceased. As His Honour was detained in Behar himself and was unable to visit Orissa personally, he deputed for that purpose Sir John Edgar, K.C.I.E., who proceeded to Orissa and passed orders on the spot.

In Balasore, Midnapore, and Moorshedabad also there was slight scarcity, and relief to a small extent had to be given.

LAND RECORDS, AGRICULTURE AND HORTICULTURE.

The activity displayed in this department was very great and in very varied directions. In addition to the general survey of Chittagong, 83 estates aggregating 4,662,400 acres were under survey and settlement during the year, and

1,208,680 acres were surveyed at a total cost of Rs. 8,32,838-12. Mr. A. C. Sen submitted an *analysis of the Dacca District* which is highly spoken of. He made various proposals, which are still under consideration, for improving the cultivation of the staples and for preventing the disputes arising from the constant accretions and diluvions, and drew attention to the much greater importance of khals, compared with roads and bridges, as a means of communication.

A considerable advance was made towards the final settlement of measures to facilitate *emigration from Behar to Burmah*. The Government of Burmah suggested that some representative zemindars and capitalists should be taken to Burmah and shown the land available, that they might decide for themselves whether it would be desirable to take such lands and settle Behar cultivators on them. This proposal was accepted, and eventually detailed rules were drawn up and approved, under which land can be obtained in Burmah on very favourable terms by Behar cultivators and capitalists. The Manager of the Dumraon Raj and another Behar gentleman each obtained a grant of 15,000 acres; and a proposal to expend Rs. 16,000 per annum in encouraging emigration is at present under consideration. Numerous experiments were made towards the *introduction of new trees and plants*, among which may be mentioned fruit-trees, date-palms, the eucalyptus, the divi-divi, the Inga Samum or rain tree, the vanilla, and the grape vine. The experiments appear to have been for the most part successful. The attempt to eradicate pebrine among *silkworms* by the supply of untainted seed, which was carried on during the year, was not so successful as had been anticipated; but no improvement can be expected at once, and it is necessary that the work should be continued for a series of years. Various *agricultural experiments* were carried on at three small farms at Dumraon, Burdwan, and Seebpore, among which may be mentioned one showing that a most excellent crop of *sorghum* (a fodder grass) can be obtained from ground manured with bone-meal. Numerous experiments were also made to test the efficiency of bone-meal as a manure for paddy, and it is satisfactory to note that a beginning has been made by ryots in its use in the districts of Burdwan and Hooghly. Fresh *experiments in potato cultivation in Darjeeling* were tried, but with the same result, viz. that blight again made its appearance and spread with great rapidity. As regard *agricultural implements*, it may be noted

that the Seebpore plough has met with some recognition, though not very generally successful, and a Durbhunga planter writes that he finds it very useful, its great advantage being that it is so light that any bullock can draw it. The *total net cost* to Government of the agricultural experiments and enquiries and of the collection of agricultural statistics and information, exclusive of the salary of the two assistants, was Rs. 6,034.

At the close of the year a proposal to establish a *Veterinary College* was under the consideration of Government. An asylum for animals was recently founded by some native gentlemen at Sodepore in the neighbourhood of Calcutta, and is liberally supported by public donations, and the Committee of the asylum offered a free site and Rs. 20,000 towards the construction of the college.

The *Calcutta Botanical Gardens* were maintained in a high state of efficiency, and organised exploration in Burma and Assam added some valuable collections to the herbarium. During the year the Superintendent of the Gardens issued a monograph, which forms the second volume of the Garden annals on the jack fruits, oaks, and chestnuts of the Indo-Malayan region, and he issued also the third and concluding portion of his monograph on the genus *Ficus*. During the year under review the control of Indian botanical operations

was centralised in the Calcutta Gardens, and the Superintendent was appointed Director of the Botanical Survey of India, which was thus constituted into a separate department.

FORESTS.

The *area* under the control of the Forest Department during the year was 11,468 square miles, or $5\frac{1}{2}$ per cent. of the total area of the province, and of this 5,195 square miles were classed as reserved, 2,239 as protected, and 4,034 as unclassified and waste. An area of 207 square miles was added to the reserves during the year, and an area of 25 square miles in the Sunderbuns was farmed out for reclamation. The forests are confined to the districts bordering on the sea, the sub-Himalayan tracts, and the plateau of Central India, so far as it stretches into Chota Nagpore and Orissa. The measures for *protection from fire* were more successful than in the previous year, 95 per cent. of the areas thus dealt with having escaped, in spite of the dryness of the season, against 72.9 per cent. in the previous year. The *Working Plans Division* was again practically in obedience during the greater part of the year, but it is now proposed to remedy this by reducing establishments in Chota Nagpore and Orissa, where they do not pay, and so freeing more men for the work. In the latter province this reduction will probably be accomplished in any case by the re-alignment of the forest boundaries so as to exclude village grazing and fuel grounds—a measure to which the Lieutenant-Governor attaches great importance in the interests of the cultivators. The number of cases of *breach of the forest law* was 2,614, against 1,704 cases in 1898-89 and 2,383 in 1887-88, and of these only 120 were taken into court—the number taken into court in 1886-87, 1887-88, and 1888-89 being 839, 516, and 254 respectively. The *outturn* of wood, including timber and fuel, was 29,973,004 cubic feet, against 27,793,504 cubic feet in the previous year—a very satisfactory increase; so that, in spite of the relaxation of the forest regulations in Orissa in consequence of the distress in that province, to which reference has already been made, the *financial results* of the year were the best since the formation of the Department, the surplus being Rs. 3,78,452, an increase of 22.58 per cent. as compared with the results of 1888-89 and of 66.7 per cent. as compared with those of 1885-86.

MANUFACTURES, MINES, AND OTHER INDUSTRIES.

The quantity of *indigo* exported, which had remained nearly stationary for three years, increased from 1,18,010 to 1,24,988 maunds, a difference of about 6 per cent.; but the average value per maund fell from Rs. 232 to Rs. 199, which is the lowest price yet obtained. As regards this, it is said that towards the close of the year prices were unfavourably affected by the tightness of the money market and the sudden rise in exchange. The exports to Germany and the United Kingdom increased by 18 and 15 per cent. respectively, and there was also a considerable increase in the exports to Austria and Turkey; but, on the other hand, the trade with Italy and the United States showed a considerable falling off. Of the total exports, 38 per cent. goes to the United Kingdom, 23 per cent. to the United States, 12 per cent. to Austria, 10 per cent. to France, and the same amount to Germany.

The number of *tea* gardens fell from 402 to 399 owing to amalgamations, and the area under cultivation fell from 79,962 to 79,006 acres, but the average yield per acre rose from 343 2lbs. to 375.47lbs., and the total outturn from

22,231,944lbs. to 25,089,423lbs. The increase is attributed to the rapid growth of the plants under improved cultivation, and to the unusual excellence of the weather. Nearly the whole of the cultivation is in the two districts of Darjeeling and Julpigoree. The *coffee* cultivation was almost nil, none being produced in Lohardugga, the only district in these provinces in which it is as a rule cultivated, and only 80lbs. in the Chittagong Hill Tracts.

The outturn of the *cinchona* factory was 1,833 pounds of sulphate of quinine and 6,578 pounds of febrifuge, the corresponding figures for the previous year being 2,191 and 6,384 respectively. The net profit of working the estate at the same time fell from Rs. 27,844 to Rs. 18,968. These results, however, are not unsatisfactory, for the object with which the cinchona plantations were introduced into this country was to secure the supply at a cheap rate of quinine and febrifuge to the Indian population, and this result has been attained. For some years the price of quinine has been abnormally low owing to the uprooting of cinchona plantations in Ceylon to make way for tea, which has thrown enormous quantities of the drug on the market, but it is said that this exportation is now showing signs of falling off; and although this will tend to raise the price of both quinine and cinchona febrifuge, the process of manufacture discovered two years ago will secure to the Government and the public in this country the permanent supply at a comparatively cheap rate of quinine of the first quality.

During the year under review, in pursuance of a scheme for expediting the development of technical education in India, Mr. E. W. Collin, c.s., was deputed to make a survey of the existing industries and to report on the advisability of establishing schools of instruction at industrial centres. His enquiry did not extend to the production of raw material, such as coal, indigo, jute, tea, and agricultural produce generally, and therefore did not deal with the question of agricultural education; but he visited all the chief seats of the European and Native industries, and gave a full and interesting account of them. Bengal is almost wholly agricultural, and only 8·73 per cent. of the population are engaged in industrial pursuits, and of these the greater number are found in Calcutta and the surrounding districts. There are in the neighbourhood of Calcutta about 50 mills, factories, and presses which give employment to upwards of fifty thousand natives and to a large number of European foremen; and there are also large mechanical workshops in Calcutta and Howrah, and Railway workshops at Jamalpore, Kanchraparah, and Saidpore. The native industries, in so far as they are independent of foreign influences, are for the most part insignificant. Thus every large village has its potter, its blacksmith, its silversmith, &c., who produce ordinary rough articles for every-day wear and tear; but it is only in the neighbourhood of Calcutta, or at European factories, such as the Burrakur Iron Works or Burn and Company's pottery works at Raneegee, that high class work can be obtained. This, however, does not apply to the artistic manufactures, for although wood-carving, Assamese silk-weaving and the *Kasider* cloth made from it, as well as silk-weaving generally, have greatly declined, yet the native jewellery, and more especially the filigree work of Dacca and Cuttack, maintains its high standard; and fine ivory carvings, metal inlaid work, and pictured silk of Moorshedabad can still be obtained, although in each of these three cases the art is now confined to less than half a dozen families.

As regards the year under review, it may be noted that the mines of the province consist of coal mines in the Bhagulpore, Burdwan, Rajshahye, and

Chota Nagpore Divisions, and of copper and gold mines in the last-named division. In the first two divisions the coal working at the Madankota and Raneegeunge mines was satisfactory, and in the Bhagulpore Division borings for coal were continued at Simra in the Damin. In Rajshahye, it is said that marketable coal has been discovered close to the Brahmaputra. In Chota Nagpore the output decreased from 640,557 to 564,871 tons. The copper mines are at Baraganda, and the output of copper ore increased from 2,734 to 4,620 tons. The gold-mining companies were only being started during the year under review, and had not commenced working. The sugar industry, which is carried on in the Bhagulpore, Burdwan, Patna, and Presidency Divisions, was in a flourishing condition. The silk industry, although declining in the Bhagulpore and Burdwan Divisions, showed considerable improvement in Moorshedabad, and was introduced into the Patna Division. The manufacture of cotton cloth in the Burdwan Division is said to be decaying in almost every district owing to the introduction of English piece-goods, but in the Presidency Division the manufacture of cotton twist from cotton increased by 59 per cent. The only industry which remains to be noticed is the ship-building at Chittagong, where two ships were built as compared with three in the previous year.

SEA-BORNE TRADE.

The total value of the sea-borne trade of the Bengal Presidency, exclusive of Government transactions, increased from Rs. 78,17,13,654 to Rs. 79,12,31,540, a difference of slightly over one per cent., or not more than the probable increase in population. Since 1885-86, however, the increase has been over 15 per cent. The increase during the year was entirely in foreign exports, there having been a decrease in foreign imports and in both branches of the coasting trade. Of the total trade, 61·7 per cent. was carried on with the United Kingdom, 10·1 per cent. (due to opium transactions) with China, and 6·47 per cent. with the United States. Of the foreign imports, cotton piece-goods were so much the most important as to be more than equal in value to all the others put together. The value of these goods was, however, less than in the previous year, being Rs. 13,12,13,470 against Rs. 14,54,77,039, a falling off which was due to the large imports of the previous year, which occasioned an accumulation of stocks, to rise in exchange, and to the state of the money market. Next in importance come metals, oils, salt, cotton twist and yarn, machinery, and woollen goods in the order named. The value of imported metals increased from Rs. 1,65,37,448 to Rs. 2,46,76,108, owing to the collapse of the Copper Syndicate. Oils, which consist almost entirely of kerosine, increased in value from Rs. 93,14,474 to Rs. 1,31,34,837, due to the continued increase in consumption. The value of imported machinery fell from Rs. 86,31,208 to Rs. 74,13,111, but was nevertheless far in excess of that of any previous year except 1888-89. There was a falling off in the value of salt imported owing to the action of the Salt Syndicate. Imports of cotton twist and yarn decreased in value by 24 per cent., but the value of woollen goods imported increased somewhat. The chief articles of export were, in the order named, raw jute, opium, tea, oilseeds, rice, and indigo, and the value of these was more than 75 per cent. of the total value of Indian produce and manufactures exported. The value of jute exported rose from Rs. 7,89,66,943 to Rs. 8,63,23,797, that of oilseeds from Rs. 3,58,14,444 to Rs. 4,13,29,096, and that of rice from Rs. 2,29,75,540 to Rs. 2,73,77,777. The value of tea and indigo fell, although the quantity in each case increased, and

the quantity and value of opium fell, although the quantity sold by Government for export remained the same. As regards tea, it may be noted that Indian and China tea have for a long time been running a race for the lead in the home market, and that Indian tea, which had for a long time been rapidly coming up with its opponent, for the first time led the way in 1889. The importations into the United Kingdom in the last two years were—1888, Indian, 92,387,000lbs., China, 109,285,000lbs.; 1889, Indian, 96,693,000lbs., China 93,208,000lbs. The value of gold imported increased from Rs. 23,07,727 to Rs. 41,12,556, and the value of that exported fell from Rs. 42,200 to Rs. nil. Of the total trade, 93·06 per cent. was carried on by the port of Calcutta, 4·01 per cent. by Chittagong, and 1·45 per cent. by Naraingunge. The trade of Naraingunge has increased very rapidly since the place was declared a port, and the trade of the year under review, both there and at Chittagong, was the highest on record. The proportion of the foreign trade of Calcutta carried through the Suez Canal declined from 65·8 to 63·7 per cent. of the whole, the cause of the falling off being the decrease in the importation of cotton manufactures.

INTERNAL TRADE, AND EXTERNAL TRADE WITH NEPAL, TIBET, SIKKIM AND BHUTAN.

The trade of the ports has already been sufficiently noticed under the head of Sea-borne trade, and that on the canals and railways will be detailed hereafter under the heads of Irrigation and Railways. A few words may, however, be said regarding the external rail-borne traffic of Bengal with other provinces. The total quantity carried decreased from 2,29,15,569 maunds in 1888-89 to 2,28,84,293 maunds in 1889-90, but the value increased from Rs. 16,83,25,293 to Rs. 18,33,63,094. The value of both imports and exports increased, the former by 14, the latter by 4 per cent. The value of the exports in 1889-90 was Rs. 8,95,65,464, and that of the imports was Rs. 9,37,97,630, or 4·7 per cent. greater. The falling off in quantity was in the exports, which fell from 125 to 116½ lakhs of maunds—a difference of 8½ lakhs. The quantity of coal and coke exported fell by over 5 lakhs, and that of rice by nearly 6 lakhs of maunds (from 10,55,920 to 3,89,913 maunds). On the other hand, the export of oils increased by nearly 1½ lakhs, and those of unrefined sugar by 1½ lakhs of maunds. Exports of tobacco increased by 82,527 maunds. The most important exports were in the order named—European cotton piece-goods, gunny bags and cloth, iron, coal and coke, tobacco, copper, unrefined sugar, liquors, oils, rice, and salt. But European cotton piece-goods were so much the most important that their value was Rs. 4,86,34,950, while the value of all the others named amounted to only Rs. 2,09,86,251. Imports increased by about 8 lakhs of maunds. There was an increase of 9½ lakhs of maunds of gram and pulse, of 2¼ lakhs raw cotton, ¾ lakh wheat, ½ lakh sugar, ½ lakh saltpetre, and a decrease of 6½ lakhs rape and mustard-seed, ½ lakh castor-seed, ¾ lakh poppy-seed, ¾ lakh hides. The most valuable imports were opium (228 lakhs rupees), raw cotton (156 lakhs), linseed (91 lakhs), indigo (89 lakhs), wheat (64½ lakhs), hides (42½ lakhs), rape and mustard-seed (22¼ lakhs), and gram and pulse (21½ lakhs). The traffic on the *Brahmaputra* and *Upper Megna* rivers carried by the India General and River Steam Navigation Companies increased in weight from 75,04,290 to 83,05,206 maunds, and in value from Rs. 7,30,85,603 to Rs. 7,47,92,626. That carried along the same rivers by the steamers of the Eastern Bengal State Railway increased in weight from 33,34,309 to 43,18,777 maunds, and in value from

Rs. 3,33,68,829 to Rs. 4,00,33,886. The traffic carried on with Assam by country boats increased from 68,65,240 to 70,70,786 maunds, but the value fell from Rs. 1,77,47,966 to Rs. 1,67,06,152.

The value of the *external trade* between Bengal only (*i.e.*, exclusive of trade registered through to, and from, other provinces) and *Tibet and Sikkim* is certainly not at present of great importance, but it more than doubled during the year, and amounted to Rs. 4,99,629 as against Rs. 2,07,708. That with *Bhutan* increased from Rs. 3,01,752 to Rs. 3,63,760, and that with *Nepal* from Rs. 1,68,28,327 to Rs. 1,82,98,179. The trade with *Nepal* is the only one of any importance at present. The most important imports from *Nepal* were rice and other crops, timber, mustard-seed, linseed, hides of cattle, skins of sheep, &c., cattle, and tobacco. The exports to *Nepal* were salt, provisions, sheep and goats, gram and pulse, sugar, and tobacco.

ROADS AND BUILDINGS.

The *expenditure* under this head amounted to Rs. 78,61,872, against Rs. 83,43,527 in the year 1888-89, the falling off being due to a reduction in the Provincial grant; and in addition to this Rs. 14,519 and Rs. 2,48,400 were spent in *Sikkim* and on the *Chittagong* frontier, respectively. Of the expenditure, Rs. 5,24,197 was Imperial, Rs. 31,24,008 Provincial, and Rs. 42,13,667 from Local Funds. From the Imperial grant the Survey of India Offices, which cost Rs. 8,55,743, were completed, and new buildings for the Secretariat of the Government of India, which are estimated to cost Rs. 11,38,276, were commenced. The remainder was expended on post-offices at *Chyebassa* and *Dacca*, on the telegraph office at *Dullunda*, on a new opium office and weighing shed near the *Nepal* frontier, and in improving the drainage of the Currency Office. The money spent on the *Chittagong* frontier was utilised in constructing a stockade, in improving the roads, and in providing quarters for the officers and men.

The Provincial grant was almost entirely spent in maintaining over 1,200 miles of metalled and 750 miles of unmetalled road, and on Civil Buildings. Under the latter head Rs. 3,72,689 was expended in constructing and repairing public offices or official residences at *Balasore*, *Arrah*, *Doomka*, *Julpigoree*, *Cox's Bazar*, *Chittagong*, and *Pubna*; Rs. 46,554 was spent on the construction of three distilleries and in introducing improvements in excise manufacture; the extension of the Museum at *Calcutta* was nearly completed; of 23 *Munsiffs'* courts under construction during the year, 11 were completed; Rs. 3,01,263 were spent on additions to the Central Jail at *Bhagulpore*, the Presidency Jail, the Reformatory School at *Alipore*, the *Dacca* Central Jail, the intermediate jail at *Khoolna*, on constructing an intermediate jail at *Doomka* and lock-ups at *Deoghur*, *Gaibanda*, *Somastipore*, and *Pakour*, and in converting the *hajut* at *Rajmehal* into a lock-up, and in improving the lock-up at *Cutwa*; the new police office at *Cuttack*, and the additions and alterations to the Mill barracks at *Dacca* to make them suitable for occupation by the reserve police, were completed; some important additions and alterations were made to the lunatic asylum at *Cuttack*; and Rs. 4,67,182 were spent in constructing roads in *Chota Nagpore*. These are the chief objects on which the Provincial grant was expended, although a number of other works of minor importance were also carried out. Almost the whole of the expenditure under Local Funds consists of the outlay by District Boards and District Road Committees on roads and communications.

IRRIGATION.

The *total capital outlay* up to the end of the year on *Major Irrigation* works amounted to Rs. 5,93,68,000. The net receipts were Rs. 1,65,709 and the interest charges Rs. 23,65,030, so that the deficit was Rs. 21,99,321, which is less than in any of the preceding three years. Under this head there are four works—the Orissa, the Midnapore, the Hidgeleeo Tidal, and the Sone Canals. The expenditure during the year was chiefly on the first of these, on which nearly three and-a-half lakhs were spent. Nearly Rs. 49,000 were spent on the remodelling of the third. As interest is paid by the Bengal Government on funds provided from the Imperial treasury for carrying out the remodelling, the expenditure is shown in the chapter on Irrigation as incurred on Minor works. The expenditure on the Midnapore Canal was over Rs. 14,000, and that on the Sone Canals amounted to nearly Rs. 72,000. The total tonnage of the boats using these canals fell from 932,824 tons to 877,433 tons, but the value of the cargo carried showed a slight increase over the previous year, being in each year over two crores and seventy lakhs of rupees. The decrease in the tonnage is attributed to the state of the rice trade. The rice crop was very unequal, and, moreover, a considerable quantity from the exporting districts was diverted eastwards to Lushai, and partly for these reasons, and partly because of the depletion of stocks which necessarily followed the bad harvest of the previous year, prices were most unusually high, and the quantity of rice exported from Bengal decreased by 7·7 per cent. The area for which irrigation leases were granted from the Orissa Canal increased from 146,046 acres to 173,409 acres, but, on the other hand, the area irrigated by the Sone Canals fell from 355,909 acres to 305,282 acres.

All the other irrigation works are classed under the head *Minor works and Navigation*, and are subdivided into (1) Works for which both capital and revenue accounts are kept, (2) Works for which only revenue accounts are kept, (3) Works for which neither capital nor revenue accounts are kept, and (4) Agricultural works. Under the first head are included six canals, of which two are in abeyance or abandoned, one has been only commenced, one is completed, and the other two are shown as under construction, but are practically complete, although estimates for important extensions have been prepared, but are at present in abeyance for want of funds. The last three are the Calcutta and Eastern Canals, the Orissa Coast Canal, and the Sarun Project. Of these the last two were worked at a loss, but the first was remunerative. The total expenditure on all these canals up to the end of 1889-90 was Rs. 1,07,96,042, and the net receipts in that year were Rs. 2,10,697. The only works included under heading (2) are the Nudda rivers. The traffic on these rivers has been declining for the last few years, owing, it is said, to the unfavourable condition of the Bhagiratho and Matabhanga rivers during the dry months and to reduction of freight by the East Indian Railway. In 1889-90 the tonnage of the boats amounted to nearly 800,000 tons, and the value of the cargo was over 3½ crores. The net revenue derived was Rs. 92,834. Under (3) are the Eden Canal and the Madhuban Canal. The former of these, although used experimentally for irrigation purposes, was constructed to provide a supply of drinking-water to Burdwan. The other canal is a small irrigation work on the borders of Nepal, which was formerly known as the Teur Canal. It was constructed by the Government at the cost of the proprietors, but their rights were subsequently purchased by

Government, and the canal was opened for irrigation purposes for the first time on 15th August 1888. No water-rates have been realized since then. The receipts from these two canals amounted to Rs. 9,406 and the expenditure to Rs. 34,117, which leaves a deficit of Rs. 24,711. If the three heads be taken together, the net surplus of receipts over charges is Rs. 2,78,820.

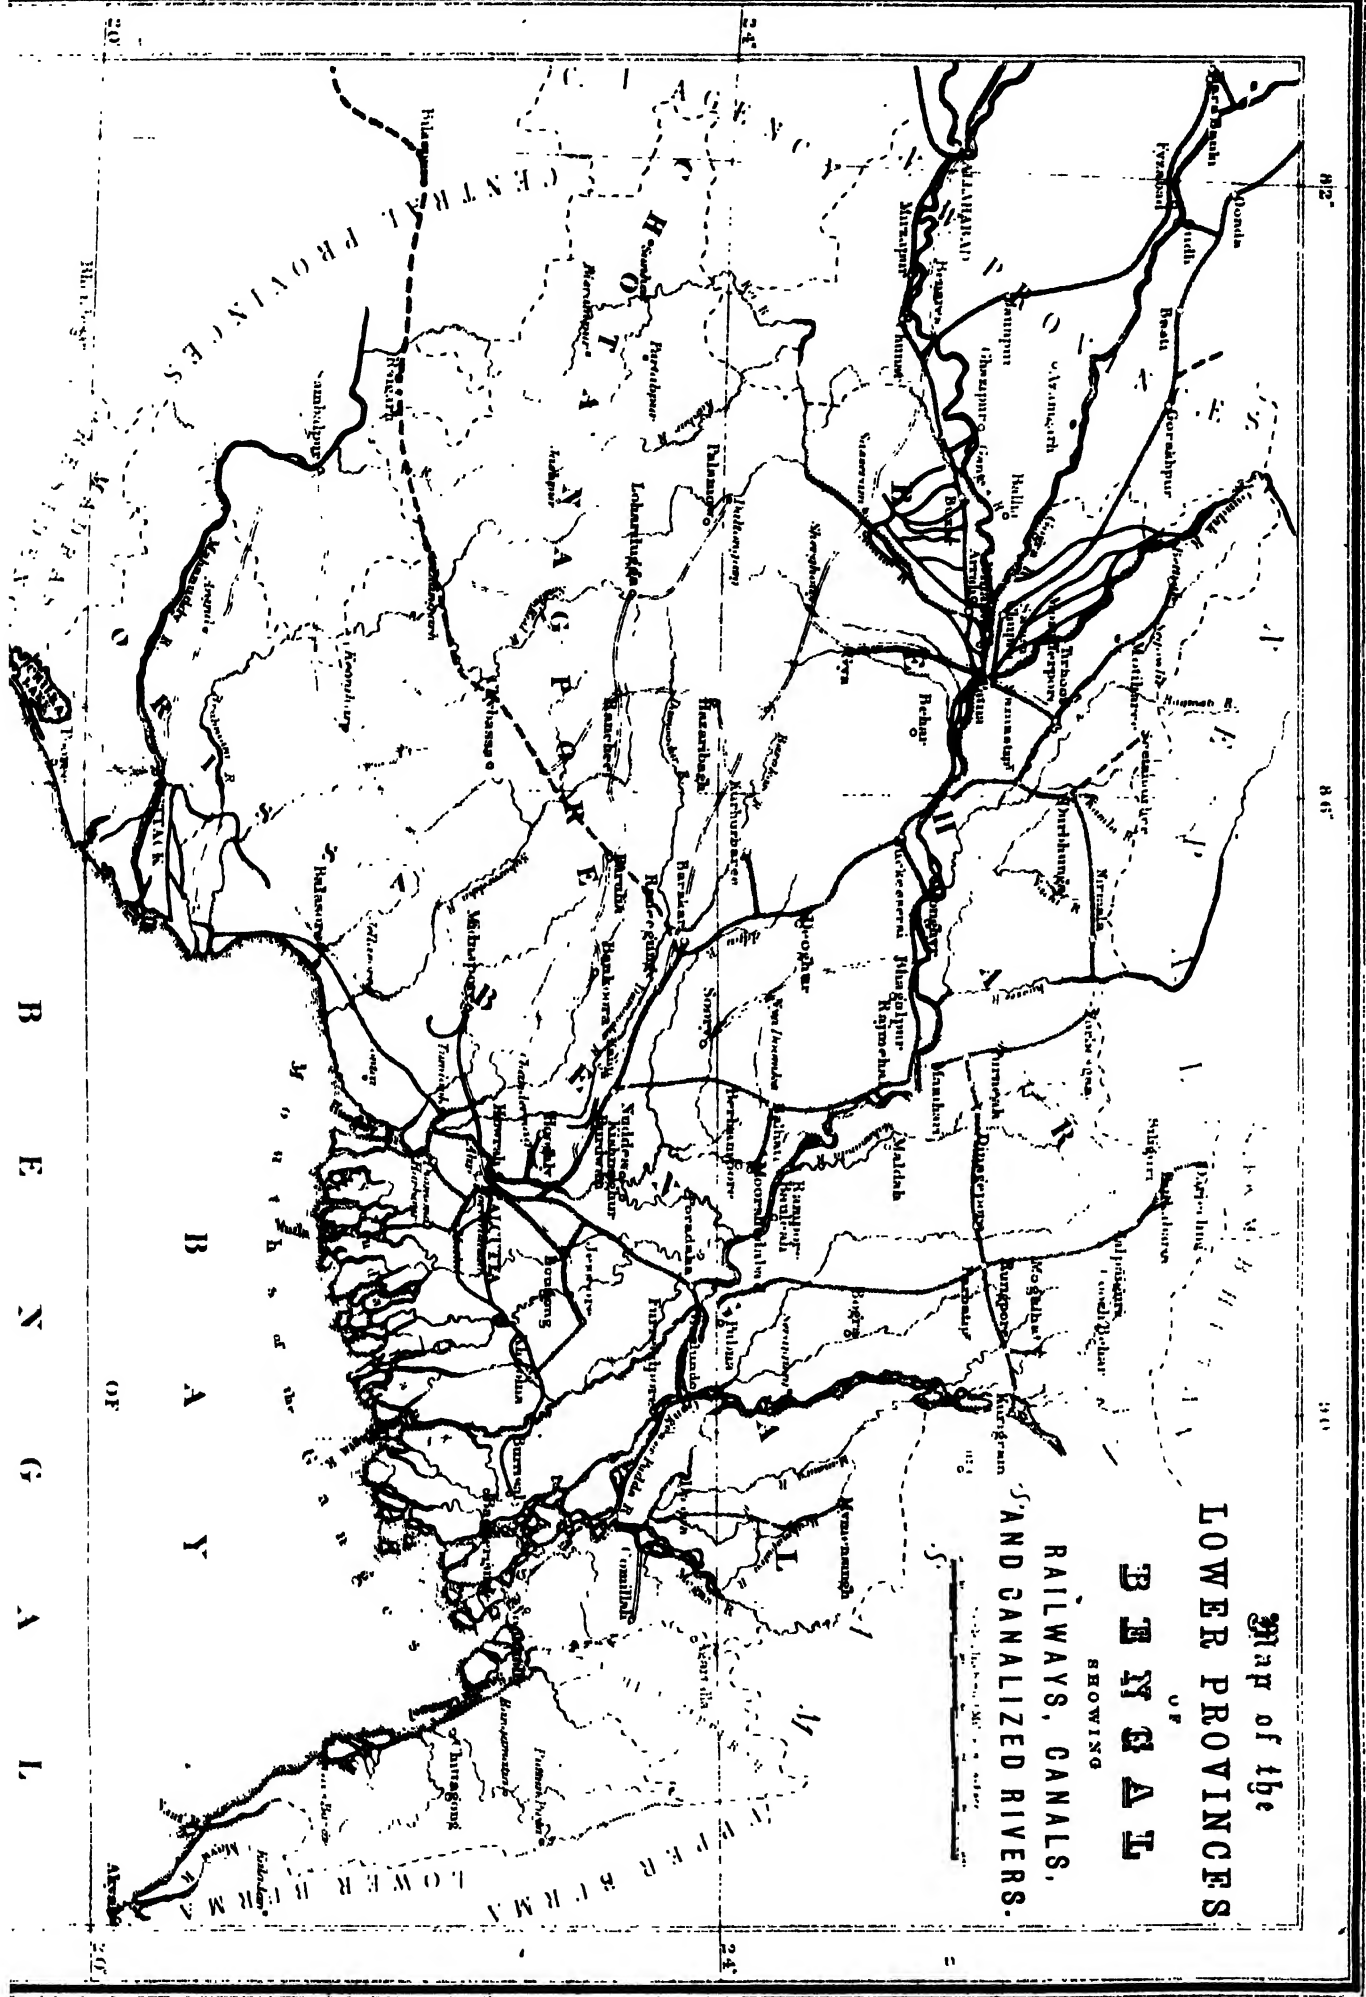

The works classed under the head of *Agricultural* consist partly of drainage projects, but chiefly of embankments, and the money expended (Rs. 8,23,963) was for the most part devoted to maintaining and repairing the works already in existence. Amongst the drainage schemes may be noticed the commencement of the Chinsurah khal drainage works to improve the drainage system of a tract of country on the left bank of the Hooghly; the Rajapore drainage works, the practical completion of which enabled the villagers to bring under cultivation a large quantity of waste land in the swamps; and the Baliaghoe drainage channel, which was undertaken during the year under review as a famine relief-work in the Balasore Division. All the embankments were maintained in good order, with the exception of the left Bhagiruthee embankment in Moorsshedabad and the tuccavi embankment in Chumparun, each of which was breached in three places. In the former case two of the breaches, which occurred at Berhamgunge and Plassey, unfortunately caused the flooding and destruction of crops over an area of no less than one hundred and sixty square miles.

RAILWAYS.

The total number of *miles of railroad* open in Bengal at the close of the year was 2,246½ miles, which is an increase of 183½ miles as compared with the previous year, and the control and financial responsibility of 1,017½ miles of this had been undertaken by the Government. In addition to this 129½ miles were under construction and 796 miles under survey. The gross receipts of the *State Railways* increased from Rs. 1,25,19,020 to Rs. 1,36,73,525, and the interest and working expenses from Rs. 92,10,388 to Rs. 95,17,306, so that the net surplus increased from Rs. 33,08,632 to Rs. 41,56,219. Of this latter sum the Provincial Government received Rs. 29,87,100 and the Imperial Government Rs. 11,69,119, the shares in the previous year having been Rs. 25,23,480 and Rs. 7,85,152 respectively. Of the net receipts Rs. 38,02,257 were obtained from the Eastern Bengal State Railway, Rs. 3,39,259 from the Tirhoot State Railway, and Rs. 14,703 from the Nalhati State Railway.

Seventy-four miles were added to the Northern Section of the *Eastern Bengal Railway* System, and only a few miles now remain to complete the connection between the Eastern Bengal and the Tirhoot State Railways. The prospects of the lines north of the Ganges are said to be most hopeful, as the *Assam-Bihar Section*, though but recently opened, is already bringing in heavy receipts, and the *Tirhoot State Railway* showed an enormous development of traffic receipts towards the latter half of the year. The *Bengal Central Railway* is worked as part of the Eastern Bengal State Railway System for 40 per cent. of the gross receipts. The net receipts increased from Rs. 1,58,145 to Rs. 2,95,988, and the traffic on it is said to show signs of still further improvement. The traffic returns of the *Nalhati State Railway* were most satisfactory, and the work of replacing the old iron rails by steel ones made good progress.

The railways which are not under the control of the Government, but which come under the heads of "State Imperial in the hands of Companies" or

REFERENCES.

Railways open shown thus —
Do. under construction " — —
Canals and Canalized Rivers " —

“Assisted Companies,” are the *East Indian*, the *Bengal and North-Western*, and the *Bengal-Nagpore Railways*; the first and third coming under the former, and the second under the latter head. The surplus receipts from the first of these fell from Rs. 79,36,297 in 1887 and Rs. 58,23,464 in 1888 to Rs. 41,56,732 in 1889. The falling off was in the receipts from goods traffic, which diminished by 75,885 tons, and is chiefly due to the rapid decline in the export trade in wheat from Bengal, which has fallen from 339,395 tons in 1886 to 78,899 tons in 1889. There was an increase of over three lakhs in the receipts from passenger traffic, which was, however, entirely derived from third class and intermediate class fares, as there was actually a falling off in the receipts from 1st and 2nd class. On the Bengal and North-Western Railway there was a decrease of Rs. 43,156 in the receipts from goods traffic—the falling off being chiefly in wheat and rice—and an increase of Rs. 58,472 in the passenger receipts. As, however, the gross expenditure was less, the net earnings increased from Rs. 9,88,844 to Rs. 10,53,965, a difference of Rs. 65,121. One hundred and eighteen miles of the Bengal-Nagpore Railway were opened towards the close of the year, 47 miles being opened on the 15th December 1889, and 71 miles on the 22nd January 1890.

The other railways are the *Patna-Gya*, the *Tarkeshwar*, the *Deoghur*, and the *Darjeeling-Himalayan*. The first three of these did very well during the year, but the net earnings of the last decreased from Rs. 2,83,327 to Rs. 2,29,116, or by 19·13 per cent.

TELEGRAPH AND POST-OFFICES.

The increasing extent to which the public avail themselves of the facilities offered them for *telegraphic* communication, and the eagerness with which they utilise any extension of the system, certainly constitute one very important indicator of material progress; and in this respect the rapid progress of previous years was well maintained. The number of messages amounted to 540,245, and the receipts to Rs. 8,27,319, an increase in each case of 9 per cent. over the preceding year. In two years the increase in each case amounts to over 21 per cent. The mileage of lines was increased by 73 miles, bringing the total up to 5,421 miles; and 50 offices were opened while 21 were closed, so that at the end of the year the number of offices open stood at 606. Among the new offices three were opened at the head-quarters of districts, so that there are now only two districts in Bengal—Maldah and the Sonthal Pergunnahs—the Sudder stations of which are without telegraphic communication.

In the *Postal Department* there was the same rapid progress as in previous years, which, however, has been so long continued as no longer to excite remark. The total number of postal articles of all classes received for delivery was 72,318,350, an increase of nearly 7 per cent., at which rate the transactions would be doubled in about ten years. There was an increase of 35 in the number of post-offices, of 260 in the number of letter-boxes, and of 61 in the number of postmen and village postmen; the total number in each case during the year 1889-90 being 2,284, 5,494, and 9,779. Three hundred and twelve and-a-half new postal lines were opened and maintained during the year, bringing the total mileage up to 25,677 $\frac{3}{4}$ miles. The number of insured articles was 51,759, with a declared value of Rs. 1,68,61,386, while the number of value-payable articles was 497,812, and their value Rs. 51,68,078. The number of money-orders of all classes increased by 263,332, and their value by Rs. 65,50,817, the

number and value being 2,479,019 and Rs. 4,73,13,657 respectively. It is, however, in the matter of revenue money-orders that the administration of the post-office has achieved the greatest triumph in recent years. In the year 1888-89 the number of remittances was nearly double that of the previous year, and in the year under review the number increased from 98,322 to 146,726, a difference of very nearly 50 per cent. The aggregate value of these orders was Rs. 11,50,111, which gives an average of less than Rs. 8, but it is precisely when the amount is smallest that the hardship of having to travel a long distance to pay it is most felt. The experiment of extending the system to the payment of rent was tried during the year, but had not proved very successful up to its close.

The number of *Savings Banks*' accounts open at the close of the year increased from 97,894 to 113,267, but the amount of deposits decreased from Rs. 1,02,30,524 to Rs. 80,30,921. The total value of *Government securities* purchased, sold, and deposited was Rs. 2,83,100, as against Rs. 1,92,000 in the proceeding year. Fifty-three *insurance policies* of the value of Rs. 61,450 were granted to employes of the Postal and Telegraph Departments. The number of *privileged newspapers* increased from 172 to 181. Twelve *combined Post and Telegraph offices* were opened during the year, and two were closed, so that 130 such offices were open at the end of the year, and the number of messages despatched rose from 106,518 to 124,696. There were 54 cases of prosecutions of postal servants during the year, and convictions were obtained in 41 cases. There were four cases of highway robbery.

IMPERIAL REVENUE AND EXPENDITURE.

The total *Imperial receipts* amounted to Rs. 13,66,13,000. There was an increase under nine major heads of Rs. 19,61,000 and a decrease under four of Rs. 4,66,000, leaving a net increase of Rs. 14,95,000. The heads under which the greater part of the increase took place were Land Revenue, Opium, Customs, Assessed Taxes, and Interest, and it was attributed to the payment by the Burdwan Raj of arrears of revenue, to higher prices obtained at opium sales, to increased imports of petroleum, arms and ammunition, to careful revision of the assessment of the income-tax in Calcutta, and to the interest on the additional loan taken by the Calcutta Port Trust on account of the Kidderpore Docks. The decrease is almost entirely under Salt and Excise, and is due in the former case to the action of the Salt Syndicate, which has injuriously affected the Liverpool trade and led to the importation of Indian-manufactured salt into areas formerly supplied by Liverpool salt, and in the latter to scarcity in Behar and to the recent changes in the excise system. The *expenditure* increased by Rs. 5,98,000 and decreased by Rs. 99,18,000, which gives a net decrease of Rs. 93,20,000. The only large increases were under Excise, Territorial and Political Pensions, and Stationery and Printing, and were due to the creation of the appointment of Excise Commissioner, to the pensions to the Oudh family being for the first time shown in these accounts, and to the large demands of the Government Presses for country-made paper in lieu of English printing paper kept in stock. Of the decrease Rs. 98,59,000, that is, very nearly the whole, was under the head Opium, and was due to smaller payments being made owing to the failure of the crops.

The balance of *Currency Notes* in the treasuries at the head-quarters of the various districts was at the beginning of the year Rs. 37,97,145; the receipts

from the Bank of Bengal, from other treasuries, from currency chests, and from the public amounted to Rs. 3,99,07,085, the issues to Rs. 4,01,98,450, and the balance in the treasuries at the close of the year to Rs. 35,05,780. The average receipts and issues of the previous five years amounted to Rs. 3,86,42,277 and Rs. 3,86,95,043 respectively. These notes, when issued to mofussil treasuries, are transmitted through the Bank of Bengal, and surplus notes are sent by the treasuries of the Calcutta Collectorate, the 24-Pergunnahs, and Howrah to the Bank of Bengal and by other treasuries to the Reserve Treasury, and it is in this way that the bulk of the remittances from the mofussil to Calcutta are made. The currency chests contain the reserve which the Comptroller-General is obliged, under Act III of 1871, to keep in hand against the notes issued, and as the money need not be kept in any specified place, it is frequently used for the purpose of making remittances at short notice, which is accomplished by emptying the currency chest at the place to which the money has to be remitted into the treasury, and at the same time paying an equal amount into a currency chest at some other place. These remittances increased during the year under review. As the issues to the public for the first time reached two crores, and as the value of the notes which the public presented to have cashed was only Rs. 85,92,100 against Rs. 1,14,59,266, the average of the preceding nine years, it is obvious that the demand for these notes is increasing. The circulation would, indeed, increase very fast if unrestricted, but it is found necessary to limit it. Thus, for example, in Eastern Bengal, when the betelnut and cold-weather rice crops are ready, money pours in and is disbursed in small sums in buying up the crops at the various hâts. After the export is over the money for the most part collects in the hands of zemindars or in the Government treasury, and has to be remitted again to Calcutta. If notes were freely issued and cashed, the result would be that the money sent to the district would be sent by the remitters in the form of notes to be cashed at the treasury, and that, when the export was over, the remitters would buy notes at the treasury and remit cheaply: so that the actual cost of conveying the specie between Backergunge and Calcutta would have to be borne by Government in both cases, while at the same time Government could derive no benefit from money held at call and actually called for in this way.

PROVINCIAL FINANCE.

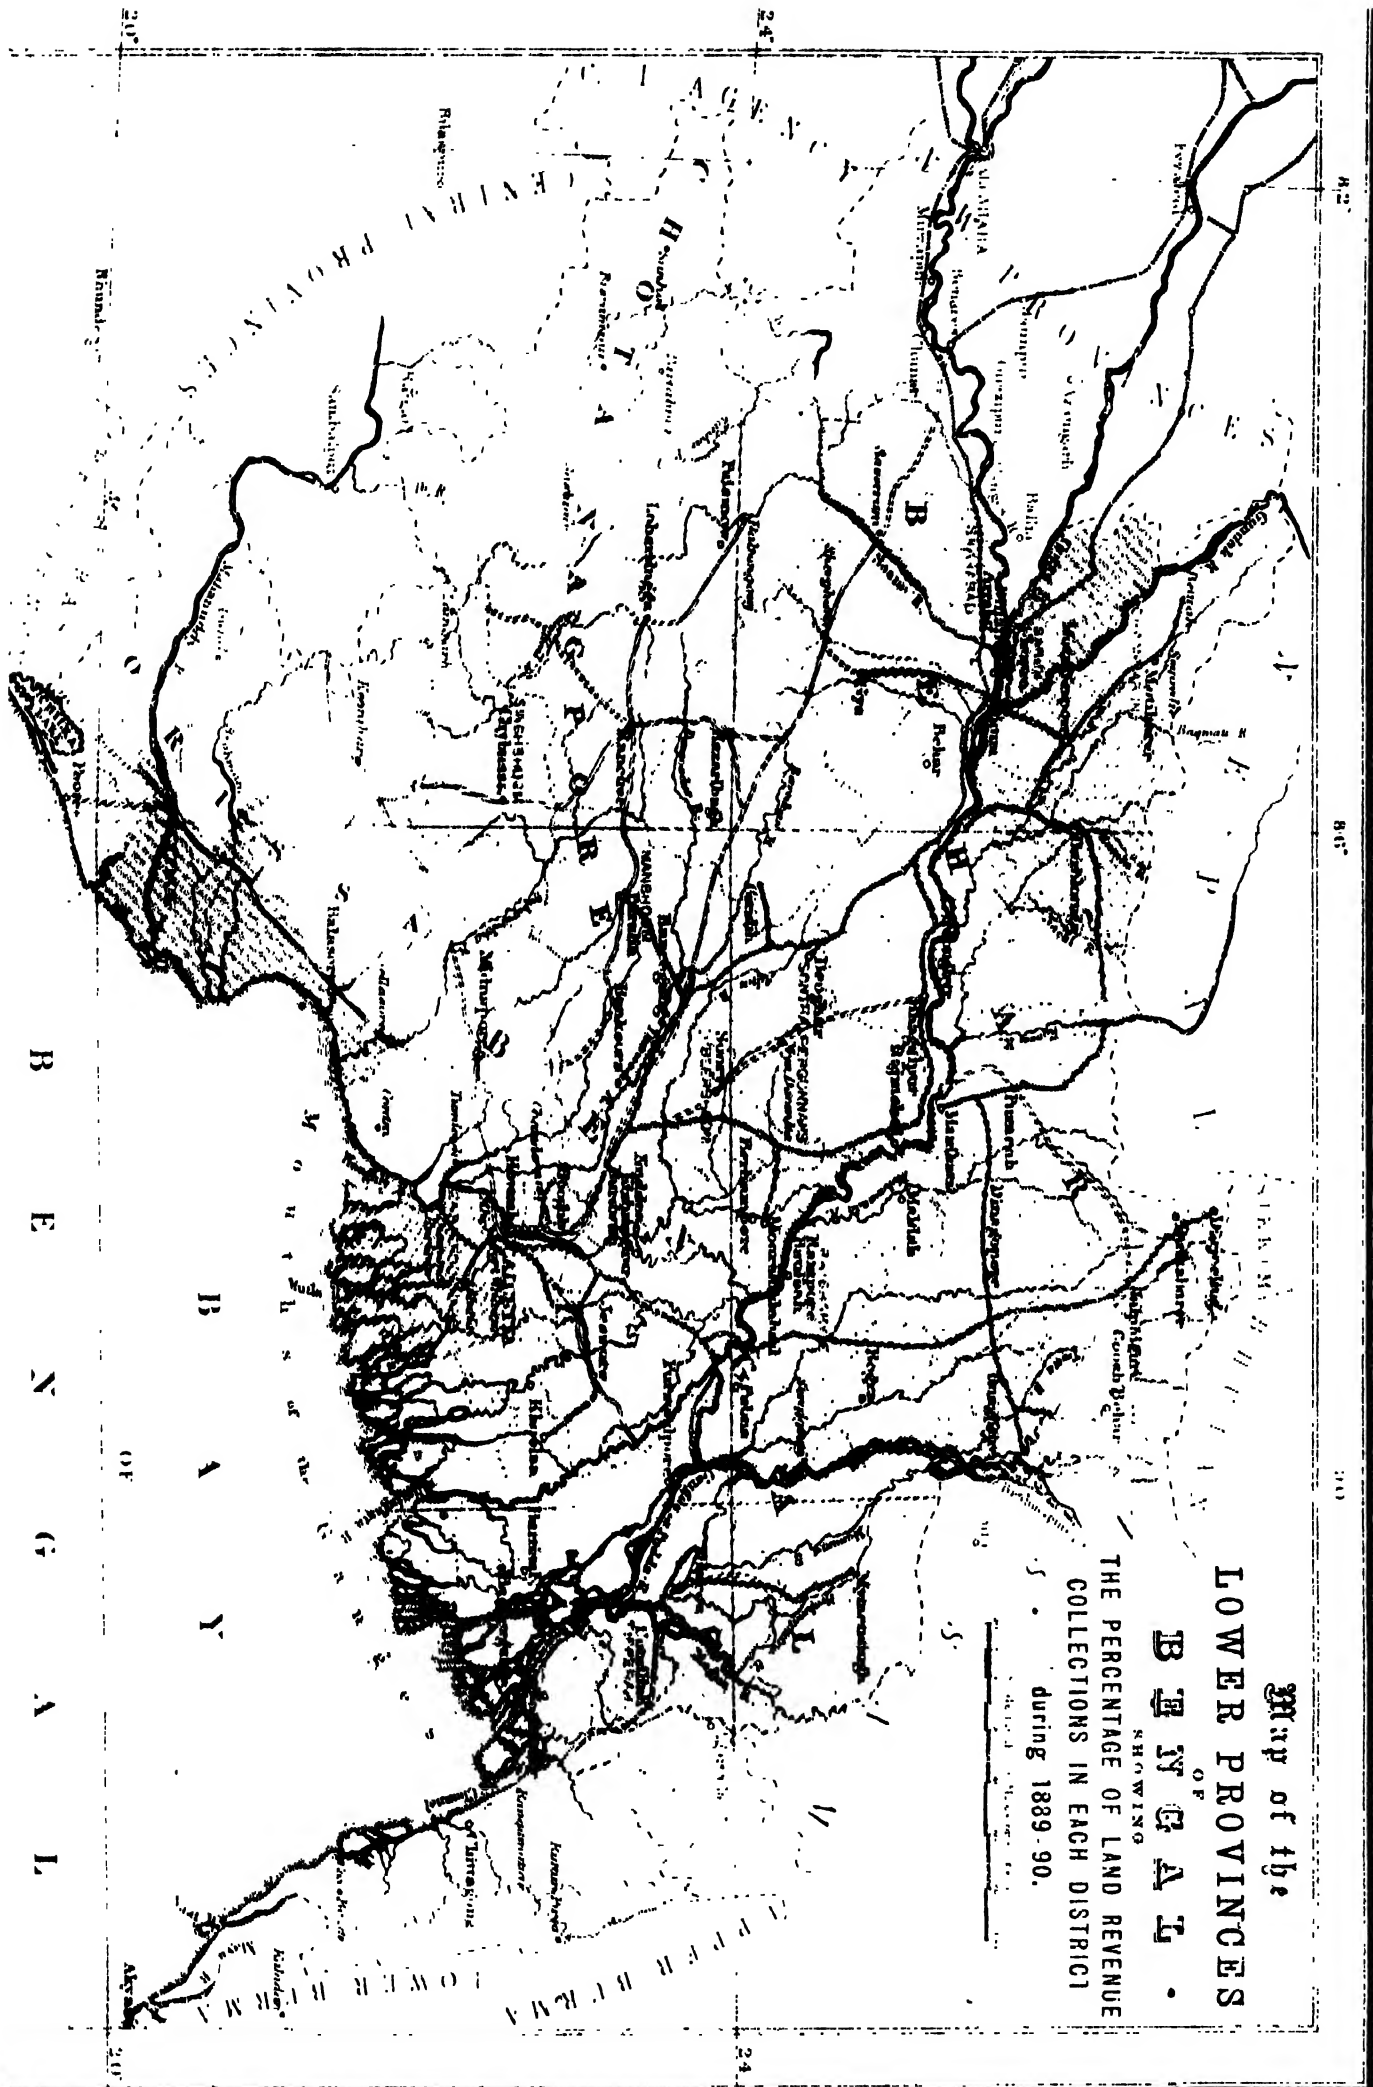

As the different heads of receipt and expenditure are separately discussed, it is unnecessary to do more here than show briefly the effect of the various increases and decreases on the Provincial finances. Out of the total revenue of Rs. 18,93,56* raised in these provinces, the provincial share amounted to Rs. 5,15,74, an increase of 5·7 per cent. over that of the previous year, as against an increase of 1·3 per cent. in 1888-89; the year before that being the first of the present contract. The year opened with a credit balance of Rs. 26,51, and the total amount at the disposal of His Honour was thus Rs. 5,42,25, against Rs. 5,20,87, and of this amount he spent Rs. 5,04,38, so that the balance at the close of the year was Rs. 37,87. The principal heads of revenue gave an increase in receipts amounting to Rs. 18,37; and as the increase in expenditure under Direct demands on the Revenues, which is the corresponding head on the expenditure side, amounted to only Rs. 2,11, the Provincial finances benefited by Rs. 16,26. Under the three Public Works

Departments of "Railways," "Irrigation," and "Buildings and Roads," the Provincial share has increased by Rs. 5,11, Rs. 1,49, and Rs. 9,41 respectively, giving a total of Rs. 16,01. Under the remaining heads of account there was a not increase of expenditure, viz. Interest (Rs. 16), Civil Departments (Rs. 7,76), Miscellaneous (Rs. 1,22), Famine Relief (Rs. 86), and Contributions (Rs. 4,33). As the opening balance of the year was less by Rs. 6,58 than that of the previous year, the net result of all these changes was to increase the balance at the close of the year by Rs. 11,36.

The results given above are the differences under the main divisions of the budget. If the receipts and expenditure under the various heads be examined separately, it will be found that the most marked increases and decreases were under the following:—*Receipts*—Land Revenue (Rs. 4,49), Adjustments (Rs. 7,73), Stamps (Rs. 2,99), Excise (—Rs. 1,04), Provincial Rates (Rs. 1,50), Assessed Taxes (Rs. 1,27), State Railways other than Eastern Bengal (Rs. 8,34), Irrigation Major Works (Rs. 1,27): *Expenditure*—Jails (Rs. 1,04), Police (Rs. 4,65), Marine (Rs. 1,32), Working expenses of State Railways other than Eastern Bengal (Rs. 2,00), State Railways' interest on debt (Rs. 1,72), Buildings and Roads in charge of the Public Works Department (—Rs. 7,80), and Contributions (Rs. 4,33). Most of these differences are discussed under the heads referred to, and the only ones calling for further remark in this place are those under Adjustments and Contributions. The increase under the former head is chiefly made up of contributions from Imperial for a new pilot brig (Rs. 1,91), for the Orissa Coast and Hidgeleo Tidal Canals (Rs. 1,81 and Rs. 1,85), and for the Calcutta Police (Rs. 2,00), and the increase under Contributions is due to the payment of arrear contributions to District Funds for 1887-88 and 1888-89, as well as of additional grants to the District Boards for the maintenance of Provincial roads transferred to their charge.

There are five *Incorporated Local Funds*: the *District Road Fund* in four districts in which the Cess Act is in force and to which the Local Self-Government Act has not been extended; the *District Road Account* in three backward districts in which neither of these Acts is in force; the *District Fund* in the thirty-eight districts to which the Local Self-Government Act has been applied; the *District Post Fund*, which is maintained by the zamindari dāk cess, an impost levied from zamindars in lieu of the obligation under which they formerly lay to transmit Government letters across their zamindaris; and the *Inland Labour Transport Fund*, the receipts of which are derived from various fees levied under the Act, and any deficit in which is made good by the Assam Government. Of these the most important is the District Fund, the receipts of which form over ninety per cent. of the whole. The receipts of these funds amounted to Rs. 82,80,821 and the expenditure to Rs. 81,84,737, so that the balance in hand rose from Rs. 26,88,233 to Rs. 27,84,317. The local funds, the transactions of which appear in the Government account books, but which are not included as part of the receipts and expenditure of the province, and are known as *Excluded Local Funds*, consist of twenty-two miscellaneous funds, the total receipts of which are less than four lakhs, and none of which are of much importance. In the year under review the receipts amounted to Rs. 3,89,262 and the expenditure to Rs. 4,16,351, and the closing balance was Rs. 1,65,609, as against Rs. 1,92,698 in the previous year.

As in previous years, the *Road and Public Works cesses* were levied at full rates in all districts except Backergunge, where the road cess was levied at half

rates. The percentage of total collections on current demand was 101·2, and on the whole the outturn of work compared favourably with that of the preceding year.

LAND REVENUE.

The *current demand* was Rs. 3,81,02,828, a decrease of Rs. 10,277 as compared with the previous year, which is more than accounted for by the fact that the owner of the Jellamoota estate in Midnapore, who for many years declined to accept the settlement of his property, has done so at last, thereby becoming entitled to a sum of Rs. 58,314 a year which was deducted from the income of Government. The arrear demand was Rs. 29,20,128, which brought the total up to Rs. 4,10,22,956. The collections amounted to Rs. 3,86,65,822, and were the best for ten years, being in excess of the regular income, and are said to have been in some degree facilitated by the general adoption of the system of remittance by money-orders, of which 139,535 were issued during the year for an aggregate sum of over 11 lakhs. The balance outstanding at the end of the year decreased from Rs. 29,57,571 to Rs. 22,60,785. There was a large increase in remissions, due mainly to the loss of crops caused by floods in Midnapore, Pooree, and the 24-Pergunnahs. In *Government estates* the collections were even better, being 104 per cent. on the current demand, but the outstanding balance is still very heavy, being 19·35 per cent. on the total demand, which was Rs. 31,42,188.

Under the *Sale Law* the proportion of estates actually sold to the number liable to sale was only 9·3 per cent. The estates not sold were exempted in almost every instance on account of the payment of revenue after the latest day fixed for that purpose although on or before the day of sale; but it is considered that too much is left to the discretion of individual Collectors, who have very little to guide them, and during the year a Bill was framed and circulated for opinion which has for one of its objects the framing of conditions under which payments made after the latest day of payment and before the day of sale may be received. The total number of *certificates* filed during the year was 166,951, against 169,072 in the preceding year, and the number pending was reduced from 105,204 at the beginning of the year to 92,553 at its close. The number of cases in which it was necessary to have actual recourse to sale increased from 5,735 to 5,848. The *registration of mutations* under Act VII of 1876 made satisfactory progress. Completion reports were received from the 24-Pergunnahs and Chittagong, and the initial work of registration is now practically complete in all districts except Moorshedabad, Cuttack, Pooree, and Balasore. During the year 50,440 applications were filed under section 12 of the Act, which represents a percentage of 5·2 on the total number of interests registered under initial registration, and is a decided improvement on the percentage (4·6) of 1888-89. The number of *partitions* effected increased from 579 to 624, but the number of cases disposed of in the Patna Division still fell short of the number of cases instituted. The cost of *land acquisition* proceedings was high, being Rs. 393 an acre as compared with Rs. 163 in the preceding year. The number of acres acquired was 4,448, and was chiefly for railway projects.

Regarding the working of the *Bengal Tenancy Act* the Board observe that, judging from the year's experience, the Act appears to have worked smoothly; and that it may be remarked again that the flood of litigation which was foretold as likely to be one of the first results of the passing of the Act, has happily

not yet occurred. The sale of printed forms of receipt on the part of Government continues to be large, amounting to Rs. 12,87,625, although private presses issue the forms at cheaper rates and presumably do a much greater business, and these figures indicate that much is being done in the direction of silently establishing a record of existing rents where all was previously in confusion. The only part of the Act to which general exception has been taken on the basis of actual experience of its operation is that which enables those transferring tenures to give notice of the transactions to their landlords, and the force of the objection under this head has been much diminished during the year by the reduction in the number of such notices from 63,372 to 29,898. The relations between landlord and tenant are said to have been fairly satisfactory on the whole, and though petty instances of discord between the two classes occurred in some districts, serious manifestations of ill-feeling were not numerous. There were 52 applications for *survey and settlement*, against 40 in the previous year, and of these 17 related to Government estates, 6 to wards' estates, and 29 to private estates.

CUSTOMS.

The net receipts from *Customs duties* showed a slight increase of .023 per cent. over those of the preceding year, which was, however, almost entirely due to the duty of 6 pies per gallon on mineral oil, which yielded an increase of two and-a-half lakhs of rupees, or of 43 per cent., as compared with the year 1888-89; for there was a general falling off in the imports both from foreign trade and from coasting trade, and owing to a rise in the price of rice; the export trade in that article and the duty derived from it also fell off. The falling off in the import duty on salt is attributed to the prejudicial effect which the action of the Salt Syndicate has had on the Liverpool trade, in consequence of which a larger quantity of salt was imported from Hamburgh and other places, and there was also an increased consumption of salt manufactured in India. The total receipts of the Customs Department increased from Rs. 2,67,70,664 to Rs. 2,68,61,674, and the charges from Rs. 9,26,419 to Rs. 9,42,537, so that the net revenue increased from Rs. 2,58,44,245 to Rs. 2,59,19,137.

OPIUM.

The number of *Opium* chests sold was, as in the two previous years, maintained at 57,000, as, in view of the extension of opium cultivation in China, it was not considered desirable to increase the quantity, nor, on the other hand, was it advisable by a reduction to run the risk of losing our hold on the Chinese market. As, however, there had been a succession of bumper harvests, there resulted an accumulation of chests in stock, and a reduction in the area under cultivation was therefore resolved on and carried out in the year under review. In addition to this the outturn was still further reduced by the partial failure of the crop, as heavy showers and hailstorms in February swamped the tender plants, while damp and cloudy weather materially checked their growth, and the high temperature and strong winds which prevailed most inopportunistically in the early part of the month of March, immediately after collection of the juice had commenced, scorched and very injuriously affected the secreting powers of the capsules. The quantity of opium produced consequently fell from 1,23,043 maunds to 67,734 maunds, and the number of chests manufactured fell from 72,614 to 41,689. This reduction, it is

estimated, will have the effect of reducing the number of chests in reserve from 49,705 chests on the 1st January 1890 to 31,010 on the 1st January 1891. As the cultivators are paid according to the quantity of opium produced, there was also a corresponding diminution in the net expenditure from Rs. 2,71,44,048 to Rs. 1,56,11,817, a difference of Rs. 1,15,32,231. The average price realized per chest increased from Rs. 1,119-15-11½ to Rs. 1,135-11-5, and as, for the reasons already stated, there was a large decrease in the expenditure, while the number of chests sold remained the same, the *net revenue* realized amounted to Rs. 4,92,93,761, being Rs. 1,07,69,571 in excess of that of the previous year.

SALT.

The receipts under *Salt* amounted to Rs. 2,29,04,994 and the charges to Rs. 3,02,386, giving a net revenue of Rs. 2,26,02,608. As compared with the previous year, these results show a decrease of one per cent. in the receipts, an increase of 13 per cent. in the expenditure, and a decrease of 12 per cent. in the net revenue. The figures, however, do not include the duty on salt manufactured in other provinces, but consumed in Bengal. There was an increase in the receipts from rent of warehouses from Rs. 53,998 to Rs. 90,100, due to a reduction in the rate of rent from Rs. 5 to Rs. 3 per 1,000 maunds which was made in 1887, and at first led to reduced receipts, but has in the long run fully justified the change of policy then introduced. Further facilities will be afforded to bonders by the erection of pontoons in front of the golahs, and by connecting them by a shunting line with the Howrah railway station. The action of the Salt Syndicate has been very prejudicial to the Liverpool trade, the exports from the United Kingdom having decreased from 83 to 70 lakhs of maunds, while there has been an increase in the imports from Hamburg, Aden, and the Arabian and Persian Gulfs. A noticeable fact in connection with the trade is the large increase in steamer traffic. Three years ago the whole of the salt imported came in sailing vessels, but during the year under review 27 vessels brought 10,51,557 maunds. As regards illicit manufacture and sale, it may be noted that the proportion of seizures to unsuccessful searches was not so good as last year, but the actual number of seizures showed a very large increase. The proposal made in the previous year to extend the Salt Act to the whole of the province was abandoned, but the Act was extended to the town of Calcutta as well as to the area included in a radius of two miles from its limits, and the control of the saltpetre refineries within this locality was entrusted to the Commissioner of Northern India Salt Revenue.

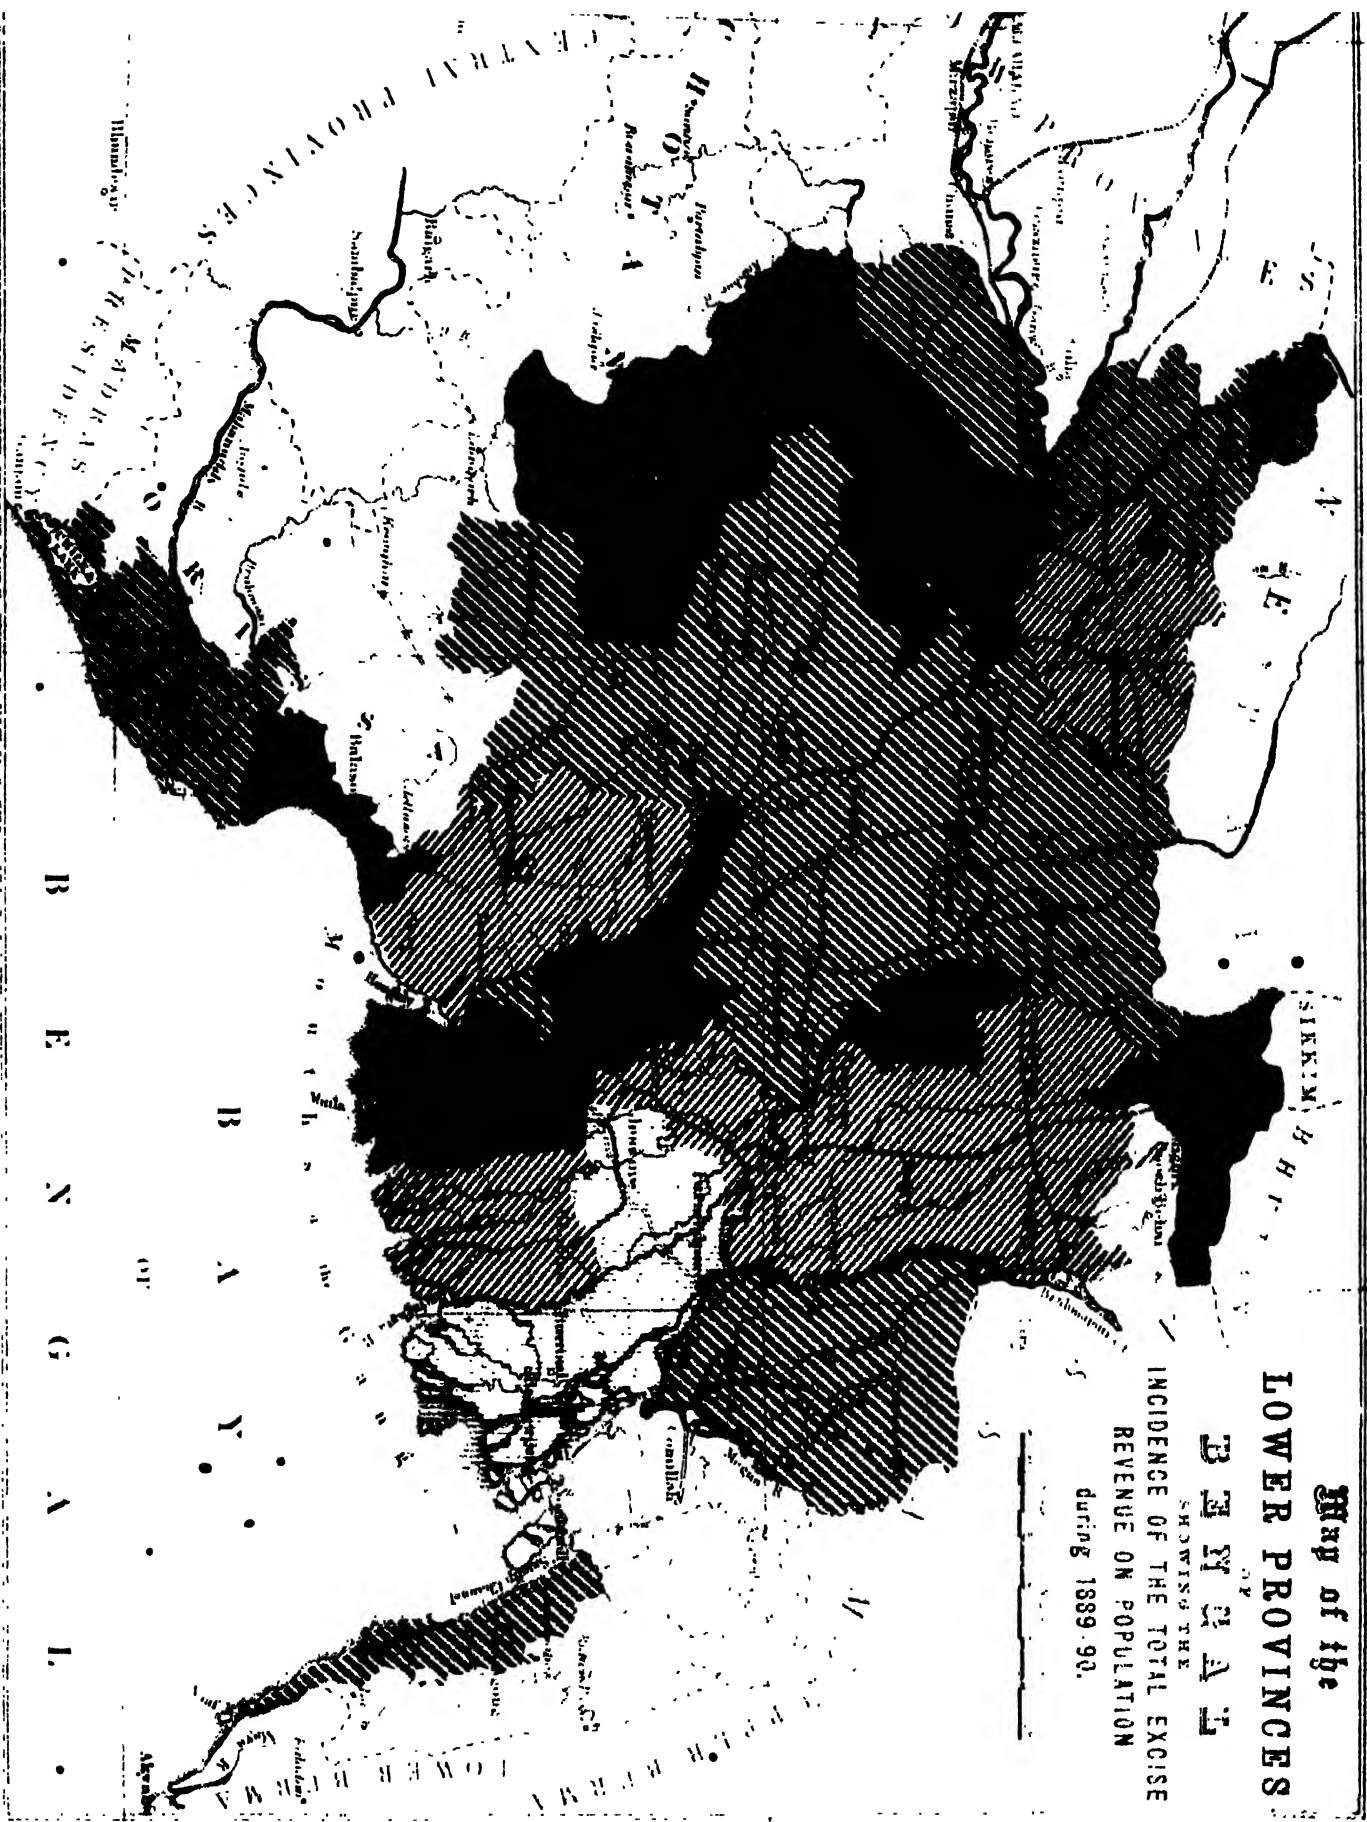

EXCISE.

The excise policy of the Government of Bengal is based upon the following principles: that any extension of the habit of drinking is to be discouraged; that the tax on spirits should be as high as may be possible without giving rise to illicit methods of making and selling liquor; and that, subject to these considerations, a maximum revenue should be raised from a minimum consumption of intoxicants. Most important action has been taken in this direction under Sir Steuart Bayley's administration, and especially during the past year, which was an eventful one in the history of Bengal excise.

No pains have been spared to improve the outstill system where outstills are retained. In the face of all the difficulties which must ever accompany the introduction of radical changes, it cannot be said that all the restrictions recommended by the Bengal Excise Commission have been successfully imposed; but it is undoubted that great improvements have been effected; that the distiller is not free to brew as much spirit as he likes and sell it whenever he likes; and that the levy of duty as well as the conditions both of distillation and sale are carefully regulated with reference to the existing local demand. A system of regulated outstills has been organised, and, as the Excise Commission were careful to explain, if the producing capacity of outstills is limited and the revenue paid on each outstill is calculated in proportion to its capacity, there is little real difference in principle between such a system and the system of central distilleries.

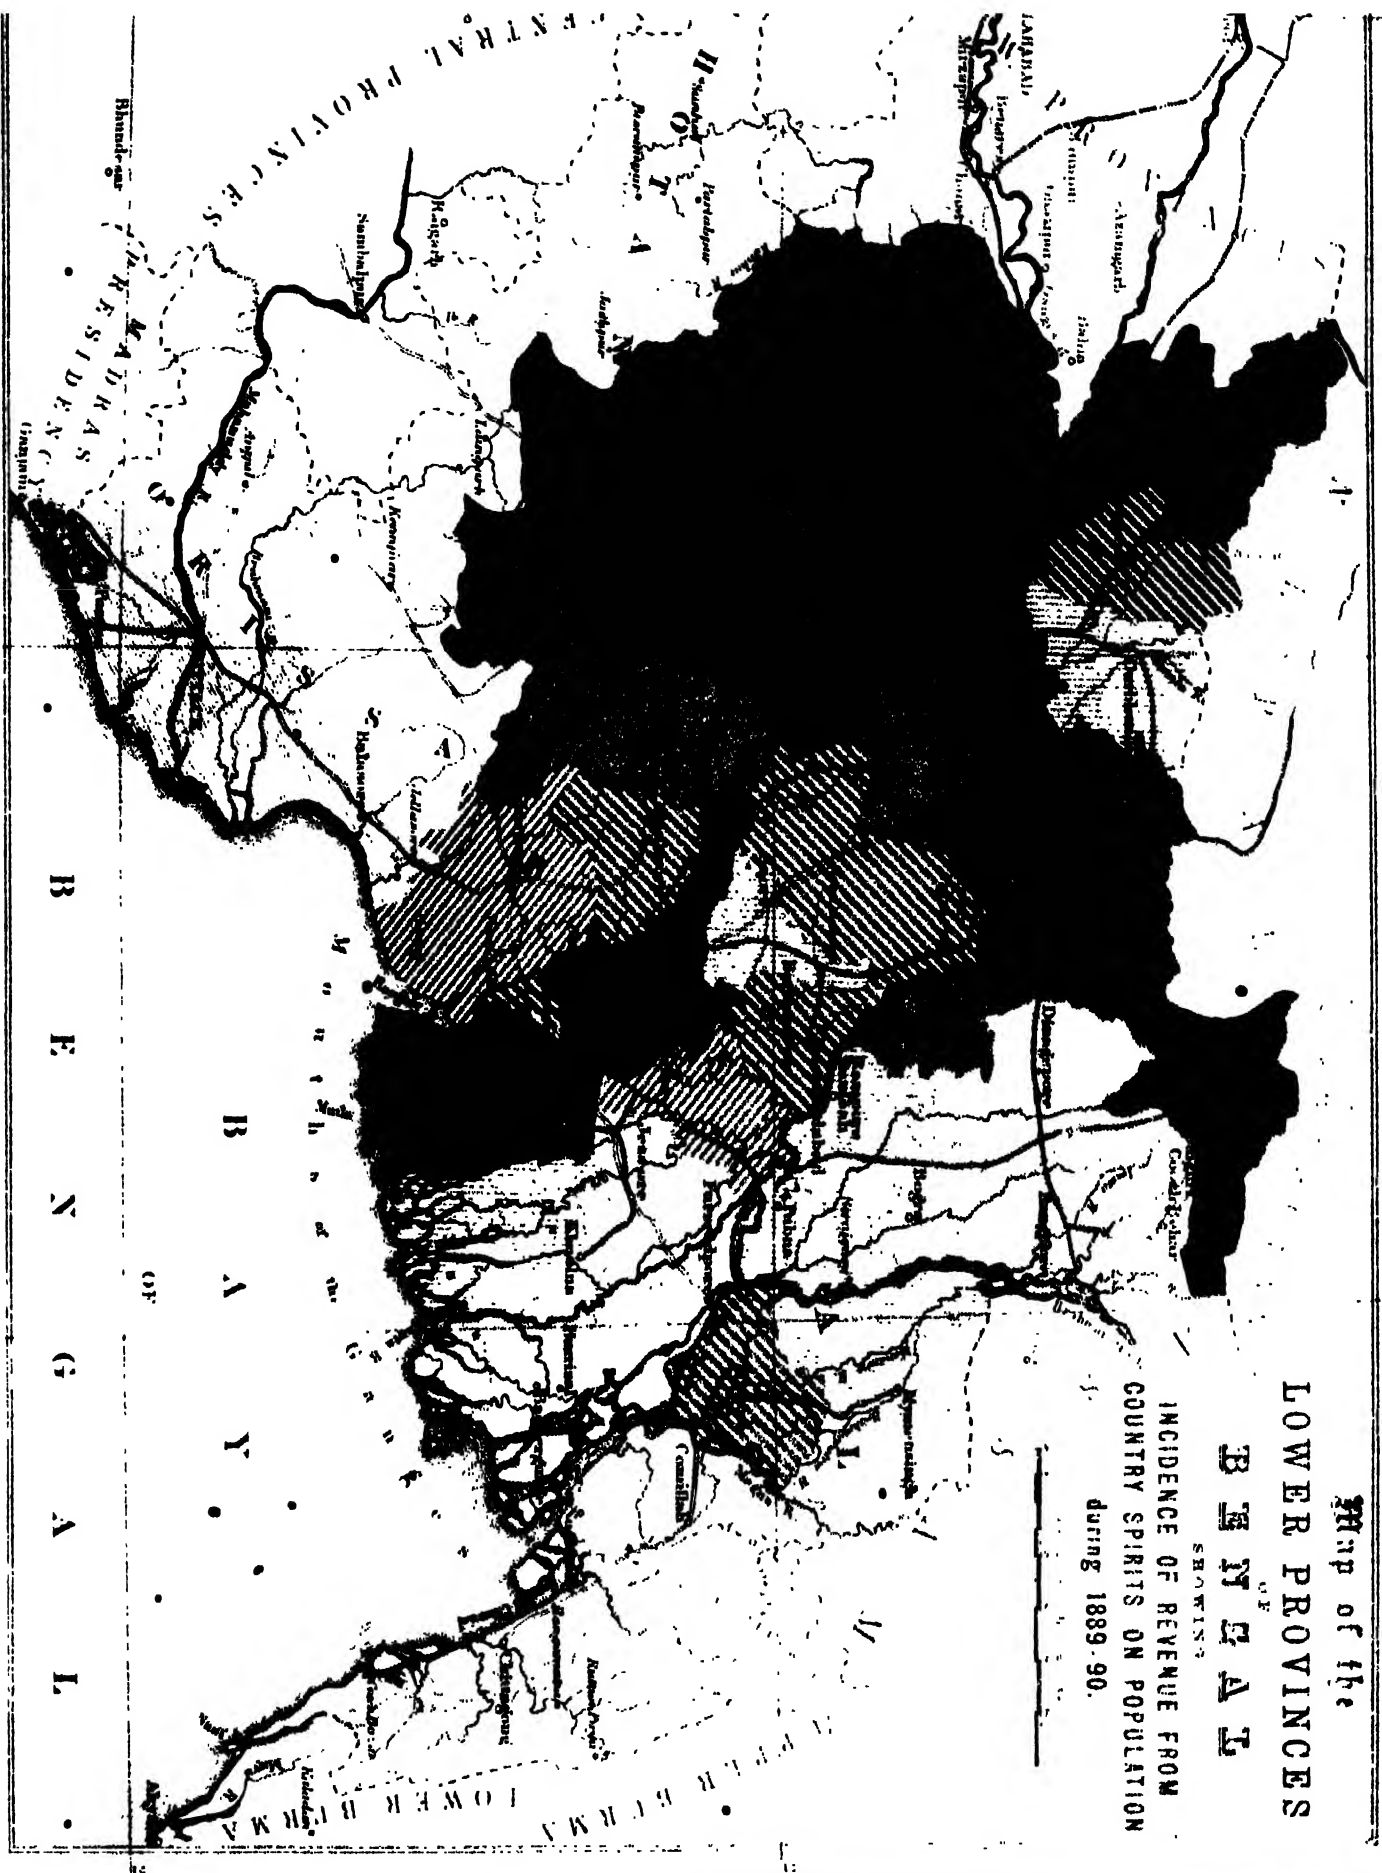

The total revenue derived from outstill license fees decreased during the past year from Rs. 31,34,561 to Rs. 27,74,925. As the fees are being gradually raised so as to force the retail price of liquor up to the price fixed by the distillery rate of duty for each district, the distillers in many cases refuse to accept settlement. It was, however, always anticipated that the policy now adopted would entail an immediate loss of revenue, and the deliberate intention throughout has been to force the abkars to increase their retail prices and so reduce consumption. If this result is attained, a temporary loss of revenue is comparatively a small matter; and unless the demand for liquor has been artificially stimulated by an undue cheapening of outstill liquor, as compared with the price maintained by distillery spirit, it is certain that the normal demand will re-assert itself and the revenues will recover. Unfortunately the effect of bad seasons has rendered the influence of these changes on the revenue more conspicuous than they would otherwise have been.

In regard to the extension of the central distillery system, the Lieutenant-Governor has declared on more than one occasion that it must be distinctly understood by the Excise Commissioner and by all officers concerned with the administration of excise in Bengal that the policy which has received the approval of the Secretary of State and of Government is, that the outstill system should be replaced by a central distillery system whenever circumstances render it expedient; and, speaking generally, the only circumstances which render the change inexpedient are sparse population, difficulties of supervision, proximity to alien territory, and a liquor which will bear neither transportation nor keeping. It is not intended that outstills should be suppressed in localities where experience shows that no other system can be advantageously introduced, and it will not be possible to work up the central distillery system in Bengal to the extent attained in some other provinces. One-half of the Bengal revenue from country spirits, and outside Calcutta much the greater part, is derived from a tract of country where the principal material used for the manufacture is the flower of the mohwa tree, and the spirit so made will not bear transport, and rapidly deteriorates when kept. It is of the weakest possible description, being 80 or 90 per cent. below London-proof. Such spirit must be manufactured near the place where it is consumed; and this, if there were no other objection, is a conclusive reason why a central distillery system cannot be successfully introduced into the rural parts of Behar and Chota Nagpore. The people are accustomed to this weak liquor, and will only drink it when it is fresh. It would no doubt be possible, as is done in Bombay, to manufacture a pure and strong spirit from the mohwa flower;

but this would not be the liquor at present consumed, and any scheme which would replace a weak liquor by a strong one is opposed to the first principles of excise administration. In Bengal the number of central distilleries must always be limited. The failure of the old system of distilleries was largely due to their excessive number—which at one time was 220—and to the consequent impossibility of exercising proper supervision over them. It has now been deemed advisable to have central distilleries only at the head-quarters of districts where they can be thoroughly watched by responsible officers, and in some cases arrangements have been made for the establishment of depôts or warehouses at subdivisional head-quarters from which shops remote from the distilleries can be supplied with liquor.

From the 1st April 1889, outstills were abolished throughout the whole of the district of the 24-Pergunnahs as well as in Howrah and the Serampore subdivision of Hooghly. From the 1st April 1890—with effect, that is, from the current year—they have been abolished throughout the whole of the Burdwan, Presidency, Dacca, and Orissa Divisions. The total revenue realised under the central distillery system during the past year, notwithstanding the extension of the distillery area, was only Rs. 19,32,207, against Rs. 19,55,754 in the previous year, while the statistics of consumption show a large decline from 1,057,119 to 853,259 gallons. The explanation of this decrease is that the year was one of general depression and bad trade.

Special rules have been issued and published for general guidance on the subject of the selection of sites for excise shops: distinct instructions have been given to ascertain and consider local opinion, and it has been ordered that where municipalities exist, the Municipal Commissioners should be consulted in determining the location of shops. The question of the location of shops in the vicinity of tea gardens is one of special difficulty and importance. A most careful and exhaustive enquiry into all the facts was instituted under the orders of the Secretary of State, and the papers then submitted afford conclusive evidence of conscientious and successful endeavours to organize the excise administration in tea districts on a sound basis. In some cases sites have been abandoned in deference to the objection of tea associations, and special arrangements have been sanctioned to prevent the importation of smuggled liquor.

The total revenue from excise fell during the year from Rs. 1,08,88,973 to Rs. 1,04,73,426, while the charges increased from Rs. 4,32,765 to Rs. 5,18,739. The consumption of ganja decreased from 6,413 maunds to 6,101, and of abkari opium from 1,925 maunds to 1,905. In the beginning of the year an Excise Commissioner was appointed and 7 Special Deputy Collectors were sanctioned, bringing the total of such officers up to 21.

STAMPS.

The total *stamp revenue* increased from Rs. 1,38,38,985 to Rs. 1,42,37,769, and as the charges increased by only Rs. 12,541, the net revenue increased from Rs. 1,32,23,282 to Rs. 1,36,09,525. On the total revenue 72·7 per cent., or nearly three-fourths, is raised under the Court-fees Act (VII of 1870), and the remainder under the Stamp Act (I of 1879). The net revenue has steadily increased from year to year, but this is no doubt largely due to the increased facilities afforded for criminal and civil justice by the opening of new courts, &c., the charges for which are not shown under this head. The incidence of the revenue was highest throughout Eastern and Central Bengal, where trade is brisk and the

population most prosperous. The number of prosecutions instituted was 741, the average of the preceding three years having been 858. The amount of rewards paid has in the same time very largely increased, but an examination of the statistics of the different districts does not show any connection between the amount of rewards and the number of cases. The Board drew attention to the fact that in a number of districts no reward at all was disbursed.

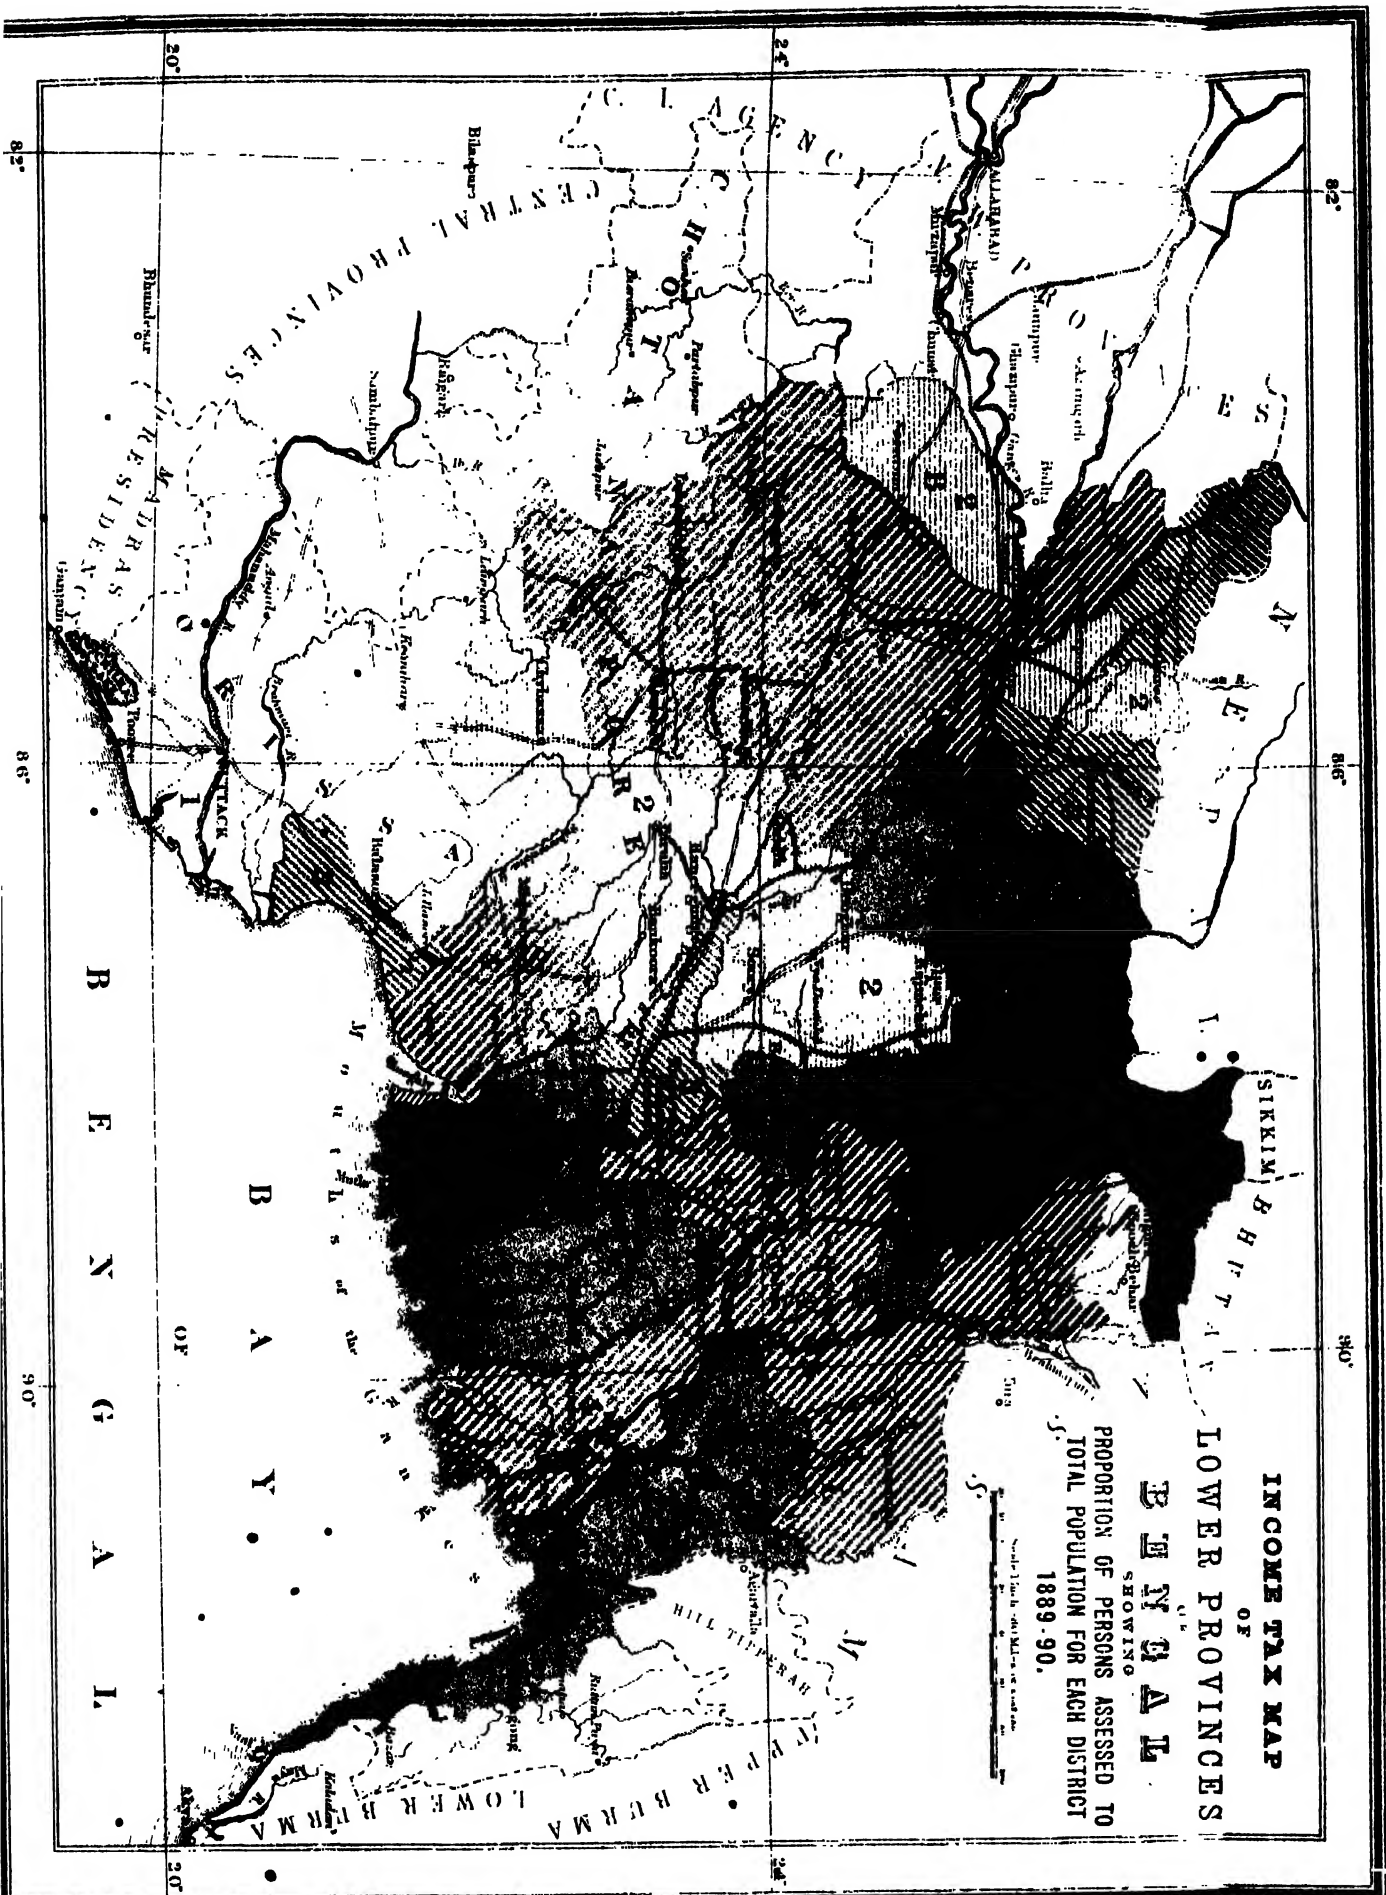

INCOME-TAX.

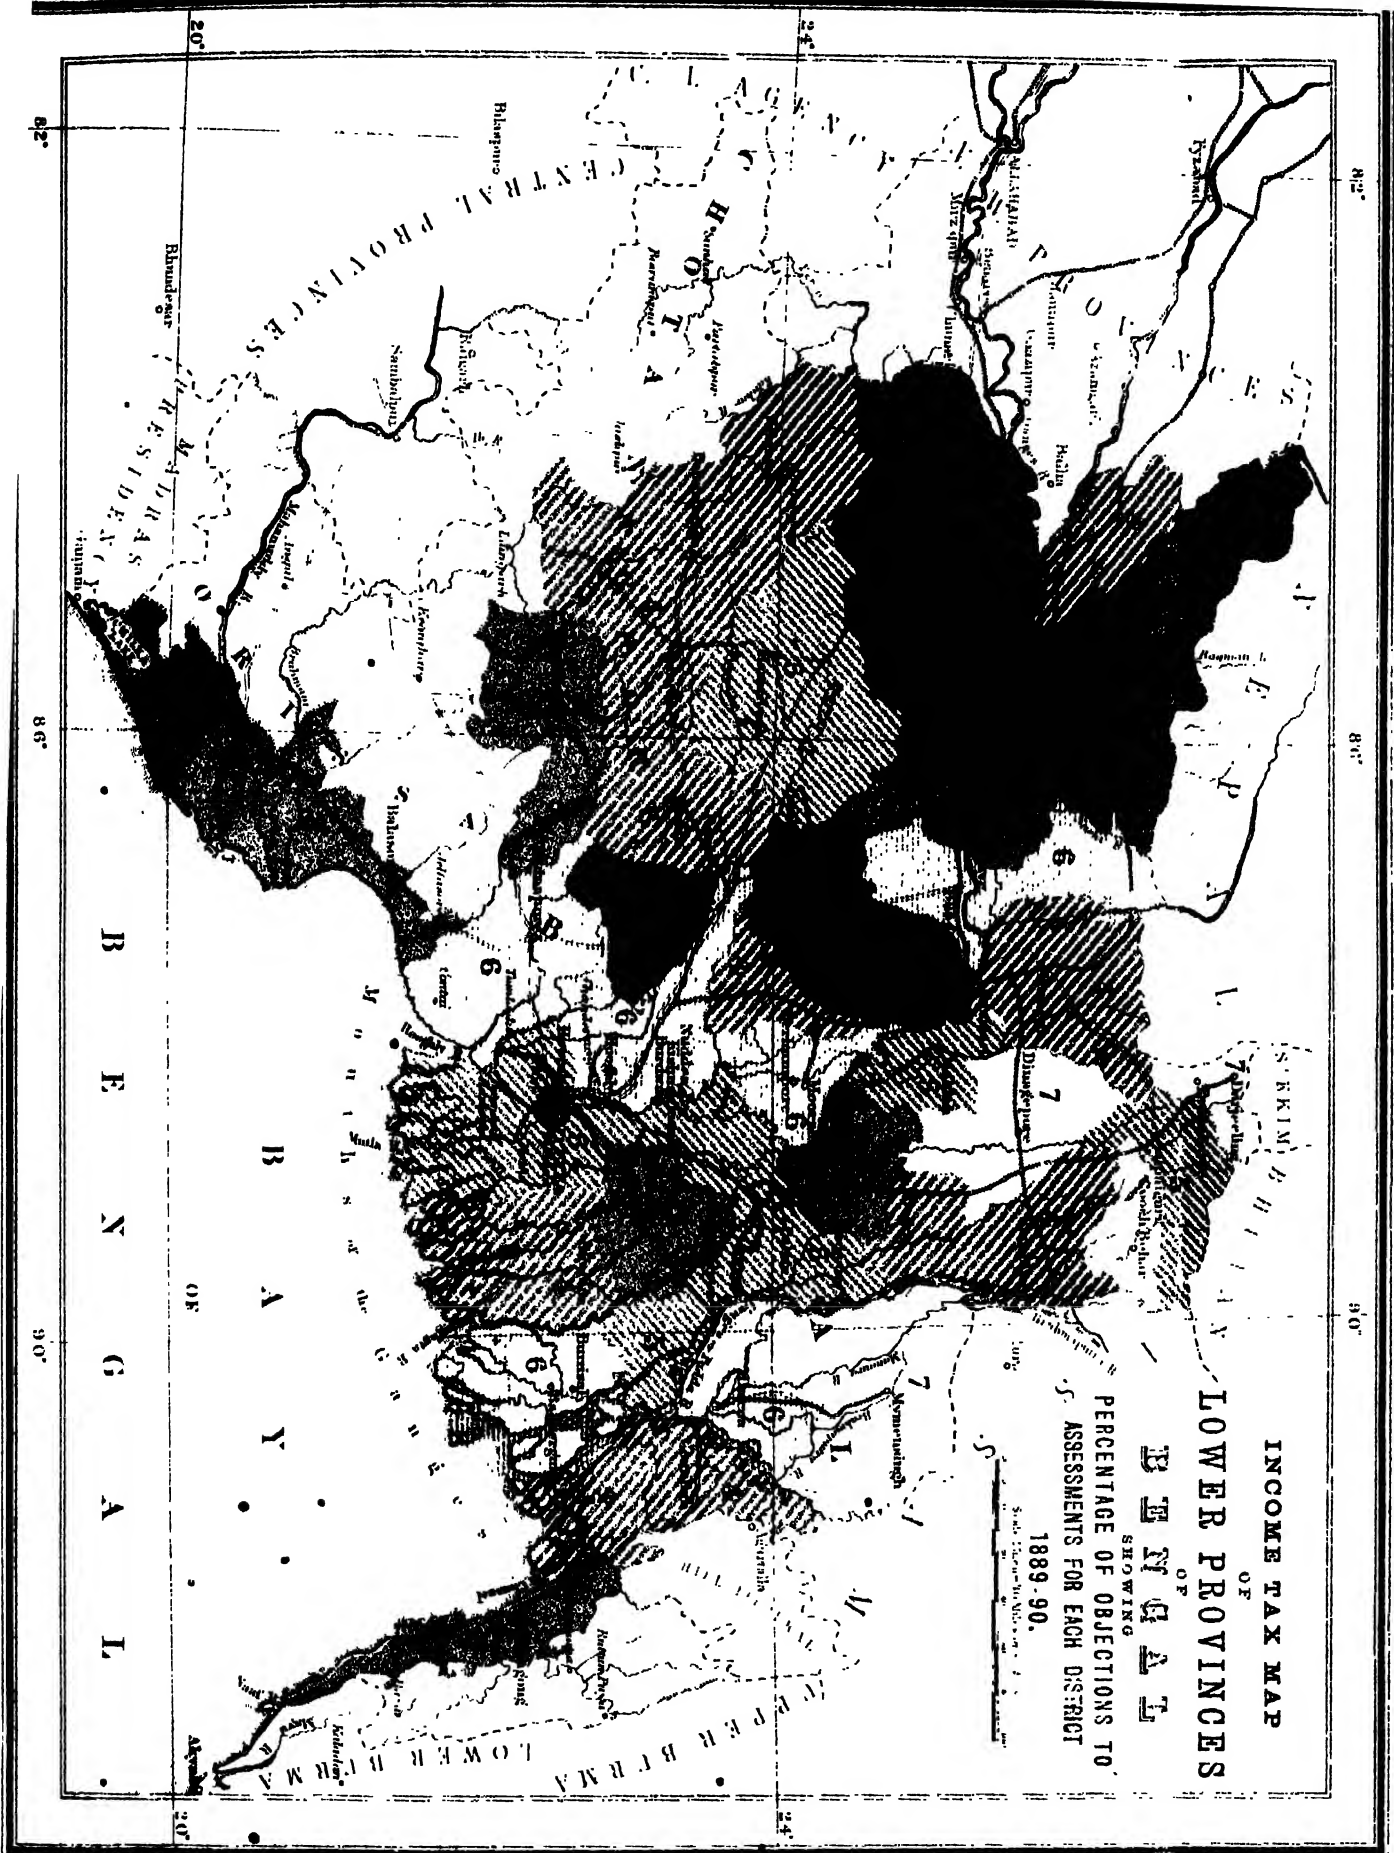

The total *demand* for the year on account of income-tax increased from Rs. 42,41,806 to Rs. 44,89,476. By far the larger portion of the increase was contributed by Calcutta, which pays nearly one-half of the entire tax. The total *collections*, exclusive of advance payments and excess collections, amounted to Rs. 41,44,257 against Rs. 38,88,388, and the net revenue was Rs. 40,00,020, an increase of 6·1 per cent. as compared with the previous year. In six districts the entire demand was collected within the financial year. Petitions of objection decreased from 16,770 to 15,027, and of the latter number 6,361, as against 6,934 in the preceding year, were successful. The most satisfactory feature about the tax, however, is the steady decline in the number of cases in which coercive measures are necessary, the improvement being very great in Calcutta, where only 112 distress warrants were issued, against 1,243 in the preceding year. The number of cases in which actual sale was resorted to showed a slight improvement, and fell from 272 to 267. Exclusive of the assessments on the salaries of Government servants and on Government securities, the *average incidence* of the tax was Re. 1 on every 17·9 persons, against 18·7 in the preceding year, and the proportion of the number of persons assessed to the whole population was 1 to 650. The largest contributions to the tax were paid by money-lenders and changers (14·6 per cent.), Government servants from salaries (10 per cent.), and general merchants (9·3 per cent.).

VITAL STATISTICS, SANITATION AND VACCINATION.

Births were registered in 137 municipalities of which the aggregate census population was 2,422,994. The ratio of registered births was 22·76 per thousand, the ratio of male births being 12·05 and that of female births 10·70. The registered death-rate was 25·03 per thousand. In both cases the registration shows an improvement over the preceding year, the birth-rate having risen from 20·63 to 22·76, and the death-rate from 24·86 to 25·03; but it is obvious that in neither case is it sufficiently reliable to enable any certain conclusion to be drawn; for as regards births the rate is exceeded by the death-rate, and as we know from the census returns that the population is increasing, it is obvious that the registration of births is even more defective than that of deaths; while as regards deaths the differences in municipal areas, where the recorded rates are higher and almost certainly more accurate than those of rural areas, are so great as to be irreconcilable on any other supposition than that they are in many cases extremely defective; and it follows, therefore, that the registration in rural areas is still more so.

There were 171,103 registered deaths from cholera, against 111,391 in 1888 and 172,578 in 1887, the mortality being greatest in the districts of the Orissa Division, which was due not only to the usual cause—the influx of pilgrims—but also to the scarcity, bordering on famine, of which an account is given

- " 3 to 4
- " 4 and upwards

under the head of Flood and Famine Relief. The number of deaths from fever was 1,101,521, against 1,092,102 in 1888 and 889,281, the average of the ten years before that. It is probable that this result is due to improvement in registration and increase in the population rather than to greater unhealthiness of climate. The total number of deaths from small-pox was .13 per mille, which is exactly the average of the five years 1883-87, the death-rate in 1888 having been .09 per mille.

After the close of the year a *Sanitary Board*, consisting of Sir Henry Harrison, Member of the Board of Revenue, as President, and Colonel McNeile, Chief Engineer and Secretary to Government in the Irrigation Branch of the Public Works Department, and Dr. Gregg, the Sanitary Commissioner, as members, was appointed, and a whole-time officer was placed at the disposal of the Board as Sanitary Engineer. This Board will be the executive agency through which the Government will act in the Sanitary Department, and it is hoped that, if judiciously worked, it will exercise a powerful initiative and a valuable control in all departments of sanitary work.

The total number of *vaccine operations* was 1,805,470, being a decrease of 40,699 as compared with the preceding year. The total cost was Rs. 1,72,696, or Rs. 4,906 more than in the year 1888-89.

EMIGRATION.

During the year 1889 requisitions for labourers were received from seven colonies, viz. Demerara, Trinidad, Mauritius, Natal, Fiji, Surinam, and Guadelope; and the number of adults actually despatched was 10,041, which is the largest number since 1884-85, the last big emigration year before the decline of the sugar industry. This increase is attributed not so much to a revival of the industry as to the fact that the Colonies, owing to the uncertainty of its future, have for the last few years been recruiting below their requirements. The number of recruiters rose from 511 to 717. From the Colonies 5,102 emigrants were reshipped, and they brought with them as usual very large savings, viz. Rs. 6,67,327-10-4, which gives an average of Rs. 131-0-10 for each emigrant. Two questions of some importance came under the notice of the Lieutenant-Governor during the year. The first is that coolies are brought to Calcutta without the initial registration of contract required by the Colonial Emigration Act under pretence that they will be sent to Assam when the real intention is to ship them to the Colonies. Legislation will be required to remedy this evil, and the matter is under consideration in connection with the amendment of the Inland Emigration Act (I of 1882). The other question is the practice of the Colonies of returning to India emigrants who have contracted leprosy in the Colonies. The Lieutenant-Governor is not disposed to accept the position that the Colonies should be allowed to return such emigrants.

The statistics of *inland* emigration show that the total number of emigrants to Assam was 57,058, a larger number than in any year since the passing of Act I of 1882, but that in spite of this increase the number recruited under the Act has continued to fall off. This change, by which unregistered emigration is taking the place of recruitment under the Act, has been observed for some years, and has brought into greater and greater prominence the necessity of supervising the traffic and affording sufficient protection to all emigrants. Much was done in this direction during the year under review. Act I (B C.) of 1889 was passed, and under it a certain amount of sanitary supervision is

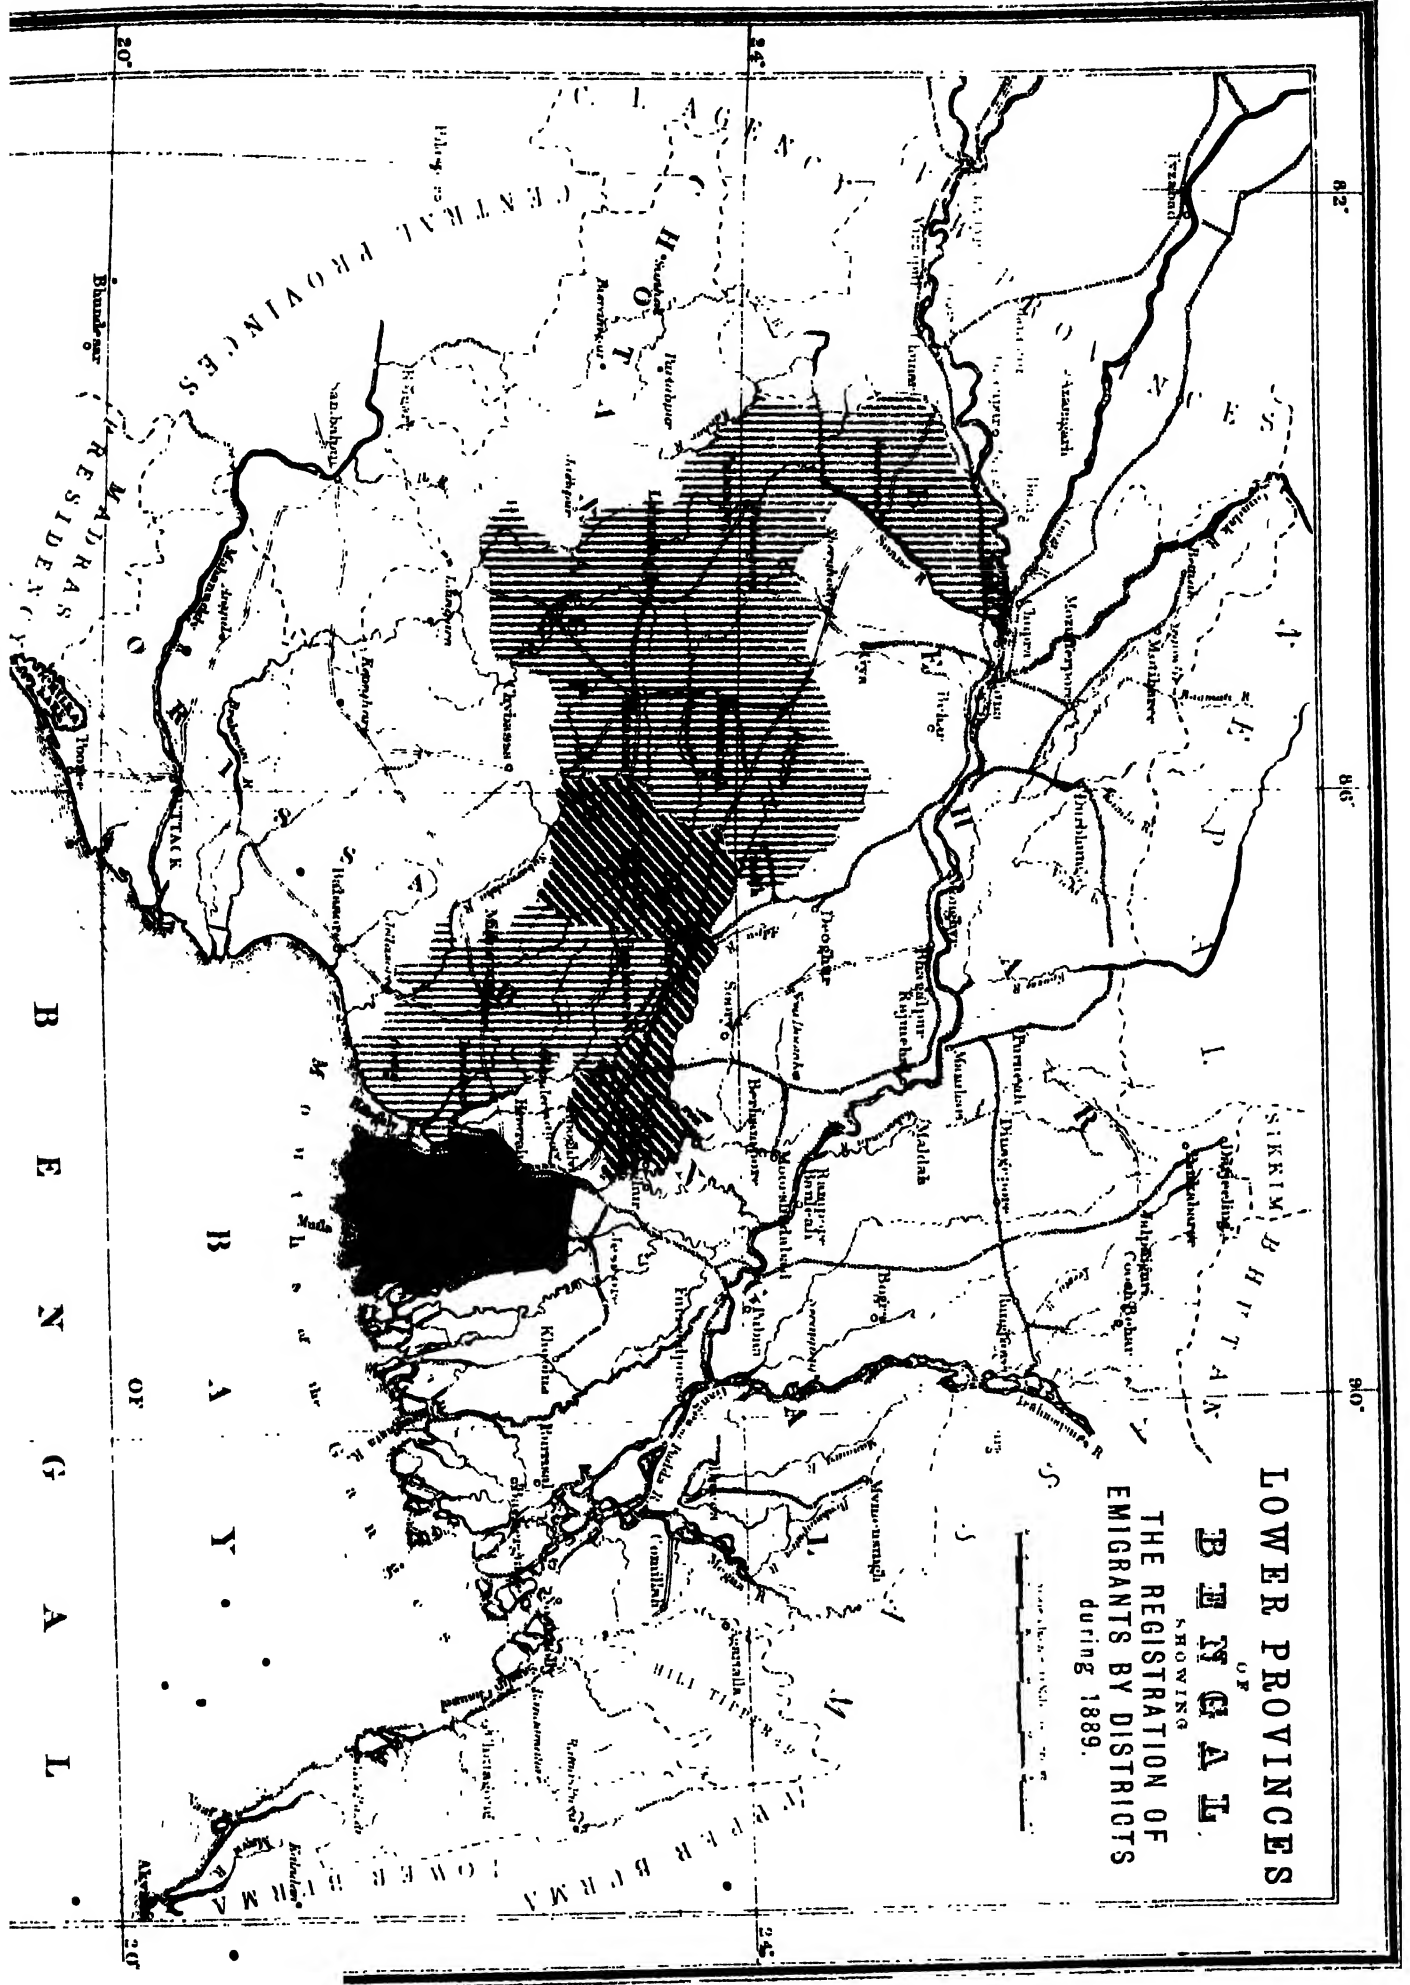

now exercised; the sanitary defects of the depôts at various places were remedied; cholera hospitals were established and wells were dug; improved arrangements were made for medical supervision; and in various other ways provision was made that the traffic might work more smoothly and with less danger to the emigrants. In addition to this a special officer was placed on special duty for the purpose of enquiring into charges of fraud and kidnapping, and a number of persons were brought to trial and received severe sentences for abduction and other cognate offences.

MEDICAL RELIEF.

Owing to recent changes in the boundaries of the suburbs the figures relating to this area cannot be accurately compared with those of former years, but it may be stated generally that there was no great increase or decrease in the recorded mortality, and that there was a marked diminution in the number of deaths from cholera. The number of cases treated at the Calcutta hospitals fell from 253,706 in 1888 to 221,540, and the death-rate rose from 124·05 to 126·13. The increase in the number of indoor patients was very considerable in the Campbell Hospital, which is resorted to by paupers, and this is attributed to the high prices of food-grains. In the Mayo Hospital there was a very large falling off in the number of outdoor patients, due to the institution being closed on Sundays. The number of women and children treated in the various institutions fell from 36,030 and 59,404 respectively in 1888 to 31,338 and 51,439 in 1889, which is said to be due to the successful management of the Lady Dufferin Hospital. The results of *surgical operations* were satisfactory. The number of major operations rose from 1,719 to 1,926 and that of minor operations from 20,264 to 20,933, and the death-rate was only 39 a thousand as compared with 46 in the preceding year. In the Eden Hospital, owing to the building having been under repairs, there were fewer patients, but the results were satisfactory. The income of these institutions, inclusive of the opening balance, amounted to Rs. 5,21,390, out of which the sum of Rs. 3,46,858 was contributed by Government. The total expenditure was Rs. 5,01,970 against Rs. 4,27,082, and the invested capital decreased by Rs. 8,500.

The number of patients with their relatives and attendants admitted into the *Eden Sanitarium* showed the same steady increase as in former years, the number being 492, against 443 in the previous year and 428 in the year 1887. Most of the patients admitted were suffering from malarious and other fevers, debility, diarrhoea, and dyspepsia. The average number of patients in the Sanitarium during the nine months it was open was 37·85, against 39·17 in the previous year, the decrease being due to the fact that the season was a shorter one than usual, as the first patient did not arrive until the 16th March, and the last patient left on the 16th November. For the same reason the receipts from patients fell from Rs. 33,579 to Rs. 32,613; but as the expenditure also fell from Rs. 35,778 to Rs. 31,923, there was a surplus at the close of the year, and for the first time the institution was really able to pay its way—a most satisfactory result. The Committee have now decided to provide four free beds in the third class from the beginning of the year 1890, and to place two of these at the disposal of the Superintendent of the Presidency General Hospital, and two at that of the Principal of the Medical College, Calcutta.

The number of *charitable dispensaries* in Bengal increased from 250 to 261, the number of patients from 1,132,451 to 1,208,824, the income from

Rs. 4,53,322 to Rs. 4,73,333, and the expenditure from Rs. 4,14,395 to Rs. 4,37,095. The number of *major operations* has increased rapidly in the last few years, and was 5,174 in 1889 as compared with 3,429 in 1885—an increase of over 50 per cent. Of this number, 1,558, or 30 per cent., were performed by Superintendents, against 659, or 19 per cent., in 1885. Inclusive of cases pending at the beginning of the year, but exclusive of cases the result of which was not yet determined at its close, the percentages of operations performed by Superintendents shown as cured, relieved, and fatal were 78·3, 9·6, and 3·3, as compared with 74·9, 10, and 5, the averages of the preceding four years; and in the case of medical subordinates the percentages were 80, 12·2, and 2·4, against quadrennial averages of 69, 10·4, and 2·4. The slightly better results in the latter case are probably due to the more critical operations being undertaken by the Superintendents themselves. The number of *minor operations* has steadily increased year by year, and stood at 60,988, which is an advance of 41 per cent. as compared with the year 1885.

The Inspector-General considers that nothing is more calculated to create confidence in these institutions than successful surgery, and the progress made in this direction is certainly satisfactory. The most common disease treated was as usual malarial fever, which accounted for nearly one-fifth of the total number of cases, after which came skin diseases, goitre, ulcers, worms, ear diseases, rheumatic affections, and eye diseases in the order named. The subscriptions from Europeans, which had been falling off for a number of years, showed a considerable increase, and there was also a large increase in the subscriptions received from natives. In discussing the question of leprosy the Inspector-General points out that the conditions under which the disease spreads itself have not yet been fully ascertained, and that the last census showed the number of lepers in British India to be no less than 131,968, so that it is possible the magnitude of the question may have been underrated, and he therefore recommends caution in dealing with it; and finally he compares the disease with phthisis, for which segregation has never been suggested.

There are five *Lunatic Asylums* in Bengal, the population of which stood on the 31st December at 987, as compared with 957 on the previous 1st of January. This increase in population has been going on for the last ten years, and the question of the sufficiency of the accommodation provided has therefore again and again been forced into prominence during that time. At first sufficient relief was obtained by transferring lunatics from the more crowded to the less crowded asylums, and by reapportioning the areas from which lunatics were sent to each asylum; but as the number still continued to increase, and as the sickness in the previous year was reported to be partly due to overcrowding, it was found necessary during the year under review to increase the accommodation of two of the asylums, and a proposal to increase the accommodation of a third was under consideration at its close. The cause of this increase has not yet been definitely ascertained, but the Inspector-General of Civil Hospitals has shown that it is entirely due to the increase in the number of criminal lunatics, the proportion of which is far higher than in other provinces; and he is of opinion that it is due to the manner in which the line is drawn between harmless and non-harmless lunatics, and he considers that in these provinces many are included in the latter class who elsewhere would be included in the former. The matter is being further enquired into. During the year 225 persons were admitted and 22 re-admitted, while 130 were discharged and 87 died. The total number of persons treated was

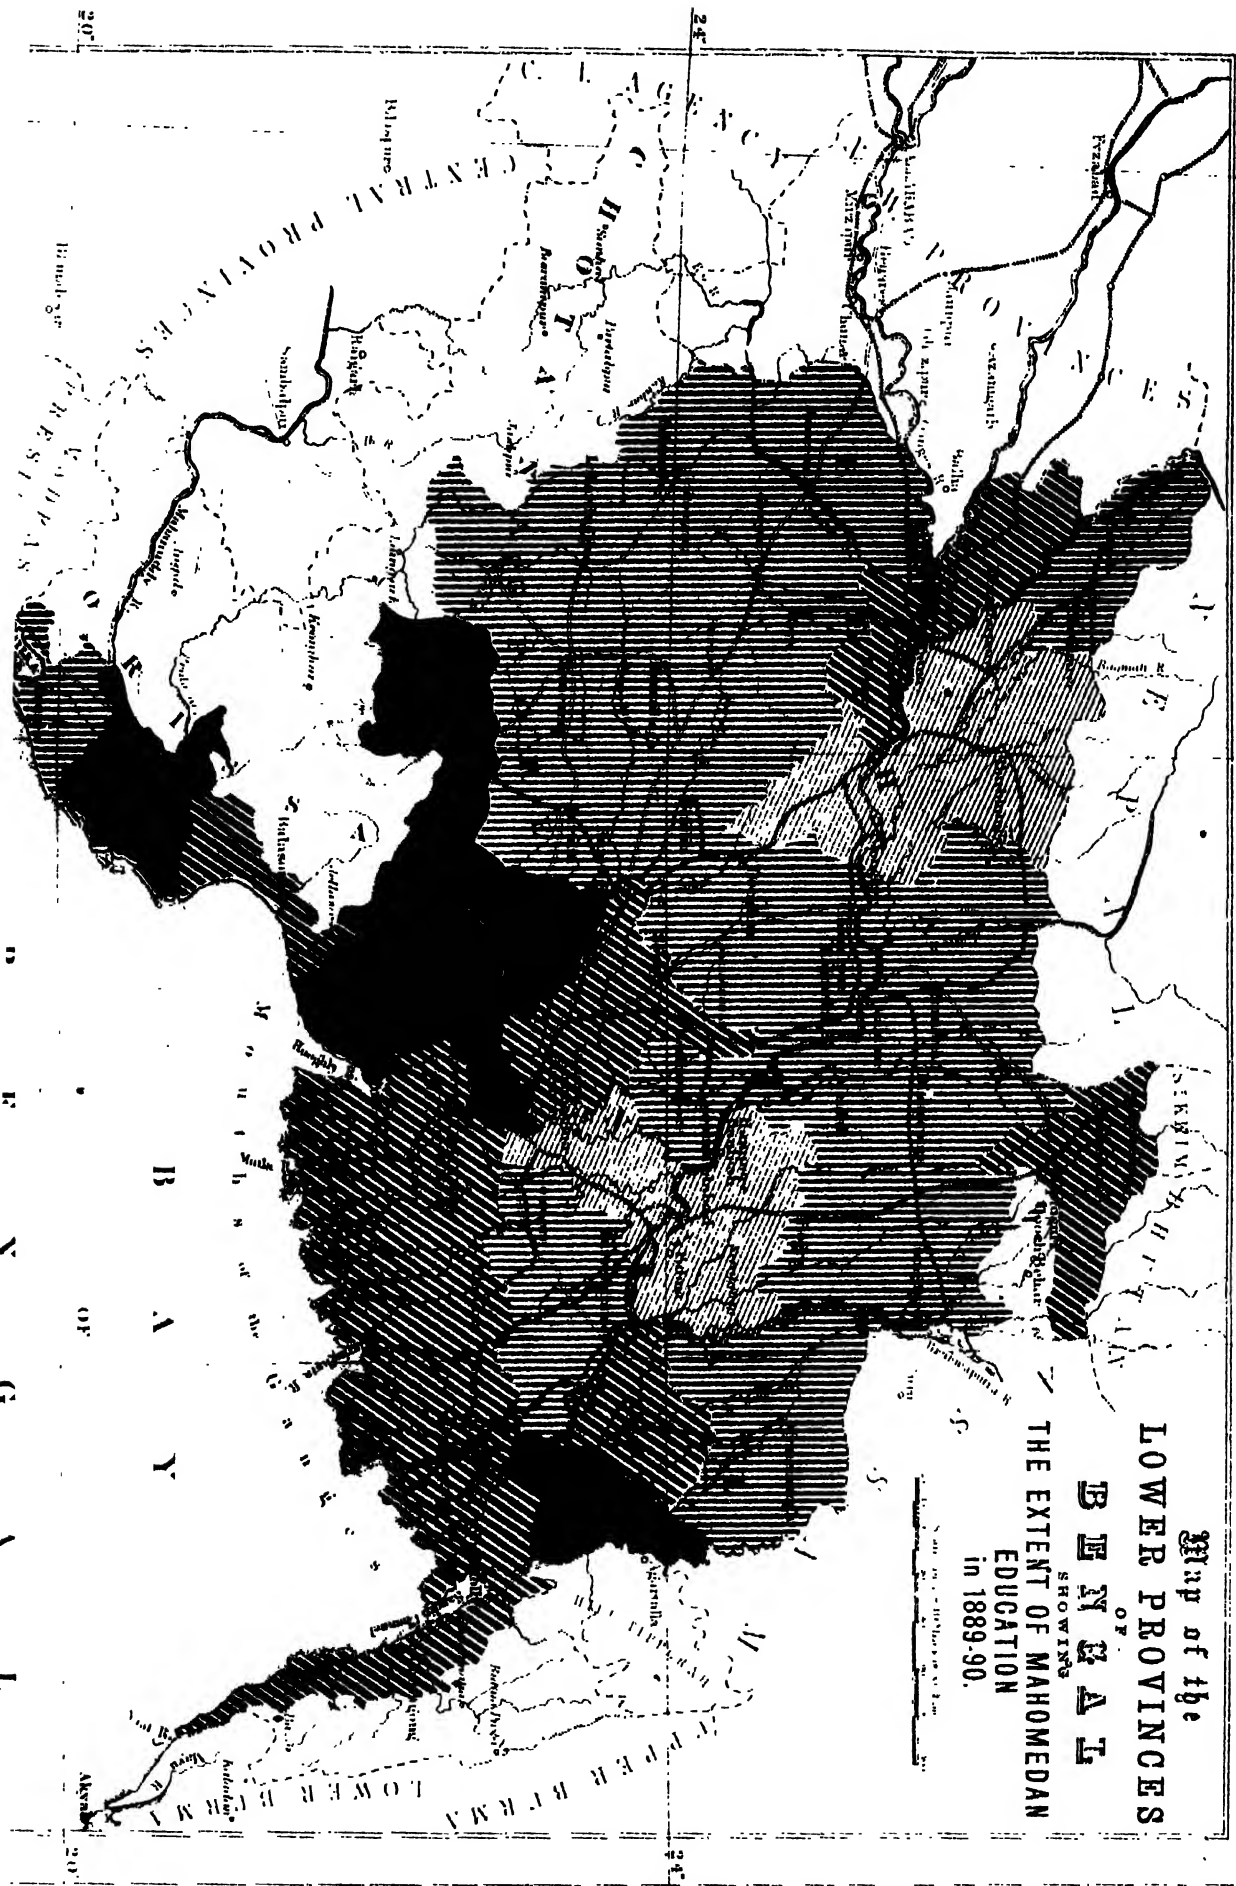

1,204, the daily average was 972·63, and the percentage of recoveries on daily average was 9·45, as against 7·18 per cent. in the previous year. The total cost of maintaining the asylums rose from Rs. 81,173·23 in 1888 to Rs. 90,076·3, and the cost per head of the average population from Rs. 87·0·4 to Rs. 92·9·9. The *European Asylum* at Bhowanipore contained 29 inmates at the beginning of the year and 33 at its close. The proportion of recoveries fell from 46·8 to 15·9 per cent., due, it is said, to the admission of a larger number of females, who suffer more frequently from the chronic and incurable forms of insanity. The receipts of this hospital amounted to Rs. 9,366 and the expenditure to Rs. 20,124, leaving a net expenditure of Rs. 10,758, as against Rs. 12,284 in the previous year, to be borne by the Government. This improvement is the more satisfactory, as ever since the hospital, which was originally a private one, was taken over by Government more than 33 years ago, its financial management has been a chronic difficulty owing to the displacement of paying by non-paying patients and to the tendency of paying ones to become non-paying as soon as they are once established in the asylum.

There was an increase from 2,613 to 2,977, or of nearly 14 per cent., in the number of analyses performed by the *Chemical Examiner*. Since 1880-81 the increase has been over 100 per cent. In addition to analyses, 9 reports on technical questions and 31 on applications for patents were submitted, and examinations of human viscera were made in 209 cases. In 48·3 per cent. of these latter cases poison was detected, opium being found in 50, arsenic in 29, and traces of other poisons in 22 cases. Sixty-three examinations for deleterious adulteration were made of spirit, but in every case with negative results, and it seems highly probable that the current ideas on the subject are erroneous. There is no doubt that drugs are added in some cases to the fermenting vats, but as their active principles are non-volatile, the distilled spirit is not affected.

EDUCATION.

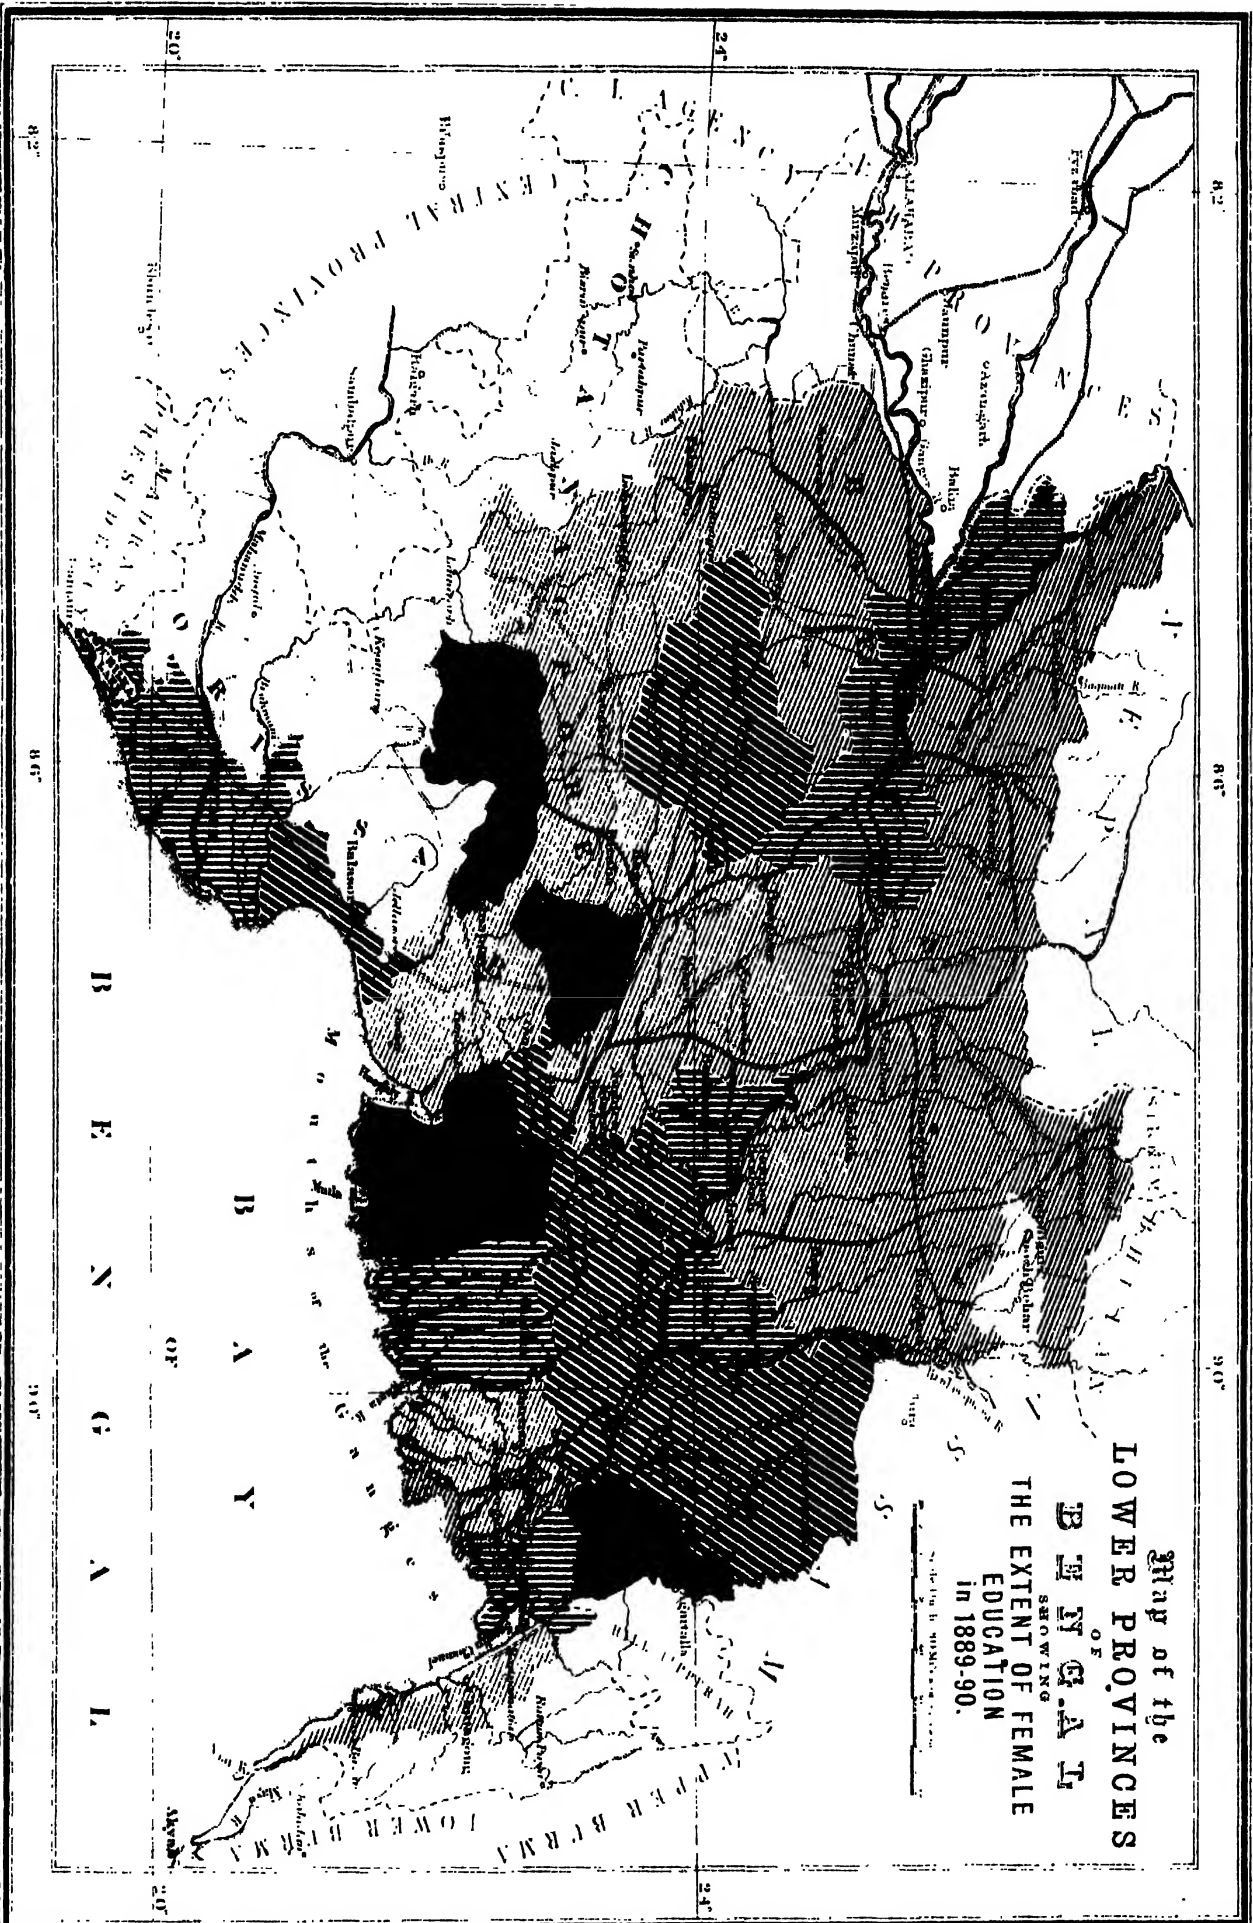

The most important change for many years in the *administration* of the Education Department has been the delegation to the District Boards constituted under Act III (B.C.) of 1885 of functions which include the management of Government primary and middle schools, the distribution of the grant-in-aid allotment for middle schools under private management, the administration of the primary grant, the conduct of the annual examinations of primary schools for rewards, and the award of lower primary scholarships. This change was carried out in 1886 and 1887, and no further movement was made in the same direction during the year under review, but the educational rules under the Act were revised, and new rules were promulgated immediately after the close of the year, defining more clearly the position of the Boards in relation to the Department, and removing obstacles to the harmonious working of the new administration. Also in accordance with the declared policy of the Department, the staff of European Professors at the Hooghly Collego has been reduced, and the Krishnagar and Rajshahye Colleges have each been placed under a European Principal of the subordinate service, assisted by a staff of graduates of the Calcutta University; and it is hoped that the reduction in cost may facilitate the transfer of these colleges to local management.

The statistics of *University Education* show a falling off in the number of students from 5,184 to 4,882, which is due to the fact that at the Entrance examination of 1889 only 24 per cent. of the candidates passed as compared

with 69 and 46 per cent. at the two preceding examinations. At the same time, the number of students was greater than in any previous year, except that immediately preceding, and showed an increase of 30 per cent. as compared with the average of the previous five years, and of over 60 per cent. as compared with the year 1886, in which the number was greater than in any year before it. The increase in attendance at Government colleges has not been quite so rapid, being only 24 per cent. as compared with the quinquennial average, and the number attending formed only 29.37 per cent. of the total number as compared with an average of 30.95 per cent. in the previous five years. The number of students who passed the First Arts examination increased from 481 in 1888 and 629 in 1889 to 996; and that passing the B.A. examination from 323 in 1888 and 366 in 1889 to 399; while 62 candidates passed the M.A. examination, against 53 in 1889 and 43 in 1888.

This improvement, it may be observed, is not due to any lowering of the standard of the examinations: on the contrary, as shown by the percentage who pass, the Entrance and First Arts examinations are more difficult than formerly; while of the students who succeed in passing these, the proportion who pass the B.A. examination is no higher than formerly, from which it may be inferred that the standard of that examination also has been raised. In the report for 1887-88 it was remarked that the science course was losing its popularity, and that although it had long been the policy of the Government to give a more practical bent to education, yet the actual tendency appeared to be in the contrary direction. The remarks there made apply equally to the two years that have since elapsed, for, although a larger percentage of those who take up the science course for the B.A. examination succeed in passing, yet the number which actually took up that course in the year under review was both absolutely and relatively smaller than in the two preceding years. In this connection may be noticed a suggestion made by the Calcutta University to the Government, that the course of study in the Presidency College should be enlarged and completed by the addition of Geology, Physiology, and Botany to the curriculum. With regard to this the Director of Public Instruction suggested a doubt whether Indian students have as yet shown such aptitude for the natural sciences as would justify the Government in incurring large additional expenditure on it.

The total number of *Secondary Schools* rose from 2,319 to 2,366, or by 2 per cent., but the number of pupils only rose from 200,124 to 201,452, that is, by 6 per cent. The increase is in the number of high and middle English schools, there being actually a decrease in the number of middle vernacular schools and of scholars attending them. The expenditure in these schools increased from Rs. 25,36,045 to Rs. 26,19,966, a difference of Rs. 83,921, of which Rs. 6,735 was met from public and Rs. 77,166 from private sources. At the middle scholarship examination the number of candidates was almost exactly the same as in the preceding year, but the results both in the English and in the vernacular side of the examination were far worse than those of the previous year. The cause of this has not been clearly ascertained, but it appears to be due partly to the enforcement for the first time of the rule preventing successful candidates of previous years from going up again to the examination in the hope of winning a scholarship, and partly to the greater severity of the examination. In this connection may be noticed a question discussed by the Director of Public Instruction in his annual report, viz., whether in the lower classes in high English schools subjects other than English

should be taught in the vernacular or in English. In 1878 it was pointed out that those pupils who left school without going on to the Entrance class get little in return for six or seven years' labour, and that they would have gained much more actual knowledge if they had studied in the vernacular. The experiment was accordingly tried first in the Presidency and subsequently in three other Divisions, and the high schools concerned were amalgamated with local vernacular schools, the new pupils receiving instruction in English as an additional subject, and being taught other subjects in the vernacular. The system was considered to have justified itself, but recently the objection has been raised by a few schools that it makes the ordinary student less familiar with English, and consequently places him at a disadvantage at the Entrance examination. The Director of Public Instruction examined this objection in the light of the examination statistics, and came to the conclusion that it was quite unfounded.

The statistics of *Primary Education* are far from encouraging. An examination of the figures of the last few years shows that in the case of upper primary education there was a steady and fairly rapid increase in the number of scholars during the eight years preceding that under review, whereas the number of lower primary scholars, which increased rapidly from 812,339 in 1881-82 to 1,121,865 in 1884-85, fell to 986,160 in 1885-86 and to 965,214 in 1886-87; and although there was an increase to 991,099 in 1887-88, the number again fell to 982,126 in 1888-89 and to 960,865 in the year under report. The decrease is in the main only apparent, being due to the stricter system adopted in recent years in the registration of pupils. Funds have, moreover, not been available to maintain the progressive expenditure which marked the earlier stages of the establishment of a system of primary education. And, as pointed out by the Director, there has been a want of smoothness of working in the, as yet, comparatively new machinery of the District Boards, by reason of which harassing delay occurs in the payment of rewards to gurus. As regards upper primary and higher education generally, it is probable that the continuous progress achieved is due to the fact that the education is spontaneously sought by the classes which benefit by it. In spite of this falling off, however, the progress which has already been achieved is certainly very great, for the Director of Public Instruction in his report estimates the number of boys of school-going age in those provinces at 5,087,582, of whom 1,403,143, or 27·5 per cent., are at school, and in the 15 most advanced districts, taken together, the average exceeds 50 per cent., so that the time may be fairly said to be within measurable distance when practically the whole population in many districts will be able to read and write.

The number of institutions devoted to some branch of *special instruction* increased from 42 to 51, and the number of pupils from 3,275 to 3,986. These figures are hopeful, and it is satisfactory also to notice that the number of students at the Seebpore Civil Engineering College was 265, the largest yet recorded. The statistics of *Female Education* show a considerable falling off, the number of girls' schools having declined from 2,302 to 2,153 and their pupils from 47,888 to 45,690. On the other hand, however, it is satisfactory to note that two young native ladies were admitted to the degree of Bachelor of Medicine; another passed the preliminary scientific L.M.S. examination; eleven young ladies of the certificate class of the Medical College obtained the College license to practice medicine and surgery; three native ladies from the Bethune College passed the First Arts examination, and three more from

the same college passed the B.A. examination. The statistics of *European Education* call for little remark. The number of schools decreased from 71 to 68, while the number of scholars increased from 6,682 to 6,710. There is still only one Government school of this class in the province—the boarding school at Kurseong. There was again an increase in the number of *Mahomedan* students, but this appears to be largely due to a number of Koran schools being for the first time included in the returns. The greater success achieved by Mahomedans is, however, very marked and satisfactory. The number of those who passed the M.A. examination increased from 1 to 3, of those who passed the B.A. examination from 18 to 21, of those who passed the F.A. examination from 21 to 57, and of those who passed the Entrance examination from 54 to 125; and there was also a large increase in the number of middle and upper primary examination certificates gained by Mahomedan students, though somewhat fewer passed at the lower primary examination. The number of pupils from among the *aboriginal races* increased from 27,246 to 29,749, which more than recovers the ground lost in the previous year. The increase was shared by most of the tracts of country inhabited by these races, but was greatest in Chota Nagpore, where it amounted to 1,559 pupils, of whom 1,390 were non-Christians and 169 Christians.

On the whole, the total number of schools and colleges increased from 64,628 to 66,285, and the total number of pupils from 1,482,150 to 1,491,923; but this increase appears to be attributable to the inclusion of the Koran schools already referred to. The total sum spent on education of all descriptions amounted to Rs. 87,43,000, an increase of Rs. 75,000 over the preceding year. The contribution from public sources declined from Rs. 32,44,000 to Rs. 32,37,000, while private expenditure rose from Rs. 51,24,000 to Rs. 55,06,000, and collegiate, secondary, primary, female, and special education were all more costly than in the preceding year.

ART, LITERATURE AND THE PRESS.

The number of publications received in the Bengal Library was 2,603, or 75 more than the average of the previous five years. The increase, however, was entirely in publications in English; for the number of other publications was 2,207, or 2·6 less than the average of the previous five years, whereas the number of English publications was 396, an increase of 77·6 publications, or 24·3 per cent. as compared with such an average. As regards the language, 63 per cent. were in Bengali, 16·3 in English, 6·2 in Hindi, 5 per cent. in Uriya, and 2 per cent. in Urdu. There is an increase, as compared with the previous five years, under the heads “Drama,” “Fiction,” “Language,” “Religion,” “Science (Mathematical),” and “Science (Natural and other).” The increase under the two latter heads is marked, but consists entirely of educational works. Of the same nature are the publications under the head “Language.” On the other hand, there is a falling off under “Law” and “Medicine,” the decrease under the latter head being in the number of homœopathic treatises which have hitherto formed the bulk of the publications under that head. The principal English newspapers were the same as in the previous year, and the total number of English newspapers was 30, and there were 14 periodicals exclusive of Government Gazettes and Departmental Lists. Eight vernacular newspapers came into existence, while one was discontinued and two were amalgamated, so that at the close of the year there were 74 newspapers as compared with 68 at the

close of the preceding year, and of these 6 were monthly, 9 fortnightly, 55 weekly, and 4 daily. Of these newspapers 8 were published in Hindi, 8 in Uriya, 8 in Urdu, 1 in Persian, 1 in English and Bengali, and 48 in Bengali.

ARCHÆOLOGY.

As the period for which the scheme of the Archæological Survey of India was sanctioned, on the retirement in 1885 of Major-General Sir Alexander Cunningham from the Directorship of the Survey, was approaching its close, the appointment of Director of the Archæological Survey was abolished, with effect from 1st June 1889, and it was arranged that the appointment of the Assistant Surveyor and staff of the Bengal Circle should not be continued after the 30th September 1890, but from that date the survey should consist of only two parties, each of which, as soon as the work in the province in which it was employed should be completed, would be transferred to the next and placed under the general orders and direction of the Local Government of that province. It was therefore inadvisable to commence fresh operations, and the work of the year was confined to following out and finishing what had already been undertaken. The measurements and drawings of the buildings in the old fortress at Rohtasgarh and of the tombs of Hasan Khan, Sher Khan, and Selim Khan at Sasseram were completed, the work of conserving the tomb at Maner was gone on with, and impressions of the more important inscriptions in Northern Bengal,—chiefly from the Asoka pillars—were taken. These latter have never yet been thoroughly edited by a competent scholar, and it has been arranged that this shall now be done. Three new Asoka inscriptions were discovered and four curious Hindoo temples are reported from Moorshedabad, but their history and archæological value has not yet been ascertained.

ECCLÉSIASTICAL.

The *Ecclesiastical Establishment*, paid entirely or in part by Government, consisted of the Lord Bishop of Calcutta, the Archdeacon of Calcutta, the Domestic Chaplain to the Lord Bishop, the Registrar of the Diocese, the Archbishop of Calcutta, 16 Chaplains of the Church of England, one Chaplain of the Church of Scotland, 12 Ministers of the Additional Clergy Society, and seven priests of the Roman Catholic Church. Twenty-four marriages were registered under the *Brahmo Marriage Act*, against 12 in the previous year, 10 in 1887-88, and 18 in the year before that. The *Calcutta Burial Board* reduced the pauper fee during the year, and raised the monumental rate. The Board for the superintendence and management or control of Muhammadan burial grounds under Act IV of 1889 was duly formed during the year.

STATIONERY AND PRINTING.

The value of stores in stock at the beginning of the year was Rs. 11,46,468, and the value of those received and credited during the year was Rs. 15,24,956, giving a total value of Rs. 26,71,424. The value of stores issued was Rs. 18,66,000, as against Rs. 17,65,622 in the preceding year, so that the stock in hand was reduced to Rs. 8,05,424. Of the stores purchased during the year, 16 per cent. were received from the Secretary of State and 84 per

cent. were procured in India, the figures for the preceding year being 26 and 74 per cent. respectively, and 35 and 65 per cent. those for the year 1887-88, and this steady increase in the proportion of stationery purchased in India is regarded as satisfactory. The cost of stores issued to departments and offices under Local Governments free of charge amounted to Rs. 8,42,855 during 1889-90, against Rs. 8,19,705 in the previous year. During the year the system of supplying rubber stamps and inks through the Stationery Office was introduced. That of the supply of newspapers and periodicals through the same agency appears to be working well.

The value of the outturn from the Jail, Secretariat, and Darjeeling *Presses* fell from Rs. 4,34,941 to Rs. 4,28,011, and the actual expenditure from Rs. 2,85,986 to Rs. 2,84,418. If, in addition to the actual expenditure, account be taken also of the wear and tear of materials and of house-rent, it appears that the total profits on the *Presses* and the Publishing Department fell from Rs. 1,31,641 to Rs. 1,20,254, showing a decrease of Rs. 11,387, against a decrease in outturn of Rs. 6,930. The disproportion of the decrease in the profits compared with the outturn is due to a decrease in the demand for forms and books by the Superintendent of Stationery—work which would have been done by convict labour in the Jail and almost the whole value of which would have been added to profit. The profit on the Secretariat Press decreased from Rs. 6,563 to Rs. 2,706, partly owing to an alteration in the rates of payment to workmen, and partly also to a reduction in the outturn and to the loss entailed on the office through the influenza, which disabled almost half the establishment for an average period of not less than a week.

ZOOLOGICAL GARDENS.

The number of visitors who paid entrance fees was 109,569, against 111,573 in the previous year ; but this number was exclusive of a large number of students and children under eight years of age who were admitted free of charge. There were 98 presentations as compared with 42 in the previous year, and among these were two African and two young Indian lions. An unusual event during the year was the birth of a pair of tiger cubs. A very useful tropical aviary was constructed during the year, which bears the name of the Nawab Bahadur of Moorshedabad in recognition of his large subscription to the Gardens of Rs. 10,000. The year opened with a balance of Rs. 11,279, the receipts amounted to Rs. 37,630, the expenditure to Rs. 46,285, and the closing balance to Rs. 2,624. Of the receipts, Rs. 18,126 were from private sources, and the balance (Rs. 19,504) was the contribution from Government.

ECONOMIC AND ART MUSEUM.

As in previous years, the work of the *Economic and Art Section of the Indian Museum* was mainly confined to preserving specimens from the influences of climate and the ravages of insects. It is considered that air-tight glass cases, with the air inside fully impregnated with naphthaline, afford the only means of efficient protection, and provision for such cases has accordingly been made in the estimate of fittings for the new buildings now under construction. A number of valuable specimens, not represented before, was added to the Art-ware Court during the year, partly by donation and partly by purchase, and additions were also made to the exhibits in the Ethnological

and Economical Courts, so that the total number of specimens increased from 33,880 to 34,625. The most important works in which the Assistant Curator and his staff were engaged during the year were the formation of a large and exhaustive collection of the fibres and mat and paper grasses of India for distribution to several institutions in the United Kingdom, and the formation of comprehensive collections of the whole of the economic products of India for the Imperial Institute, London, the Indian Museum and other museums.

PART II.

REPORT

ON THE

ADMINISTRATION OF BENGAL, 1889-90.

REPORT FOR THE YEAR 1889-90.

CONTENTS.

1.—POLITICAL.

ADMINISTRATION OF BENGAL, 1889-90.

I.—POLITICAL.

Changes of Administration.

THE experiment of allowing rent to be paid by means of money-orders was tried in the districts of the Burdwan Division during the year. The measure having proved beneficial, Government have directed, under section 54 (2) of the Bengal Tenancy Act VIII of 1885, that from 1st July 1890 payment of rent by means of postal money-orders be authorised in the Burdwan, Rajshahye, Presidency, and Dacca Divisions.

During the year rules were passed, with the approval of Government, in regard to the costs incurred in the realisation of petty demands by the certificate procedure. Under these rules when the cost of realisation of a demand appears to a Collector to be excessive in comparison with the amount of the original demand, he is authorised in his discretion to remit any portion of the fees which may be found in any case to be unreasonable with reference to the circumstances of particular cases.

A slight amendment of the rules under section 59 of the Land Acquisition Act X of 1870 was made during the year to bring them into conformity with the existing rules in the Civil Account Code regarding deposits. The Board's Rules for the guidance of officers in working the Act also underwent a thorough revision and have since obtained the final approval of Government.

At the conference of the Directors of the Departments of Agriculture held at Delhi in 1888, the question of relieving the surplus population of overcrowded districts was discussed, and it was suggested, with reference to the congested districts of Behar, that it would be desirable to obtain and circulate information as to the precise terms on which lands could be had in Burmah, the nature of the soil, and the prevailing climatic conditions. The Government of India subsequently expressed a wish that the Government of Bengal should depute an officer to Burmah, for the purpose of discussing with the local authorities the procedure which should be adopted in order to attract settlers from Behar and the terms on which lands might be obtained. In March 1889 it was suggested that the most practicable way to test the feasibility of promoting emigration to Burmah would be to take some representative zemindars and capitalists to Burmah, to show them the lands that may be available for settlers from Behar, and to let them decide for themselves whether it would be desirable for them to take such lands and to settle Behar cultivators on them on such terms as might be agreed upon. This proposal was accepted by the Government of Bengal, and Mr. P. Nolan, C.S., was deputed, accompanied by Rai Jai Prakash Lal, Manager of the Dumraon Raj; Mr. Hudson, Secretary, Behar Indigo Planters'

Association; Mr. G. Walker of Messrs. Gisborne and Company, and a party of cultivators from Dumraon. The results of the visit were—

- (1) that detailed rules were drawn up and approved, under which land can be obtained in Burmah on very favourable terms by Behar cultivators and capitalists;
- (2) that Rai Jai Prakash Lal, Manager of the Dumraon Raj, applied for and obtained a grant of fifteen thousand acres of land in one district, for settlement upon it of Behar cultivators, and that another Behar gentleman applied for and obtained a grant of fifteen thousand acres of land in another district.

The question of effecting a reduction in the fares of deck passengers to Burmah with a view to encourage emigration is still under consideration.

Act VIII of 1890 came into force on the 1st July 1890. Briefly, its object is to provide a law of guardian and ward applicable as far as possible to all classes of Her Majesty's subjects in British India. By this enactment Act XL of 1858, for making provision for the care of the persons and property of minors in Bengal, has, among other enactments in force in other parts of India, been repealed, and section 3 of the Indian Minority Act IX of 1875 has been amended.

In a circular issued by the Government of India during the past year, it was suggested that the emoluments of Directors of Departments of Land Records and Agriculture should, as circumstances permit in each province, be brought into accord with the following general rules and principles, which were so framed as to afford the least possible disturbance to existing circumstances:—

- (1) The Director will draw the pay, substantive or officiating, of his contemporary, i.e. the officer next below him in the regular line.
- (2) He will receive Rs. 250 a month special allowance; provided that
- (3) The maximum salary drawn, including pay and special allowances, will not exceed Rs. 1,800.
- (4) No monthly travelling allowance will be permitted. Special travelling allowance under the ordinary rules will be granted, the daily rate being fixed with reference to the circumstances of the provinces concerned.

It was considered impossible to enforce the proposed rule in the case of Mr. Finucane, the present incumbent of the appointment, as the effect would be to reduce his salary very materially and to deprive him of the fixed travelling allowance of Rs. 250 a month at present drawn by him. The Secretary of State accorded his sanction to the action of the Government of India as proposed in the circular above, and it was settled that as soon as circumstances would permit of the arrangement being made without inconvenience or loss to the present holder of the appointment, the pay and allowances of the officer in charge of the Department would be brought into accord with the rules laid down above.

The question of training junior officers with a view to secure a succession of efficient Directors of the Department of Land Records and Agriculture was considered as a corollary to the above, but no decision was arrived at on the subject during the year.

The Committee appointed by the Government of India to enquire into certain matters connected with the administration of jails in India submitted its report during the past year. The views of this Government on the proposals made by the Committee have already been submitted to the Government of India. Many of the recommendations of the Committee are in harmony with the system which has been in force in Bengal for some years, and of the improvements which have been effected on the suggestion of the Committee, and with the approval of the Government of India, the following are the most important:—The superficial area and cubic capacity available for each prisoner in sleeping wards have been regulated, as proposed by the Committee, in accordance with

the healthiness or otherwise of the several jails in this province. Steps have been taken to carry out the measures proposed by the Committee for effecting an economy in the management of jails, viz. the storage of grain during cheap seasons of the year, extensive cultivation of jail lands, systematic rearing of fish in jail tanks, establishment of jail dairies, and supply of the requirements of jails as much as possible by prison labour. Orders have been issued to local officers to provide camping grounds in the neighbourhood of each jail, to which all or a great number of the prisoners may be transferred on the outbreak of any contagious disease, or any disease which is shown by experience to localise itself under certain conditions. The principles advocated by the Committee for deciding upon the advisability of removing prisoners into camp have been explained to the Magistrates and the Medical Officers in charge of jails; the only points on which discretion is allowed are the determination of the fact that the disease is epidemic in character and intensity, and the determination of the climatic conditions (such as heavy rain and flooded lands) which will justify the retention of prisoners in the infected area as a lesser evil than the exposure of them to wet and cold. A sufficient number of tents and extra fetters are kept in stock for the purpose, and the Inspector-General of Police has been instructed to make arrangements for the supply of police guards when need arises.

The Government of India also deputed Mr. C. J. Lyall and Dr. A. S. Lethbridge to enquire into and report on the working of the penal settlement of Port Blair with a view to make the effects of transportation more deterrent if necessary. The report submitted by them is now under the consideration of that Government, and, pending the issue of final orders on the subject, the practice of transporting all male term convicts from Indian jails (except from Burma) has been discontinued.

Hitherto all hospitals and dispensaries in Bengal enjoyed the privilege of indenting upon the Government medical store depôts for their supply of medicines and medical instruments. With a view to lighten the work of the depôts, the Government of India, during the past year, withdrew the privilege from all medical institutions which were not purely and entirely State institutions, and directed that local bodies having control of hospitals and dispensaries should make their own arrangements for obtaining their medical stores for such institutions. With reference to these orders, the Calcutta Police Hospital and the outdoor department of the Medical College Hospital, called "Chooni Lall Seal's Dispensary," were included in the list of State institutions permitted to indent from the Government Medical Store Depôt, and the institutions noted on the margin* were allowed the money grants entered against their names in lieu of medicines

which were formerly supplied to them from the depôt free of charge.

An important question which attracted a good deal of public attention during the year was that of the number of public holidays in the Bengal Province. For thirty years

the Bengal Chamber of Commerce had been agitating for the reduction of the number of holidays to the days actually required for the observance of the Hindoo religion, and the question came again and again under the consideration of the Government, but it was found impossible to accede to the proposals of the Chamber because of the inconvenience which would be entailed upon the Hindoo community of Calcutta and some other parts of Bengal, and the strength of the popular attachment to those popular holidays. In 1888, however, on the recommendation of a Committee appointed to enquire into the whole question, it was found possible to make an arrangement which had the effect of removing the inconvenience felt by the mercantile community, so far as regarded the closing of the Custom House; and it was ordered that for the Custom House, as distinguished from the Preventive Department, Sundays, New Year's Day, Good Friday, the Queen's Birthday, and Christmas Day should in future be held to be absolutely close holidays, but that for week days for which the office had hitherto been closed in the

Doorga Poojahs, and on all ordinary gazetted holidays other than the days mentioned above, the Custom House should be opened free of charge for one hour, viz. from 11 A.M. to 12 noon; all work applied for up to 12 o'clock being carried through, provided that notice was given to the Assistant Collector before closing hours on the day previous, or, if that was a holiday, 24 hours in advance, that it was required to have the office so opened. In 1888 and in 1889 the Chamber of Commerce made further representations to Government, urging that only those days should be declared public holidays under the Negotiable Instruments Act which were actually required to be devoted to necessary religious ceremonies; but, for the reasons given on previous occasions, the Government was unable to comply with the request, and on the 11th December 1889 a notification was published in the Gazette, declaring the holidays under section 25 of the Negotiable Instruments Act in 1890 to be the same as in previous years. In consequence of the publication of this notification a deputation waited on the Lieutenant-Governor at Belvedere on the 19th December. They laid stress on the alteration which the passing of the Act had introduced into the conditions of the problem since the decision of Government was arrived at in 1879, when it was urged that, though the Banks were closed, exchange operations might be and were carried on, and, as a matter of fact, that the Banks did take cheques from purchasers of bills during the vacation, and remittances by telegram or otherwise were not necessarily suspended. Now, however, the deputation stated, this was no longer the case, and the Banks felt it unsafe to do any business at all on holidays gazetted under the Negotiable Instruments Act, since that Act came into operation, and consequently the inconvenience to commerce had become intensified. They then suggested that it might be possible to find a solution of the difficulty by restricting the number of holidays gazetted under the Act, but retaining by executive authority the existing number of holidays for all public offices save the few in Calcutta which were indispensable to the foreign commerce of the port. This proposal appeared to His Honour to afford a means of removing the inconveniences complained of by the mercantile community, while at the same time it was not open to the same objections as the original proposal to summarily reduce the number of holidays; and accordingly, after consultation with the different representative bodies, the Lieutenant-Governor caused two notifications to be published in the Gazette—the first, issued under the Act, dealing only with those Hindu holidays the observance of which is absolutely required for enabling Hindu employés, whether in the service of Government or of private persons, to fulfil their religious duties; and the second, issued as an executive order, including the remaining days hitherto observed as public holidays, and applicable to all public offices and Magisterial and Revenue Courts under the Government of Bengal, with the exception of the offices of the Collector of Customs, the Shipping Master, the Registrar of Assurances, Calcutta, the Collector of Stamp Revenue, Calcutta, the Stamping Department of the Office of the Superintendent of Stamps, Calcutta, and the Salt Rowannah and Opium Sale Departments of the Board of Revenue. In all these latter offices special arrangements were made, by contracting the hours of business, by limiting the work undertaken to what is really urgent, by granting leave to Hindu employés wherever practicable, and by utilizing as much as possible the services of non-Hindu clerks, with a view to minimize the inconvenience which may be felt by those who have hitherto enjoyed close holidays on the days which will in future be open.

Relations with Tributary States, and Frontier Affairs.

THE most noticeable events of the past year were the appointment of a Political Agent at Guntok to assist the Maharaja in Council with his advice in the administration of affairs, the establishment of a Council for the conduct of ordinary civil, criminal and revenue work, the settlement of unoccupied waste lands and lands owned by monasteries, and the preservation of sâl forests by bringing them under the direct control of the Durbar. Mr. J. C. White, the Political Agent, made extensive tours almost throughout the year, and was able to collect much valuable information about the state of the country and its people. Acting under his advice, the Council has devised sundry measures for the introduction of an improved system of administration and for the development of the resources of the State. In settling waste lands the Council has taken the necessary steps for keeping Bhuteas, Lepchas, and Nepalese apart from each other, and this has proved beneficial in averting disputes among them. Very favourable rates have been allowed to the new settlers, the maximum rate charged for the first five years being 8 annas per acre. Before the close of the past financial year about four hundred settlers and their families cleared and occupied the waste lands, and the number has undoubtedly increased by this time. Two Bhutea surveyors were employed, but much progress could not be made, as work was not commenced until November 1889, and owing to the density of the jungle considerable difficulty was experienced in cutting boundary lines. The monastery lands consisted formerly of small patches scattered all over Sikkim. With the consent of the Lamas concerned each monastery has now taken over the lands surrounding it rent-free, and has in return relinquished all claims on detached lands and the rents raised from them. Steps have been taken to stop indiscriminate destruction and waste of valuable timber by bringing the sâl forests on the banks of the Teesta and Runjeet rivers under the direct control of the Sikkim Durbar.

Weather, crops, and public health. The rainfall was much heavier than usual, and the wheat and barley crops, were damaged by hailstorms. No injury was, however, done to the crops of rice, bhoota, murwa and buckwheat, the outturn of all of which was good. Rice is imported in large quantities from the plains and from places near Darjeeling, while bhoota is exported from Sikkim to Darjeeling. There was more sickness than usual, especially amongst the Paharias, and this is attributed to the excessive rainfall. The diseases most prevalent were fever, dysentery and diarrhœa. The Government has supplied the Political Agent with medicine, and a dispensary has been opened at Guntok.

Crime. There was very little crime in Sikkim during the past year. Two murders were committed by insane Paharias, and they were banished from Sikkim according to custom, and sent over the Singlala pass into Nepal. There were also a few cases of petty theft and robbery with violence.

Roads. Beyond the extension of an existing road, no new lines of communication were opened out during the year. The Durbar proposes to undertake the construction of five additional roads, the routes of most of which have been settled. Last year a sum of Rs. 2,000 was contributed by Government towards the construction of roads in Sikkim.

General observations. During the past year the Maharaja received an allowance at the rate of Rs. 6,000 a year out of Rs. 8,444, the aggregate revenues of his State. The reforms and improvements recently introduced into the State will, it is expected, result in an

increased revenue. The Lieutenant-Governor in November 1889 visited Tumlong, where the Maharaja came to see him. Sir Steuart Bayley was fully convinced of the necessity for maintaining the Council, and did his utmost to persuade the Maharaja to take a more leading part in the administration.

The relations between the Bhutan authorities and the British Government during the past year were satisfactory. The former were pressed to join the Thibetans during the military operations in Sikkim, but they abstained from giving them assistance. There is some inconvenience in having correspondence with Bhutan conducted both by the officials of Buxa, in Julpigoree, and by the Deputy Commissioner of Darjeeling, and it has recently been arranged that all correspondence by either authority should be first submitted to the Commissioner of the Rajshahye Division, so as to avoid contradictory or divergent lines of action; but as the Commissioner is obliged to reside at a distance from the frontier for a considerable part of the year, there is a difficulty about placing the Bhutan agents in direct communication with him, since they cannot be persuaded to venture into the plains. It should be our object to have all communications with Bhutan concentrated into one channel, and carried on by one agent, and it seems probable that the agency should be at Darjeeling; but at present the Bhutan Government is anxious to receive its subsidy at Buxa, and it will require some negotiations before the question can be settled.

BHUTAN.

HILL TIPPERAH.

General remarks.

The unsatisfactory state of affairs in Hill Tipperah has been the subject of correspondence between the Maharaja and the officers of this Government for some years, as the continuance of the existing maladministration threatened to bring the State to ruin. The Maharaja did not respond to repeated calls for the submission of a detailed statement of receipts and expenditure, or an account of the measures taken by him to correct the abuses pointed out. The Government therefore decided to take more direct and active steps in the matter, and in May 1889 the Political Agent was deputed to see the Maharaja and deliver to him a letter addressed to His Highness by the Lieutenant-Governor; he was at the same time authorized to give His Highness advice as to the matters which specially required reform. The negotiations with the Maharaja terminated satisfactorily, and His Highness accepted all the proposals made to him for the amelioration of the management of his State and his zemindaries in British territory. His Highness, of his own accord, selected Rai Uma Kanta Das Bahadur, Assistant Political Agent, Hill Tipperah, for appointment as his Minister, and expressed his willingness to give him full power of administration with respect both to the Hill Tipperah State and to the connected zemindaries. The selection made by the Maharaja has met with the approval of Government, and the deputation of Rai Uma Kanta Das Bahadur to Hill Tipperah in the post of Minister has been sanctioned. It has not been considered necessary to appoint for the present an Assistant Political Agent in succession to the Rai Bahadur, but has been decided that all political work in connection with Hill Tipperah should be carried on by the Magistrate of Tipperah, who is *ex-officio* Political Agent, an officer being added to the district staff to assist him in the performance of his other duties. These arrangements have come into force since the 15th April 1890.

The rainfall was scanty, being 59·60, against 73·12 in the previous year.

Crops, public health, and material condition of the people.

The outturn of the ordinary crops of the State was fair, but paddy is said to have suffered to a certain extent on account of drought. Jute cultivation, which has been commenced in some parts of the plains, is said to have proved profitable. The labouring class were injuriously affected by a rise in the price of food-grains, as it was not accompanied by any increase in the value of labour. The deficiency in the rainfall was not good for the public health, and cholera broke out in several places, carrying off a considerable number of people. There was no emigration, but the movement of Chukmas into Hill Tipperah was very marked, about 656 families having immigrated from the Chittagong Hill Tracts.

The natives of this tract live only by agriculture, and the trade of the country is almost confined to Bengalis. The absence of roads is a serious hindrance to trade, and improvements are much needed in this direction. The rates of export

Trade and commerce.

duties on cotton, oil seeds, and forest produce continue to be high. The present state of the finances necessitates the levying of some such duties, but the heavy rates stand in the way of further development of trade and production. The total amount of export duties realised during the year under all heads was Rs. 1,87,114, the entire value of the export trade being estimated at Rs. 7,48,000, against Rs. 6,41,000 in the previous year. The principal articles of import are salt, dried fish, hardware, piece-goods, and pottery, but as no import duty is levied by the State, no statistics are available to ascertain the value of the import trade.

The results of the revenue administration during the year show some improvement as compared with the previous year.

Revenue administration.

The total receipts from all sources, exclusive of the zemindaries, amounted to Rs. 3,12,465, against Rs. 2,97,510 in the preceding year, thus exhibiting an increase of Rs. 14,955. The plan adopted by the Maharaja for the purpose of liquidating the debts by reducing the rates of interest and causing the whole of the interest and a portion of the principal to be deducted from the yearly jumma of the farms granted to the creditors, is not very wise. The izaradar's interest is to rack-rent the ryots and realise his debt in as short a time as possible, while the cost of collection of the balance is raised by every farm thus given. A proper settlement of revenue cannot be made until a full and careful survey of the lands has been effected and the rights of the tenants have been recorded.

The police force have to collect a portion of the revenue in addition to their legitimate duty of preserving the public peace. They are now paid their salaries more regularly than before, and can therefore be subjected to stricter discipline; but until their salaries are paid on a more liberal scale, much improvement cannot be looked for.

Police.

There was little crime during the year. The hill people are not inclined to resort to criminal courts, owing partly to the distance of the courts from the interior, and partly to their want of sympathy with the Bengali officers. The total number of criminal cases for disposal during the year was 603, of which 348 cases were tried, and of the 795 persons accused, 423, or 53·2 per cent., were convicted. In 196 cases 231 British subjects were defendants, of whom 137, or 59·3 per cent., were punished. There were 102 cases of appeal, in 53 of which the sentences of the lower courts were confirmed, in 41 they were modified or reversed, and in 4 re-enquiry was ordered. The number of original civil suits for disposal was 472, and in 135 of them British subjects were concerned. The total value of the suits instituted was Rs. 26,590, of which the sum of Rs. 15,500 was decreed. There were 92 appeals against the orders of the lower courts, and all these were disposed of during the year. In 34 cases the appellants were wholly or partly successful, and in the remaining ones the judgments of the lower courts were confirmed. The Jubraj, who is the Chief Judge of the khas appellate court, is reported to have inspected all the courts in Agartala and taken an interest in their working.

Criminal and civil justice.

Nothing of importance occurred during the year in regard to boundary or frontier matters. All the guard-posts were well garrisoned during the raiding season, and four advanced posts were established on the southern frontier to watch the movements of the Lushais. These arrangements were satisfactory, but a post in the rear of the Hill Tipperah boundary has lately been garrisoned from Cachar, and the State is now entirely surrounded by British territory; so it may be hoped that the necessity for keeping up guard-posts will soon cease to exist, and the Maharajah will then be able to reduce his military force, which is a very expensive body.

Boundary matters.

There are four jails or lock-ups in the State. The daily average number of prisoners confined during the year was 32·61. They were as usual treated with indulgence, and their general health was on the whole good throughout the year. There were 16 schools with 467 pupils, against 18 schools with 493 pupils in the preceding year. These institutions were not managed properly, and arrangements are said to be in progress for their better management in future. Besides the

Miscellaneous.

dispensary attached to the Maharaja's residence, where medicines are distributed gratis to the general public as well as to the members of His Highness' household, there are four other charitable dispensaries in the State. The total number of outdoor patients treated at these institutions was 6,592, against 5,003 in 1888-89. The daily average number of both indoor and outdoor patients was 55·64, and the number of surgical operations and vaccinations were 236 and 916 respectively. There is only one post-office in the State, which is attached to the Political Agency and managed by Government. The work of the post-office has considerably increased, but the Maharaja has refused to open any more offices, and simply consented to undertake the delivery by his establishment of all covers intended for parties living in the interior.

Raja Balabhadra Sing Mandhata of Nayagarh having died heirless on the 2nd March last, Babu Raghunath Sing Hari Chandan, a relative of the late Chief, has been allowed by this Government to take possession of the *guddi* as a provisional arrangement, subject to

TRIBUTARY STATES OF ORISSA.

Administrative changes.

the approval of the Government of India. This succession has been contested by the Raja of Khandpara, and the final decision of the matter is now under consideration. Since the close of the year the minor Chief of Mohurbhunj has been placed in charge of the State. Both by his disposition and by his acquirements he appears to be well fitted for his high position, and it is hoped that he will prove himself an efficient ruler.

Scarcity.

The partial failure of crops in consequence of the irregularity and deficiency of the rainfall during the years 1887-88 and 1888-89 brought about a scarcity of food-grains in most of the Tributary States and the Government estates of Angul and the Khondmals during the past year. The States of Mohurbhunj, Nilgiri, Keonjhar, Pal Lehar, Dhenkanal, and Athgarh were little affected by the distress, but it was severe in other places, and was further augmented by the outbreak of cholera and small-pox, which considerably increased the mortality. The people who suffered most were the aboriginal and semi-Hinduised tribes who form the landless class and live partly by labour and partly on jungle produce, and their sufferings were intensified in some cases by delay in the commencement of relief operations. On the appearance of serious symptoms of distress the necessity of vigilant supervision was impressed upon the Superintendent of the Tributary Mehals, Orissa, and in July 1889 Sir John Edgar, K.C.I.E., C.S.I., Chief Secretary to this Government, was specially deputed for the purpose of making personal enquiries into the condition of Angul and some of the affected tracts in the Tributary States, as well as in the Regulation districts. Immediate measures were also adopted for the alleviation of the distress by the opening of relief-works, the supply of gratuitous relief, the grant of money advances and agricultural loans, as well as loans to the Tributary Chiefs who applied for them, the relaxation of forest rules, &c. The rainfall of the past year was much above the average of the three preceding years, and there has been, on the whole, a fair outturn of crops. The relief operations have consequently been discontinued, and the people are reported to be in a comparatively prosperous condition.

Public health and vaccination.

In a year of scarcity the public health could not be expected to be good. As noticed above, cholera and small-pox caused great havoc during the period of scarcity which lasted from April to November, but the actual statistics of mortality could not be collected, although an attempt was made with that object. In Angul alone the estimated deaths from these diseases were 3,028 and 131 respectively, while 1,974 more are attributed to starvation. After the rains of November malarious fever appeared in an epidemic form, and the people suffered from it severely. Influenza also broke out in several of the States during the past year. The total number of persons vaccinated during the year was 26,906, against 23,427 in the preceding year. It appears that there are no local trained vaccinators, and that there is no effective control over those who are brought in from Cuttack. Operations conducted in this way are not likely to commend themselves to the people, already prejudiced as they are against vaccination, and the Superintendent is in correspondence with the Sanitary Commissioner on the subject of training local men as vaccinators and letting them work under the

supervision of the local medical officers. No new dispensary was opened during the year, but the existing institutions are reported to be gaining popularity.

The mineral wealth of the Tributary Mehals has not been completely explored, but it is probably not inconsiderable. Coal mines exist in Angul and Talchere, and there are mines of mica and stone quarries in Nilgiri, Dhenkenal, and Angul.

Mines, manufacture, trade, and commerce. Iron ore is found in Dhenkenal, Angul, Talchere, Mohurbhunj, and Athmullik. The principal industries are weaving and the manufacture of brass and bell-metal wares, but both are now on the decline. Gold washings carried on in river-beds in Mohurbhunj, Dhenkenal, and Angul have hitherto proved unremunerative. There was no export of food-grains during the past year owing to the scarcity, but oilseeds and forest produce were largely exported. The chief articles of import are salt and English-made cloths.

Administration of justice. The total number of civil and revenue cases in the courts in the Tributary States established under the authority of the British Government fell from 10,102 to 8,402, the decrease occurring chiefly in Angul, Baramba, Dhenkenal, Mohurbhunj, and Nursingpore. Out of 193 civil and 70 revenue appeals, 214 were decided during the year and 49 remained pending at its close. The total number of offences reported during the year was 2,614, against 2,691 in the preceding year; and of these 2,074 were returned as true, against 2,057 in 1888-89. The number of cases brought to trial, including those pending from the previous year, was 1,982, against 1,865 in 1888-89; and of 4,287 persons concerned in these cases, 999 were acquitted or discharged, 3,216 were convicted, 22 died, escaped, or were transferred to other courts, and 51 remained under trial at the end of the year. There were only 75 criminal appeals, of which 15 were rejected, and in 35 the orders of the lower courts were confirmed, in 10 they were modified, and in 15 reversed.

Revenue. In Angul the total realisable land-revenue demand for 1889-90 amounted to Rs. 47,117-14-11, of which Rs. 26,870-1 were collected during the year; of the large balance of Rs. 20,247-13-11 outstanding at the close of the year, which was due to the inability of the ryots to pay in consequence of failure of crops, Rs. 15,125 have since been realised. No land revenue is paid in the Khondmals. The total receipts of the Khondmal Road and School Funds amounted to Rs. 3,578-7 and Rs. 2,337-15-11 respectively, and the two funds showed a balance of Rs. 2,984-2-8 and Rs. 2,944-10-7 respectively at the close of the year. The following statement shows the demands and collections on account of land revenue in the five States under the direct management of Government:—

NAME OF STATE.	Total realisable demand including arrears.			Amount collected during the year.			Balance outstanding at the close of the year.		
	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.
Mohurbhunj	2,37,386	10	9½	2,19,467	6	9	17,919	4	0½
Dhenkenal	99,363	8	4	70,507	3	4	28,856	5	0
Baramba	34,388	9	5	19,562	8	4½	14,826	1	0½
Nursingpore	37,414	4	6	22,366	10	1	15,047	10	5
Pal Leharā	30,339	12	8	19,905	2	5½	10,434	10	2½

The high prices of food-grains and the very generally prevailing distress necessarily affected the realisation of land revenue. The Mohurbhunj State has already been made over to its Chief, and the responsibility of Government for the collection of arrears no longer exists. In regard to the other States, the Superintendent has issued instructions for the recovery of the arrears as early as possible. The financial management of these five States during the past year was satisfactory. The resources of the Pal Leharā State, which recently came under the management of Government, and which is involved in heavy debts contracted by the late Chief, require improvement, and the Superintendent has directed his special attention to this subject.

Settlement. The settlement operations in Angul are nearly complete. The assessment work was finished in December last and shows an increase of revenue from Rs. 36,898 to Rs. 1,10,547. This very large increment has resulted, not from raising rates, but from changes

in classification, and especially from the assessment of lands brought into cultivation but hitherto unassessed. Still it would be impolitic and scarcely just to attempt to enforce the settlement completely at once, and the enhancement has accordingly been postponed altogether till 1892, when the newly-assessed lands will pay half rates for five years, three-quarter rates for five years, and then for five years full rates. These concessions will, it is hoped, prevent the settlement from being too great a burden. In the Mohurbhunj State 19 pergunnahs have been resettled since the assumption of its management by Government. Under the terms of the resettlement, the revenue of these pergunnahs has been increased from Rs. 79,133 to Rs. 1,97,428. The settlement of 70 villages in Nilgiri has been completed, and the result shows an increase of assessment from Rs. 6,955 to Rs. 14,747.

In Angul the number of liquor shops open was 5, against 13 in the preceding year, and the excise revenue was reduced from Rs. 1,701 to Rs. 1,372. In the Khondmals certain rules have been framed regulating the sale of liquor with a view to check the drunkenness of the people. During the past year 58 licenses for the establishment of outstills were issued, against 50 in 1888-89, and the collections amounted to Rs. 1,697, against Rs. 1,440. The excise revenue demand of Mohurbhunj decreased from Rs. 13,063 to Rs. 11,352. The objectionable system under which the outstills in this State were farmed out to licensees, who on payment of a definite revenue with respect to a certain area were at liberty to manufacture and sell as much as they chose, has been discontinued. Dhenkenal showed an increase of excise revenue during the past year, but there was a slight falling off in Baramba and Nursingpore, apparently due to the scarcity. In Pal Lehara two liquor and three opium shops were opened during the year, and the revenue amounted to Rs. 869.

The total number of schools was 1,128 with 14,407 pupils, against 1,182 schools with 15,153 pupils in 1888-89. There were seven girls' schools, the same as in the preceding year, but the number of pupils fell from 448 to 425. There were also 266 girls reading in the boys' schools during the past year. One girl passed the lower primary scholarship examination from Angul and obtained a scholarship. There were 1,592 children of the aboriginal races under instruction, against 1,541 in the preceding year. The total expenditure on education in the Gurjats during the year amounted to Rs. 67,155, of which Rs. 7,570 were borne by Government.

The area of reserved forests in Angul was not extended during the year. The management of the forests is very expensive, the annual average expenditure of the last four years being nearly thrice as much as the receipts. This abnormal deficit is explained by the Superintendent to be due to the fact that Angul is unable to compete with the cheaper timbers of the neighbouring States. The distressed condition of the people during the past two years necessitated the relaxation of the forest rules with a view to allow them free access to the reserves to collect edible roots, fruits, sago-palm, iron stone, and fuel. With the object of improving the condition of the landless classes of Orissa and protecting them from scarcity in future, Sir John Edgar has made some valuable suggestions for reconstituting the forest reserves in Angul and Khoorda and reorganizing their administration. The question is now under consideration. The forests in Mohurbhunj, Dhenkenal, Baramba, and Nursingpore were administered by the respective Managers of those States.

Mr. W. H. Grimley was in charge of the Chota Nagpore Division throughout the year, except from the 1st to the 27th April 1889. The Commissioner's tour in the Tributary States was unavoidably of short duration. It being the first year of his office, the district head-quarters claimed prior attention, and at the same time the Kol agitation in the district of Lohardugga prevented his moving far from head-quarters. But although the Commissioner was only able to visit the States of Udaipur, Sirguja, and Jashpur during the year under review, he had an opportunity of seeing the Chief of Bonai in Ranchi, and the Raja of Seraikela and the Thakur of Khursawan were met both at Chyebassa and Ranchi. The Commissioner displayed tact and prudence in bringing to a satisfactory termination the long-standing and

THE TRIBUTARY AND POLITICAL
STATES OF CHOTA NAGPORE.

Tour, &c.

complicated disputes between the Raja of Bonai and the Gond Chief, and in dealing with the Gohandals of Khursawan, who refused to accept the terms of settlement offered to them. Mr. Grimley also took prompt measures to quell the disturbances made by a band of Jashpur Karwas who entered upon a series of plundering expeditions, carrying off cattle and killing those who opposed them.

The rainfall was sufficient and the crops generally good, but the influx of workmen employed in the Bengal-Nagpore Railway caused an unusual demand for all articles of food, and prices ruled high in consequence.

The general health of the people was good in all the States, except Sirguja and Gangpur. Small-pox carried off 1,144 persons in Sirguja, and cholera was fatal in 101 cases in Gangpur and 85 cases in Sirguja. There was a slight falling off in the number of vaccinations, and some of the Chiefs still repeated in the past year the old established objections to this operation, but their prejudices are said to have been overcome, and vaccinators will probably be less hindered in their work in future. The statistics of cattle disease are not very trustworthy, but the report of its general prevalence is undoubtedly true. With a view to diminish the mortality, instructions have been issued by the Maharaja for the segregation of the stricken animals, and by the Commissioner for the prompt burial of cattle that die of the disease and for the destruction of their hides. The territories of many Chiefs are now being rapidly brought into communication with other parts of India by the construction of the Bengal-Nagpore Railway, and efforts are being made to open out the mineral wealth of the country.

The Lieutenant-Governor regrets to observe that education, which has always been backward, has further retrograded during the year under review. Although six additional schools were established, the number of pupils in the majority of the States was smaller than in the previous year. The total number in all the States was 1,219, against 1,329 in 1888-89.

The statistics of crime call for little remark. The number of offences against the person increased in Gangpur and Khursawan, and there was a larger number of theft cases in the former State and in Changbhakar than in 1888-89. House-breaking cases rose from 6 to 14 in Udaipur. There has been a decrease in the number of civil suits and execution cases in all the States except Gangpur.

The majority of the Chiefs have maintained their reputations as judicious and wise rulers, and have generally followed the advice given to them by the Commissioner on difficult questions. The State of Khursawan, which has been successfully managed by Government during the minority of the Thakur, has now passed into the hands of its Chief, and Sir Stuart Bayley has much reason to hope that this young ruler will prove a successful and prudent administrator.

The tribute payable by the States amounted to Rs. 5,219-8, including arrears, and the whole amount has been realised.

The operations of the Chin-Lushai Expeditionary Force have been brought to a successful termination. Of the captives taken away in the Chengri Valley and Chima Valley raids, 7 escaped from the hands of the raiders and 75 were recovered by ransom or otherwise.

But the expedition dealt with the northern tribes and had no effect on the Shendus living to the south of Fort Lungleh. Two of their parties entered our territory during the past year while the expedition was in progress. On receipt of information patrols were immediately despatched in search of them. The first party could not be found, but traces of a large encampment said to have been occupied by them were visible in the neighbourhood of the Chanda village. The second party was discovered within 2½ miles of the Pyramid Hill post, but they beat a precipitate retreat as soon as they found themselves pursued. There is little doubt that they crossed the border for raiding purposes, which they would have carried out had circumstances favoured them. The complicity of these tribes in some of the raids of

previous years, the necessity of securing the release of the persons then taken prisoners by them and still held in captivity, and their general raiding propensities, render it imperative to adopt measures for exercising control over the villages inhabited by them.

There was also a scare in the Upper Chengri Valley in the month of August, due to a rumour that Lienpunga was preparing for another raid. The Joormorong outpost was re-occupied by the frontier police in consequence, and confidence was soon restored among the villagers. The military expedition prevented the holding of the annual durbar, but Captain Shakespear, the Assistant Political Officer, held a meeting of the Mulienpui Chiefs after the close of the year.

There was a considerable falling off in the export and import of almost all kinds of articles of trade on the frontier, but this is attributable to the unsettled condition of the country due to the expedition, and the figures of the past year do not afford an indication of the future progress of trade. The trade in salt is already more extensive than before, and the further improvement effected in the communication with the Demagri Bazar will facilitate the sale of other commodities in much larger quantities in future. During the past year 3,663 persons belonging to the trans-frontier tribes resorted to the Demagri Bazar, against 2,949 in the preceding year.

Trade.

Besides the permanent posts at Demagri, Burkal, and Ruma, and the newly-established one at Lungleh, three temporary posts at Pyramid Hill, Joormorong, and Keokradong were occupied during the year. The frontier force performed their very arduous duties in connection with the expedition cheerfully and well, and General Tregear, who commanded the Chittagong column of the expedition, was fully satisfied with their work. It is, however, to be regretted that the severe and fatiguing duties and exposure to which they were subjected increased the number of casualties from 16 to 51 under the heads of discharge, retirement, and resignation. A considerable number of men appear to have resigned in consequence of an order prohibiting the grant of leave except on medical certificate, but this restriction has since been withdrawn and leave is now freely granted. The expenditure incurred in provisioning the force amounted to Rs. 52,614, against Rs. 33,051 in the previous year. The increase is due to the fact that the men garrisoning distant outposts were not, as usual, brought in to Rangamati during the rainy season of the past year.

Frontier police.

The coolie corps, mainly composed of recruits from the Sonthal Pergunnahs, was of great service during the expedition. The men were first employed in improving a portion of the road from Rangamati to Peskisurra, but the work had to be stopped before much progress had been made, as they were required to work on the Burkal tramway in consequence of the desertion of the local coolies owing to an outbreak of cholera.

Coolie corps.

The relations of this State with the British Government have continued to be friendly and satisfactory. .

KUCH BHAH.

II.—ADMINISTRATION OF THE LAND.

Survey.

THE following statement shows at a glance the progress made in, and the cost of, survey operations in Bengal, in the principal Government, wards' and private estates in all parts of the province except the Sonthal Pergunnahs:—

CLASS OF ESTATES.	Area in acres.	Under professional survey.	Under non-professional survey.	TOTAL AREA SURVEYED UP TO 31st MARCH 1889.		COST PER ACRE.	
				By professional party.	By non-professional party.	Professional survey.	Non-professional survey.
		Acrea.	Acrea.	Acrea.	Acrea.	Rs. A. P.	Rs. A. P.
Government estates	27,48,699	26,55,178	92,981	5,27,504	7,524	0 6 8	0 10 0
Wards' estates	18,35,582	17,80,448	55,134	10,10,291	55,134	0 6 8	0 5 10
Private estates	78,750	...	78,750	...	49,579	...	0 3 6

The surveys in all the above cases were in connection either with settlement proceedings or with proceedings for the record of rights.

The greater part of the province of Orissa is temporarily settled, and last general settlement, after detailed investigation into the circumstances of the province, was made for 30 years in 1836-37. This settlement expired in the famine year 1866-67; but as Government considered that it would be inexpedient to increase the land revenue of the province at that time, the settlement was renewed without enhancement for 30 years, and its term will therefore expire in 1896-97. For this reason it has become necessary to undertake the survey and the preparation of a record of rights with a view to the resettlement of revenue, and a scheme was accordingly submitted during the year for the conduct of the survey through indigenous agency, under the supervision of the Survey Department, and received the approval of the Government.

As a part of the scheme for the general survey of Orissa, the measurement of pergunnahs Rohang, Sarai, and Chowbiskood in Poori, which mainly consist of Government estates, was undertaken last cold weather. The total area of which the traverse survey was completed was 407 square miles, the area cadastrally surveyed was 358 square miles, and the total cost to the close of the year was Rs. 24,872.

The traverse survey in Poori was extended to pergunnahs Lembai, Kot Rohang, and Kotdesh, and a traverse survey was also made of 127 square miles in certain tracts irrigated from canals in Cuttack.

The total area of the Western Duars in Jalpaiguri is 1,913 square miles, inclusive of forest, jungle, and waste lands. To the end of the last year's field season the traverse survey of 450 miles and the cadastral survey of 210.35 square miles had been completed. In the field season of 1889-90 782 square miles had been traversed, the 4-inch topographical survey of 118 square miles and the cadastral survey of 304 square miles had been completed at a total cost of Rs. 76,553, and it is estimated by the Survey Department

that in order to complete the records of this area, a further sum will be required, making a total outlay of Rs. 1,04,509, or 9½ annas per acre. This expenditure is far in excess of the estimates prepared by the Survey Department, and is said to be due to the unhealthiness of the climate and to want of co-operation on the part of the people; but the Director observes that, when the estimates were prepared, the survey authorities had had a year's experience of the locality, and that the difficulties now pointed out might have been foreseen. Moreover, the cost per acre in the year under report was far in excess of that of the previous year, and cannot, therefore, be wholly accounted for by the nature of the climate or by the attitude of the people.

The survey of the thanas Satkania, Banskhali, and Patya in the district of Chittagong was begun during the cold weather. The total area traversed was 716 square miles. The total area cadastrally surveyed, including the completion of Old Thana Ramoo, was 270 square miles. The total cost to the end of March, inclusive of the area surveyed in Old Thana Ramoo, was Rs. 82,490. It is not as yet possible to say what the final cost of survey per acre will be, but it is feared that it will be high, owing to the smallness of the fields, the unhealthiness of the climate, and the litigious character of the people.

A professional survey of 17 Government estates in Backergunge, with a total area of 157 square miles, of which 46 square miles are more or less under cultivation and the remainder under jungle, was ordered during the year. The survey was completed, but a considerable portion of the writing up of the records remained to be done at the end of the year. One and the same party was employed on the survey of these, and of the Dakhin Shahbazpore ward's estate, and the expenditure on both Government and the wards' estates was Rs. 23,374, but it is not stated how much of this is chargeable to the wards' and Government estates separately. The increase in Government revenue expected is Rs. 7,000 a year.

Survey training schools were opened at Tangi and Barabana in Cuttack, and 115 pupils passed through and were reported by Mr. Patterson, the Deputy Superintendent of Survey, to be competent to carry on the work of survey next season. Mr. Patterson also reports that a number of pupils can be obtained and passed through the schools by next cold weather, sufficient for the requirements of the Survey Department.

The Survey Party in Calcutta has been employed throughout the year in surveying (1) those houses which had not been previously surveyed owing to the absence of owners and various other causes, and (2) the boundaries of holdings and of the streets, lanes and ditches belonging to the Municipality, which had not been demarcated at the time the principal survey was completed.

There were 52 applications for survey and settlement of lands under Chapter X of the Bengal Tenancy Act during the past year, as against 40 of the previous year. The following statement shows the progress made in surveys under the Tenancy Act, in Government, wards' and private estates, during the year:—

Surveys of Government Estates under Chapter X of the Bengal Tenancy Act.

Settlements.

THE financial results of the settlement operations conducted during the year are compared with the results of the year 1888-89 in the following statement —

YEAR.	ORIGINAL SETTLEMENT.		RESETTLEMENTS.				SUMMARY SETTLEMENTS.				SETTLEMENTS FOR DISPOSAL.	
	Num-ber.	Net revenue.	Num-ber.	Net revenue.	Increase.	Decrease.	Num-ber.	Net revenue.	Increase.	Decrease.	Number.	Esti-mated revenue.
1888-89	139	Rs. 37,894	543	Rs. 1,42,154	Rs. 35,394	Rs. 6,143	142	Rs. 82,227	Rs. 2,257	Rs. 41,799	1,165	Rs. 5,91,276
1889-90	163	17,608	381	1,33,375	29,717	6,177	118	82,062	3,069	1,333	1,273	4,10,886

Altogether 163 original settlements and 381 resettlements were effected during the year, but none of them call for special mention.

The settlement of the Jellamoota estate in Midnapore with its proprietors was concluded during the year, the net revenue payable by the proprietors being Rs. 1,26,753. The area under cultivation at the time of the last settlement of the Angul estate was 50,081 acres; the area now found to be under cultivation is 133,742 acres. The application of the existing rates to the areas now found by survey to be under cultivation would result in trebling the revenue hitherto paid by the surbarakars to Government. As a sudden increase of revenue from Rs. 36,898 to about Rs. 1,10,000, however, was considered to be more than what the ryots and surbarakars could bear, it was proposed that lands under cultivation at the time of the last settlement should be assessed at the rates adopted at that settlement, and that lands since brought under cultivation should be assessed at half rates for five years, at three quarter rates for the following five years, and then at full rates. The ryots and surbarakars are willing to accept these proposals, which are now under the consideration of Government. The total cost of the preparation of the record of rights and settlement of rents to the end of March 1890 was Rs. 40,363, or annas 1-10 per acre. Thirty-three villages of the Banki estate in Cuttack were assessed, with the result that the revenue payable to Government in these villages increased from Rs. 4,453 to Rs. 5,823, or by 30.7 per cent. An increase of Rs. 5,000 is expected on the entire estate. The total cost of settlement to the end of March was Rs. 8,018, and Rs. 4,000 more will be required to complete the settlement. The total cost of settlement will thus be Rs. 12,018, or $2\frac{1}{2}$ annas per acre. No settlement work proper was done in Pooree during the year, and the expenditure incurred in connection with settlement charges amounted to Rs. 2,002 up to end of May 1890. The settlement work in the Duars was somewhat delayed by the deputation of the Settlement Officer, Mr. Walsh, on other duty, and by delay in appointing his successor. The total cost of settlement operations to the end of the year under report was Rs. 24,755. The increase of revenue expected is about Rs. 40,000.

The sum granted by Government for the ordinary settlement work of the year was Rs. 48,300, of which Rs. 45,404 appears from the Accountant-General's report to have been expended.

Government Resolution, dated 29th January 1889, ordered a settlement to be made, under the Sonthal Pergunnahs Settlement Regulation III of 1872 as amended by the Sonthal Pergunnahs Rent Regulation II of 1886, of certain estates within the Sonthal Pergunnahs district. The total area eventually brought under the settlement operations up to the end of April 1890 was about

200,000 acres of cultivated and about 180,000 acres of uncultivated land. The statement below shows the progress made up to the date above named :—

Statement exhibiting the field work done during seasons 1888-89 and 1889-90, the recess work done during 1889, and the recess work remaining to be done in 1890.

78·24, against 71·7 in 1888-89. In the districts noted in the margin‡ the collections exceeded 90 per cent. of the total demand. With the exception of Khulna, which has fallen out of the list, all the districts mentioned in it in 1888-89 are again included, while those of Rungpore, Tipperah, Maldah, Balasore, and Lohardugga have qualified for a place in the list during the year under report.

§ Districts showing improved percentage.

	Percent- age in 1888-89.	Percent- age in 1889-90.		Percent- age in 1888-89.	Percent- age in 1889-90.
Monghyr	65·47	59·49	Nuddea	75·1	79·45
Midnapore	60·92	61·52	Backergunge	69·47	79·93
Furzedpore	61·67	65·37	Chittagong	72·3	81·78
Patna	53·84	65·45	Gya	76·12	82·08
Burdwan	58·91	66·91	Bogra	80·93	83·04
Moorsheadabad	63·48	71·48	Noakhally	72·72	83·77
Hooghly	65·54	72·01	Shahabad	79·58	84·06
Poorce	51·89	72·68	Jessore	77·25	84·56
Mymensingh	70·02	74·31	Sonthal Per- gunnahs	64·78	86·17
24-Pergunnahs	62·97	77·76			
Dacca	77·31	78·48			

Districts showing a falling off.

	Percent- age in 1888-89.	Percent- age in 1889-90.		Percent- age in 1888-89.	Percent- age in 1889-90.
Mozufferpore	49·88	45·82	Cuttack	82·43	74·06
Durbhunga	65·43	48·66	Pubna	77·66	77·59

Bhagulpore	68·64	60·84	Rajshahye	89·76	86·43

management and (b) Estates under farming leases:—

The percentage of the total collections on the total demand for the districts which did not reach the 90 per cent. standard are compared in the margin§ for the two years 1888-89 and 1889-90. Out of the 30 districts named, 20 show an improved percentage and 10 a falling off.

The following table compares the figures of demands, collections, remissions, and balances for the same two years under the two divisions —(a) Estates under direct

	YEARS.	DEMANDS.			COLLECTIONS. •			Remissions.	BALANCES.			Percentage of total col- lections on total de- mand.	Percentage of total un- collected balances on total demand.
		Current.	Arrear.	Total.	Current.	Arrear.	Total.		Current.	Arrear.	Total.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Under direct management.	1888-89	Rs. 10,08,905	Rs. 4,78,451	Rs. 20,87,416	Rs. 11,18,727	Rs. 3,34,408	Rs. 14,53,135	Rs. 19,244	Rs. 4,87,780	Rs. 1,27,257	Rs. 6,15,037	69·61	29·46
	1889-90	16,33,361	6,01,757	22,35,118	12,02,333	4,00,530	17,53,303	42,936	3,24,352	1,14,467	4,38,819	78·44	19·63
Under farming leases.	1888-89	6,00,723	1,89,421	8,80,147	5,35,120	1,44,509	6,79,635	623	1,64,598	44,292	2,08,890	76·43	23·49
	1889-90	9,98,078	2,08,092	9,07,070	5,60,679	1,73,121	7,33,800	3,792	1,38,084	31,394	1,69,478	80·80	18·69

Under both heads, though the total demands were larger, the balances have been reduced, the collections having also been larger. To this extent there has been an improvement as compared with the results of 1888-89, but the remissions under both heads were larger in 1889-90 than in the year previous. In the current collections against estates under direct management the percentage was 79·1, against 69·53 in 1888-89, while the arrear collections on the arrear demand are 76·5, against 69·89. In estates under farming leases current collections show a percentage of 82·2 against 76·47, and arrear collections 83·2 against 76·29.

There has been no change in the Burdwan, Presidency, Dacca, Chittagong, Bhagulpore, Orissa, and Chota Nagpore Divisions.

ESTATES UNDER DIRECT MANAGEMENT.

Agency and mode of management.

The collections from the cart-road reserve lands in Darjeeling were made during the year by the Sub-Deputy Collector instead of by the Surveyor as in the previous year.

The General Manager of Wards' Estates in Patna was placed in charge of the Government estates there.

In Durbhunga the management by European agency was done away with after the restoration of the Malinuggur estate to the Durbhunga Raj, and a small establishment was entertained for Bakhtiarpore, which is now the only Government estate in the district.

A revised arrangement was made for the management of the Majnamoota estate in Midnapore, in consequence of the settlement of the Jellamoota estate with its proprietors. Two out of the four circles into which the estates were divided have been abolished, and the services of two Sub-Deputy Collectors replaced at the disposal of Government. Some reduction was also effected in the charges of the remaining circles. The question of further reducing the establishment by substituting a Sub-Deputy Collector for the Deputy Collector in charge, and dispensing with the services of other hands in the subordinate staff is under consideration.

The following table exhibits the amounts expended in each division on works of improvement:—

Miscellaneous works of improvement.

DIVISIONS.		AMOUNT EXPENDED—					
		In digging tanks and sinking wells.	In drainage and irrigation.	In planting trees.	In dams and embankments.	In sundry works.	Total.
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Burdwan	...	3,209	...	61	2,466	181	5,907
Presidency	...	347	228	1,238	1,813
Rajshahye	..	615	...	104	...	3,244	3,963
Dacca	...	2,021	2,567	4,591
Chittagong	...	710	...	119	400	442	1,671
Patna	...	2,600	4,890	36	2,898	763	11,477
Bhagulpore	...	800	225	1,025
Orissa	...	5,408	6,033	13,582	25,023
Chota Nagpore	1,834	1,834
Total	...	15,713	6,952	310	11,797	22,232	57,004

In addition to the above, Rs. 17,992 were expended on miscellaneous improvements in the Orphanage market in the 24-Pergunnahs, Rs. 17,453 on repairs of gramhheris and clearance of khals in the Majnamoota and Jellamoota estates in Midnapore, and Rs. 6,336 (out of the Darjeeling Improvement Fund) on the clearance of jungle and drains, improvement of hâts, sinking of wells, planting and rearing of trees, and maintenance of roads, dispensaries, and primary schools in Darjeeling.

The large amount entered under the head "Sundry works" against Orissa in the above statement refers chiefly to works executed in the Khorda estate.

This subject will be more fully treated in a subsequent chapter. Some notice of it is, however, required here.

Cultivation of new staples.

The cultivation of Buxar wheat in Nuddea, Bogra, Julpigoree, Chittagong, and Balasore was more or less unsuccessful, except in Bogra and the Alipore subdivision of Julpigoree. The result of wheat cultivation in Moorsshedabad has not been reported. The potato was cultivated in Chittagong, Cuttack, Midnapore, and Julpigoree. The experiment in the Alipore subdivision ended most satisfactorily. The Darjeeling potato was tried with fair results in the Sasseram subdivision of Shahabad. The cultivation of *boro* paddy, introduced into the Diamond Harbour subdivision of the 24-Pergunnahs after the floods of 1888, has since been attended with favourable results. An attempt was made to cultivate long-stemmed paddy in low-lying lands in the Contai subdivision in Midnapore, but it was fruitless. In Chittagong experiments in sugarcane met with varying success, and in tobacco resulted in failure.

Education.

Primary schools are maintained in Government estates in most districts, the largest expenditure being reported from Darjeeling (Rs. 5,077), Chittagong (Rs. 4,839), Julpigoree (Rs. 3,224), and Pooree (Rs. 3,329).

Roads and Communications.

The usual grant of one and a half per cent. on the collections from Government estates was made over to the credit of the District Road for the improvement of communications in Government estates. The expenditure on this account is reported from many districts, the largest being in Julpigoree (Rs. 40,739). Government, moreover, made a special grant of Rs. 15,000 for opening out roads in this district. In Darjeeling Rs. 1,500 were spent from the Darjeeling Improvement Fund and Rs. 3,858 by the District Road Committee in the maintenance of village roads. In Backergunge Rs. 3,305 were expended. The works executed in other districts call for no special notice.

Inspection of accounts.

The tehsil registers and accounts in the different districts were inspected, and the ryots' receipts tested in many cases. The results of these inspections were in general satisfactory.

In Midnapore, Burdwan, Patna, and Durbhunga some errors and irregularities were brought to light, and have subsequently been corrected and remedied. A tehsildar of the Majnamoota estate in Midnapore was convicted of criminal breach of trust and dismissed. In Hooghly a tehsil mohurir was found to have embezzled Rs. 3-13. He was criminally prosecuted and convicted, but the case has, on appeal, been remanded by the District Judge for re-trial. After the final adjustment of accounts in the Jaipore Government estates in Bogra, referred to in the previous year's report, the total amount embezzled by 13 patwaris was found to be Rs. 1,950-15. As the defalcations extended over a long period, during which there was a lack of supervision and gross mismanagement, especially in matters of accounts and the maintenance of registers, it was not considered advisable to take any criminal action against the patwaris. Of the amount embezzled, Rs. 836-2-3 have been realised, and the balance is under recovery. The Manager of the estate, Moulvie Abdar Rahman, who is under suspension, was pronounced unfit for retention in Government service. As, however, the prescribed procedure of formally calling upon an officer under such circumstances to show cause why he should not be dismissed was not complied with in this case, a further report is awaited. The complaints of the ryots of Gya, referred to last year, were found on enquiry to be false and malicious, and the tehsildar in Tipperah, whose case was pending, was reinstated. The tehsil accounts in Noakhally are said to require a thorough overhauling, which is now in progress.

Condition of ryots.

The condition of the ryots throughout the Government estates in Dacca, Bhagulpore, Patna, and Chota Nagpore Divisions is reported to have been generally good. In Chittagong the ryots were unfavourably circumstanced during the early part of the year. But latterly they were more prosperous than ever, as they had excellent crops as well as high prices for them. In Midnapore the tenantry suffered from either flood or drought. The crops of the ryots of Kootooberia in the 24-Pergunnahs were injured by the salt-water inundation, and some remission of rent has since

been sanctioned. In Kushtea, in the district of Nuddea, the ryots suffered from loss of crops and collapse of houses, caused by floods and encroachments of the Ganges. The principal estates in the Lalbagh subdivision in Moorshedabad have been subject to inundations during the last four years, and this liability has, in a great measure, affected the condition of the ryots. In Rajshahye agricultural loans were granted to the ryots of the Mircha Diar estate, who suffered from the destruction of crops by a sudden overflow of the river. In Gya both the *bhadoi* and *kharif* crops yielded a good outturn, and the advances made by Government materially helped the ryots in improving their condition. The Khorda estate in Pooree had good harvests during the year. The lower and labouring classes in Cuttack, who were in distress during the early part of the year on account of scarcity and high prices of food-grains, have been in better condition since the winter paddy crop was reaped in November last.

The amount placed by Government at the disposal of the Board for the management and improvement of estates was Rs. 2,72,108, and this sum was distributed according to the requirements of the different districts. The Accountant-General reports that Rs. 2,71,696 have been expended, but these figures are liable to modification after the accounts for March 1890 have been finally closed.

Wards' Estates.

THE rent-roll of the wards' and attached estates under the management of the Board of Revenue slightly exceeds the large sum of a hundred lakhs, or a crore of rupees a year, and the collections in 1889-90 were nearly 103 lakhs, being better than the current demand by Rs. 2,74,728. This result is the best ever attained, except in the year 1878-79. The explanations given in regard to the estates on which collections have been deficient are generally satisfactory, the exception being in the case of the Chandra Kumar property, Shahabad, where only 75 per cent. of the current demand was realized—a result due to the unsettled condition of certain villages which were over-assessed, the villagers being burdened with debts incurred during the time of the late proprietor. In the Dhalbhum Estate the collections amounted to only 72 per cent. of the current demand, a large portion of the balance (Rs. 96,291) shown against pergunnah Dhalbhum alone being disputed and irrecoverable, owing to the resumed ghatwali tenures having been assessed by the late proprietor's amla in a most perfunctory and summary manner without the knowledge of the tenants and without acceptance by headmen and tenure-holders. With a view to dispose of the objections raised by the tenants, the re-measurement and re-assessment of 111 villages of the pergunnah were undertaken. In Deo the collections from the middlemen who farm the estate were very bad owing to opposition on their part to the management of Government. The system of ticcadari management is maintained merely as an expedient for temporary convenience, to facilitate collections when the Manager is not, for any cause, able to do what is properly his own work.

The good collections of the year have slightly decreased the large outstanding balances which constitute so objectionable a feature in the administration of these estates, while more has been done in the same direction by granting remissions (which generally means writing off debts barred by limitation), with the result that the arrears have been reduced from 108 lakhs to 82. The Srinagar Ward's Estate has been seven years under the management of the Board, and their attention has been repeatedly called to the large balances outstanding; yet a sum of Rs. 83,432 is entered as still due from the period before the Board took charge. The Bhowanipore Estate, with a rent-roll of Rs. 1,62,576, shows, after large reductions, a balance of Rs. 9,63,321, most of which is classified as bad and irrecoverable, and must presumably be barred by limitation, if it was ever really due.

The claims of Government on wards' and attached estates have been satisfied during the year, the moderate balance (since paid) of Rs. 18,174 being more than equalled by advance payments made on other estates. This is an important branch of wards' administration, which at one time received insufficient attention.

The general financial results of the year cannot be regarded as satisfactory, inasmuch as the debts due by estates increased from 45 to 48 lakhs, the cash balances diminished from 24 to 17 lakhs, while only four lakhs were invested or spent on the purchase of land.

The amount spent on improvements, Rs. 66,930, is somewhat in excess of the expenditure under that head in previous years. But on some properties there is a deficiency in this respect: for instance, in Cossimbazar, with a rent-roll of over four lakhs, the outlay on improvements was only Rs. 4,668, while Rs. 75,067 were invested;

in Narhan, with an income of nearly two lakhs, nothing was spent on improvements, while a lakh was invested.

The most important improvements during the year were those made by effecting surveys and records of right under the Bengal Tenancy Act. The progress made during the year was generally satisfactory. The survey of the Srinagar Estate (695 square miles) was completed under the efficient management of Mr. Collin. Maldwar has been finally dealt with. In Sunkerpore, Burdwan, Churamon, Koojung, and Kanika the proceedings are in an advanced stage.

Education.

Satisfactory progress has been made in the education of each of the principal wards.

III.—PROTECTION.

Course of Legislation.

DURING the year 1889-90 the Council of the Lieutenant-Governor of Bengal had under consideration three Bills. All of these were passed and received the assent of the Governor-General, viz., Act I (B.C.) of 1890, an Act to consolidate the Calcutta and the Suburban Police Superannuation Funds; Act II (B.C.) of 1890, an Act to amend the Bengal Vaccination Act, 1880; and Act III (B.C.) of 1890, an Act to consolidate and amend the law relating to the port of Calcutta, and to the appointment of Commissioners for the said port.

This Act received the assent of the Governor-General on the 18th February 1890. The Bill was introduced, read in Council, and referred to a Select Committee on the 6th April 1889. The report of the Select Committee was presented on the 21st December 1889, and the Bill was passed on the 18th January 1890. The Superannuation Funds for the Police Force of the Town and the Police Force of the Suburbs of Calcutta had hitherto been distinct; the former, it appearing, being in a flourishing financial condition, while the latter was clearly not solvent. This had been brought about by causes which indicated that the burdens of the one fund had in many cases been thrown upon the other. The object of the Bill was to remedy the state of things so disclosed, and this has been done by consolidating the two funds.

This Act received the assent of the Governor-General on the 4th March 1890. The Bill was introduced, read in Council, and referred to a Select Committee on the 4th January 1890. Under section 33 of the Bengal Vaccination Act, 1880, the Lieutenant-Governor was empowered to make rules and issue orders in all matters connected with the working of that Act which was applicable in the first instance to the town of Calcutta, the port of Calcutta, and the suburbs. Separate rules were made for Calcutta, for the suburbs, and for places outside Calcutta and the suburbs. It was found desirable to have the same rules in force henceforth in the old town of Calcutta and in that portion of the suburbs which has been amalgamated therewith by the Calcutta Municipal Consolidation Act of 1888. The Bill, by making the necessary alteration in the definition of the words "Town of Calcutta," and by eliminating the definition of the "Suburbs of Calcutta" in the Bengal Vaccination Act of 1880, now extends the operation of that Act to the enlarged municipal area and to the port of Calcutta.

This Act received the assent of the Governor-General on the 15th May 1890. The Bill was introduced, read in Council, and referred to a Select Committee on the 6th April 1890. The Bill purports to re-enact the existing law relating to the port of Calcutta with amendments found by experience to be necessary, and to consolidate into one Act the law relating to the port. The more prominent alterations in the law introduced by the present Act may be summarised as follows:—

The Commissioners for the port of Calcutta are now represented by 15 members, and consist of—

- the Chairman;
- the Vice-Chairman;
- eight elected and five nominated Commissioners.

Of the elected Commissioners, the Bengal Chamber of Commerce is empowered to elect five instead of four as formerly, and the restriction which hitherto limited the choice of a representative by the native community to one of its own nationality for each of the two constituencies, where its vote practically governs the election, has been removed.

The offices of Chairman and Vice-Chairman, subject to a power to cancel the same or appoint a successor reserved to the Local Government, have been made permanent.

New sections introduced, dealing with the valuation of Port Trust property for the purposes of municipal assessment, follow in principle the lines laid down in the Calcutta Municipal Consolidation Act of 1888. Conspicuous among the innovations of minor import connected with the subject of assessment is one which permits the reduction of ten per cent. being made on the sum payable under the provisions of the Act as the consolidated rate on the annual value of the Port Trust property. Any dispute, moreover, which may possibly arise with regard to such annual value is to be submitted to the final decision of the Local Government.

The power entrusted to the Commissioners upon the limits of the port being extended to remove any private wharf, jetty or other work now requires before its exercise the assent of the Local Government. Further, the right to institute a civil suit for the award of compensation is expressly given to the owner of such work for the injury he may have suffered through its removal, should he deem himself in a position to show that the work had been lawfully made or was one in which a prescriptive right had accrued. A similar privilege is reserved to persons who may deem themselves aggrieved by being debarred the use of any private wharves or other works under an order in that behalf enforced by the Commissioners in accordance with the provisions of the Act.

The scale of charges to be framed by the Commissioners for the conveyance of goods by their tramways has been included among those which require the previous assent of the Local Government before they can be validly enforced.

Some obsolete enactments of the older Acts have been omitted; rules relating to the preparation and submission of budget estimates have been revised; provision has been made for the grant of pensions to the Commissioners' employés; the powers and duties of the Port Police have been defined, and the liability which attaches to the Commissioners in respect of goods left at their premises or under their charge has been more clearly explained.

Police.

EXCLUSIVE of the Railway Police, the sanctioned force in 1889 was 73 superior officers, 3,418 subordinate officers, and 19,365 constables; but at the close of the year the subordinate officers were 74 and the constables 348 under* the sanctioned strength. The total expenditure for the year was Rs. 40,81,342, while the expenditure on that portion of the force that was employed on purely police duties was Rs. 26,23,294, or 7·6 pies per head of the population. These figures, as also those of the proportion of police to area, nearly approximate to the figures of previous years.

Town Police. The Town Police worked with but varying success. In Howrah, Dinajpur, and the Presidency Division generally they are reported to have done well, while in Dacca, Mymensingh, Bhagalpur, and at the head-quarters of four of the important districts of the Patna Division they failed in many respects. In Patna itself the procedure in cases instituted for breach of municipal bye-laws would appear to be faulty in the extreme, and in Faridpur it is said that the great extension of the boundaries of the municipality rendered its proper watch and ward an impossibility. The Magistrate of this last district has been asked for a special report on this point. It has for some time been clearly necessary to take measures to lighten the duties and increase the popularity of Municipal Police. A redistribution of batta allowances, which are now given to all fourth-grade constables on town duty, and the successful introduction of a new system of working this force (described in paragraph 9 of the Resolution on the Police Report for 1888) in Midnapur and Hughli, have effected some improvement. The further extension of this scheme has now been sanctioned.

Rural Police. It would be useless to recapitulate all the cases that illustrate the well-known failure of the District Police in Bengal. In Kulpi, in the 24-Pergunnahs, two of the ringleaders in a dacoity case were chowkidars, while the punchayet was the receiver; in Murshidabad the chakeran men are described as a community of subsidised ruffians mostly belonging to the criminal classes and constituting a positive source of danger to the public; while abuses in the matter of distribution of pay and arrears of collection continue as numerous as ever. There are a few exceptions to this very general failure, but the reports have long since shown that further reform is needed. Colonel Ramsay, District Superintendent of Police of Monghyr, was placed on special duty at the end of the year in order to investigate certain points connected with the chowkidari system. His labours have now merged in those of the Committee which has been appointed to consider the general question of police reform. It will be, perhaps, the most important portion of the Committee's duty to attempt to devise means of welding together more completely than has hitherto been done the rural and the regular police. In the tea districts it will probably be necessary to introduce some system by which Government may be kept informed of what goes on in the gardens. The Inspector-General of Police sums up the present conditions in the following unfavourable terms:—

"The position of the chakeran men remains as it was, whilst that of the others has much improved wherever attention has been given to the subject, and in Chota Nagpur at all events, under the special Act, the chowkidar has at present certainly nothing to complain of. In any further legislation which may be attempted the powers of the punchayet should be restricted to assessment and collection, and the chowkidar must be brought under police control in a way that will bring home to him the fact that he is our subordinate with nothing to expect or fear from the village community. But the material is for the most part bad and rotten, and by placing things on a sounder footing we are not removing its inherent vices."

Four head-constables and five constables were judicially convicted and sentenced to various terms of imprisonment for ill-treating accused and suspected persons; and one sub-inspector and three constables in Jessore were dismissed for the same reason, although the judicial prosecution against them broke down for want of corroborative evidence. On this subject Mr. Veasey remarks—

“This exhausts the list of cases of this nature ordered to be shown as true, and it cannot, I think, be said that it is either long or serious. It is certainly outnumbered by the list of false charges, for accusations of this nature are much in favour amongst the criminal classes and their advisers; but although the police attach far too much weight to confessions, the old stock theory that most confessions are extorted by violence might very well be put on one side, though it is too much to hope that this will happen.”

The following statement shows the proportion of cognizable crime to population and police in various provinces of India :—

Criminal statistics.

PROVINCE.	Police.	Population.	Crime (cognizable).	Proportion of police to population.		Proportion of police to crime (cognizable).		Proportion of crime (cognizable) to population.	
				Police-man.	Per-sons.	Police-man.	Cases.	Cases.	Persons.
North-Western Provinces and Oudh ...	82,632	43,323,390	193,123	1	to 1,326	1	to 5.8	1	to 225
Punjab ...	20,095	18,842,264	87,721	1	to 1,337	1	to 4.3	1	to 214
Central Provinces ...	8,653	9,838,731	25,505	1	to 1,137	1	to 2.9	1	to 385
Bombay, including Sind ...	19,040	15,674,613	41,178	1	to 822	1	to 2.1	1	to 380
Madras ...	21,648	30,868,504	128,476	1	to 1,425	1	to 5.9	1	to 240
Assam, including Frontier Police ...	4,607	6,064,298	10,364	1	to 1,316	1	to 2.4	1	to 554
Bengal ...	23,306	65,964,160	111,476	1	to 2,830	1	to 4.7	1	to 591

In paragraph 14 of the Resolution on the Report for 1888, the difficulty of drawing any satisfactory conclusion from such statistics as are given in the above table was commented on, and it was said that it would be more interesting to compare the police of Bengal with that of other provinces in the matter of success in dealing with crime. In accordance with this suggestion, The Inspector-General of Police gives the results obtained by applying the tests of police work to the crime of the different provinces, and the following table has been compiled from these results :—

	North-West- ern Provin- ces and Oudh.	Punjab	Central Pro- vinces.	Bombay (in- cluding Sind).	Madras.	Assam (including Frontier Police).	Bengal.
Test A3—Percentage of police cases ending in conviction to cases investigated	35.4	33.8	51.6	32.4	27.2	30.5	32.8
Test A4—Percentage of police cases ending in conviction to cases decided	69.4	63.8	74.6	58.3	68.9	62.5	59.2
Test B2—Percentage of persons convicted in police cases to persons arrested by police	62.6	57.2	66.6	43.2	42.9	55.8	48.7

The Lieutenant-Governor concurs with Mr. Veasey in his opinion that Bengal does not “appear to advantage as regards judicial results, and the figures given under test A4 must represent a large number of failures of justice. The high standard of proof demanded, the latitude allowed to the advocates of accused persons, and the dilatory procedure so much in vogue, are all obstacles well-known and to be reckoned with in these provinces, whilst elsewhere they may be factors of less importance, but they would not exercise the influence they do if investigating officers were more careful and if supervision were more efficient.” At the same time (if the Central Provinces, which are in a great proportion inhabited by comparatively simple races, be excluded) the variations between provinces are not so great as might reasonably have been expected.

The following figures show the amount of cognizable and non-cognizable crime reported in the province as compared with that of the two previous years :—

	1887.	1888.	1889.	Increase as compared with 1888.	Increase as compared with 1887.
Cognizable ...	101,969	110,357	119,656	9,299	17,687
Non-cognizable ...	109,254	112,606	117,407	5,401	8,153
Total ..	211,223	222,963	237,063	14,700	25,840

During the year under review there was an increase of cognizable crime in all the Divisions of Bengal except Rajshahye, the increase being most marked in the Burdwan and Patna Divisions. In non-cognizable crime there was also a general increase, the only exception being Patna, which shows a small decrease of 127.

As in the previous year, the increase in cognizable crime was mainly under "Cases against property" and "Other cases," the number of which rose from 68,951 and 30,275 in 1888 to 74,431 and 34,072 respectively in 1889. This is said to have been chiefly due to the high prices of food-grains during the year. As remarked in the Resolution on the Jail Administration Report for 1889, the large increase of offences against property also affected the number of direct admissions into jail during the year, which rose to 33,542, the highest that has been recorded since 1879. The details of the increase in non-cognizable crime will be noticed in a subsequent paragraph.

The percentage of cases declared false decreased slightly from 6·0 to 5·8.

False cases.

The divisional percentages vary from 7·8 in Chittagong to 3·9 in the Orissa Division. The variations are most marked in the district returns, the highest being 21·2 in the

Chittagong Hill Tracts and the lowest 1·3 in the Sonthal Pergunnahs. In the Burdwan Division, the percentage varied from 8·2 in Hooghly to 2·1 in Howrah. The high rate in Hughli is said to have been due to the inclusion in the returns of direct cases summarily dismissed under section 203 of the Code of Criminal Procedure, while no satisfactory explanation is given of the abnormally low percentage in Howrah. In some cases the same districts, such as Bogra and Chumparun, in the former of which the percentage was 13·7 against 4 in 1888, and in the latter 9·3 against 17·6 in 1886, show considerable variations in the figures of different years. According to Mr. Veasey these variations are due more to "individual views and influences" than to any local conditions. It seems, however, to the Lieutenant-Governor that, though this statement is true, both in regard to the police officers who investigate and the magisterial officers who decide (and such fluctuations as those shown in Bogra and Chumparun are, doubtless, due to the personal equation of the Magistrates), it does not apparently cover the whole ground, as otherwise it would be difficult to account for the fact that the Chittagong Division generally returns the highest, and the Presidency Division the lowest percentage of false cases. In Puri, Balasore, and Maldah so many as 24, 31, and 39 cases, respectively, sent up in A form were declared false without any attempt to prosecute.

The statistics of the prosecution of complainants for bringing false cases are unsatisfactory in every way. There is a great falling off both in the number of prosecutions instituted and in the percentage of convictions obtained in the Presidency and Chittagong Divisions. Backerganj, Monghyr, and Chumparun have done best, but the 24-Pergunnahs, Hughli, Patna, Mozufferpur, and Purneah are all exceedingly bad. The whole subject has been reviewed lately by Sir Stuart Bayley in dealing with a proposal which has been made by the Government of the North-Western Provinces to extend the scope of section 25C of the Criminal Procedure Code, and His Honour is of opinion that, although much of the failure of officers in dealing with such cases is due to preventable causes, much more is due to defects in the law.

The results of sessions trials were unsatisfactory in the extreme, the percentage of convictions for the whole province falling from 56·0 in 1887 and 51·7 in 1888 to 49·1.

Sessions trials.

For the first time for many years the chances of the escape of an accused person who has been formally committed for trial by an investigating officer appear to be greater than the chances of his conviction. For this result the districts of Pubna and Bogra appear to be very largely responsible, and the Lieutenant-Governor cannot but think that causes other than the alleged misconduct of the police must have contributed to the failures of justice that undoubtedly occurred. The percentage fell in Bogra from 51·7 in 1888 to 22·2 in 1889, and in Pubna from 48·9 to 10·0; and it is worthy of notice that the Jail Report for the past year shows that Pubna headed the list of releases on appeal with a percentage of 22·76, while Bogra was not much better with a percentage of 12·11. These two districts are included in one Sessions charge.

In six out of eight jury districts the results were bad, notably so in Hooghly and Burdwan; but in Patna there was great improvement, and in Howrah the percentage (60·4) was above the average. The subject of trial by jury is now under the special consideration of the Lieutenant-Governor, who has been asked for a report on the subject by the Government of India.

The following table shows the number of true cognizable cases for the last five years, as well as the percentage of convictions obtained in such cases during those years :—

Analysis of crime by classes.		1885.	1886.	1887.	1888.	1889.	1885.	1886.	1887.	1888.	1889.
Abetment	1			3		1					
Class I.—Offences against the State and public tranquillity.		2,802	2,891	2,901	2,872	2,818	57·7	56·7	55·0	57·9	61·1
„ II.—Serious offences against the person.		4,484	4,542	4,543	4,022	4,702	43·3	41·8	43·0	42·6	43·1
„ III.—Serious offences against person and property or against property only.		24,103	22,803	22,234	25,247	27,824	9·7	8·4	8·5	8·2	8·5
„ IV.—Minor offences against the person.		2,533	2,682	2,427	2,403	2,334	21·0	21·1	19·6	20·8	20·1
„ V.—Minor offences against property.		42,306	40,020	36,181	38,381	41,032	36·2	34·6	33·4	33·6	35·3
„ VI.—Other offences not specified above.		24,819	27,003	27,753	30,159	33,950	89·9	88·8	89·5	89·2	90·7
Total	...	100,948	99,941	95,983	103,688	112,661	43·7	43·0	44·7	44·4	46·0

Under this class there was a small decrease of 54, due to a falling off in cases of rioting. The cases of coining were few in number and mostly unimportant. The decrease in the number of rioting cases is found in three Divisions only, an increase being shown in the number of such cases in all the others.

The great fall from 512 to 377 in the Dacca Division is most satisfactory, although even this lower number still leaves the Division at the head of the list. There were 353 cases in the Patna Division, but they were generally of a trivial nature, and the number does not appear excessive when the large area and vast population of this Division are taken into consideration. There were some serious cases in the Presidency Division, in which rioting has increased in the past two years. Jessore and the 24-Pergunnahs are responsible for the increase, while the figures in Khulna are still high. A most satisfactory fall in the number of persons bound over in Backerganj was not followed by any increase in rioting, though the presence of three bodies of punitive police in the district must have had its proper influence on the figures.

There is very little fluctuation in the figures under this class. There was a slight improvement in the percentage of convictions before the Sessions Courts (47·9 in 1889 to 44·4 in 1888), but the standard is very low. On the whole, the results in cases which come under this heading fully justify recent strictures on the working of the police, and show that they are as unsuccessful in prosecution as in detection.

There were 316 murders, the largest number reported since 1880. Robbers were responsible for 26 of these as against 10 in 1888 and an average of 8·2 for the five years before that, and there were again 13 due to poison. It is curious that this is the exact number of murders by poison in the years 1887 and 1888, and the average number of such murders in the four years before 1887. The increase in the total number of murders must be considered with the decrease of 17 in the number of culpable homicides.

There was a slight improvement in the percentages of conviction, but the standard is so low that there is not much room for congratulation. In one of the cases of murder by dacoits in Midnapur all five of the dacoits were sentenced to transportation for life, but only six persons had been convicted for murder as robbers before the close of the year. In the cases of murder by poison only one solitary person was convicted. For all other murders 214 were acquitted at the Sessions and 103 convicted, the majority of the latter receiving sentences of transportation.

If the figures of this class of crime be taken separately for each Division, a marked feature of the statistics is, as usual, the very large number of cases reported from the Dacca Division, in which serious crime is always prevalent. The statistics in Backerganj alone will bear comparison with those of the

whole Divisions of Chota Nagpur, Orissa or Bhagalpur, and Mymensingh is not far behind Backerganj, and it is in Mymensingh that there has been a notable increase in 1889 of 71 true cases. In the Presidency Division there has been a marked decrease common to most districts, while in Burdwan there has been an increase due chiefly to the district of Hughli. The figures for the Rajshahye Division show an increase of 33 cases in Rungpur, and those of the Chittagong Division show that there has been a distinct growth of crime attended by violence in the district of Chittagong. Chumparun, in the Patna Division, shows an increase of over 50 per cent.

Results in murder cases were very bad in most Divisions. In the two jury districts of Burdwan and Hughli there was not a single conviction in 20 cases. In the Presidency Division 63 persons were tried for "other murders," but only eight convicted. In 10 cases in Dacca only two persons were convicted, while in Faridpur, in the same number of cases, 44 persons were released and one was convicted. In Patna there was no conviction in a murder by dacoits and three murders by robbers, while in the Patna Division generally there were only nine persons convicted to 48 acquitted in 39 murders. But these are only examples of the general rule of results in 1889, and the Lieutenant-Governor agrees with the Inspector-General of Police in thinking that most of the failures of justice are due to the police attaching too much weight to confessions and the Courts too little weight to circumstantial evidence.

In perusing the brief accounts of important cases given by the Inspector-General, it is melancholy to note that many were due to quarrels between husbands and their youthful wives.

There were 234 cases of culpable homicide, against 251 in the previous year. The decrease is nominal, some cases having been included under the head of murder. The results of trials show a slight falling off, the percentage of convictions in true cases being 38·8, against 40·2 in 1888.

This class of offences includes dacoity, robbery, serious mischief, and burglary.

Serious offences against person and property or against property only.

The increase in these crimes reported in 1888 shows no signs of diminution in 1889. The results of trials are wholly unsatisfactory, and there is scarcely any portion of the report, which is the reverse of flattering to the Police in most of the statistics it produces, which more seriously reflects on their efficiency than this.

The following table shows the figures relating to dacoity for the last five years:—

	Cases, including those pending in previous year.	Convictions.	Percentage.	PERSONS—			Percentage of convictions to persons who appeared.	Percentage of convictions to persons tried.
				Appeared before Magistrate.	Convicted.	Acquitted.		
1885 ...	182	37	20·3	663	159	385	23·9	29·2
1886 ...	113	35	30·9	558	135	291	24·1	31·6
1887 ...	115	24	20·8	508	95	277	18·7	25·5
1888 ...	144	34	23·6	607	132	399	21·7	24·8
1889 ...	190	31	16·3	782	168	554	21·4	23·2

The percentage of convictions and the very great increase in the number of persons acquitted are both most serious features of the above statistics. The falling off in power and efficiency is everywhere observable, though Burdwan and Patna account for 16 cases each out of a total increase of 40 cases. In Chumparun alone there were 13 cases against a blank return for 1888. This serious outbreak of crime is attributed to the distress caused by high prices. Out of 35 persons sent up from this district, only nine were convicted, 26 being released. Results are worse in the Hughli district, which, with 11 cases, shows only one conviction under section 411, Indian Penal Code. In the Rajshahye Division, again, only two persons were convicted in 17 cases, against 49 discharged or acquitted. In the Burdwan district no arrest was made in three out of four cases, while in Purneah all the nine persons convicted have since been

released by the High Court. The only exception to this general run of bad results is Tipperah, where, out of 40 persons sent up for trial in four cases, 28 were convicted—a result no doubt creditable to the police of both Tipperah and Noakhali, who worked together, the dacoits belonging to the latter district.

In Midnapur there was a small increase from 8 to 11 cases. Five troublesome gangs in this district were broken up during the year, one of the ring-leaders (Kristo Chunder Chowdhury), who admitted having had a hand in 15 dacoities, and who was last released from jail in 1885, being sentenced on conviction to transportation for life. It is hoped that the breaking up of these gangs will have the effect of materially diminishing the number of dacoities in this district.

Two river dacoities, both attacks on rice-boats, are reported from the 24-Pergunnahs.

There were 177 cases of robbery, against 155 in 1888. No explanation is given of the increase which occurs under the heading of "Highway robberies." Out of 231 persons brought to trial, only 91, or 39·3 per cent., were convicted. In the Chota Nagpur Division six convictions were obtained in eight cases. In a case of mail robbery in Hazaribagh the accused was, on conviction, sentenced to four years' imprisonment.

There were 501 cases of mischief by fire, against 506 in 1888, but the judicial results were extremely bad, 30 persons being convicted, against 211 discharged or acquitted. The worst districts were Dinajpur and Mymensingh. In the former district only two persons were convicted in 86 cases, and in the latter only one in 36 cases.

Minor offences against the person.

A decrease of 71 under this class calls for no notice.

Including burglaries, which, for purposes of comparison, are usually treated with offences under this class, as well as under Minor offences against property. Class III, the number of cases was 66,932, against 61,711 in 1888. The large increase of 5,221 cases is attributed to the failure of crops and the consequent impoverishment of the lowest classes. The variations were most marked under the heads of theft and burglary, which show an increase of 2,305 and 2,501 cases respectively. Under burglary the percentage of convictions in cases was 7·5, against 7·2 in 1888; but the percentage of persons convicted shows a slight improvement, being 55·5 against 53·7. This is said to be due to the fact "that in a considerable proportion of cases the men sent up have been caught red-handed, so that the police have had their work done for them." Patna is again the worst among the Divisions, the number of burglaries (7,654) being nearly 700 more than any total reached in the Division during the last eight years, and 1,529 more than the total for 1888. Chowkidari parades and an increased use of the power to refuse investigation under section 157 have undoubtedly contributed to this increase; but the danger of too free a use of this power is shown in the falling off of cases in Patna, where there was a high percentage (37·0) of refusals; and Mr. Veasey is probably right in thinking that with fewer refusals there would have been more crime reported. In this matter the Lieutenant-Governor considers that much discretion should be left to the District Superintendents and their station officers, subject to the control of the Magistrate, and His Honour would call attention to the remarks made in paragraph 12 of the Resolution on the Report for 1887:—"The discretion is one which must be exercised. It requires to be carefully controlled, as it is liable to serious abuse, but its judicious exercise may relieve the police of much useless work. No general orders should be laid down in any district that particular classes of cases are not to be enquired into." The large increase of burglary in the Patna Division attracted the Lieutenant-Governor's notice last year when dealing with the statement of serious crime for the third quarter of that year. The attention of the Commissioner has since been drawn to the matter, and he has been asked to impress upon Magistrates and District Superintendents in the Division the absolute necessity for greater exertion on their part in the matter of checking and controlling this crime.

Amongst districts the worst was Monghyr with 1,945 cases, against 1,890 in 1888. In the Bhagulpur district there was an increase of 329 cases owing, it is said, to better reporting and high prices. The results in Midnapur were good in comparison with the bad ones last year, and the remarks of Mr. Munro on

the crime of this district, which have been quoted by Mr. Veasey, show an intelligent grasp of the wants of the district which is not always to be found elsewhere. In Dinajpur much good work is said to have been done of late years. This is indicated by the fact that there was a decrease in burglary both in 1889 and in the previous year, though the causes at work were much the same. Judicial results were, however, not satisfactory.

In Darjiling the number of cases increased from 91 to 141, or more than 50 per cent., while Faridpur shows an increase of 125 cases, and results are said to be going from bad to worse. Separate reports will be called for regarding both these districts.

An increase of 3,791 cases under this class was due to prosecutions for nuisance, the number of which rose from 21,641 to 25,599 during the year.

Bad livelihood cases show an increase of 54, but, as remarked by the Inspector-General of Police, this is far from satisfactory, in view of the fact that there was such a considerable increase during the year in cases of dacoity and burglary. Two thousand and twenty-five cases were instituted on the report of the police and 82 by petition before the Magistrate. Of these 1,178 of the former and 49 of the latter ended in conviction. The Lieutenant-Governor is disappointed to find that, though the importance of disposing of these cases as quickly as possible has repeatedly been insisted upon in previous Resolutions, the returns for the past year show no improvement in this respect. In 29 districts the average duration of cases exceeded 50 days from the date of first report to the Magistrate, while in two districts it was more than 100 days. In Durbhunga a case was no less than 717 days, or for nearly two years, under trial; while in one case in Dinajpur and in another in Midnapur so many as 442 and 404 days, respectively, were allowed to intervene between the date of report to the Magistrate and that of the issue of the process. Such delays as these are wholly inexcusable and completely stultify the whole proceedings. Again, there is apparently no reason why the average duration of a total of 31 cases in Dacca should be 148 days, when Sarun with 88 cases shows an average duration of only 4.6 days. As a means of effectually putting a stop to these delays, Mr. Veasey suggests that the cases should be entered in the Magistrate's case register. This matter will be dealt with separately. The number of cases tried in Court was 1,083, against 811 tried locally. The Lieutenant-Governor is of opinion that the increase in the number of cases tried in Courts is a move in the right direction, though he would not wish that the advantages of an efficient local enquiry should be forgotten. But the delays that are inseparable from an invariable determination to try these cases locally have very bad effects, and His Honour wishes to repeat the remarks made in the Resolution on the Report for 1886, that "it is far better that a case should be taken up at once in Court than that men should have charges hanging over their heads for months and months because it is not found convenient to depute an officer to the spot. There are many cases in which it is no kindness to the suspected person to make the enquiry in his village, and in which no advantage can accrue from such a procedure." The number of bad characters under police surveillance rose from 41,561 to 42,812. The increasing number on the registers is, however, the chief obstacle to effective scrutiny, and the Lieutenant-Governor is therefore glad to observe that Mr. Veasey has introduced a system of classification which, by making the duty lighter, will enable the police to devote more attention to habitual criminals.

There was an increase of 314 in the number of cases reported. Out of 3,016 persons brought to trial, 2,504 were convicted. Mr. Veasey remarks:—

Railway Police.

"The police as a rule are very successful with pick-pocket cases, which are nearly always the work of habitual criminals; but in these days of light sentences the releases pretty well balance the convictions, and the thief on coming out returns to his old ways, only changing the scene of his operations. A case is mentioned in which an old offender sentenced to five years at the Sessions was released on appeal, as the money was found under the seat. He was sitting next the person robbed, who had his pocket slit open in the usual way, and the result may perhaps be considered unfortunate. In two cases railway thieves of this class, well-dressed men of respectable appearance, came under observation only owing to their travelling without tickets, and were then found to be old hands, who would of course have indignantly resented suspicion."

In the case of a dacoity at Paleza Ghât the railway employés, who outnumbered the dacoits, excused themselves from assisting the police on the plea that they were not engaged to fight, and that if they did and got hurt they would probably be discharged. As an instance of the failure of railway cases when tried by inexperienced officers, the Assistant Inspector-General of Government Railway Police on the East Indian Railway mentions a case in which a pointsman, guard, and driver were prosecuted for gross negligence which might have been attended with the most disastrous results. The pointsman was convicted, but the driver and the guard were both acquitted, the former on the ground that it was a dark night and it was difficult for him to see, and the latter because he had "too much other work to look after between the stations." He suggests that it might be considered whether the more important cases should not be tried at the head-quarters of the district in which they occur by one of the senior officers. The Lieutenant-Governor does not see his way at present to issue a general order to this effect. The attention of the District Magistrates will, however, be called to the importance of taking up all such cases themselves, where possible, or at least of seeing that they are not tried by inexperienced officers.

One hundred and fifty-three persons were killed in 217 railway accidents, including 34 railway servants and 25 persons who committed suicide.

Non-cognizable crime.

Non-cognizable offences increased by 5,401, as will be seen from the subjoined table:—

				1888.	1889.
Class I	8,556	8,581
" II	30	33
" III	955	848
" IV	56,689	56,535
" V	9,110	9,730
" VI	11,074	11,356
Special laws	25,592	30,324
Total				112,006	117,407

The increase was mainly in offences under "Special laws," and was due to a larger number of prosecutions under the Municipal Act. In class VI cases under section 106 of the Criminal Procedure Code (security for keeping the peace on conviction) fell from 1,907 to 1,860. It is to be regretted that Magistrates make so little use of this important section, which, judiciously applied to a certain class of offenders, may be employed with the most salutary effect. The attention of district officers will be called to this matter. Process was issued against 115,303 persons in 1889, of whom no fewer than 31,594 were acquitted. In many districts compliance with a summons appears to have been more or less a matter of choice, as remarked by Mr. Veasey, and the percentage of persons who appeared to persons summoned, which stands at the low figure of 78·7 for the whole province, is very low indeed in the districts of Dacca, Faridpur, Purneah, Noakhali, and Tipperah. The above figures combine to show, even when full allowance is made for compromises appearing as acquittals, that complaints are insufficiently tested before process is granted, and it will require the close and constant supervision of the Magistrate to check the failure in administration which these statistics disclose.

Remands.

The number of A forms sent up rose from 35,716 to 38,605. They were disposed of as follows:—

				1888.	1889.
At first hearing	34·6	37·3
Remanded once	20·6	20·1
Do. twice	13·9	13·4
Do. thrice	9·8	9·2
Do. four times	·2	6·1
Do. five do.	4·2	3·9
Do. six do.	2·7	2·6
Do. more than six times	5·1	5·1

There was a slight improvement in the percentage of cases decided at the first two hearings, but the percentage of cases remanded more than six times

continued the same. Amongst districts it was only in Hughli, Howrah, the 24-Pergunnahs, Darjiling, the Chittagong Hill Tracts, and the Gurjhat that more than two-thirds of the cases were decided in two hearings, while in Lohardugga, Faridpur, Jessore, Bogra, and Noakhali less than one-third were concluded in the same number of hearings.

There is no doubt that these delays are to a great extent the result of a want of system and bad supervision. For instance in Purneah, where the number of cases remanded more than six times was 132 out of a total of 769 cases, a frequent excuse for the remand was that the process had not been duly served, yet the late Commissioner found in the course of his inspection that no trouble was ever taken by the judicial officers to ascertain the cause of the failure; again in the sudder subdivision of the Dinajpur district, where no less than 198 cases were pending with the police and 55 with the Magistrates, the case registers, instead of being utilised, had been superseded by a special statement which must have given unnecessary trouble and have afforded insufficient information. This state of things is certainly not creditable to the officers concerned, and the Lieutenant-Governor is sure that a systematic and periodical examination of the registers, such as need occupy but little time, would produce a marked effect.

Reconviction.

The number of persons reconvicted rose from 1,640 to 1,915. Mr. Veasey remarks that the increase—

“is considerably discounted by the proof it affords that the sentences passed cannot in many instances be really deterrent; and further, that we have a large criminal population who find so little to object to in a life in jail that they begin to qualify for re-admission almost as soon as the gates close behind them. On the other hand, the police generally understand now the importance of verifying the antecedents of accused persons, and much information is thus elicited which a few years ago would have remained neglected.”

It is believed that, though there has been some improvement in this matter, much remains yet to be done, both by the police in putting the information before the Courts, and by the Courts in attaching proper importance to previous convictions in awarding punishment. Several cases have recently come to His Honour's notice in which old offenders have been treated with most uncalled for leniency, on the ground that some of the previous convictions proved against them were of a date more than ten years back, and were consequently excluded from consideration. Sir Stewart Bayley is not prepared to accept the principle involved in this explanation, and regrets to think that these and other similar cases show that Mr. Veasey is justified in saying that “authorities who are practically irresponsible (to the Commissioner) are apt at times to ignore local requirements.” Amongst districts, Patna and Monghyr take the lead with 123 and 106 reconvictions respectively. There were only four districts, viz., Bankura, Pubna, Bogra, and Khulna, in which the number in each case did not exceed 10. In 199 cases, as against 142 in 1888, it was proved that the accused had been convicted three times or more.

Criminal Tribes.

Under the directions of the Government of India, the subject of the control and punishment of Criminal Tribes is now under special enquiry, and the Committee on Police

Reform has been asked to take the subject up. The Mughya Domes still continue to give much trouble, and the scheme instituted some years ago for their reclamation does not appear to have had any lasting success. The question of the retention of the Dome colonies in Chumparan is now under consideration. It is, however, noteworthy that the Magistrate of that district, while he calls them ‘pilferers by choice and burglars by necessity,’ is of opinion at the same time “that they get credit for much crime which is in reality the work of Ahirs, well-to-do people who thrive by thieving, and with whom the chowkidars are hand-in-glove in consequence,” and the Lieutenant-Governor believes that there is much justification for this view. The Rajshahye Division, and more especially the districts of Rungpur and Dinajpur, are still overrun by miscellaneous gangs of vagabonds whose movements it is very difficult to control.

The total number of names entered during the year was 2,610, of whom 804 were arrested and 531 surrendered themselves.

Absconders.

This subject has not hitherto found a place in the annual report. The Lieutenant-Governor fully agrees with Mr. Veasey's comments on the unsatisfactory nature of the returns on this subject, and in his remarks as to the importance of giving special attention to it.

The following statement shows the number of cognizable and non-cognizable Crime and Police in Calcutta and the Suburbs. cases reported in the Town and Suburbs of Calcutta during 1889 and the two preceding years:—

					1887.	1888.	1889.
Cognizable	...	{ Penal Code*	6,485	8,619	8,421
		{ Miscellaneous	21,566	29,716	24,643
Non-cognizable	...	{ Penal Code*	6,566	5,759	5,027
		{ Miscellaneous	20,475	19,569	21,692
Total					55,092	63,663	60,383

* As in previous years, some offences under other Acts are included in this table with offences under the Penal Code.

The decrease in cognizable crime occurred mainly under the head of street offences. There were 12,543 such cases in 1889, against 16,793 in 1888. The increase in non-cognizable offences is due to the fact that the number of cases under the Conservancy Act rose from 18,617 in 1888 to 20,691 in 1889.

The number of persons arrested and summoned fell from 69,377 in 1888 to 56,762 in the year under review. The decrease occurred mainly under the heads (1) Public and local nuisances, (2) Miscellaneous offences under the Stage Carriage Act, (3) Street offences, and (4) Offences under Port Acts. The number of persons convicted was 49,003, against 61,865 in 1888. The percentage of convictions for cognizable offences fell from 94·68 to 93·30, and for non-cognizable offences from 71·12 to 65·99.

There were only 60 false cases out of a total of 50,297 reported in the Town and only 24 out of 10,086 reported in the Suburbs.

The value of the property stolen was Rs. 1,51,267, against Rs. 1,22,523 in 1888, and that of the property recovered Rs. 69,199, against Rs. 59,401 in 1888. In the Town the percentage of property recovered, 49·02, was the same as in the preceding year, but in the Suburbs there was a marked falling off from 43·89 to 35·06.

The ratio of cognizable crime to population in the Town and Suburbs was as follows:—

		Area in square miles.	Population.	Proportion of crime to population.
Town	...	7·8	433,219	1 to 16·83
Suburbs	...	23	251,439	1 to 34·65

The following statement shows the number of true cognizable cases reported within the Town during the last three years:—

Crime.		1887.	1888.	1889.
Class	Abetment of offence not committed	1
	I—Offences against the State, &c. ...	49	43	32
	II—Serious offences against the person ...	213	182	186
	III—Serious offences against person and property ...	185	163	189
	IV—Minor offences against the person ...	58	71	53
	V—Minor offences against person and property ...	2,223	2,037	2,309
	VI—Other offences not specified above ...	4,408	7,710	6,891
	Special and Local laws ...	16,009	18,950	16,074
Total		23,145	29,156	25,735

There was a decrease in offences relating to coin, the number of which was 5, against 13 in 1888. Six persons were arrested, of whom 4 were convicted and 2 discharged. The maximum sentence inflicted was 6 months' rigorous imprisonment.

There were 4 cases of murder, against 6 in 1888. In one of these cases the accused, a Burman convict in the Presidency Jail, who in a sudden fit of passion

killed the convict-warder, also a Burman, by a blow from a heavy block of wood, was sentenced to capital punishment. The same sentence was passed upon a seaman of the British barque *Roanoke*, who committed an indecent assault on a young shipmate, and on being threatened with exposure, mortally stabbed him with a clasp-knife; and also in the case of a constable of police who, in a fit of jealousy, cut the throat of a woman whom he was in the habit of visiting. In the remaining case the accused, who is a native of the Gwalior State, absconded.

Cases of grievous hurt decreased to 17 from 26 in 1888, the average of the five preceding years being 33. Twenty-nine persons were arrested, of whom 14 were convicted and 15 discharged. There were 33 cases of hurt by dangerous weapons, against 57 in 1888. Two highway robberies were committed by European soldiers stationed in Fort William. In the first case the offenders escaped, but in the second a man was apprehended and sentenced, on conviction, to one year's rigorous imprisonment.

True cases of burglary rose from 161 to 179, and the number of convictions from 95 to 119. The amount of property stolen was much smaller than in any of the four preceding years, but the proportion of property recovered was only 32·15 per cent. as compared with an average of 47·33 per cent. in those four years.

In theft cases there was an increase of 283 as compared with 1888. The percentage of cases detected was 48·94, against 47·32 in 1888. The number of cases of criminal breach of trust fell from 269 to 261 in 1889. Out of 462 persons charged under the Gambling Act, 441 were convicted. Under the Stage Carriage Act there were 2,079 cases and 2,032 convictions, against 2,632 cases and 2,702 convictions in the previous year. The officers of the Society for the Prevention of Cruelty to Animals did much good service throughout the year in prosecuting offenders under the Act, and over 98 per cent. of the persons arrested were convicted and punished. The barbarous practice of flaying goats alive was for the first time exposed, but the leniency of Magistrates in such cases as these, as well as in the numerous 'phooka' cases, seriously detracted from the good effect of the prosecutions.

The following is a comparative statement of true cognizable crime during Cognizable crime in the Suburbs. the past three years :—

Crime.			1887.	1888.	1889.
Class	I—Offences against the State, &c.	...	15	14	15
"	II—Serious offences against the person	...	77	53	75
"	III— Ditto against person and pro-	...			
	perty	...	171	127	151
"	IV—Minor offences against the person	...	15	25	21
"	V— Ditto against property	...	709	738	680
"	VI— Other offences not specified above	...	717	1,534	651
	Special and local laws	...	3,073	6,604	5,662
Total			4,777	9,095	7,255

There was one case of an offence relating to Government currency notes. A native of Burrisal, in whose lodgings at Machooa Bazar counterfeit notes and two leaden plates prepared for forgery had been found, was sentenced to five years' rigorous imprisonment. An accomplice of his at Burrisal received a similar sentence, but it was quashed by the High Court. There were three cases of murder, against one in 1888. In one of these cases the accused was on conviction sentenced to transportation for life. In the other two cases no clue was obtained to the murderers. There were three cases of culpable homicide, in one of which a Hindu of the labouring class, who committed a murderous assault on his wife, was sentenced to be hanged, but the High Court reduced the sentence to ten years' transportation. In a second case the accused were discharged by the High Court. In the remaining case the culprit escaped. There were only 16 cases of grievous hurt, against 21 in 1888 and an average of 25 in the five previous years. In one of these cases three policemen attached to the Tallygunge thana were on conviction sentenced to terms of rigorous imprisonment ranging from two to three years. There were 11 cases of kidnapping, in one of which a notorious offender, who decoyed a little girl from her house by

promising her sweetmeats, and robbed her of her gold ornaments, was on conviction sentenced to seven years' transportation. The figures of detection and conviction under the head of burglary and lurking house-trespass were good, but the proportion of property recovered to property stolen was low, owing to the failure of the police to recover property valued at Rs. 6,500 stolen in one case near Tallygunge.

As has been explained in a previous paragraph, the large increase in the number of cases under this head occurred in conservancy prosecutions. There were four cases of forgery, against 15 in 1888. Convictions were obtained in two cases. The number of cases of extortion was 15, against 17 in 1888. In two cases committed to the Sessions the offenders were sentenced to six and three years' rigorous imprisonment respectively. In one case a constable was sentenced to six months' imprisonment for extorting four annas from a milkman.

There was a decrease of 71 cases as compared with the previous year. This called for no special notice.

The number of cases of suicide in the Town and Suburbs was 83, against 84 in 1888. In 36 per cent. of the cases death was caused by hanging, and in 28 per cent. by means of opium. Of the persons who committed suicide, 65 were Hindus, 10 Mahomedans, and 8 Christians.

There were 292 accidental deaths, against 351 in 1888. One hundred and three deaths were due to drowning as against 152 in the previous year; 30 were caused by falls from trees and buildings, and 31 by carriages and horses. One hundred and forty-two drivers of public and private carriages were prosecuted for rash and furious driving, of whom 124 were convicted.

The importation of fire-arms increased from 1,889 pieces in 1888 to 2,655 pieces in 1889. The increase was due to the importation of a cheaper class of weapon. There was an increase of 411 in the number of guns imported, and of 216 in the inland transport of guns. The imports of percussion caps rose from 15,470,000 to 23,384,000 in 1889, owing to the fact that the surplus stock in hand at the commencement of the year was much less than that at the commencement of 1888. The number of guns sold in Calcutta was 2,720, against 2,709 in 1888, of which only 957 were of native manufacture, against 1,084 in 1888. There were seven prosecutions under the Act, against 35 in the previous year.

Thirty-three persons were admitted to the Workhouse under section 5 of the Act. Two persons were deported, 12 were shipped away as seamen, and 2 others provided with employment.

Nine fires occurred in the Town, 16 in the Suburbs, and six in Howrah. The damage done is estimated at Rs. 1,38,490, against Rs. 12,53,480 in 1888. In only one case was there the loss of a human life. The most serious fire occurred at Narcoldanga, resulting in the destruction of a large quantity of hay and straw, and 14 tiled huts, worth in all Rs. 40,000. The fire lasted for four days and three hours.

The total cost of the Town Police was Rs. 4,52,725, against Rs. 4,60,302 in 1888, and that of the Suburban Police Rs. 1,58,255, against Rs. 1,60,066. The decrease in expenditure on both the Town and Suburban Police was due to minor causes.

There were 1,972 up-country men in the police, against 1,957 in 1888, and 173 Bengalis, against 181 in 1888. The number of up-countrymen employed as officers was 99, against 78 Bengalis. The percentage of casualties in the force was 9.74, against 11.40 in the previous year. Fifteen members of the force were punished judicially, against 16 in 1888. Fifty-six men were dismissed and two men deserted, against 81 and 3 respectively in 1888. The number of vacancies was 288, against 337 in 1888. The decrease occurred chiefly under the heads of resignations and dismissals.

Two hundred and sixty-eight certificates were granted for hotels, shops for the sale of exciseable articles, and native eating-houses in the Town, and 52 in the Suburbs, against 286 and 46 respectively in 1888. The fees realized amounted to Rs. 822,

against Rs. 1,180 in the Town, and to Rs. 235, against Rs. 198 in the Suburbs. Property to the value of Rs. 20,668 was picked up and brought to the police office, and 88 per cent. of the amount was restored to the owners.

Two hundred and seventy-eight old offenders were convicted in the Town, against 257 in 1888. Of those, 80 had been convicted more than three times. In the Suburbs the corresponding figures were 83 and 16, against 132 and 19 in 1888. Eighty-eight notorious offenders were photographed on their release from jail, and their names registered by the Detective Department.

One thousand five hundred and sixty persons were killed by wild animals in 1889 as compared with 1,335 in 1888, 1,563 in 1887, and an average of 1,617 for the three years ending 1886. Of these persons a third or more than a third are said to have been killed by tigers in each year. It is true, of course, that the ordinary villager's classification very often fails to distinguish a tiger from a leopard or a panther, and that in many cases in which a man has been killed in the jungle by an unknown beast, the animal is set down as a tiger; but in spite of these possible inaccuracies there can be no doubt that some of the districts of Bengal are still infested by them. The following statement shows the figures for tigers during the past three years for the whole province and also for some selected districts:—

	Number of persons killed by tigers.			Number of cattle killed by tigers.			Number of tigers killed.			Amount of reward.		
	1887.	1888.	1889.	1887.	1888.	1889.	1887.	1888.	1889.	1887.	1888.	1889.
										Rs. A.	Rs. A.	Rs. A.
Bengal	672	522	530	7,011	8,449	8,780	269	376	318	4,446 0	6,337 8	6,236 0
Monghyr	115	65	42	246	152	222	1	107	50	75 0	1,550 0	651 0
Gya	64	84	68	453	441	162	1	0	5	25 0	100 0	62 8
Hazaribagh	63	56	33	879	857	715	0	7	4	200 0	175 0	100 0
Lohardugga	122	94	150	1,259	2,240	2,317	52	54	71	1,162 8	1,450 0	1,847 8
Manbhum	23	3	4	112	07	94	5	8	2	250 0	200 0	50 0
Singbhum	29	45	39	74	100	74	4	0	8	87 8	125 0	187 8
Mymensingh	12	18	34	35	29	352	4	11	10	87 8	200 0	237 8

It will be seen that while their depredations have been attended with decreasing loss of life in Monghyr, they are still dangerous to a very serious degree in the districts of Gya and Lohardugga. The increase in the number of deaths by wild animals in 1889 was distributed under all heads. The increase in the number of deaths by tigers in Mymensingh is attributed to improved reporting. There has been a great increase in the number of deaths by wolves, and the Patna Division, specially the district of Durbhunga, is responsible for the increase. The Presidency Division continues to show a large number of deaths due to jackals, the majority of the "persons" killed being children.

During the year 22,884 cattle were killed by wild animals, against 23,616 in 1888. The figures which are given year by year of cattle killed by wild animals are so liable to mistakes of all kinds, and are obviously so incomplete, that it would be most unsafe to deduce any arguments from them. When animals stray and are killed or die in the jungle, they are usually returned by the villagers as killed by wild beasts, the choice of the species of wild beast being left to the police or supplied by their imagination. And it is clear that in many districts deaths of cattle due to wild animals are not reported at all. With these reservations the following statement is appended:—

	AVERAGE OF 1884-5-6.			1887.			1888.			1889.		
	By tigers.	By leopards and panthers.	By all other animals.	By tigers.	By leopards and panthers.	By all other animals.	By tigers.	By leopards and panthers.	By all other animals.	By tigers.	By leopards and panthers.	By all other animals.
Number of cattle killed	4,780	5,414	1,000	7,011	7,005	3,154	8,449	11,279	3,834	8,780	10,308	3,706

Six thousand eight hundred and seven wild animals were killed during the year, against 6,503 in 1888, and Rs. 16,011 were paid as rewards for their

destruction, against Rs. 13,795 in 1888. The large increase under both heads in the year 1889 as compared with the year 1888 is due in great part to the entries of wolves killed and the rewards paid for their destruction. In the year 1888, 544 wolves were killed and Rs. 2,504-1-9 paid as rewards; in 1889, 1,030 wolves were killed and Rs. 3,815-12 paid for their destruction. For the two years the figures for the Patna Division alone are 370 and Rs. 1,623 and 713 and Rs. 2,549-8 respectively. There were fewer tigers killed in 1889; but, owing to the enhancement of the rewards offered for the killing of man-eaters, there is a very slight fall in the return of the amount paid as rewards.

It may be noted how little influence the efforts of shikaries and the offer of rewards for the destruction of wild beasts appear to have on the mortality, both of human beings and of cattle, due to their depredations. Allowance must of course be made for the improvement in the record and registration of such mortality, but the significance of the figures will appear even if only the smallest possible allowance is made. In 1884, 419 persons and 5,033 cattle were killed by tigers, while the number of tigers destroyed was 866, and a sum of Rs. 15,367 was paid as rewards for killing them. The figures for 1885 show that 510 persons and 4,751 cattle were killed during that year, while 674 tigers were killed at a cost of Rs. 9,674. In 1888, 522 persons and 8,449 cattle are debited to tigers, of which 376 were killed at a cost of Rs. 6,337; and in 1889 the figures are 530 persons, 8,780 cattle, 318 tigers, and Rs. 6,236 the amount of rewards paid. The details of the figures relating to leopards and panthers show much the same results. It would not appear, therefore, that the system of rewards has much real effect on the rate of extermination of wild beasts or on the depredations committed by them.

Ten thousand six hundred and eighty-one persons were killed by venomous snakes in 1889, against 8,946 in 1888. The number of snakes killed during the year was 41,189 against 39,326 in 1888, and Rs. 3,439 were paid for their destruction, against Rs. 3,587 in 1888. No special measures were taken by this Government for the reduction of the mortality from snake-bite. In accordance with the wishes of the Government of India, the question of the mortality due to venomous snakes, and the measures taken of late years to destroy them, were specially considered by the Lieutenant-Governor. His Honour has had before him elaborate reports on these points submitted by the Divisional Commissioners, who are practically unanimous in their opinion that no further action is necessary or desirable. The habits of the people, who cannot be induced to cut down the jungle that encumbers their homesteads, or to refrain from walking in that jungle with unprotected feet and legs in the dark or in the dusk of early morning, and the constantly recurring floods that drive snakes to the homesteads, both conduce to increase the mortality from snake-bite. In some parts of Bengal the natives, Hindus and Mahomedans alike, will kill every snake they see without thinking of a reward, and in other districts in which certain high-caste Hindus regard them as an object of veneration, the offer of small rewards will not persuade the people to destroy them. A suggestion to increase the amount of rewards, and another to offer rewards for the destruction of snakes' eggs, were not accepted, as it was considered probable that either course might lead to the breeding of snakes for gain.

CHITTAGONG HILL TRACTS.

The operations against the hill tribes beyond the frontier, undertaken during the cold weather of 1889, resulted in the establishment of a new permanent post at Lungleh in the Lushai country and two new temporary outposts, one at Lungsin, on the new road between Demagri and Lungleh, and the other at Jourmarong up the river Changree. As 200 men were required to garrison Fort Lungleh, two temporary outposts, Ohipoom and Khagrasurry, had to be abolished, and a third, Palitye, could not be occupied up to the end of 1889.

The sanctioned strength of the Frontier Police during 1889 was the same as in the previous year, namely 539. The force was 45 under strength at the close of the year, against 18 in 1888 and 19 in 1887; and of the actual strength of 494 men, 31 were unpassed recruits. A recruiting party was formed, and it was arranged that it should proceed to Chumparun to enlist 70 men to fill

up existing and expected vacancies. The party could not, however, leave the district till the beginning of 1890, as most of the men comprising it had to be deputed to Lungleh to complete the sanctioned strength of that post.

Owing to unavoidable circumstances the majority of the Frontier Police could not go through the customary course of firing practice during the year.

The experience of the year 1889 tends to prove that the privilege of free passes by railway and steamer which had been granted to men who wished to rejoin the force after long leave in Nepal was not appreciated, and did not operate as an inducement to such men to return. A special report on the subject is awaited from the local officers.

Despite the very arduous duties which fell to the lot of the Frontier Police during the year, and the number of admissions to hospital which were the direct result of wounds or ailments resulting from the severity of the work the men had to perform, the total admissions to hospital and the rate of mortality did not increase. The daily average number of sick in hospital and the average number of days spent in it by each patient were higher than those of 1888, but the increase was not so great as might well have been expected. The figures below give a comparative statement for the last three years—

	1887.	1888.	1889
Deaths ...	14	27	26
Admissions into hospital ...	2,361	2,609	2,153
Daily average of sick ...	52	53	67
Average number of days spent by each patient ...	7.5	7.7	8.5

The newly-opened hospital at Lungleh admitted 648 patients during the last eight months of the year; but as a considerable number of these were suffering from wounds and ulcers, the general health of the force at Lungleh may be held to have been satisfactory.

Imported coolies from the Sonthal Pergunnahs were employed during the year in clearing jungle and making roads. They did excellent work, and appeared to be fully satisfied with the conditions under which they were required to perform it.

There were no changes in the distribution of the Civil Police during the year. They continued to do the usual simple duties which have been entrusted to them in the absence of a staff of peons and chuprasis in the hill tracts, and were also employed on some miscellaneous work in connection with the Lushai Expedition.

The officers and men of the frontier force rendered excellent service during the year. They cheerfully performed the arduous and responsible duties entailed on them in consequence of the disturbed state of the frontier. It is satisfactory to note that the force has always been found to be equal to the task imposed on it, and able to maintain its reputation as a thoroughly efficient body.

Criminal Justice.

THERE were 125 persons under trial before the High Court in its criminal jurisdiction during 1889, against 156 in the previous year. Of these, one is shown under the heading "died, escaped, or transferred," 26 were discharged or acquitted, 87 were convicted, and 11 remained under trial at close of the year. Of the number convicted, 16 were sentenced to death, 30 to transportation, 39 to rigorous imprisonment, 1 to simple imprisonment, and 1 was ordered to be detained in a reformatory school.

Including cases pending at the commencement of the year, the total number of persons who appealed to the High Court, or in whose cases appeals were preferred by Government under section 417 of the Code of Criminal Procedure from judgments of acquittal, or references were made under sections 432 and 438, or whose cases were dealt with by the High Court under section 435, was 3,504 as compared with 3,322 in 1888. The results of these appeals and references are shown below:—

Appeals or applications rejected	1,239
Sentences confirmed	873
Ditto modified	298
Ditto reversed	832
Ditto enhanced	3
Proceedings quashed	1
New trials or further enquiries ordered	84
Died, escaped, or transferred	1
Remaining under trial at the close of the year			173
Total			3,504

Two stipendiary Magistrates were, as in previous years, employed in Calcutta. The number of Honorary Magistrates was 106 in 1889, as against 91 in 1888. The number of stipendiary Magistrates at the Presidency and of Sessions Judges and District Magistrates outside the Presidency town remained unchanged. In the districts outside the Presidency town of Calcutta the total number of Benches of Magistrates was 202, as against 196 in 1888, and the number of Magistrates of each class at the close of the year compares as follows with the total number at the close of the previous year:—

	1888.	1889.
Stipendiary	380	393
Honorary	1,647	1,673

Of the stipendiary Magistrates, 262 exercised powers of the first class, 60 of the second class, and 71 of the third class, as compared with 241, 61 and 78, respectively, employed at the close of the previous year.

The total number of persons under trial before the Courts of Session, including those whose cases were pending at the close of 1888, was 3,558, as compared with 3,454 in the previous year. Of these, 24 died, escaped or had their cases transferred, 1,421 were discharged or acquitted, 1,629 were convicted, 44 were committed or had their cases referred, and 438 remained under trial at close of the year. Of the persons convicted, 192 were sentenced

to transportation. All offences, including abetment and attempts, falling under chapters VIII, XI, XVI, XVII, and XVIII of the Indian Penal Code were tried by jury in the districts of Burdwan, Dacca, Hooghly, Patna and the 24-Pergunnahs. Other cases in Bengal were tried with the aid of assessors. The number of such trials during 1889 was 286, as compared with 305 in 1888. In these 286 cases, the Sessions Judge approved of the verdict of the jury in 235 cases, disapproved of it wholly in 25 cases and partially in 25 cases, while the remaining case was withdrawn before the completion of the trial. Of the 14 cases referred under section 307 of the Code of Criminal Procedure and before the High Court during 1889, 13 were heard and determined, with the result that in 5 the verdict of the jury was reversed, in 7 it was upheld, and in the remaining case it was modified.

The number of persons who appealed to the Courts of Session during the year, including those whose cases were pending from the previous year, was 11,764, as compared with 10,415 in 1888. Of these, the appeals of 3,873 persons were rejected. The original sentences or orders were confirmed regarding 4,001 persons, modified regarding 1,267, and reversed regarding 2,034 persons, while in the cases of 55 persons new trial or further enquiry was ordered. The cases of seven persons were referred to the High Court for revision. The number of persons whose appeals were disposed of was 11,237, and 505 appeals remained pending at the end of the year. The cases of 22 persons were shown under the head "Died, escaped, or transferred."

The number of persons under trial during the year before the courts of the various Magistrates in Bengal, excluding the courts of the Presidency Magistrates, and the results of the trials are shown below :—

Number of persons under trial	205,220
Ditto acquitted or discharged	72,120
Ditto convicted	122,224
Ditto committed or referred	3,359
Ditto who died, escaped, or were transferred	326
Ditto remaining under trial at the end of the year	6,891

The following statement shows the sentences passed by Magistrates in the districts outside the Presidency town :—

Fine	...	{ With imprisonment	4,452
	...	{ Without ditto	89,520
Whipping	...	{ Solo punishment	1,098
	...	{ Additional ditto	147
Imprisonment	...	{ Rigorous	26,003
	...	{ Simple	832
Forfeiture of property	4

The sentences of imprisonment passed may be thus classified :—

Not exceeding 15 days	5,775
Ditto 6 months	16,283
Ditto 2 years	4,597
Exceeding 2 years	81

One hundred and sixteen juveniles were sentenced to detention in a reformatory school during the year, as against 73 in 1888. These sentences were passed in only 31 districts, including Calcutta, the largest number being reported from Calcutta (16), the 24-Pergunnahs and Julpigoree (11 each), Chumparun (8), and Bhagulpore (7). Ninety-nine juveniles were so sentenced by Magistrates in districts outside the Presidency town, 15 by Presidency Magistrates, 1 by the Sessions Judge of Mymensingh, and 1 by the High Court in its original jurisdiction on a commitment by a Presidency Magistrate.

The number of persons under trial before the Presidency Magistrates during the year was 44,883, as compared with 54,124 in the previous year. Of the persons under trial, 5,109 were either acquitted or discharged, 39,635 were convicted, 19 died, escaped, or had their cases transferred to other courts, and 69 were committed

to sessions. Of those convicted, 1,552 persons were sentenced to imprisonment, 75 to whipping, and 35,723 to pay fines. Forty-three of the persons sentenced to fine and 3 of those sentenced to whipping were so sentenced in addition to some other punishment, and of the 1,552 persons punished with imprisonment, the sentence was in the case of 15 juveniles commuted to detention in a reformatory school.

In addition to the 1,552 persons shown as sentenced to imprisonment, 10 were awarded rigorous imprisonment for terms not exceeding one year on failure to furnish security for good behaviour.

During the year 255 European British subjects, concerned in 179 cases, were brought to trial in the criminal courts, as compared with 209 in 153 cases in 1888. Of the persons tried during the year under review, 1 was shown under heading "Died, escaped, or transferred," 152 were convicted, and 97 acquitted, while the cases of 5 remained pending at the close of the year. Inclusive of the cases pending at the close of 1888, there were 184 on the files during 1889, of which 182 were disposed of during the year; 176 being tried by Magistrates and 3 by Sessions Judges, who were European British subjects, and 2 by Native Magistrates in Burdwan. The remaining case was struck off owing to the death, escape, or transfer of the accused. The most numerous trials were held, as in previous years, in Chittagong (99), Darjeeling (39), 24-Pergunnahs (36), and Howrah (19). As compared with the figures for the preceding year, there was an increase of 19 in the number of trials in Darjeeling, and of 11, 10, and 9 in the 24-Pergunnahs, Chittagong, and Howrah respectively. In Burdwan the number fell from 25 in 1888 to 12 in 1889. The districts of Chumparun, Durbhunga, Gya, Mozufferpore, Nuddea, and Pubna returned one case each, and Manbhoon, Sarun, Rungpore, and Tipperah two each.

The offences with which European British subjects were commonly charged were, as in previous years, breaches of local and special laws (under which 135 were charged in 12 districts), and criminal force and assault (under which 48 persons were charged in 14 districts, Darjeeling contributing 11 and Burdwan and Hughli 6 each). In addition to the above, 12 were charged in 4 districts with theft, 10 in 4 districts with mischief, and 7 in 2 districts with offences affecting life, the 24-Pergunnahs contributing 6 out of the 7. The remaining persons reported were charged with minor offences under the Penal Code. Only one of the persons tried during the year claimed a mixed jury, and none claimed trial by assessors of special nationalities.

Four hundred and forty-nine thousand seven hundred and forty witnesses attended the different courts during the year under review as against 429,465 in 1888. Of the former number 436,778 were examined by Magistrates, 12,612 by courts of session, and 350 by the High Court.

The number of persons whipped under judicial orders was 1,350 in 1889, as compared with 953 in the preceding year.

1885	1,965
1886	1,652
1887	1,267

Statistics of offences and offenders.

The statistics of offences and offenders are fully discussed in the chapters on Police and Prisons.

The following statement shows the total number of persons who were under trial during the year in the criminal courts of the Sonthal Pergunnahs and the results of the trials:—

Total number of persons under trial	6,966
Ditto convicted	3,670
Ditto discharged or acquitted	2,986
Ditto committed or referred	36
Ditto who died, escaped, or were transferred	6
Pending for trial at the end of the year	268

Of the 3,670 persons convicted, 993 were sentenced to imprisonment, 184 to whipping, and the remainder were ordered to pay fines, or to furnish security for good behaviour, or to keep the peace.

The results of the appeals preferred and of the applications for revision made are shown below :—

Appeals or applications rejected	163
Sentence or order confirmed	285
Ditto modified	39
Ditto reversed	37
Fresh trial ordered	16
Referred for revision to the High Court		..	3
Remaining at the end of the year	19

Prisons.

THE total jail population at the beginning of the year was 13,985. The total number of admissions during the year rose from 81,136 to 84,639, the largest number admitted since 1879. The increase occurs in the number of convicts and under-trial prisoners, while the number of civil prisoners fell from 1,502 to 825, the reduction being due to recent changes in the law. There remained 15,048 prisoners in jail at the close of the year. The figures of the previous year's population were undoubtedly slightly affected by the Jubilee releases of 1887, and those for this year are not above the average of the five years from 1881 to 1886. The following table shows the figures for convicts only for the last ten years:—

	1880.	1881.	1882.	1883.	1884.	1885.	1886.	1887.	1888.	1889.

Balance at the end of the year ...	16,284	15,231	14,377	13,417	14,051	13,821	13,405	11,050	12,821	13,876
Daily average number of prisoners ...	16,673	15,696	14,901	13,711	13,697	13,757	13,504	10,908	12,378	13,591

It will be noted that the number of direct admissions (33,542) in 1889 is the highest that has been recorded since 1879, and that the daily average number of convicts rose from 12,378 in 1888 to 13,591 in 1889. The increase is stated to have been mainly due to the large number of convictions for theft and other minor offences against property prompted by the high prices of food-grains. The following statement of offences against property in the Patna Division, in which considerable scarcity prevailed during the year under report, fully supports this view, and the detailed figures of such crimes in the districts of Mozufferpur, Chumparun, and Darbhunga, which were more especially affected by the failure of crops, tend still further to bear it out:—

NAME.	1889.			1888.		
	Cases of burglary ascertained to be true.	Cases of theft ascertained to be true.	Admissions to jail.	Cases of burglary ascertained to be true.	Cases of theft ascertained to be true.	Admissions to jail.
Patna Division ...	7,573	4,927	3,262	5,949	4,130	2,814
Mozufferpur district ...	559	633	330	387	407	241
Darbhunga " ...	1,572	724	358	998	450	210
Chumparun " ...	961	1,159	616	531	857	363

The proportion of the daily average number of convicts confined in central jails to the total daily average population was 53.68 per cent. against 57.40 in the preceding year. The district and intermediate jails held 43.68 per cent. of the population, the corresponding ratio for the previous year being 39.96. The percentage of the population of subsidiary jails (2.64) was the same as in 1888.

The decrease in the percentage of convicts confined in central jails was the result of the recommendations of the Jail Committee for increasing the sleeping space for each prisoner. Most of the district and intermediate jails had accommodation for a larger number of prisoners than they had been holding, but this was not the case with the central jails, which were consequently most affected by the orders in question.

The number of convicts released on expiry of sentence rose from 26,452 in 1888 to 28,754 in 1889; the admission of a large number of prisoners with short sentences which terminated during the year accounts for the increase. The number released on appeal fell from 1,980 in 1888 to 1,942 in 1889. There had been a steady increase in the number of such releases since 1882, and the slight decrease of last year, although it occurred in a year of numerous admissions, does not show any marked improvement in what is an unsatisfactory feature in the criminal administration of Bengal. There were 1,575 releases under the mark rules as compared with 1,352 in 1888, which shows that the disturbing element in the working of the mark system introduced by the exceptional releases of the year 1887 is beginning to disappear. Thirty-seven prisoners were released on medical grounds against 33 in the previous year, and only two convicts were set free on other grounds as compared with 88 in 1888, when many were released in consequence of special remissions granted to them on the occurrence of Her Majesty's jubilee.

The number of convicts transported beyond the seas rose from 797 in 1887 and 803 in 1888 to 829 in 1889. The steady increase is due to the relaxation of the rules regulating the selection of convicts for deportation. The number of prisoners belonging to this Province, who were transported in 1889, was 119 against 97 in 1888. Executions, of which there were 21 in 1888, fell in 1889 to the unusually small number of 17.

There were 404 Burman convicts in jail on the 31st December 1888, and 200 were admitted during the year under review, bringing the total to 604. Their conduct in jail has been on the whole good, and, notwithstanding the large increase in their numbers, the offences recorded against them during the year only increased from 434 to 455, of which 271 related to work. One of the convicts was sentenced to capital punishment for having murdered another Burmese prisoner, a convict overseer, and there was another case of serious assault, in which a Burman attacked a Bengali prisoner, but the measures immediately taken prevented him from doing much harm. The Burmese are a dangerous class of prisoners on account of their instability of character, their impulsive nature, and their great impatience of restraint, but their capacity for work is superior to that of other native convicts, and the Superintendents are naturally inclined to appoint them freely to jail offices. It is not, however, safe to have a large proportion of these men as overseers and convict warders, for even holding offices of trust is not sufficient to restrain their longing for freedom.

Of the convicts admitted during the year, there were 60·95 per cent. Hindus, 34·70 per cent. Mahomedans, 1·24 per cent. Christians, 0·36 per cent. Buddhists and Jains, and 2·75 per cent. of all other religions. The corresponding figures of the previous year are 60·57, 35·60, 1·19, 0·50, and 2·14. The number of juveniles admitted in 1889 was 434 against 306 in the preceding year.

The number of prisoners sentenced to simple imprisonment rose from 2,143 to 2,434, of those to rigorous imprisonment only from 28,716 to 30,949, and of those to rigorous imprisonment with whipping from 72 to 117, but only 42 prisoners were sentenced to rigorous imprisonment with solitary confinement against 64 in the preceding year. No explanation of the increase in the number of prisoners punished with simple imprisonment has been given by the Inspector-General, and further enquiries will be made as to the very large number of such sentences in Singbhum (83), Manbhum (60), Puri (59), Cuttack (59) and Patna (79). The number of female convicts increased from 1,218 in 1888 and 1,280 in 1887 to 1,503 in 1889. The number of re-convicted prisoners fell from 3,612 in 1888 to 3,561 in 1889; the recent rules regarding the identification and classification of habitual offenders have been worked with great care both by the Jail and Police Departments, but still there remains much more to be done. The Inspector-General's investigations in the central jails have led him to the conclusion that there are in those establishments 300 or 400 incorrigible thieves,

for whom transportation for life is the only punishment likely to be effective. At the suggestion of the Inspector-General, the Government of Bengal has lately recommended to the Government of India that experiments should be made in the Presidency and Alipur Jails in the system of anthropometry which is said to be so successful a feature of jail administration in the city of Paris. The number of persons imprisoned for failing to give security for good behaviour had been increasing somewhat rapidly since 1884, but the last year shows for the first time a slight decrease, viz. 1,066 against 1,070 in 1888. Of the total number of prisoners admitted during the year, 87·04 per cent. were unable to read and write, 9·48 per cent. were able to read and write a little, and 3·48 per cent. were able to read and write well. The figures of the previous year were 86·64, 10·21 and 3·15 respectively. In the year under review 1,528 judicial sentences of whipping were inflicted against 1,234 in 1888; the number of boys whipped increased from 394 to 485.

There were 30,219 under-trial prisoners admitted during the year, against 28,454 in 1888. Of these 11 escaped during the year and six remained at large at the close of the year. The number of deaths among the under-trial prisoners rose from 43 in 1888 to 61 in 1889. The daily average number of under-trial prisoners increased from 1,255 in 1888 to 1,379 in the year under report, and the even distribution of these deaths among the various jails of the province does not suggest any particular cause for the increased mortality. The average period of detention of undertrial prisoners was 45·81 days in Sessions cases and 13·44 in others. The number of civil prisoners admitted was only 825 against 1,502 of the previous year; this large decrease is attributed to the alteration in the civil laws which took effect in May 1888. It is remarkable that with a daily average of 54·49 civil prisoners there was only one death.

The total expenditure on jail buildings during the year amounted to Rs. 2,37,214 against Rs. 2,40,244 in 1888. In the Jail buildings. Presidency Jail Rs. 35,220 were spent on the construction of corrugated iron work sheds, a new civil ward, and on other improvements. In the Bhagalpur Central Jail Rs. 10,173 were expended in building a double-storied barrack and improving the jailors' quarters, and at Dacca Rs. 7,736 were expended on the work of constructing double-storied barracks. At Buxar a house for the Deputy Superintendent and a godown for storing rations and clothing were built; these and other improvements were carried out at an aggregate cost of Rs. 19,664. At Khulna and Purulia Rs. 4,694 and Rs. 2,564 were respectively expended in making additions and alterations to the existing jail buildings, and the temporary wards at Faridpur were furnished with corrugated iron roofs at a cost of Rs. 2,424. A sum of Rs. 53,822 was expended in constructing six subsidiary jails and a new intermediate jail, and in making improvements in other subsidiary jail buildings. The daily average number of prisoners employed on jail buildings was 1,316 against 1,334 in 1888.

The total number of warders and head-warders employed in jails and subsidiary jails during the year was 1,587 against 1,584 in the preceding year. It is possible that this staff Guards and escapes. may have to be increased by the ultimate reconversion of some intermediate jails into district jails, but for the present the increase in the population of those jails may be met by temporary additions to the force of warders until it has been ascertained whether the general tendency to decrease, which has been observable for some years, has been permanently checked or only casually interrupted during a year of scarcity. There was a general improvement in the appearance and efficiency of the warder guard; the offences committed by warders (2,504 as against 1,815 in 1888 and 2,359 in 1887) are still very numerous, but the large number reported under the heads of 'absence from duty,' 'neglect of duty' and 'backwardness in drill' shows that the increase is due to a great extent to the enforcement of stricter discipline.

There were only 11 escapes during the year as compared with 21 in 1888 and 13 in 1887. This is the lowest number on record, and is very satisfactory. The only case which calls for notice is that of the two European prisoners who escaped from the Presidency Jail by breaking locks and climbing the outer main wall from a cross wall which was then under construction. They were eventually recaptured by the Calcutta Police and placed on their

trial before the Chief Presidency Magistrate, who sentenced them to seven days' rigorous imprisonment. The extraordinary leniency of this sentence, which was wholly inadequate as a punishment for the grave offence committed, had a demoralising effect on the other prisoners in the Presidency Jail, and it is much to the credit of the officials of that jail that they were able to prevent the recurrence of such escapes. The warders who were responsible for the escape were punished departmentally. Of the 11 prisoners who escaped, seven were recaptured; besides these, four of those who had escaped in previous years were apprehended.

Despite the increase in the daily average population of the jails, there was a decrease in the number of offences committed from 29,064 in 1888 to 25,107 in 1889, the percentage

Prison discipline.

to daily average population falling from 234·8 to 184·8; the decrease occurred under every head of breach of jail discipline. Punishments by criminal courts rose from 20 in 1888 to 40 in 1889, and the punishment of reduced diet was awarded in 563 cases against 525 in 1888. Of prisoners punished with solitary confinement, 1,276 suffered that punishment only, while 318 more received reduced diet in addition; in 1888 the respective numbers were 1,295 and 352. There was an increase from 245 to 272 in the cases in which corporal punishment was inflicted, and it is a matter for regret that in spite of the repeated orders of Government cases in which less than 10 stripes were awarded should still occur. There were 204 cases of corporal punishment in central jails, where all long-term prisoners and bad characters are confined. Fetters were imposed as a punishment in 7,793 cases against 8,759 in 1888, and in 119 cases they were used for safe custody.

Of the total daily average number of male convicts in 1889, 5·70 per cent. were employed as convict officers, as compared with 5·93 per cent. in 1888. The convict officers are reported to have worked excellently during the year, and they seem to have understood that only continuous good behaviour on their part could secure them promotion to the higher grades. The percentage of punishments to the average number of convict officers was 209·2 in 1889 against 200·7 in 1888.

The new mark rules, which have been in force since 1887, have continued to work satisfactorily, and the results show that 1,572 prisoners, against 1,352 in 1888, had their releases accelerated in consequence of the marks which they had obtained.

The gross expenditure for all classes of jails, excluding the amount expended by the Public Works Department, rose from

Expenditure.

Rs. 10,68,161 in 1888 to Rs. 11,91,149 in 1889. The

average cost per prisoner amounted to Rs. 79-4-5, against Rs. 77-12-8 in 1888. The charges on account of dieting prisoners rose from Rs. 2,95,680 in 1888 to Rs. 3,89,300. The increase was owing partly to the larger daily average population, and partly to the high prices paid for food-grains. The average value of the chief articles of diet per maund amounted to Rs. 3-14-6 in 1889, against Rs. 3-8-11 in 1888. The increase in the price of rice alone, which is the staple food of the country, was 8 annas and 8 pies per maund as compared with the preceding year. Granaries are now under construction in jails for the storage of grain to be purchased in the cheap season of the year, and arrangements are in progress for the proper cultivation of jail lands and gardens, and for the breeding of fish in jail tanks, and dairies have been started in many jails. It is hoped that these measures will tend to make a considerable reduction in the cost of dieting prisoners during the current year. The total earnings from vegetables and other products supplied from the jail gardens during the year amounted to Rs. 47,827, against Rs. 36,284 in 1888. This result is satisfactory, and shows that the matter is receiving greater attention from the Jail authorities.

The cost of establishment fell from Rs. 3,95,224 in 1888 to Rs. 3,91,292 in 1889. Four of the jailors, whose appointments had been abolished on the conversion of certain district jails into intermediate jails, were transferred to the Registration Department during the year under report, and one retired. The hospital charges increased from Rs. 46,632 to Rs. 56,464; the increase is partly due to the rise in the prices of food-grains, and partly to the more liberal scale of diet now allowed to sick prisoners. The total cost of clothing rose from Rs. 58,309 to Rs. 70,011 on account of the greater number of prisoners admitted during the

year, the clothing for many of whom had to be obtained in the local markets. The clothing has hitherto been manufactured by jail labour, but charged to the Department at the market rates, but this practice has now been done away with, and the cost of raw materials only will henceforth be debited to the Jail Department. The cost of contingencies also rose from Rs. 1,09,213 in 1888 to Rs. 1,28,168 in 1889. There was an increase of Rs. 6,455 on account of municipal taxes on jail buildings, and Rs. 1,083 in the cost of dieting defendants. Rupees 2,028 were paid during the year as compensation for land acquired for the extension of the jail garden at Dacca.

The total average cost per head on account of diet, hospital charges and clothing rose from Rs. 29-13-8 in 1888 to Rs. 34-13-11. The Buxar Central Jail was very economically managed, and it is satisfactory to note that in seven intermediate jails and four district jails, which have been specially mentioned by the Inspector-General, unusual care and economy were evinced by the officers in charge. In Mymensingh and Gya increased expenditure is accounted for by the unhealthiness of the prisoners, and in only two cases has Dr. Lethbridge found it necessary to call for explanations from the officers concerned of apparent extravagance in management.

The total average number of prisoners sentenced to labour increased from 12,210·17 in 1888 to 13,393·69 in 1889. Of these 5,569·45 or 41·58 per cent. were employed on manufactures, against 5,368·39 or 43·96 per cent. in the preceding year, and 15·3 per cent. were sick, convalescent or infirm against 13·9 per cent. in 1888. The average number of prisoners employed as convict officers and servants, and on gardening and other prison duties, was 4,152·38 or 31·0 per cent., against 3,488·35 or 28·5 per cent. in 1888. The net cash earnings increased from Rs. 2,66,898 in 1888, or Rs. 49·12 per head on the average number of convicts employed on manufactures, to Rs. 3,98,530 in 1889, or Rs. 71·9 per head. The total profits on the year's working amounted to Rs. 2,60,096, or Rs. 19·7 per head, as compared with Rs. 2,69,564, or Rs. 22·1 per head in 1888.

The average earning of each prisoner in central jails is shown in the following table:—

					1889.	1888.
Presidency	68·4	73·0
Alipur	44·4	43·7
Bhagalpur	21·8	10·5
Midnapur	11·2	15·1
Rajshahye	4·5	12·4
Dacca	3·0	3·7
Buxar	0·9	21·3

The decrease in the earnings of the Presidency Jail was due to the reduction in the quantity of printing work executed during the year. The jute mill in the Alipur Jail is now wholly employed in supplying the requirements of public consuming departments. The indifferent health of the prisoners in the Midnapur Jail affected the earnings to a considerable extent. The castor-oil industry in the Rajshahye Jail was at a standstill for six months during the past year owing to a sudden rise in the castor seed market. The decrease in the profits of the Buxar Jail is combined with a very large increase in the amount and value of the work turned out by it, and is wholly due to the very low rates given by the Ordnance and Commissariat Departments. It is much to be regretted that the prisoners in a large jail, such as the one at Buxar, should be almost exclusively employed on unremunerative labour, and it is hoped that better rates will be obtained in future. The stock of manufactured articles at the end of the year considerably diminished, the stock in hand on the 31st December 1889 being valued at Rs. 1,86,706, as against Rs. 2,66,106, at the close of 1888.

The amount expended during the year on subsidiary jail buildings was Rs. 69,481, against Rs. 70,106 in 1888. New subsidiary jails, besides the erection of a new intermediate jail at Nya Doomka. The condition of the warder guard was on the whole satisfactory. The average period of detention of convicts in subsidiary jails was 8·52 days,

against 8·21 days in 1888. The longest detention occurred in the Khondmal, Angul, and Bhola subsidiary jails. From the Khondmal and Angul jails the prisoners could not be transferred owing to an outbreak of cholera in an epidemic form in the Cuttack Jail, to which the subsidiary jails are affiliated. At Bhola the prisoners were employed on work connected with the new subsidiary jail buildings. The average detention of under-trial prisoners during 1889 was 13·92 days, against 14·11 days in 1888. In Serajganj, Chandpur, Arrareah, and Siliguri under-trial prisoners were detained for periods varying from 26·30 to 21·79 days. There were 14 escapes against 19 in 1888. Of those who escaped, four were convicts and ten under-trial prisoners. All the convicts and four of the under-trial prisoners were recaptured during the year. A most daring escape was effected by two under-trial prisoners from the Serampur subsidiary jail. They contrived to unhook the iron rod on which the hurricane lantern was hung which served to light the ward in which they were confined at night. With this they made a hole in the masonry wall of the building, and then escaped over the outer wall while the sentry was asleep. Excluding the expenditure in the Public Works Department, the average cost per prisoner in the subsidiary jails rose from Rs. 121-6-7 in 1888 to Rs. 122-5-6 in 1889, the increase being chiefly due to the high prices paid for articles of food.

During the year the Inspector-General issued the orders necessary to carry out the suggestions of the Jail Committee for providing sufficient superficial area and capacity for each prisoner in the sleeping wards of the jails throughout the province. In the case of barracks in which the prisoners sleep more than four deep between ventilating openings, the space was increased to 100 square feet and 1,200 cubic feet per man from 50 square feet and 750 cubic feet, the minimum space recommended by the Jail Committee for unhealthy jails. The measures taken by Dr. Lethbridge have resulted in materially reducing the accommodation in the old jails which have more than two rows of beds in the sleeping wards, while the accommodation in healthy jails and in the wards of unhealthy jails which are raised 12 to 14 feet off the ground, has been much increased by reducing the space to 36 square feet and 540 cubic feet, in accordance with the recommendation of the Jail Committee. Calculated on the revised scale there was accommodation available in the central, district and intermediate jails for 16,335 convicts against 17,008 in 1888 and 17,433 in 1887. There was thus ample accommodation for the 13,232 convicts who represent the daily average strength in 1889, but, as it was not found possible during the year to distribute those men over the several jails according to their capacity, there was some excess in a few of the jails, where the extra prisoners were made to sleep in worksheds and other temporary structures. In the Maldah and Palamow intermediate jails, however, there was real overcrowding, as no temporary extra accommodation was available, and measures have been taken to increase the sleeping accommodation so as to obviate any chance of a recurrence of this overcrowding. Among the undertrial prisoners the female ward in the Hughli Jail was at one time overcrowded, but arrangements are being made for enlarging the capacity of this ward.

The sickness and mortality of convicts and under-trial prisoners for the past ten years are shown in the following statement :—

YEARS.	Daily average number of prisoners.	Daily average sick.	Ratio per mille of daily average sick.	NUMBER OF DEATHS.			DEATH-RATES PER MILE OF AVERAGE STRENGTH.			REMARKS.
				From cholera.	From all other causes.	Total number of deaths.	From cholera.	From all other causes.	From all causes.	
1880	17,803	941	52·8	81	1,100	1,181	1·7	61·8	63·5	Convicted and under-trial only.
1881	16,620	875	52·8	85	1,014	1,099	5·1	61·4	66·5	
1882	15,003	849	56·5	151	933	1,084	9·5	58·0	68·1	
1883	14,776	729	49·3	61	701	762	4·1	47·4	51·5	
1884	14,868	724	48·6	62	678	740	4·1	45·6	49·7	
1885	14,026	773	51·7	187	730	887	10·5	48·9	59·4	
1886	14,579	648	44·4	40	593	543	2·7	34·5	37·2	
1887	12,047	539	44·7	20	379	399	1·7	31·4	33·1	
1888	15,684	681	43·3	132	482	614	9·7	35·3	45·0	
1889	14,971	695	46·4	132	555	687	8·8	37·0	45·8	
Total	150,025	7,402	490·2	871	7,075	7,946	57·9	461·9	519·8	
Average	15,002	740	49·0	87	707	794	5·7	46·1	51·9	

The absence of any improvement in the death-rate is mainly attributable to the fact that the health of the prisoners admitted during the year was greatly affected by the general poorness of the crops in many parts of the province. The jails in which the proportion of the daily average sick per mille of average strength was very high were Palamow (111·1), Singbhum (100·7), Gya (100·1) and Midnapur (82·2). The unhealthiness of the Palamow Jail was due more to overcrowding than anything else, and the necessary steps have been taken to remedy this defect. The Singbhum Jail shows some improvement compared with the statistics of the previous year. In consequence of the high mortality in the Gya Jail in 1888, and during the first quarter of 1889, the Lieutenant-Governor appointed a Committee to enquire into its causes, and the officers forming that Committee expressed their opinion that the deterioration in the health of the jail population was due to the general unhealthiness of the district. Sir Steuart Bayley is pleased to observe that the jail is now reported to be perfectly healthy. The Midnapur Jail has been particularly unhealthy for the past two years, especially during 1889, when the proportion of the daily average sick increased from 42·9 in 1887 and 71·4 in 1888 to 82·2, and the death-rate from 34·6 in 1887 and 44·5 in 1888 to 77·2. The receipt of a large number of prisoners in bad and indifferent health from the neighbouring districts was one of the chief causes of the unhealthiness during the past year, and, in spite of the efforts made to improve the condition of the jail, a large number of deaths occurred from chronic diseases of malarious origin. Some improvement has since been effected, but the jail still remains very unhealthy and requires special vigilance.

Cerebro-spinal fever proved very deadly during the past year, 19 out of the 27 cases which occurred proving fatal. There were 13 cases with 10 deaths in the Hazaribagh Jail, and 8 cases with 4 deaths in the Alipur Jail. Rajshahye had 4 cases with 3 deaths, and the 2 cases which occurred in the Mymensingh and Jalpaiguri Jails ended fatally. The disease first made its appearance in the Alipur Jail in 1885, and the Committee appointed in 1886 to investigate its origin attributed it to overcrowding and defective ventilation in the sleeping barracks. Notwithstanding the measures which were promptly adopted to remove these defects, it has appeared from time to time in a sporadic form. The experience of the past year, during which the disease suddenly appeared in virulent epidemic form at Hazaribagh, where there is not the least overcrowding, and as suddenly disappeared, has raised a doubt as to whether the origin and causes of the disease have yet been accurately determined. The Superintendent, Dr. Moorhead, has submitted a very careful and elaborate report on the symptoms and course of all the cases in Hazaribagh, which should be of great use in determining the nature and causes of this very fatal disease. It has accordingly been decided that another special enquiry should be held in the matter, and a Standing Committee have been appointed to meet at the Alipur or Presidency Jail on the occurrence of every case of cerebro-spinal meningitis in those jails or in any of the other Government institutions in their vicinity. The Committee have been directed to submit their report at the expiration of a year. Of the 132 prisoners that died from cholera, 117 were convicts and 15 under-trial prisoners. The largest number of cases occurred in the Cuttack, Dacca, Buxar, Mymensingh, Chittagong, Midnapur, Rajshahye, and the Presidency Jails. Sites have been provided near all jails for the camping out of prisoners on the outbreak of cholera in an epidemic form, and a sufficient number of tents and extra fetters have been kept in stock for the purpose. There were 9 cases of small-pox with 2 deaths. In the Mymensingh Jail 19 prisoners suffered from the beriberi disease, of whom 16 had been received in the jail in bad or indifferent health.

The total number of deaths among convicts was 626, or 46·0 per mille, against 571, or 46·1 per mille, in 1888. Of this number, 590 died in jails, of whom 209, or 35·42 per cent., were received in good health, 207, or 35·08 per cent., in indifferent health, and 174, or 29·49 per cent., in bad health. In the subsidiary jails there were 33 deaths (19 from cholera and 14 from other causes) against 18 in 1888. Out of the 19 deaths from cholera, 16 occurred among the prisoners at Angul, where the free population suffered severely from scarcity of food. The death-rate among convicts in the subsidiary jails was 91·9 per mille against 54·9 in 1888, but the large increase is wholly due to the deaths from cholera mentioned above. Excluding the deaths from cholera, the following jails

show the highest death-rate:—Jalpaiguri (179·4), Singbhum (117·3), Palamow (102·6), and Hazaribagh (92·5). In the Jalpaiguri Jail, 10 convicts died against 2 in the preceding year. The increase in the death-rate does not appear to have been due to any want of care on the part of the Superintendent. There were 6 deaths among convicts in Singbhum, against 10 in 1888, and the high percentage is due to the comparatively small average population. A similar remark applies to the mortality in the Palamow Jail. Of the 19 deaths that occurred in the Hazaribagh Jail, 10 were from cerebro-spinal fever. The following table shows the extent to which prisoners discharged from jails in 1889 improved in health during their residence in jail:—

	1				2			
	State of health on admission of those who were discharged from jail as per column 2.				State of health on discharge of those who were discharged from jail as per column 1.			
	Good.	Indifferent.	Bad.	Total.	Good.	Indifferent.	Bad.	Total.
In 1889 ...	23,115	10,110	8,000	36,225*	6,780	7,608	1,575	36,225*
Ratio per cent. to total number discharged from jails ...	63·80	27·91	8·29	100·00	78·03	21·72	4·35	100·00

* Excluding the figures for the Bogra intermediate jail for first four months and those for the Palamow intermediate jail for the whole year.

The return is satisfactory. Of the convicts discharged during the year, 19·6 lost weight in jail against 20·6 per cent. in 1888 and 19·3 per cent. in 1887.

The Alipore School opened in 1889 with 106 and closed with 108 boys.

Alipore Reformatory.

Twenty-eight were admitted during the year, while 22 were released, 2 died, and 2 escaped. There were no serious offences, and discipline was maintained with a smaller number of punishments than in 1888. Punishment by cutting marks has been in a great measure superseded by direct fines of the money earned by the boys. There was a decrease in the number of cases in which penal diet was resorted to as a punishment. The year under review was exceptionally healthy. Admissions to hospital fell from 2·43 in 1888 to 1·70 in 1889.

The average number of boys present at the night school increased from 98 in 1888 to 100 in 1889. Here, as at Hazaribagh, English is taught to the more advanced boys. The mark system continued to work well. The number of boys entitled to marks increased, and the average weekly earnings rose from Rs. 2-4-3 in 1888 to Rs. 2-10. The total amount earned during the year was Rs. 229-14-9, including payments for extra work, of which Rs. 175-0-9 were deposited in the Government Savings Bank.

Of 74 released boys, concerning whom reports were received, it appears that 7, or 9·45 per cent., were in jail, 5 were reported as not bearing a good character, and 1 died; the remaining 61 boys, of whom only 2 follow the trades they learned at school, are believed to be leading honest lives.

The cost of maintenance increased from Rs. 125-9-6 in 1888 to Rs. 137-9-5 for each boy, and the cost of diet rose from Rs. 3,277-14-3 in 1888 to Rs. 3,653-19-9 owing to the higher rates paid for articles of rations.

The manufactory account shows a profit to the school of Rs. 7,313-15-8, against Rs. 7,023 in 1888. No allowance is made in the account for value of the labour of the boys employed, or for wear and tear of block: it merely shows the balance of actual receipts over actual expenditure. Book-binding, carpentry, and tinsmith's work showed net profits of Rs. 3,074-4-5, Rs. 1,267-12-2, and Rs. 1,144-1-10, respectively. The profits on cane-work increased from Rs. 335-12-5 in 1888 to Rs. 383-15. Printing has been introduced with excellent effect, and yielded a profit of Rs. 1,086-0-6 during the year under review.

The number of boys confined in the Hazaribagh School rose from 223 at the close of 1888 to 267 at the close of 1889. The daily average population was 244·06, against 229·50 in 1888. The health of the school shows no general improvement, although there were only 2 deaths as against 5 in 1888. There were no fewer than 217 admissions to hospital as against 133 in 1888 and 91 in 1887, and the daily average of sick rose from 6·67 to 6·68.

Hazaribagh Reformatory.

While there was a decrease in the number of offences under all other heads, there was a slight increase in the number of punishments for stealing, 89 in 1889 to 87 in 1888. "Whippings" have increased from 10 to 17, and "hand canings" from 82 to 89. In the latter instance the increase has been almost proportional to the increase in population. The punishments by "fines and forfeiture of marks" show a decrease from 203 to 110.

Out of 244.06, the daily average number, 235 boys on an average attended the night school. The mark system worked well. The average earning per week was Rs. 10-11-3, against Rs. 9-15-2 in 1888. The total earnings were Rs. 556-9-6, against Rs. 570-6 in the previous year.

Reports were received regarding 115 boys; 75 reports were favourable; in 17 cases it was not known what had become of the boys; 5 had been re-convicted and sent to jail, and 3 were looked upon with suspicion by the police. Eleven boys continued to work at the trades they learned in school, and 4 died.

The expenditure rose from Rs. 89-13-10 per head in 1888 to Rs. 92-10-1 in 1889. The increase was mainly due to the issue of warm coats and blankets to the boys and to the supply of furniture for the school.

The manufacturing account shows a profit of Rs. 3,301-7-8, against Rs. 3,757-2-11 in 1888, but the school is said to be in a better position in regard to its manufactures, and the new industries of shoe-making, leather-tanning, and carpet-weaving have been started on a satisfactory basis. Besides these trades, carpentry and iron and tin work are taught.

Civil Justice.

High Court, Original Jurisdiction. INCLUSIVE of 528 cases instituted during the year, there were 976 suits for disposal on the Original Side of the High Court during 1889, against 920 in 1888 and 996 in 1887. The number disposed of during 1889 was 401, against 472 in 1888 and 562 in 1887, the proportion of suits disposed of to the total number before the court being 41·08, against 51·3 in 1888 and 56·42 in 1887. There were 575 suits pending at the close of the year, against 448 in 1888 and 434 in 1887.

High Court, Appellate Jurisdiction. The High Court sat on the Appellate Side for 228 days in 1889, against 250 days in 1888 and 262 days in 1887, and disposed of 4,636 appeals and applications as compared with 5,577 and 5,192 in 1888 and 1887 respectively, the number pending at the end of the year being 3,654, against 2,517 and 2,859 at the end of 1888 and 1887 respectively. The proportion of work undisposed of in 1889 was 44·07 per cent. of the whole work on the Appellate Side of the High Court, against 31 per cent. in 1888 and 35 per cent. in 1887.

The number of first appeals from original decrees disposed of during the year was 305, of second appeals 1,598, and of miscellaneous orders in court 396. The number of first and second appeals amounted to 1,903, against 2,815 in 1888, or a decrease of 912 cases ; and the number pending at the end of 1889 was 3,303, against 2,224 in 1888, or an increase of 1,079 cases.

Courts in the interior. The total number of the various descriptions of original civil suits instituted in the courts in the interior during the year is shown in the subjoined statement:—

Instituted in—	Suits for money.	Under the rent law.	Other suits.	Total.
Small Cause Courts ...	45,292	91	175	45,558
Munsifs' " ...	179,920	186,632	36,030	402,582

	408,527	407,345	412,039			

The suits instituted in civil courts (inclusive of the courts in the Schedule Districts), classified according to value, were as follow :—

	Rs.	
Not exceeding 10	...	92,879
Ditto 50	...	228,306
Ditto 100	...	77,613
Ditto 500	...	58,319
Ditto 1,000	...	5,527
Ditto 5,000	...	3,838
Ditto 10,000	...	504
Ditto 10,00,000	...	308
Exceeding 10,00,000	...	22

There were in addition 551 suits the value of which cannot be estimated in money.

The following statement shows the results of decrees put in execution by the regular civil courts during the past two years :—

Year.	Decrees executed.		Amount realised.
	Completely.	Partially.	
			Rs.
1889 ...	91,063	65,022	1,65,12,891
1889 ...	93,044	65,375	1,58,04,530

The number of suits instituted in the Calcutta Court of Small Causes during the past three years is shown below :—

Calcutta Court of Small Causes.

	Number of suits instituted.
1887 ...	26,811
1888 ...	25,097
1889 ...	26,396

Details of the value of the suits instituted in 1888 and 1889 are given below:—

	Rs.		1888.	1889.
Up to	10	...	6,844	6,876
"	50	...	11,111	11,637
"	100	...	2,986	3,214
"	500	...	3,298	3,714
"	1,000	...	552	580
Above	1,000	...	306	375
			<u>25,097</u>	<u>26,396</u>

The figures show an increase of 1,299 as compared with the institutions in 1888. The increase occurred in the number of suits of all values. The following table gives the number and description of suits instituted during the years 1888 and 1889:—

			1888.	1889.
Contract in writing	4,791	5,218
Do. not in writing	2,493	2,321
On account stated	1,555	1,795
Money had and received	616	656
Goods sold	8,301	8,795
Wages, work and materials	3,077	3,041
Rent not falling under the rent law	3,506	3,840
Moveable property or value thereof	307	91
Damages	375	607
Other suits for money or moveables not already mentioned	76	32
Total	<u>25,097</u>	<u>26,396</u>

The amount in litigation during the year was Rs. 22,64,325, as compared with Rs. 20,08,441 in 1888.

The total number of cases for disposal in 1889 amounted to 29,463, of which 2,787 were cases pending from the previous year. Of these, 27,191 were disposed of, leaving 2,272 cases pending at the close of the year.

The following statement shows the results of the suits of the past three years:—

How disposed of.		1887.	1888.	1889.
For plaintiff after trial or reference to arbitration	...	4,560	3,446	4,672
Ditto <i>ex parte</i> or on confession	...	8,922	9,143	9,931
Compromised	...	9,539	8,467	8,757
Non-suited	...	* 726	* 408	* 640
Dismissed after trial or uncontested	...	1,431	1,025	1,193
Ditto on default of plaintiff	...	2,826	2,075	1,998
Total	...	28,004	24,563	27,191

* These cases were all withdrawn with leave.

The percentage of the cases in which the result was in favour of the plaintiff during the three years referred to are given below:—

1887	...	82.2
1888	...	85.7
1889	...	85.9

The gross receipts during the year amounted to Rs. 3,25,105, and the expenditure to Rs. 2,05,705, against Rs. 2,91,885 and Rs. 2,07,566 respectively in the preceding year. The net amount credited to the general revenues was Rs. 1,19,400, against Rs. 84,319 in 1888.

The following statement shows the number of suits instituted and disposed of in the mofussil Courts of Small Causes during the last three years, omitting cases not tried under the summary procedure of the courts:—

	1887.	1888.	1889.	Decrease since 1888.
Instituted ...	53,927	45,188	44,982	206
Disposed of ...	56,169	46,713	45,394	1,319

Compared with 1888, the decrease in the number of suits was greatest in the following courts:—

Dacca ...	561	Jessore ...	359
Pubna ...	400	Monghyr ...	344

During the year the courts of 13 Sub-Judges and 80 Munsifs, as well as 9 Courts of Small Causes, were inspected by District Inspections by District Judges. In the districts of Bankura, Gya, Nuddea, Pubna and Rungpore all the courts were inspected, and nearly all those in Birbhum, Bhagalpur, Dacca, Dinajpur, Faridpur, Noakhally, Rajshahye and Sarun. In Cuttack, Hooghly and the 24-Pergunnahs no inspections were made for various reasons. In the remaining districts a few only of the courts were visited.

The following statement shows the work done by the Appellate Courts during 1889:—

COURTS IN THE INTERIOR.		Total number of appeals for decision.	Total number of appeals disposed of, exclusive of transfers.
Appeals from decrees—			
Sub-Judges' courts	17,871	12,796
District Judges' courts	27,579	6,709
Revenue courts	629	512
Courts in the scheduled districts	668	588
Total	46,747	20,605
Miscellaneous appeals—

Second appeals	257	162
Total	542	366
GRAND TOTAL	5,675	2,231

The High Court in 1887 represented to the Government of India that an increase to the existing judicial establishment of 6 Sub-Judges and 66 Munsifs was, in their opinion, necessary. Up to the end of 1889 sanction was given to the temporary employment of 3 Sub-Judges and 36 Munsifs. The general question of the increase necessary to the strength of the Subordinate Judicial Service is now under the consideration of Government.

The following statement shows the progress of civil litigation in the Civil justice, Sonthal Pergunnahs. Sonthal Pergunnahs during the past three years:—

	INSTITUTED.			DISPOSED OF.			PENDING.		
	1887.	1888.	1889.	1887.	1888.	1889.	1887.	1888.	1889.

Civil execution ...	3,535	3,303	3,641	3,702	3,261	3,766	843	885	760
Rent „ ...	2,013	1,620	1,787	2,230	1,800	1,909	549	569	447
Title „ ...	927	1,019	934	978	1,073	954	206	182	162
Total ...	17,591	15,971	16,725	18,493	16,107	16,753	3,115	3,030	3,002

During the year 1889 there was an increase in the number of suits of all sorts, except civil suits and title execution cases. The total number of cases disposed of during 1889 was 16,753 as compared with 16,107 in 1888, while at the end of the year there were 3,002 cases pending, as against 3,030 at the end of the preceding year.

There were 10 appeals to the High Court during the year. The number of appeals against the orders of subordinate courts in the district fell from 684 in 1888 to 618, of which 429 were to subdivisional officers and 189 to the Deputy Commissioner. The receipts of the courts rose from Rs. 69,240-5-6 in 1888 to Rs. 73,580-5.

During the year 1889-90 six appeals were pending in the Privy Council and one was instituted.

Civil litigation of Government. The following statement shows the result of Government litigation in all the civil courts of Bengal during the year 1889-90 as compared with the two previous years:—

	1887-88.	1888-89.	1889-90.
Decided in favour of Government ...	524	338	348
Decided against Government ...	72	155	58
Compromised, remanded or withdrawn ...	89	57	48
Percentage in favour of Government ...	88	68½	85½

Taking the litigation in the High Court only, the percentage of cases decided in favour of Government decreased from 100 to 98½.

The result of Government litigation in the lower appellate courts was favourable as compared with that of the two preceding years, the percentage of cases decided in favour of Government being 88 in 1889-90, against 82½ and 57½ in 1887-88 and 1888-89 respectively.

In the courts of the first instance the percentage of cases decided in favour of Government was 83, against 68½ in the preceding year. Exclusive of land acquisition cases, the percentage was 65 in 1888-89 and 81½ in 1889-90. Out of the 51 cases decided against Government, 26 were land acquisition cases; and of the remaining 25, two were cases in which Government was plaintiff, the one being a suit for recovery of a bigha of chakran land in the district of Midnapur and the other a suit for possession of two cottahs of Government khas mehal land in the district of the 24-Pergunnahs; eight were cases for recovery of surplus sale proceeds, which, as a matter of course, could not be paid, as the plaintiffs' names were not registered in the collectorate; two were for rent of a house occupied by the steamer office at Manickgunge; one was for setting aside,

a sale on the ground of irregularity in the publication of sale notices, and the rest were for sundry other matters of minor importance.

The total value of the cases in which decisions were given adverse to Government fell from Rs. 2,10,030 to Rs. 1,50,528. Of this amount, Rs. 285 represented the value of the suits in the High Court, Rs. 4,868 the value of suits in zillah appeals, and Rs. 1,45,375 that of original suits. In original suits decided adversely to Government, the value of suits to obtain possession of land, estates or other property, or for the recovery of rents or bond debts, was Rs. 6,650, of land acquisition suits Rs. 1,19,203, and of suits for the reversion of revenue sales on the plea of informality, non-liability, &c., &c., Rs. 852.

The result of the litigation in which the Court of Wards was interested during the year 1889-90, as compared with that of the two preceding years, was as follows :—

	1887-88.	1888-89.	1889-90.
Decided in favour of Court of Wards	... 707	818	604
Decided against Court of Wards	... 185	110	62
Compromised, remanded, or withdrawn	... 68	43	54
Percentage in favour of Court of Wards	... 79½	88½	90½

The amount of decrees in favour of Government under realization during the year was Rs. 55,247, against Rs. 67,540 in 1888-89. The amount realized fell from Rs. 30,281 to Rs. 11,659, and the percentage of recovery from 44½ to 21½. The largest outstanding balances were in Bankura (Rs. 5,365), in the 24-Pergunnahs (Rs. 3,556), in Julpiguri (Rs. 4,487), in Sarun (Rs. 3,389), in Balasore (Rs. 6,820). In wards' decrees, the amount under realization and that realized fell from Rs. 13,94,090 and Rs. 2,68,027 to Rs. 11,74,880 and Rs. 2,15,720 respectively, and the percentage of recovery from 19½ to 18½. The largest outstanding balances were in Burdwan (Rs. 2,69,785), in Midnapur Rs. 15,234), in Rajshahye (Rs. 1,50,721), in Mymensingh (Rs. 55,201), in Bakerganj (Rs. 50,367), in Durbhunga (Rs. 41,716), in Shahabad (Rs. 42,334), in Gya (Rs. 1,78,585), and in Bhagalpur (Rs. 63,778).

Registration.

The following table shows the number of registrations, the receipts and expenditure, and the number of registration offices open during the last six years:—

General statement.

YEAR.	NUMBER OF REGISTRATIONS.				Total receipts	Total expenditure	Surplus.	Number of registration offices.
	Affecting immovable property.		Other registrations.	Total.				
	Compulsory.	Optional.

Decrease	243,588

* Including some deeds the registration of which has since become compulsory under the Bengal Tenancy Act.

The most noticeable figures in the above statement are those that show a decrease in optional registrations affecting immovable property. The Inspector-General of Registration explains that the decrease is due solely to the gradual introduction of the Transfer of Property Act and to a change in the classification of deeds for the transfer of permanent tenures and holdings of small value by sale or gift. The registration of these was formerly held to be optional, but is now deemed compulsory. In all cases in which sufficient time has elapsed to give these changes their full effect it has been found that optional registrations steadily increase *pari passu* with compulsory ones. There has been a steady increase in the operations of the Department, and its financial position is excellent, the surplus at the close of 1889-90 being larger than that of any previous year. Several new offices have been opened since the close of the year, and the demand for an extension of registration operations still continues.

The number of perpetual leases decreased from 78,766 in 1886-87 to 71,642 in 1887-88 and 69,330 in 1888-89, but it again rose to 76,390 in 1889-90. The Inspector-General's remarks on this point are of considerable interest and importance. He says:— "There are two great classes of perpetual leases—those given by zemindars to their tenants and those sublet by tenants to others. These two classes fluctuate independently of each other, and the circumstances of each particular district become a factor in determining their variations. But as far as the first class of perpetual leases is concerned, a general rule, such as would be naturally expected, seems to be at work. The amount of land being limited, the settlement by zemindars with their ryots in perpetuity has a tendency to increase up to a certain point, and then to steadily decrease as the majority of the lands become settled. This has actually been observed to be the case in the sub-district of Baraset in the 24-Pergunnahs, where the Sub-Registrar is the most punctual and businesslike officer I have under me (which renders his office very popular), and is also a most careful observer and notes facts in connection with registration transactions in the most intelligent manner. He has observed a regular permanent settlement going on during the past two or three years between the zemindars and their ryots, owing to the zemindars finding it difficult to make arbitrary enhancements or ejections under the new law, and the number of registrations under this settlement has already reached its maximum and begun to

decline. I have no doubt that this same cause is at work in other sub-districts, where the usual stereotyped explanation is given, that the zemindars find themselves in straitened circumstances owing to a succession of bad harvests; but it is only in particular districts, like those in the Dacca and Chittagong Divisions, where the ryots are prosperous and insist on obtaining some certainty of tenure, that these settlements are at all general." Many of the registrations are, of course, mere paper transactions, due to the necessity for re-registration of under-tenures when the ownership of the property is transferred. The disturbance in the ordinary current of land transactions occasioned by the introduction of the Bengal Tenancy Act has rendered it difficult of late years to appreciate the true nature and value of fluctuations in figures of registration of deeds; but the experience of three years of its working does show that the number of transactions under the head of perpetual leases has steadily increased and tends to reach a certain maximum, after which a decrease may be looked for. The following statement shows the number of perpetual leases registered in some of the important districts since 1882-83, and generally points to the conclusions arrived at by the Inspector-General, although in some districts the individual action of two or three large landholders always affects the statistics, and the bearing of the Tenancy Act upon them is thus prevented from being apparent:—

DISTRICT	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
Burdwan	904	803	1,012	1,051	1,183	1,118	1,318	1,374
Bankura	1,651	1,699	1,971	2,377	2,554	2,826	2,709	3,270
Midnapur	1,036	1,383	1,478	1,618	2,071	1,604	1,638	1,248
24 Pergunnahs	4,619	4,481	5,051	6,143	6,727	5,839	7,010	7,510
Nudda	1,713	1,601	1,710	1,569	1,244	1,530	1,586	1,812
Jessore	11,881	11,100	11,315	9,750	6,207	3,792	3,609	4,260
Khulna	2,562	4,575	4,873	4,701	4,376	4,041	5,164	5,210
Dacca	633	790	590	763	809	1,234	1,221	1,317
Faridpur	6,221	6,076	6,509	6,623	8,033	8,082	7,822	8,410
Backerganj	11,150	10,813	12,069	10,969	10,438	8,088	8,480	8,234
Noakhali	3,931	5,536	7,621	8,117	5,759	5,290	4,555	4,753
Chittagong	13,803	17,248	22,010	23,472	20,437	18,294	10,322	19,627

Of the total number of other than perpetual leases, which rose from 187,263 in 1886-87 to 227,686 in 1889-90, 175,231 were counterparts, the percentage of leases being 23.03 as compared with 27.06 in 1886-87, 23.65 in 1887-88, and 23.72 in 1888-89. Any deductions from these figures are dangerous, as District Registrars appear to be doubtful in some cases as to whether kabulyats should be classed as leases, or merely as the counterparts they are, and because pottahs are also frequently entered as counterparts. Moreover, the prevalence of *zur-i-peshgi* and *kurtaoli* leases, of which no counterparts are given, in the most important districts of Behar, frustrates any attempt at theorising on these statistics.

The number of instruments of mortgage of the value of Rs. 100 and upwards rose gradually from 58,648 in 1886-87 to 77,555 in 1889-90. There was a slight decrease last year in the districts of Rungpur, Dacca, and the Sonthal Pergunnahs. Similar instruments of value less than Rs. 100 also considerably increased during the last three years, the figures of the past year being 130,007 against 72,355 in 1886-87. The increase is in many cases ascribed to failure of crops and the high price of food-grains. The increase in deeds of mortgage does not appear to have affected the registrations of obligations for payment of money, including bonds and miscellaneous deeds, such as kabinnamahs. The latter rose from 89,795 in 1886-87 to 103,962 in 1889-90. About 82 per cent. of the bonds were of values up to Rs. 100, the rest exceeding that amount. The increase in this case, as in the case of mortgages, is probably due to a great extent to the scarcity that affected many parts of Bengal during the past year. The total number of registrations affecting moveable property, exclusive of wills and written authorities to adopt, increased from 125,188 in 1886-87 to 149,350 in 1889-90.

While the aggregate value of property transferred by registered documents increased by more than 520½ lakhs of rupees in 1888-89, it decreased by more than 412½ lakhs during the past year. There was an increase of nearly 11 lakhs in the value of moveable property transferred, but the value of immoveable property diminished by more than 423 lakhs.

The number of transfers of estates and tenures effected by deeds of sale during the past year were 90,691, against 52,858 in 1886-87 and 81,382 in 1888-89, and 9·9 per cent. of the purchasers were mahajans, traders or money-lenders, 15·3 per cent. zemindars, 29·6 per cent. intermediate tenure-holders, 24·1 per cent. ryots, and 21 1 per cent. others not specified. The following table compares the sales of ryoti holdings and the number and classes of purchasers during the last four years and shows a steady increase in the number of such transactions, which is, no doubt, the result of the facilities afforded by the Tenancy Act:—

YEAR.	RYOTI HOLDINGS AT FIXED RATES.							RYOTI HOLDINGS WITH RIGTH OF OCCUPANCY.						
	Number of transactions.	PURCHASERS.						Number of transactions.	PURCHASERS.					
		Mahajans, traders, or money-lenders.	Zemindars.		Ryots.	Others.	Total.		Mahajans, traders, or money-lenders.	Zemindars.		Ryots.	Others.	Total.
			Landlords of holdings trans-ferred.	Other landlords.						Landlords of holdings trans-ferred.	Other landlords.			
1886-87	24,721	3,791	786	2,504	13,500	7,315	27,396	53,071	6,458	1,050	3,315	37,662	8,079	56,564
1887-88	30,137	4,830	891	2,577	16,368	7,818	32,584	58,200	7,654	974	3,405	40,686	8,143	60,562
1888-89	33,396	5,124	1,396	3,092	17,823	8,176	35,610	64,449	8,301	1,371	4,431	45,012	8,030	67,148
1889-90	35,342	5,161	1,181	2,616	20,300	8,596	37,649	77,373	10,029	2,000	5,198	54,234	9,277	80,798

The number of registrations under sections 12 and 18 of the Bengal Tenancy Act fell from 79,109 in 1886-87, 76,324 in 1887-88, and 47,391 in 1888-89 to 26,780 in 1889-90. The decrease in the past two years is due, to a certain extent, to the discontinuance of the practice of registering deeds relating to fractional portions of permanent tenures or ryoti holdings at fixed rates, where the partition is not made with the landlord's consent in writing. On the subject of sections 12 and 18 of the Act, the Inspector-General remarks:—"There is not the least doubt that the levy of landlords' fees under those sections is exceedingly unpopular with both landlords and tenants, and that it is evaded in every possible way. The reasons of this unpopularity are not far to seek. The ryots object to pay the landlord's fee because in a great many cases it is refused by the landlord as being beneath his dignity, or as being likely to amount to an admission of an occupancy right of the tenant, and in nearly every case the ryot is not exempted by its payment from the necessity of giving *salami* to his landlord." The great increase in the number of registrations of leases, mortgages and sales are, as observed by Mr. Holmwood, attributable to the indirect effect of the Bengal Tenancy Act.

In 3,897 cases registrations were refused under section 71 of the Indian Registration Act. There were 365 appeals against such refusals, and registrations were ordered in 310 cases. There were 83 prosecutions instituted during the year, with 130 persons involved. The majority of these cases were for false personation, false statements and forgery, and of the persons accused 53 were acquitted, 63 convicted, and 14 awaiting trial at the end of the year.

The Inspector-General reports that the procedure in the matter of impounding deeds which is at present in force is not in strict accordance with the law, and he has been asked to submit proposals for the amendment of the rules on the subject.

The number of inspections made by the Inspector-General and other officers during the past year was 861, against 868 in 1888-89 and 906 in 1887-88. The District Registrars have themselves done a fair share of this work, but there was a great falling off in the number of inspections by Sadr Sub-Registrars and Subdivisional Officers. In 16 of the districts that have subdivisions there were no inspections made at all.

The following table shows the working of Act I (B.C.) of 1876 for the Voluntary Registration of Mahomedan Marriages and Divorces since its introduction:—

YEARS.	Number of districts in which the Act was in force.	Number of offices open on the 31st March.	Number of marriages registered.	Number of divorces other than <i>kholas</i> registered.	Number of <i>kholas</i> registered.	Total number of ceremonies registered.
1876-77	14	77	2,555	402	161	3,118
1877-78	14	103	7,391	1,404	695	9,390
1878-79	14	103	8,161	1,705	771	10,637
1879-80	14	107	7,137	2,097	623	9,857
1880-81	14	106	5,777	1,874	779	8,430
1881-82	14	107	4,951	2,239	667	7,857
1882-83	14	112	5,068	2,247	766	8,081
1883-84	14	112	4,273	2,315	895	7,483
1884-85	14	112	3,913	2,540	957	7,410
1885-86	14	112	3,993	2,422	1,109	7,524
1886-87	14	112	3,926	2,179	1,147	7,252
1887-88	14	112	4,100	2,478	1,090	7,668
1888-89	14	113	4,527	2,819	1,113	8,459
1889-90	14	113	3,959	3,119	1,137	8,216

The districts of Dinajpur, Pubna, Backerganj, Noakhali, Mymensingh, Bogra, Tipperah, and Dacca showed an increase in the total number of ceremonies registered, while the districts of Khulna, Rajshahye, Rungpur, Faridpur, and Chittagong showed a decrease. The Inspector-General of Registration thinks that in the majority of districts the Mahomedan Marriage Registrars are slowly but surely gaining ground, and that in those districts where they do not do so, it is owing to their own inferior qualifications or to the active opposition of interested headmen and zemindars. Mr. Holmwood was lately asked for a separate report with reference to the alleged unpopularity of the Act, and he has given his reasons for holding that it is not in any way unpopular, though in certain places it is neglected and in certain others its effects are destroyed by the opposition of a few hostile zemindars. Some practical reforms, suggested by Nawab Abdul Latif Bahadur, C.I.E., in a valuable minute on the working of the Act, have been adopted by the Permanent Committee and approved by Government, and they will be immediately introduced. The Act is at the same time to be extended, on the recommendation of the Permanent Committee, to the Town of Calcutta and the districts of 24-Pergunnahs, Jessore, and Murshidabad. As regards the Qazis' Act, the Inspector-General reports that the "Act does not seem to gain ground much, though wherever the Qazis are energetic enough to establish Naib Qazis and get hold of the professional persons who arrange marriages, there is a marked increase in their operations. This is specially noticed in the districts of Eastern Bengal."

Twenty-one companies, limited by shares, with an aggregate nominal capital of Rs. 84.11,000, were registered during the year, against twenty companies with an aggregate nominal capital of Rs. 37,07,000 in the preceding year. Of these, two were banking companies with an aggregate capital of Rs. 1,50,000, one insurance company with a capital of Rs. 3,00,000, four trading companies with a capital of Rs. 12,20,000, four mills and pressing companies with a capital of Rs. 20,50,000, six tea companies with a capital of Rs. 12,10,000, two mining companies with a capital of Rs. 3,81,000, and two miscellaneous companies with a capital of Rs. 4,00,000.

Besides the above, there was one company limited by guarantee, viz., the European and Anglo-Indian Defence Association, which was registered during the year under section 26 of the Act as an association not for profit.

Six companies increased their capital, the increase amounting to Rs. 3,08,400. Of fourteen companies under liquidation, nine, with an aggregate nominal capital of Rs. 21,92,000, commenced dissolution during the year, and the remaining five with a total capital of Rs. 15,75,000 were finally dissolved. Five companies, originally joint-stock, were converted into companies limited by shares.

The total number of companies working in Bengal at the close of the year was 248. The total receipts under the Indian Companies Act, VI of 1882, amounted to Rs. 8,953-4 and the total expenditure was Rs. 636.

Municipal Administration and Local Self-Government.

THE duties which devolved on the Commissioners of the Calcutta Municipality during the first year of the amalgamation of the urban portion of the suburbs with the town proper under one system of Municipal Government under Act II (B.C.) of 1888, were exceptionally onerous. There were 34 general meetings against 14 in the previous year; 125 meetings of Standing Committees against 56; 66 of Special Committees against 28; and 57 of Sub-Committees against 33. Altogether the total number of meetings was 282 against 131. There were no less than 26 members who attended 50 meetings or more during the year, and seven members (of whom three were nominated and four elected) who attended over 100 meetings. These results, showing how largely the Commissioners devote their time and trouble without remuneration to municipal duties, afford the most satisfactory evidence of the growth of public spirit in the metropolis. The account given of the principal subjects under discussion at these meetings indicates the importance and variety of municipal interests under consideration. Among other items may be mentioned the new Central Road, the question of burning the town refuse, the extension of water-supply and drainage to the Suburbs, the question of legislation for lepers, the protection of wild birds, the maintenance of a public library, the preparation of bye-laws, and the reorganization of establishments in the amalgamated area.

The loan liability of the Corporation at the close of the year stood as follows:—

Loans.				Rs.
6 per cent. debentures	4,17,500
5 ditto	1,12,92,400
4½ ditto	10,48,300
				<hr/>
				1,27,58,200
Consolidated loans from Government				...
				60,11,610
				<hr/>
Total				...
				1,87,69,810

Two new 5 per cent. loans were raised during the year—one for 5 lakhs, in June 1889, for water-supply, for which tenders amounting to Rs. 39,26,000 were received, and which was placed at an average premium of Rs. 5-14-6; and the other for 14 lakhs, which was incurred for both water-supply and drainage and the repayment of 6 per cent. debentures. The larger loan was raised in September, and the whole of it was taken up at rates varying from Rs. 3 to Rs. 5-12 premium.

The actual income of the Municipality during the year was Rs. 42,17,121, and the actual disbursements amounted to Rs. 41,27,831. The principal items of receipts and charges are as follows:—

RECEIPTS.	Rs.	EXPENDITURE.	Rs.
General rate at 9½ per cent.	17,34,869	Interest on general loans including drainage	...
Sewage rate, &c., at 2 per cent.	3,10,034	Contribution for repayment of general loans	...
Water rate at 6 and 3 per cent.	9,11,028	General establishment	...
Lighting rate at 2 per cent.	3,02,259	Road Department	...
Taxes	4,95,821	Gowkhana	...
Municipal Market	1,20,477	Conservancy	...
		Sewage rate charges	...
		Water rate charges, including interest on loans, Rs. 4,29,916, and contribution for repayment of loans, Rs. 1,70,917	...
		Lighting, &c.	...
			9,33,930
			3,17,860

The total rates realized amounted to $19\frac{1}{2}$ per cent. on the annual valuation of assessable property, against a maximum of 23 per cent. allowed under the law, and the total incidence of taxation of all sorts was at the rate of Rs. 6-8-1 per head of the population according to the census of 1881.

The annual valuation of Calcutta for the year was Rs. 1,73,70,515. The apparent increase was only Rs. 26,408, but the real increase was Rs. 2,76,408, after allowing for a nominal reduction of $2\frac{1}{2}$ lakhs in the valuation of the Kidderpore dock premises.

Owing to the large fluctuating population of Calcutta it is not possible to estimate the increase or decrease, as is usually done, by the number of births and deaths, and the vital statistics of the town are therefore still calculated on the census of 1881. Upon this basis the number of deaths in the town proper was 26·9 per thousand against 27·7, the mean of the decade; while in the amalgamated area of the suburbs it amounted to 46·9 per thousand. The number of cholera deaths in the town proper was 1,071, which, with two exceptions, is the lowest mortality since the introduction of a pure water-supply. In this connection, the Health Officer observed—

“The years 1871 and 1880 had respectively 800 and 805 deaths. There is a marked periodicity about these low rates from cholera, which seems to point to some biological law in the life history of the cholera contagion, in the form perhaps of some periodic struggle for existence which, when recovered from, is followed under favourable conditions for a time with a remarkable vigour. To remove those favourable conditions is practically to stamp out cholera, a consummation which, as far as Calcutta is concerned, will no doubt in time be effected. In the days before the water-supply, i.e. before 1869, there was a similar periodicity, only with this difference, that the lowest annual number of deaths was 2,270 and the highest over 6,829, whereas after the introduction of the water-supply the lowest was 800 and the highest 2,272.”

Nothing could demonstrate more eloquently than these figures the immense sanitary boon conferred on Calcutta by the introduction of a water-supply. The Commissioners are to be congratulated on the vigour they have displayed in the administration of this department of the Municipality, and on the systematic manner in which they have extended the benefits received to all portions of the town. Shortly before the commencement of the year under review a third pumping-station was opened at Halliday Street to remedy the scarcity of water in the riparian and other wards, and the favourable effect on the cholera rate was at once marked and has been continuous. A fourth station will soon be constructed in Bhowanipore to supply the suburbs. The work of connecting that portion of the suburbs which could be directly supplied from the town mains was completed in September 1889, and at the close of the year the length of mains and services on the filtered system amounted to 184 miles. There are now 990 stand-posts on the filtered and 2,505 ground hydrants on the unfiltered system. The population supplied with filtered water at the date of the Engineer's report was 480,019, which includes 75,800 of the suburban amalgamated area. The supply had then reached an average of $35\frac{1}{4}$ gallons of filtered water and 8·9 gallons of unfiltered water per head of the population. The total cost to the town on account of water-supply has been Rs. 1,42,72,897.

The construction of the fine new street, known as the Central Road, which the Commissioners have at great expense determined to cut through the most overcrowded and overbuilt portion of the city, was undertaken during the year. This road will be 70 feet wide with 50 feet for carriage way, and nearly two miles long from the Hooghly Floating Bridge to the Sealdah terminus of the Eastern Bengal State Railway. The first section of this road from the bridge to Clive Street has been completed; the land acquisition for the rest is proceeding, and a considerable portion at the Sealdah end has been cleared of buildings.

The most important work undertaken in the Drainage Department of the Municipality is the survey for drainage of the suburbs, which is still in progress. There are two parties engaged—one for the south-eastern area and the radical outfall into

the Biddiadhary river, and the other for the southern area, which is for surface drainage only.

Bustee cleansing and structural improvement.

The total expenditure incurred on bustee cleansing and structural improvement during the year was Rs. 2,46,572.

MUNICIPALITIES IN THE INTERIOR OF BENGAL.

Number of municipalities.

The total number of municipalities in existence at the close of the year was 147. The total population within municipal limits was 2,595,940, and the average proportion of rate-payers to the whole population in municipalities was 17·9 per cent.

Elective system.

The system under which two-thirds of the total number of Commissioners fixed for each municipality are elected by rate-payers was in force in all the municipalities except 29.

Results of elections held during the year.

The two newly-formed municipalities of Cossipore-Chitpore and Manicktollah having been allowed the franchise, the first general elections were held in them. Out of 3,026 and 1,507 registered voters in those towns, 944 and 822 persons respectively attended the poll and voted. Of 103 bye-elections held under section 27 to fill up vacancies in the ranks of Commissioners, 91 were conducted successfully ; the remaining 12 failed owing to nominations of candidates not having been submitted by the electors within the time prescribed by the rules. The largest attendance of voters at the poll was 70·7 of the total number of qualified electors.

Constitution of Committees.

The following statement shows, division by division, the constitution of the Committees of the various municipalities during the year :—

DIVISION.	Nominated.	Elected.	Total.	Officials.	Non-officials.	Europeans.	Natives of India.	REMARKS.
Burdwan	136	228	364	48	316	21	343	
Presidency	230	327	557	63	494	24	533	
Rajshahye	84	97	185	14	141	33	150	
Dacca	10	107	217	33	144	12	205	
Chittagong	33	40	73	17	56	6	67	
Patna	179	190	369	70	293	45	324	
Rhagulpore	79	83	164	22	143	23	141	
Orissa	42	33	75	23	47	8	67	
Chota Nagpore	71	37	108	22	86	16	92	
Total ..	988	1,144	2,112	343	1,769	100	1,923	

The following table shows the percentage of officials and Europeans to the total number of Commissioners during 1889-90 and the previous eight years :—

	Officials.	Europeans.		Officials.	Europeans.
1881-82 ...	26·3	22·9	1886-87 ...	15·6	9·1
1882-83 ...	25·3	21·7	1887-88 ...	16·2	9·4
1883-84 ...	24·5	21·2	1888-89 ...	16·0	8·9
1884-85 ...	18·0	12·1	1889-90 ...	16·1	9·0
1885-86 ...	16·1	10·1			

It is clear that, so far as the *personnel* of the Municipal Committees is concerned, full scope has been given to the principle of allowing the townspeople to manage their own affairs.

Meetings of Committees.

The largest number of meetings held by any municipality was 41 at Serampore with an average attendance of 56·8 per cent. of the members. Twenty-seven municipalities held more than twenty meetings with an average attendance at each meeting varying between 25 and 87·5 per cent. of the total number of members. The attendance was on the whole satisfactory, and the statistics show that a large amount of time and trouble was devoted by the Municipal Commissioners to the discharge of their duties.

The Municipal Benches in the province tried 16,604 cases of nuisance and breach of conservancy rules, in which 14,730 persons were convicted and 2,209 acquitted; and the total amount of fines inflicted amounted to Rs. 17,044. The average amount of fines imposed on each offender varied from Rs. 4-2-8 in Jamalpore, in the Monghyr district, to Re. 0-2-1 in the Nuddea Municipality.

The tax on holdings was in force in 36 municipalities, and was levied at rates below the maximum ($7\frac{1}{2}$ per cent. per annum on the annual value of holdings) in 13 places.

The tax on persons according to their circumstances and property was in force in the rest of the municipalities, and was levied at rates varying from 8 annas to one rupee per cent. on the estimated income of the assessee. The average incidence of municipal taxation throughout Bengal (excluding Calcutta) was 11 annas and 11 pies per head of the population.

The following table compares the opening balances, income, expenditure, and closing balances of municipalities, division by division, for the year 1889-90 and those of the preceding year:—

DIVISION	Opening balance.		Income during the year.		Total funds available for expenditure.		Total expenditure.		Closing balance.	
	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.

Chota Nagpore ...	8,031	10,643	53,847	63,519	61,878	74,162	51,206	63,127	10,672	11,035
Total ...	4,07,588	3,46,402	30,49,764	26,47,502	34,57,352	29,93,904	30,42,963	26,77,511	4,11,207	3,16,393

The large discrepancy between the closing balance of 1888-89 of the municipalities in the Presidency Division and the opening balance for 1889-90, is due to the exclusion from the current accounts of the closing balance of Rs. 62,042 of the late municipality of the Suburbs of Calcutta. The small discrepancies in the other divisions have been explained by the local officers.

The total income of the municipalities in Bengal under Act III (B.C.) of 1884 amounted during the year to Rs. 26,47,502, against Rs. 30,49,764 of the previous year. This large apparent falling off is due to the dismemberment of the Suburban Municipality, and as the entire area included within that municipality has

not been excluded from the operation of Act III (B.C.) of 1884, no satisfactory comparison can be made between the municipal accounts of 1889-90 and of previous years. Excluding, however, the income from the municipalities in the Presidency Division, the total income from taxation proper of all other municipalities in the remaining eight Divisions shows an increase of Rs. 57,504 over the receipts

of 1888-89, as shown below:—

	Burdwan.	Rajahmundry.	Dacca.	Chittagong.	Patna.	Bhagulpore.	Orissa.	Chota Nagpore.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1888-89 ...	5,00,183	1,60,881	2,32,558	51,325	3,22,083	1,38,310	54,712	30,538	14,90,590
1889-90 ...	5,07,501	1,68,252	2,23,919	45,148	3,58,813	1,40,136	65,884	38,541	15,48,094
Increase or decrease ...	+7,318	+7,371	-8,739	-6,177	+36,780	+1,826	+11,172	+8,003	+57,504

Water-rates were levied only in Burdwan and Darjeeling. The collec-

	1888-89.	1889-90.
	Rs.	Rs.
Burdwan ...	13,003	13,207
Darjeeling ...	10,205	10,909
	<u>23,208</u>	<u>24,116</u>

tions in both places show a small increase, as noted in the margin. The rate at Burdwan was levied at 4½ per cent. as in the preceding year; but with reference to the urgent necessity of extending the supply of filtered water to all parts of the town, the Municipal Commissioners have raised the rate

to 5 per cent. for the current year. The rate at Darjeeling is 2½ per cent. only, and the increase is due to the imposition of the rate for the first time at Goompahar. No water-rate is yet levied in Bhagulpore. In Mymensingh and Dacca the munificence of Raja Surjya Kant Acharjya Bahadur and of Nawab Sir Abdul Ghunny, K.C.S.I., has rendered the imposition of a water-rate unnecessary.

The total municipal expenditure of the province was Rs. 26,77,511, against Rs. 30,42,963 in the preceding year, and the year under report closed

with a balance of Rs. 3,16,393, against Rs. 4,11,207 in 1888-89. The following comparative statement

shows the percentage of the municipal income spent in each Division under each of the principal heads of expenditure during the last two years :—

NAME OF DIVISION.	Income during the year.		General establishment.		Public safety.		Public health.		Public instruction.		Public convenience.	
	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.
	Rs.	Rs.										
Burdwan ...	6,33,867	6,41,058	10'23	10'38	10'31	8'62	44'7	47'89	6'04	6'21	19'35	17'21

Average	11'31	11'61	5'27	5'74	47'65	48'94	4'94	4'31	20'39	19'66

The largest expenditure was incurred on conservancy (Rs. 4,69,867), public works including maintenance and repairs of streets (Rs. 4,57,191), general establishment (Rs. 3,07,495), medical institutions (Rs. 2,30,241), and road-cleaning establishment (Rs. 1,92,741).

The total municipal expenditure on vaccination amounted to Rs. 16,847.

Medical.

The provisions of the Compulsory Vaccination Act, 1880, were in force in 130 municipalities, and the total number of persons vaccinated or revaccinated during the year amounted to 98,567, of whom 89,753 were successful cases. One hundred and twenty municipalities maintained 127 dispensaries (including one temporary institution), and the total cost incurred was Rs. 2,30,241.

The Municipal Commissioners of Burdwan made a provision of Rs. 240 per annum for the education of one girl in the

Female medical education.

Campbell Medical School in Calcutta; but as no one availed herself of this offer, it was resolved to utilise the allotment in training a nurse at the Burdwan Charitable Dispensary. In this attempt also they were unsuccessful. They are now trying to secure another duly qualified and trained nurse. In the Pubna district two midwives were appointed, paid partly from the municipal and partly from the district funds. Other municipalities in the Rajshahye Division were ready to incur expenditure on this account, but no female students came forward for help, and consequently no help was given. In Burrisal the Municipal Commissioners employed a midwife for the female hospital. There is a female hospital attached to the Bankipore Dispensary, where a trained nurse is employed to look after female patients. Although stipends had been provided for by the municipalities in the Sarun district for female medical students attending the Temple Medical School, no candidates have yet come forward to attend the institution. These results are discouraging, and they corroborate what has come to the notice of Government from other sources, that less interest is evinced in Bengal than in other provinces in India in the furtherance of female medical aid to women.

The increase under this head occurred mainly in Dacca (Rs. 10,372) and Bhagulpore (Rs. 43,939). The Howrah Municipality reduced its expenditure from Rs. 2,471 to Rs. 413.

Water-works.

In Dacca the increased expenditure was due to the extension of the water-works in that town, for which a loan of Rs. 1,25,000 has been sanctioned by Government.

The total expenditure from municipal funds on education during the year was Rs. 83,000, against an expenditure of Rs. 86,000 during 1888-89. The details are shown

		Rs.
Public instruction.		
—		
Secondary	...	53,000

Miscellaneous	...	3,000

in the margin, and betray the fact, which was already well known to Government, that the Municipal grants are still devoted as a rule to the maintenance of English education, and that very little assistance is given to primary schools. There has, however, been some improvement in this

respect, and Commissioners of Divisions have not been slow to check the tendency of Municipal Commissioners to aid English education at the cost of the rate-payers generally, while only a few of the well-to-do class profit by the schools.

Every encouragement is now offered to municipalities to apply for loans for the execution of well-considered schemes of improvement. The following applications were

Loans and sanitation.

sanctioned within or immediately after the close of the year:—

- (a) *Dacca*.—The municipality applied for a loan of Rs. 1,25,000 for extending the water-works to some parts of the town which were not hitherto supplied with filtered water. Rs. 30,000 was advanced during the year, and the balance will be advanced during the current year.
- (b) *Dinagapore*.—In March 1890 orders were issued sanctioning the grant of a loan of Rs. 10,000 to the Dinagapore Municipality for the completion of the drainage works in that town.
- (c) *Rampore Beaulah*.—In April 1890 sanction was accorded to the grant of a loan of Rs. 15,000 applied for by the Rampore Beaulah Municipality for the construction of drainage works.
- (d) *Bankoora*.—A loan of Rs. 5,000 was applied for and sanctioned to the Bankoora Municipality, in June 1890, for improving the water-supply in that town by sinking six wells and acquiring and excavating a big tank in the centre of the town.
- (e) *Pooree*.—The municipality applied for a loan of Rs. 25,000 for the improvement of the drainage of that town. But as the scheme submitted by the municipality was not approved by the Public Works Department of Government and has to be revised in that Department, the application for the loan has been held in abeyance.
- (f) *Sooree*.—The Sooree Municipality obtained a loan of Rs. 1,000, repayable in four years without interest, from Raja Ram Ranjan Chakrabartty Bahadur, of Hetampore, for establishing a municipal market called the “Jubilee Market.”

Proposals for loans to the Midnapore, Chupra, and Mozufferpore Municipalities for the improvement of the drainage of those towns have been under consideration, but as the schemes were not matured in any of these places, no final orders have been passed. The Scrampore Municipality also applied for a loan of Rs. 30,000 for improving drainage.

The provisions of the section empowering the Commissioner of the Division and the Magistrate of the district to suspend the execution of any resolution or order, or prohibit the doing of any act by the Commissioners of a municipality, when such resolution or order or act is in excess of the powers conferred by the law, or is likely to lead to serious breach of the peace, or to cause serious injury or annoyance to the public or to any class or body of persons, were enforced in three municipalities during the year, viz. Dacca, Colgong, and Arrah. The circumstances were unimportant in all the cases.

Enforcement of section 63 of the Act.

The tramway in the town of Patna was completed and was in working order during the year. The length of the tramway is nearly seven miles with 11 sidings to enable

Miscellaneous.

cars to cross each other. The total number of passengers carried up to 31st March last was 151,260. There was only one serious accident during the year.

There were serious outbreaks of fire in the municipalities of Nattore, Bogra, and Rungpore, attended with loss of property, but no lives were lost. Great damage was done to the roads by the high floods in Coomarkholly, Nuddea, and Santipore. In Moorshedabad there was an unusual flood during the year, and considerable portions of Lalbagh and Azimgunge were under water. The Nawab Bahadur of Moorshedabad contributed about Rs. 3,000 for the relief of the poor in Lalbagh, and Rai Dhunput Singh Bahadur and Rai Bepin Chand and Rai Budh Singh Dudhuria Bahadur contributed Rs. 500 and 100 respectively for the relief of sufferers from the flood in Azimgunge. In the Manicktollah Municipality a fire occurred, causing damage to property to the extent of about Rs. 40,000.

In April 1889 a tornado passed over some of the villages within and about the Tangail Municipality. Its duration was very short, and it extended over a distance of five miles. Some 139 human lives were lost and 242 persons seriously wounded. The loss of property was estimated at Rs. 19,000. A sudden somewhat similar blast of wind also visited the town of Nalchitti on the night of the 27th October 1889. Its duration was a few minutes only, and it extended over an area of about a mile. Some damage to property was caused, but no lives are reported to have been lost.

WORKING OF DISTRICT BOARDS.

There were during the year 38 District Boards and 106 Local Boards; the area comprised within their jurisdiction was 109,391

Constitution of Boards.

square miles, and the total population, according to the census of 1881, was 57,185,307. The total number of members of District Boards, including the Chairmen, was 797, of whom 460 were appointed by Government and 337 were elected. Of the total number of members, 243 were officials and 554 non-officials. The number of Europeans or Eurasians and natives of India respectively was 186 and 611. The average number of members of each District Board was 20·97. As in the previous year, the Magistrate of the district was in every instance re-appointed Chairman of the District Board on the expiry of his term of office, under section 24 of the Bengal Local Self-Government Act. The total number of members of Local Boards was 1,203, of whom 768 were nominated by Government and 435 were elected. The elective system is in force in 58 Local Boards. Of the total number of members of Local Boards, 163 were officials and 1,040 non-officials. The number of Europeans or Eurasians and natives of India on the Boards was 97 and 1,106 respectively. The average number of members of each Local Board was 11·35.

Generally speaking, the members of District and Local Boards consist of zemindars and talookdars, pleaders and Government servants, with a somewhat larger proportion of medical practitioners and mooktears in the case of Local Boards, and in districts where they are to be found, indigo and tea-planters, railway employes, and managers of European firms always enjoy a fair share of representation.

The year under report witnessed the second general election of members of District and Local Boards which had completed their three years' term of existence, and the elections were on the whole successfully conducted.

General elections.

Taken together, the total number of meetings held by District Boards was 448, giving an average of 11·79 meetings for each Board. The greatest number of meetings was

Meetings of Boards.

held in Dinagopore (18), Tipperah (18), Sarun (18), Burdwan (17), Gya (17), Furreedpore (16), and Durbhunga (16); while the least number was held in Hooghly (8), Mymensingh (8), Mozufferpore (8), Chumparun (8), Nuddea (7), Moorshedabad (7), Julpigoree (7), and Jessore (6).

The average attendance at meetings of District Boards was 8·98, the average percentage of attendance being 42·82. The attendance was best in Howrah and Tipperah, amounting to 65 and 62·7 respectively, and worst in Cuttack, where it was only 19·8. In the last-named district six meetings were adjourned for want of a quorum out of 12 convened.

The total number of meetings held by all the Local Boards was 788, the average for each being 7·43. Only 8 of the Local Boards held more than 12 meetings, the highest number attained being 15 in Bhubooah. Six of the Boards held 12 meetings, and the rest less than 12. The average attendance at meetings of Local Boards was 5·69, and the average percentage of attendance was 50·13.

In most districts Local Boards have been entrusted with the administration of the grants for village roads, pounds, ferries, and primary education. In some instances powers relating to water-supply, the grant of rewards for the destruction of noxious animals, and the management and supervision of grant-in-aid and Boards' middle English schools have also been delegated to them.

No Union Committees have yet been appointed, but a scheme for their gradual establishment has been submitted to the Government of India, and is still under consideration.

The following statement shows the principal items of income and expenditure of District Boards during the year under review :—

INCOME.			EXPENDITURE.		
		Rs.			Rs.
I. Land Revenue	...	15,945	1. Refunds	...	13,601
VI. Provincial rates	...	34,32,574	18. Administration	...	2,58,533
XII. Interest	...	609	20. Pounds	...	23,589
XVII. Pounds	...	3,94,594	22. Education	...	10,04,140
XIX. Education	...	30,561	24. Medical	...	42,546
XX. Medical	...	7,625	26. Scientific and other minor departments	...	5,219
XXI. Scientific and other minor departments	...	1,648	29. Superannuation allowances and pensions	...	1,209
XXV. Miscellaneous	...	1,39,874	30. Stationery and printing	...	48,057
XXXII. Ferries, &c.	...	3,28,314	32. Miscellaneous	...	43,365

Debt	...	8,19,261	43. Minor works and navigation	...	4,373
			45. Civil works	...	38,42,381
			Debt	...	6,25,260
Total	...	62,73,403	Total	...	61,72,240

The year 1888-89 closed with a credit balance of Rs. 18,28,843 (corrected figures): at the close of the year 1889-90 this balance was increased to Rs. 19,30,006.

Of the total income under this head, Rs. 9,365 represent canal tolls realized in Chittagong and the balance sale-proceeds of trees, grass, &c. Compared with the previous year, the Chittagong canal revenue shows a

falling off to the extent of Rs. 2,213.

The entire amount, Rs. 34,32,574, under this head represents the balance of the receipts of the district road cess which is credited to District Boards after deducting the cost of collection and revaluation. Compared with the previous year, there was an increase of Rs. 78,704 in the income derived from this source, and this item may be expected to increase slowly but surely in consequence of the revaluations which from time to time are effected in all districts. The largest increase during the past year was in Burdwan and Gya, from Rs. 1,02,826 and Rs. 1,76,014 in 1888-89 to Rs. 1,36,865 and Rs. 1,97,198 respectively.

The total receipts from pounds under the Cattle Trespass Act, amounting to Rs. 3,94,594 only, show a net decrease of Rs. 37,321 as compared with the collections of 1888-89, and a decrease of Rs. 25,559 as compared with the estimate (Rs. 4,20,153) on which the Provincial adjustments with District Boards were based. The decrease is, however, more apparent than real, and is mainly due to a change in the system of accounts. Under recent orders of Government, the security advances, amounting to one quarter's demand, taken from the pound farmers

at the time of settlement in March 1890, were credited to the suspense head of accounts, "Deposits," pending adjustment by transfer from "Deposits" to "Pound rents," whereas in previous years such advances were directly credited to "Pound rents." The estimate for the current year is Rs. 4,42,441.

The receipts under Education declined from Rs. 33,996 in 1888-89 to Rs. 30,561. The falling off was chiefly in the districts of Chittagong and Monghyr.

Education.

Medical.

The total income under this head fell from Rs. 10,875 in 1888-89 to Rs. 7,625 in 1889-90.

Of the several items which constitute the income under "Civil works," ferry receipts, amounting to Rs. 2,84,164, alone call for notice. Compared with the previous year, there

Ferries.

was a falling off of Rs. 1,29,706, but the decrease, like that in the case of pounds, is more fictitious than real, and the estimate for the current year is Rs. 3,55,000. In Nuddea there was a nominal decrease from Rs. 10,834 to Rs. 2,460 in consequence of several ferries having been transferred from the Boards' management to Government. In Bogra there was a decrease from Rs. 9,370 to Rs. 1,410, due principally to the erroneous credit in the previous year of the receipts from Government ferries. For the same reason there was a decrease in Chittagong from Rs. 22,069 to Rs. 10,551, in Patna from Rs. 21,347 to Rs. 14,154, and in Maldah from Rs. 26,121 to Rs. 963. In Shahabad the receipts decreased from Rs. 15,319 to Rs. 3,929; but as Rs. 19,994 were refunded to Government on account of erroneous credit, a loss of Rs. 16,065 is shown under this head, and is due to a great extent to a change in the system in accounts under which advances which were formerly credited direct are now kept under the head of "Deposits." The marked decrease in Sarun from Rs. 27,721 to Rs. 4,966 is due to adjustment of accounts. Of the districts which show an increase, it is necessary only to explain that the considerable increase in Julpigoree, amounting to Rs. 6,884, is due to the fact that all the ferries in this district have now been transferred by Government to the District Board.

The total amount contributed from Provincial funds to District Boards during the year was Rs. 10,98,148, or Rs. 4,37,799 in excess of the previous year, a result which was

Contributions.

chiefly due to late adjustments, the Government grants in many cases for two years, and in some instances for three years, having been drawn by the Boards in the year under report. Special orders have lately been passed to avoid the recurrence of such confusion, and the Accountant-General has been instructed to take action on his own authority to place the fixed annual grants at the disposal of each District Board at the beginning of the financial year. The fixed annual grant made by Government to establish equilibrium between the receipts and charges transferred to the management of District Boards, including charges for stationery and forms, but excluding all other special grants, amounts to Rs. 4,14,915. In addition to this a contract grant was made to District Boards, amounting in the past year to Rs. 2,22,924, for the maintenance of Provincial roads, which, under section 74 of the Act, have been transferred to their charge, and grants of Rs. 1,36,728 and Rs. 37,108 respectively were made to the District Boards of Durbhunga and Mozufferpore for expenditure on relief-works.

The entire amount under this head represents "Deposits and advances."

Debt.

Compared with the previous year, there was an increase of Rs. 3,80,539 under both Deposits and

Advances. This was chiefly due to the security deposits taken from the farmers of pounds and ferries being credited under this head for the year under report, whereas they were in the previous year credited as pound and ferry collections.

The cost of general administration has increased from Rs. 2,46,732 to Rs. 2,58,533. Various reasons have been assigned

EXPENDITURE.

Administration.

for the increase, but the chief causes appear to be the transfer of the charges on account of the travelling allowance of members of District Boards from "Miscellaneous" to "Administration" and the increase in the percentage cost of audit and treasury establishments. Considerable sums were also expended in the purchase of furniture for offices of District Boards.

With the sanction of the Government of India, rules have been laid down declaring the general principles regulating the grant of pensions to employes under local bodies. District Boards are required to pay contribution to pension in case of all pensionable Government officers transferred to their service, and liability for payment of those pensions will then be borne by Government. Special rules have been made applicable to cess establishments entertained by Collectors and sanctioned by the Board of Revenue. It is left for the Boards to make rules, which must be sanctioned by the Lieutenant-Governor under section 35 of the Local Self-Government Act, for employes whose whole service has been under them, and draft model rules have been circulated by Government for the convenience and guidance of Boards in such cases.

The charges on account of cattle-pounds show an increase of Rs. 4,906, which is attributed to the change in the system of accounts, the pay of pound clerks being now charged to "Police" or "Pounds" instead of to "Administration" as in previous years.

Compared with the figures of the previous year, the total expenditure under "Education" shows a decrease of Rs. 26,669.

Of the total amount expended, Rs. 1,93,847 represent the cost of inspection; Rs. 2,130, Rs. 72,470, and Rs. 4,06,214 the expenditure on training and special schools, middle schools, and primary schools respectively; Rs. 2,69,117 the amount of grants-in-aid; Rs. 704 scholarships, and Rs. 59,658 miscellaneous charges. The number of primary schools and the expenditure generally on primary education increased during the year. In some districts, notably Midnapore, Howrah, the 24-Pergunnahs, and Moorshedabad, there was a falling off owing to scarcity and floods, but this was more than counterbalanced by the increase in other districts. The number of middle schools slightly declined owing in a great measure to the withdrawal of the grants which had been improperly made in some cases from the allotment for primary education.

In Hooghly there are 56 Sanskrit toles with 268 students. In Bankoora mention is made of six advanced Arabic or Persian schools with 102 and of 33 Sanskrit toles with 331 pupils. In Rungpore the Bayley Technical School is maintained by the District Board. In Backergunge it is in contemplation to start a technical school for teaching carpentry, &c., at the head-quarters of the district. The Board have also voted two scholarships of Rs. 10 each, tenable in the Seebpore Engineering College. In Mymensing, one of the zemindars is said to have offered Rs. 10,000 for opening a technical school in addition to an annual contribution to be made for its maintenance by the District Board, and the matter is under consideration. The Tipperah Board has founded two scholarships of Rs. 15 each, tenable at the technical branch of the Seebpore Engineering College, and these have been awarded to two natives of the district now pursuing their studies in that college on their contracting to serve under the District Board after the completion of their college career. The Chairman further reports that an attempt is being made to establish an artisan school in Comillah under the auspices of the District Board. The Noakholly Board have offered a scholarship of Rs. 10 at the same college, tenable for five years, but apparently no applications have been made for it.

The question of providing means for the encouragement of female medical education continued to receive the attention of District Boards. The medical scholarship of Rs. 10 a month offered by the Midnapore District Board was awarded to Sarat Kumari Mittra, a female student of the Campbell Medical School at Calcutta, and she has drawn the stipend since April 1889. The Superintendent of the School speaks favourably of the progress made by her. In Burdwan a sum of Rs. 20 per mensem was set apart for a similar scholarship, and in Bankoora the Board sanctioned the award of a scholarship of Rs. 8 to any female candidate of that district who would be willing to prosecute her studies in any medical school or college; but it appears that no one came forward to take advantage of these offers. The District Board of the 24-Pergunnahs have sanctioned the grant of scholarships of Rs. 5 each a month for two years to two female students of the Campbell Medical

Female medical education.

School—Srimati Kiron Sasi Mukherjee and Srimati Susila Debi—with effect from the 1st February 1890. Funds were provided by almost all the District Boards in the Rajshahye Division, but no advantage was taken of the opportunities offered. In Rungpore only a scholarship of Rs. 15 per month has been awarded to one Srimati Kailas Bashini Dasi, a student of the Calcutta Female Medical School, who has agreed to practise in the district when qualified. The only district in the Dacca Division where stipends or scholarships were sanctioned by the District Board is Backergunge, where two girls of Brahmo parentage were awarded scholarships of Rs. 10 a month each, tenable in the Campbell Medical School. The District Board, Mymensingh, has, with a view to encourage female medical education, created five appointments of trained nurses under the five Local Boards with a monthly salary or retaining fee of Rs. 25 each. Both Chittagong and Tipperah report that attempts were made to get female students to go to Calcutta for medical education, but no one would come forward. The offer made by the Tipperah Board was for two scholarships of Rs. 15 each, tenable at the Sealdah Campbell Medical School. The Chairman of Tipperah reports that subscriptions are being collected to form an endowment for the establishment of a lady doctor in Comillah, and it is hoped, if this is successful, that it will induce female students to qualify for service in this special branch. In Gya a system of stipends and scholarships for a supply of female native doctors and of trained nurses has been organized during the year, consisting of a midwife, four paid female apprentices, and one mehterani. The monthly expenditure on account of pay of this staff amounts to Rs. 49. The total amount of expenditure incurred during the year, including pay, contingencies, and cost of furniture, &c., was Rs. 1,514-1-9. For the encouragement of female medical candidates who attend the Cuttack Medical School, the Cuttack District Board has contributed Rs. 100, to be paid as scholarship to the most deserving female student.

The total medical expenditure amounted to Rs. 42,546, showing an increase of Rs. 16,771 compared with the previous year.

Medical.

The total expenditure incurred under this head in the whole of Bengal was only Rs. 8,756 on account of sanitary arrangements at fairs, and in some places in the excavation of

Sanitation.

wells and tanks. In Jessore Rs. 10,000, in Burdwan Rs. 5,000, in the 24-Pergunnahs Rs. 2,000, and in Khulna Rs. 2,000, were allotted for the supply of pure drinking-water, but nothing was spent. The result is no doubt of a very unsatisfactory character; but without the appointment of local agencies specially entrusted with matters relating to village sanitation and empowered to raise the necessary funds, very little improvement can be expected in this direction. A special report in which this question has been fully discussed has been submitted to the Government of India, and the whole question is now under the consideration of that Government.

The total expenditure shown under the head of famine relief amounts to Rs. 2,59,785, the greater part of which was incurred in the districts of Durbhunga (Rs. 1,69,065) and Mozufferpore (Rs. 74,289). The whole outlay was on public works.

Famine relief.

With a view to the equitable adjustment of the contribution to be made by Government and the District Boards respectively towards the famine relief expenditure in the affected areas of the Patna Division, it was decided in August 1889 to divide the expenditure into three classes, viz.—

Class I.—Ordinary district works which the District Boards would in any ordinary year have carried out in the affected area, and for which therefore they made no claim on Government for reimbursement.

Class II.—District works undertaken by the Boards as measures of relief, and to be paid for by them.

Class III.—Other relief works, whether carried out by the District Boards or by Government, the cost of which the Districts Boards were unable to bear, and gratuitous relief.

This division recognises distinctly the principle which has been laid down, that the duty of providing relief in the way of work must fall in the first place on local funds before provincial funds can be applied, and that Government should come to the assistance of District Boards only when the expenditure is

heavier than they can reasonably be expected to bear consistently with their duties in the non-affected areas, the maintenance and repairs of the ordinary district communications and the pay of the permanent establishments.

Under section 99 of the Local Self-Government Act III (B.C.) of 1885, District Boards are empowered to incur expenditure on measures for the relief of famine within such financial limits as may be prescribed by the Commissioner of the Division concerned, and the Bengal Famine Code provides that in districts to which this section of the Act has been extended, relief operations should be governed by rules to be issued under section 138. The provisions of section 99 of the Act have now been extended to all the District Boards of the province, and rules under section 138 have been prepared and issued for their guidance.

The expenditure under the head of "Civil works in charge of Public Works officers" increased by Rs. 2,66,678. It must be explained that the expression Public Works officer does not mean an officer in the Public Works Department of Government, and that the whole of the Civil works referred to were undertaken by Engineers in the employment of District Boards. The expression is used in the prescribed form of accounts in order to show separately the expenditure on public works proper from that incurred on account of ferry establishments, contingencies and refunds, which are considered to be in charge of Civil officers, and amounted in the past year to Rs. 1,10,162. The following statement compares the public works expenditure for the past three years:—

YEAR.			Original works.	Repairs.	Establishment.	Tools and plant.	Water-supply and water-works.	Drainage works.	Total.
			Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1887-88	10,72,715	16,04,900	5,20,594	30,225	4,534	...	32,32,968
1888-89	11,15,614	17,88,953	5,27,598	27,115	6,261	...	34,65,541
1889-90	11,71,942	19,43,732	5,57,345	32,893	20,960	5,347	37,32,219

Out of a total outlay of Rs. 37,32,219, no less than Rs. 2,22,924 was defrayed from grants paid to the District Boards from Provincial revenues as a contract allowance for the maintenance of provincial roads, the charge of which has by arrangement been transferred from the Public Works Department of Government to local bodies. The remainder, or Rs. 35,09,295, represents the expenditure incurred from road cess funds. This amount during the past year was exceptionally large, as a considerable outlay was debited in several districts to Civil works which might more properly have been charged against Famine Relief. A sum of Rs. 10,785 in the Bhagulpore district, of Rs. 6,445 in the 24-Pergunnahs, and of Rs. 2,000 in Purneah, appears to have been so debited. But the line which separates these heads of account is too slight to render it necessary to order any adjustment.

In the districts marginally noted a considerable expenditure was incurred on original works. The most important of these was the construction of the new Tangail road from Phulbariah to Kalihati, 26 miles in length, on which the District Board of Mymensingh spent no less than Rs. 63,000. As a rule the expenditure on original works is largest in the Patna Division and smallest in the Presidency, where the most striking feature of the figures is the small proportion of funds spent on original works compared with that spent on maintenance and establishment. Repairs were of the usual character, and do not call for remarks. The provincial roads transferred to the management of District Boards were on the whole maintained in good condition.

	Expenditure incurred on original works during the year.
	Rs.
Midnapore	31,814
Dinapore	40,303
Rungpore	60,806
Jalpigoree	59,422
Dacca	35,400
Furreedpore	27,216
Backergunge	53,366
Mymensing	1,63,639
Tipperah	30,774
Patna	96,253
Gya	57,154
Durbhunga	65,392
Mozufferpore	62,368
Saran	62,289

The total amount expended by District Boards (except Mozufferpore, for which no figures have been furnished) on the construction and repair of village roads during the year was Rs. 3,68,952.

Village roads. The railway feeder from Haripal to Bhanderbatti, a distance of about six miles in the district of Hooghly, was under construction during the year, and will, it is expected, be soon thrown open to traffic. Another feeder, about two miles in length, from the Grand Trunk Road to the railway station at Galsee, in the Burdwan district, was sanctioned, but owing to delay in land acquisition the work was not commenced.

Railway feeders. In Nuddea a small feeder from the Majergram railway station to Majergram village was constructed during the year.

The important feeder road from Gaibanda, in the Rungpore district, to Hilli station, Northern Bengal State Railway, in the Dinagpore district, was improved by the District Boards of Dinagpore, Bogra, and Rungpore.

In Dacca a railway feeder road connecting the Sripore station with Goshinga, an important market on the Lakhye river, was continued, the outlay amounting to Rs. 2,488. Rajah Rajendra Narain Rai Bahadur, of Bhowal, has given free of cost as much of his land as is required for the road.

The Monghyr District Board undertook during the last year the metalling of the following railway feeder roads:—

- (1) Dhararah to Lahota Road, which forms a feeder of the East Indian Railway station at Dhararah.
- (2) Beguserai to Garrah Road, which forms a feeder to the Tirhoot State Railway.
- (3) A portion of the Patna Road between Indupore and Burhea railway station, which will be a continuation of the Burhea feeder road.

In the district of Bhagulpore an important railway feeder was constructed to join the Rughoopur station on the Tirhoot State Railway with Simrahi and Panchpararia near the Nepal frontier. The road from Madhepura to Rughoopur is being bridged, and this will bring the subdivisional head-quarters within 25 miles of the Rughoopur station.

Tramways. Several proposals for the construction of tramways came under the consideration of District Boards during the year, but no work was actually undertaken. The Howrah-Ampta and Howrah-Sheekballa schemes, which are intended to facilitate communication between the districts of Howrah and Hooghly, are now under consideration in the Public Works Department. The Dooars Tramway line, for which the Julpigoree District Board has guaranteed Rs. 4,000 annually until the scheme returns 6 per cent. profit, has been undertaken by Messrs. Octavius Steel and Company. Negotiations were opened by the District Board of Patna with certain engineering firms for the construction of a steam tramway on the line of road between Bukhtearpore and Bohar. The construction of steam tramways on the Gya-Nowada Road in the Gya district and on the Ganges and Darjeeling Road between Purneah and Kissengunge are also under consideration.

Water communications. In many districts expenditure is incurred in the maintenance of water communications as well as roads; but the small items on which money was spent are not of sufficient importance to enumerate in detail.

The following particulars are recorded regarding the services of steam river communications which were either subsidised or undertaken by District Boards during the year.

Steam river service. The steamer service between Rampore Beaulah and Danukdea has been made a daily one, and the Rajshahye District Board increased the subsidy from Rs. 2,400 to Rs. 4,800 per year. A daily steamer service between Pubna and Kushtea was again established from the middle of June, the Pubna District Board paying a subsidy of Rs. 5,200 per year towards its maintenance. The steam ferry between Naraingunge and Munshigunge was taken over from the Traffic Department of the Eastern Bengal State Railway and managed by the District Board. The ferry was worked at a loss of Rs. 1,284, but it was

of great benefit to the public. In Backergunge the daily steamer service between Barisal and Khulna was continued, and was of great advantage to the district throughout the year. The Board paid the usual subsidy of Rs. 500 per mensem, minus certain deductions for late arrivals.

The District Board of Noakholly pays a monthly subsidy of Rs. 200 for a bi-weekly steam service with Barisal. The Tipperah Board has secured the establishment of a daily steamer service between Gouripura and Naraingunge *via* Satnal, a station on the Goalundo-Naraingunge line. During three months of the year the want of water prevents the steamer proceeding further than Daudkandi, 32 miles by road from Comillah, but two boats are engaged at a monthly cost of Rs. 30 to run between Elliotgunge, 21 miles from Comillah, and the steamer station. A similar boat arrangement has been made at the same cost between Muradnagar and the steamer station. The Board pay a monthly subsidy of Rs. 200 to Messrs. Kilburn and Company for the steam service, and receive Rs. 100 from the Postal Department for the carriage of mails between Daudkandi and Satnal. The Board also subsidised a steam service at Rs. 225 a month between Chandpore and Chandipore, but the company which undertook the work closed it after a short trial, apparently finding it unprofitable.

The average percentage of cost of establishment on the total outlay on public works during the year was 16·4. The highest percentage was in Chittagong and the lowest in Mymensingh, the figures being 28·4 and 9·1 respectively.

No loans were contracted during the year under report, but the Lieutenant-Governor has agreed to grant a loan of two lakhs to the District Board of Dinagepore and Rs. 25,000 to the Julpigoree Board for the construction of bridges on district roads, and since the close of the year has signified his intention to sanction a loan of Rs. 80,000 to the Patna District Board to complete the construction of bridges on the roads from Buktearpore to Behar and from Mosourhi to Tabhera.

The Lieutenant-Governor's opinion of the working of District Boards in Bengal was fully stated in last year's Report, and the events of the past year merely confirm the views then expressed. Their dilatoriness in dealing with accounts and bills is remarked on by several officers, and another blemish noticeable is the occasional tendency of certain Boards towards factious criticism of, and opposition to, professional authority. The Commissioner of Burdwan writes:—"The Inspector of Local Works is always willing to help and advise the District Boards, and his action in this respect is, I think, appreciated by them all except Burdwan, which seems to resent all interference as an unnecessary and covert attack upon their independence." The Furreedpore District Board is said to have given way to a spirit of "ungenerous criticism against the Engineer, an excellent officer, who ought to have been encouraged rather than thwarted." In the Purneah Board there was extreme friction at one time between the members and their District Engineer, and the interposition of Government was necessary before healthy relations could be restored. Such cases must be characterised as blots. If the members of a District Board cannot always agree with their responsible executive advisers, they should at least be willing to credit them with a single-minded desire to advance the condition of the district. But, generally speaking, Sir Steuart Bayley can say that the record of the year has been a very favourable one. Good work has again been done, and all departments show a satisfactory expansion of administration.

Marine.

LIEUTENANT E. W. PETLEY, R.N., was in charge of the Calcutta Port Office throughout the year.

The building for the Port and Shipping Offices was not completed during the past year. It is now nearly finished.

The strength of the Pilot Service at the end of the year was 60 pilots of all grades and 17 leadsmen apprentices. The number of pilots now accords with the scale which was sanctioned in the orders dated the 4th July 1888. No leadsmen apprentices were appointed during the year.

The leadsmen apprentices still occupy the two houses at Garden Reach rented by Government for their accommodation, and the premises are reported to be admirably suited for the purpose. These quarters were, as in the year before, under the management of a Mess Committee; and the Port Officer, who inspected them frequently during the year, found them to be in excellent order.

The following statement shows the number of arrivals and departures during the past two years:—

		1888-89.			1889-90.		
		Number.	Gross tonnage.	Net tonnage.	Number.	Gross tonnage.	Net tonnage.
Arrivals	...	1,037	2,245,857	1,615,935	1,038	2,250,918	1,601,153
Departures	...	1,034	2,210,444	1,608,656	1,018	2,202,819	1,570,776
Total	...	2,071	4,456,301	3,224,591	2,056	4,453,767	3,174,929

These figures are exclusive of 13 light-vessels, 13 pilot brigs, and 34 other Government vessels, 2 vessels put back, 7 steam-tugs, which are constantly moving up and down the river, and the steamers trading to the Orissa ports. Of these there were 133 arrivals and 134 departures. They do not also include the native craft.

The size and draft of steamers visiting the port still continue to increase. One hundred and forty-three steamers, drawing over 21 feet, entered the port during the year under review against 120 in the year before.

Thirty-nine cases of grounding and five of collision took place during the year against 50 and 12 in the year before. None of these casualties, however, resulted in the loss of a vessel, and in one only was serious damage done. The collisions were all accidental, but as regards the groundings, blame was attached to the pilots in ten cases. Eight of these were due to error, of judgment, one to inattention, and one to unskilfulness. The remaining cases of grounding were either accidental or unimportant, or due to alteration of channel. The percentage of casualties amounted to 2.14 against 2.99 in the year before and 2.84 in 1887-88.

The Eastern Channel and the lower part of the Gaspar have remained unaltered, but the channel between the Longsand and the Upper Gaspar light-vessels deteriorated considerably. The channel between the Longsand light-vessel and the Longsand

spit buoy has also shoaled somewhat, and there is no anchorage for deep vessels anywhere between the Lower Eastern Gasper and the Longsand spit buoys. The Eden Channel has improved, and has 17 feet of water in the best track over the bar. Seven inward-bound vessels and two outward-bound were delayed for want of sufficient water over the bars. This does not, however, take account of vessels being kept in the port for want of water over the bars during certain stages of the tides.

The new steamer *Guide*, which was built in England to take the place of the *Undaunted*, arrived towards the close of the year, and was, after being surveyed, taken over from the builders and fitted out for duty. The vessel is well fitted in every way for the service on which she is employed. The new pilot brig *Fame* arrived at the beginning of the year. Considerable expenditure had to be incurred on alterations and in rectifying defects to make her fit for the work of a pilot brig. The *Sarsuti* was thoroughly overhauled, cleaned and painted during the year, and is reported to be in good condition. The hull, rig, and equipment of the *Coleroon* were thoroughly repaired to render her efficient with the usual ordinary repairs for some years to come. A new launch for the Port Officer has been completed since the close of the year.

One hundred and twenty-four candidates were examined for colonial and local certificates of competency of various grades, of whom 88 passed. Of the successful candidates, 19 obtained colonial certificates of competency as master, 24 as first mate, 3 as only mate, 17 as second mate, 3 as first class engineer, and 6 as second class engineer. The local certificates consisted of 1 master's, 1 first mate's, 2 second mate's, 4 second class engineer's, and 44 engine-driver's. One candidate obtained a license as a steam-tug pilot, and three certificates as master were granted under the Inland Steam-vessels Act, 1884.

The licenses of two of the native pilots were renewed, 14 new permits were granted to native coasters and 6 were renewed. Five vessels were registered under the English Merchant Shipping Act of 1854, and the registry of three was cancelled.

Under the Native Passenger Ships Act, 1887, a voyage which does not last more than five days is classed as a short voyage. The number of passengers other than pilgrims to Jeddah carried to and from Bengal ports on long voyages is very small.

The short voyage trade includes the following lines:—

Calcutta and Burma direct and *via* Chittagong.
 Calcutta and Chittagong.
 Chittagong and the Burmese ports.
 Calcutta and Chandbally.
 Calcutta and Balasore.
 Calcutta and False Point.
 Calcutta and Pooree.
 Calcutta and Coast Ports.
 Calcutta and the Andamans.

Burma Trade.

The subjoined table gives the number and tonnage of the arrivals and departures, and the total number of native passengers carried:—

		Number of steamers.	Net tonnage.	Number of passengers.
Arrivals at Calcutta	...	197	217,803	35,085
Departures from Calcutta	...	186	206,740	38,982

The above figures include 12,401 passengers who arrived at Calcutta in steamers which came *via* Chittagong and the Arracan ports, and 6,527 passengers who embarked at Calcutta in such steamers. Of the 12,401 arrivals, 5,065 came from Chittagong. The figures do not include the passengers who arrived

at Calcutta in 32 steamers of one line, the owners of which were unable to furnish the information. Judging, however, from the number carried from Calcutta by the same line, the error is not very important.

Chittagong Trade.

The number and tonnage of arrivals and departures were as follows:—

	Number of steamers.	Net tonnage.
Arrivals at Chittagong ...	129	64,615
Departures from Chittagong	129	64,615

Figures are not available of the number of passengers conveyed to Chittagong. The number of passengers conveyed from there is given in the following table:—

Departures from Chittagong.	DESTINATION OF PASSENGERS.			
	Calcutta.	Rangoon.	Akyab.	Kyephu.
Number of passengers ...	5,065	8,782	11,093	40

Chandbally Trade.

The passenger traffic between Calcutta and the port of Dhumra (Chandbally and Alba) is large, and is conducted by steamers of several lines. A feature of the trade is that the steamers for Chandbally nearly always leave Calcutta on Wednesday, that day being preferred by the Hindoo passengers to any other. It would be more convenient to some classes of the community were the steamers to leave on different days, but their owners do not appear to be able to make an arrangement to bring this about. A large number of the passengers are pilgrims going to or coming from Pooree, but it is impossible to distinguish these from ordinary passengers.

An abstract of the traffic is subjoined:—

	Number of steamers.	Net tonnage.	Number of passengers.
Arrivals ...	197	53,835	68,259
Departures ...	198	53,989	66,952

Balasore Trade.

The passenger traffic between Calcutta and the port of Balasore is not large.

The subjoined figures give the number and tonnage of the arrivals and departures, and the number of passengers to and from Balasore:—

	Number of steamers.	Net tonnage.	Number of passengers.
Arrivals ...	28	5,524	429
Departures ...	29	5,732	1,295

False Point Trade.

The passenger traffic to and from the port of False Point was inconsiderable. The steamers of one line call at the port, but mostly for cargo.

The following table gives an abstract of the traffic:—

	Number of steamers.	Net tonnage.	Number of passengers.
Arrivals ...	48	71,428	138
Departures ...	48	71,428	122

Pooree Trade.

At Pooree there was only one entry, a vessel conveying pilgrims, and specially chartered for the purpose.

An abstract of the traffic is given below:—

			Number of steamers.	Net tonnage.	Number of passengers.
Arrivals	1	302	985
Departures	1	302	700

Calcutta and Coast Ports Trade.

The coast ports trade was conducted by two lines of steamers, but the passengers arriving in the steamers of one line are not included, as the figures are not available. The number of such passengers is understood to be very small. The figures here given include the passengers to and from False Point, which have been entered in a previous table:—

			Number of steamers.	Net tonnage.	Number of passengers.
Arrivals	67	97,937	1,771
Departures	51	73,771	777

Andamans Trade.

Figures are not available of the number of passengers conveyed from Port Blair. An abstract of the traffic is subjoined:—

			Number of steamers.	Net tonnage.	Number of passengers.
Arrivals at Calcutta	11	12,221	...
Departures from Calcutta for Port Blair	10	11,174	1,183

PILGRIM TRADE TO RED SEA PORTS.

The subjoined table shows the arrivals and departures of pilgrims for the year:—

			Number of steamers	Net tonnage.	Number of passengers.
Arrivals	3	5,257	1,245
Departures	2	2,750	778

One steamer which left for Jeddah in June 1889, failed to reach there in time for the pilgrims to take part in the Haj, and the pilgrims are reported to have undergone much suffering owing to the inability of the owners of the vessel to fulfil their contract. Orders have been issued to the port officials and the police to protect pilgrims from imposition of this kind in future.

The working of the Act in the case of vessels making so-called short voyages, that is, voyages not extending over five days, continues to be unsatisfactory in regard to the overcrowding which can take place without exceeding the limits laid down in the Act and rules. The subject is now under the consideration of the Government.

Dr. Richards was the Health Officer of the Port of Calcutta from the beginning of the year up to the 14th September, when he took leave. Shortly afterwards he died. He was relieved by Dr. G. Jameson, who acted until the 11th November, when he made over charge to Dr. R. MacLeod.

One thousand four hundred and forty-three vessels were inspected during the year against 1,464 in 1888. The reduction in the number of vessels inspected is unimportant.

Dr. Richards brought to notice that many steamers arrived in the port which had unsuitable and ill-ventilated accommodation for their crews, and the Health Officer was asked to furnish instances of such ships, with a view to the Board of Trade being furnished with information on the subject. When

the required information was received, the owners of the vessels not ordinarily trading to the United Kingdom were addressed on the subject, and they have undertaken to improve the ventilation of the crew spaces. Particulars regarding vessels trading to the United Kingdom have been communicated to the Government of India for transmission to the Board of Trade.

The number of European seamen who arrived in port fell from 22,705 in 1888 to 20,662 in the year under report, but the daily average population was 1,626 against 1,510 in 1888. Including deaths out of hospital, the death-rates per mille of the last five years were as follows :—

Sickness and mortality among European seamen

				Cholera.	Other causes.	Total.
1885	4.72	25.99	30.71
1886	11.61	33.53	45.14
1887	10.03	16.91	26.94
1888	10.59	27.15	37.74
1889	11.07	20.29	31.36

The following table shows the number of admissions into hospital and deaths from different diseases during the past five years :—

		1885.		1886.		1887.		1888.		1889.	
		Admissions.	Deaths.	Admissions.	Deaths.	Admissions.	Deaths.	Admissions.	Deaths.	Admissions.	Deaths.
Cholera	...	16	7	49	26	29	19	26	15	33	17
Diarrhoea	...	102	...	185	...	116	1	106	2	112	2
Dysentery	...	116	6	106	3	70	...	34	4	61	4
Fever, enteric	...	4	1	12	4	8	2	2	...	1	...
„ malarious	...	194	2	321	3	220	1	120	1	227	2
„ simple	...	344	...	155	...	65	...	82	1	79	...
Scurvy	...	13	...	7	...	4	...	3
Small-pox	...	3	1	...	1
Sunstroke	...	5	3	4	1	5	1	19	5	6	1
Other diseases	...	1,179	12	1,875	31	1,201	11	1,182	21	1,267	17
Total	...	1,976	40	2,714	71	1,719	35	1,575	49	1,816	43

The total number of casualties from all causes was 51 against 57 in 1888. Of these, 43 occurred in hospitals and 8 elsewhere. As regards the cases in hospitals, it is satisfactory to notice that the death-rate fell from 32.4 per mille in the previous year to 26.4 during the year under report, which is nearly equal to the quinquennial mean (26).

The death-rate from cholera was slightly lower than the average of the previous five years. As regards the seasonal incidence of this disease, it may be observed that the rise in the port did not always correspond with that in the town.

The Health Officer having brought to notice that timely information is not always given to him by the Hospital authorities of the occurrence of cholera on boardships, with a view to enable him to inspect them early, the Inspector-General of Civil Hospitals has been asked to instruct the Superintendents of the Medical College, General, Howrah, Campbell, and Mayo Hospitals, to convey to the Health Officer early information of cases of cholera, small-pox, or other contagious diseases common in India, and of scurvy occurring amongst sailors. Rules have also been made which will enable the Health Officer to get information of such diseases occurring on board direct from the shipping.

There were no admissions from small-pox during the year, and no death has been reported from this disease since 1881.

There were no admissions also from scurvy during the year, against 3, 4, 7, and 13 in 1888, 1887, 1886, and 1885, respectively.

Six cases of sunstroke were admitted into hospital, with 1 death, against 19 admissions with 5 deaths in hospital and 3 deaths out of hospital in 1888. Three deaths from this disease are reported to have occurred on boardships in port.

There was no death either from acute alcoholism or *delirium tremens*.

Fifteen deaths are reported to have occurred from drowning against 6 in 1888. The late Dr. Richards suggested that death from this cause might to a certain extent be prevented by putting up hand-rails on each side of the landing-stages. It was ascertained that none of the accidents in 1888 happened from off the jetty gangways, and no action was taken in the matter. The Health Officer, who was instructed to report the causes, so far as they can be ascertained, of the 15 accidents which occurred in 1889, has reported that in five of these cases drunkenness was known to have been the cause of the accident, while in a sixth it was the probable cause; in four instances the men were drowned by falling from what appear to have been insecure stages when scraping or painting the ship's hull; one man met his death while bathing, one by falling overboard at night, one in an ineffectual attempt to save the life of a drowning shipmate, and two when leaving or getting on board their ships. The majority of these accidents could not have been prevented by any precaution that it would be possible to take, but measures are under consideration for securing the safety of men employed on painting and scraping the hulls of vessels.

Although the number of European seamen admitted into hospital on account of venereal disease in 1889 was greater than in the previous year, the rate per mille on the average strength was lower than that of the past three years, and it compares favourably with the quinquennial mean.

Deaths at sea.

At sea there were 36 deaths against 35 during the previous year.

The following table shows the mortality from all causes among the native floating population, the averages being calculated on a population of 25,000 :—

Sickness and mortality among the native floating population.

		Total deaths.		Ratio per mille.	
		1889.	1888.	1889.	1888.
Cholera	...	80	95	3·2	3·7
Bowel-complaints	...	9	7	·36	·27
Fever, malarious	...	5	22	·2	·85
Do., simple	...	8		·32	
Other causes	...	27	24	1·08	·96
Total	...	129	148	5·16	5·78

The figures, however, as stated last year, are not very reliable.

The total death-rate among the lascar crews on the river was 1·29 per 1,000 against 1·6 per 1,000 in 1888. No complaints were made by the lascar crews during the year.

Lascar crews.

Four ships arrived in port with pilgrims from Jeddah, in one of which there were two cases of small-pox. In the annual report for the year 1887, the Health Officer of the Port

Pilgrims.

made certain proposals with a view to ensure the more efficient sanitary treatment of vessels arriving in port with cases of small-pox. It has been decided that it must be left to the captains and officers of ships to assist the Health Officer in carrying out the provisions of the Compulsory Vaccination Act.

Water-supply.

No complaint was made in regard to the water-supply to the shipping during the year.

There has been a general improvement in the conservancy of the foreshore of the river, some of the nuisances formerly complained of having been removed. Although the drain

Conservancy. Sanitary defects.

at King's Road, Howrah, still discharges into the river, yet it is more free from pollution than it formerly was, as measures have been taken by the Municipal Commissioners of Howrah to prevent offensive matter being thrown into the drain till the proposed scheme for draining the whole town is carried out. The nuisance at the jetties, which was formerly a subject of complaint, has been removed by providing an additional latrine within the jetty enclosure. The flushing inlets have also been free from offensive smell during the year.

The highly objectionable outflow of liquid sewage from Fort William has received the attention of the Sanitary Commissioner, and it is hoped that permanent good will result. A scheme for connecting the sewers of Fort William with those of the town has been prepared, and the Government of India has been asked to have it carried out.

The defects noticed in the previous year's report, regarding the state of Kassi Mitter's burning ghât, have been remedied by raising a wall on the river-side, thus preventing the cremation of bodies being seen from the river.

There was a decrease in the number of corpses found in the river, but the number of carcasses is still on the increase. Further steps have been taken to mitigate this nuisance.

Corpses and carcasses floating in the river.

There was during the year a general increase in the operations of the Calcutta Shipping Office.

Financial results.

The receipts amounted to Rs. 29,157, and were higher than those of any of the previous nine years. The expenditure amounted to Rs. 21,471 against Rs. 20,700 in the preceding year. The increase in the receipts was mainly under the heads "Shipping fees" and "Discharging fees," and was due principally to an increase in the number of native seamen shipped and discharged during the year. There was a net increase of Rs. 771 in the charges, due chiefly to a fresh supply of agreement and account forms having been printed during the year.

The receipts of the funds held in trust by the Calcutta Shipping Office on account of European and native seamen were considerably in excess of those of the previous year, the total being Rs. 60,018 against Rs. 47,736 in 1888-89. The receipts on account of deposit-money of British seamen exceeded those of the previous year by Rs. 7,892-6-8. The increase is due to the practice adopted by the Shipping Office, during certain months when the number of unemployed seamen is large, of requiring each seaman at the time of his discharge to deposit a portion of his wages as security against his falling into distress.

The numbers of the seamen shipped and discharged through the Shipping Office were considerably in excess of those of the previous year. The figures compare as follows:—

Seamen shipped and discharged.

			1888-89.	1889-90.	Increase.
Shipped	14,772	16,932	2,160
Discharged	13,073	15,592	2,519

The increase is most prominent in the case of Indian seamen shipped and discharged, owing, it is said, to the employment of lascars by some of the regular lines of steamers which had previously carried European crews.

The number of desertions rose from 132 in 1888-89 to 252 during the year under review. The increase is attributed to the fact that the higher wages that prevailed during the last quarter of the year induced men who had only small sums due to them to leave their ships for re-engagement on higher wages.

Desertions.

The amount remitted home by seamen's money-orders rose from £395 in 1888-89 to £926 during the year under review. This increase, it is stated, was due to the issue of some individual orders of heavy amounts during the latter part of the year, and to the change in the law requiring payment of seamen's wages to be made at the current rate of exchange.

Remittances by seamen.

The practice of inducing seamen to sign agreements stipulating that in the event of their being discharged abroad their wages should be paid at a fixed rate of exchange has been put a stop to by section 4 of the Statute 52

Payment of seamen's wages at a fixed rate of exchange.

and 53 Vic., Chapter 16. The law now requires that, notwithstanding anything entered in the agreement, the payment of seamen's wages shall be made at the rate of exchange for the time being current at the place where the payment is made, when the payment is made in any currency other than that stated in the agreement. The Chamber of Commerce having suggested to the Government that it would be equitable both to seamen and ship-owners if the rate of exchange advertised weekly by Marine Insurance Offices were adopted for the payment of wages of seamen at Calcutta, the Government of India has decided that at the larger ports, where it is possible to ascertain the exact rate, the market rate of exchange should be taken, the rate of the day on which the mail leaves being taken as the rate for the ensuing week, and that at the smaller ports, where the market rate is not readily ascertainable, payments should be made at the official rate fixed for the adjustment of all financial transactions between the British and Indian Governments.

Great care is now taken by the authorities of the Shipping Office to protect seamen from imposition. In four cases the masters of vessels were made to pay back money improperly obtained from those serving under them, and it is hoped that these cases will serve as a warning to others and put a check on such discreditable practices.

The receipts of the Chittagong Shipping Office amounted to Rs. 537 against Rs. 289 in 1889. The increase was due to the discharge of a larger number of seamen than in the year before, owing to casualties to ships necessitating the discharge of their crews. The receipts on account of the funds held in trust, including the balance at the close of 1888-89, amounted to Rs. 12,626, and the total amount paid was Rs. 12,277. The numbers of the seamen shipped and discharged were 39 and 152 against 62 and 89 in the year before.

Two seamen were discharged at False Point and four shipped during the year. At Balasore one seaman was discharged, but none were shipped. No seamen were shipped or discharged at Pooree.

Excluding the advances made to the Commissioners of the Port of Calcutta by the Government in respect of the Kidderpore Dock Works, the gross debt of the Commissioners on the 31st of March 1890 amounted to Rs. 1,20,36,401, distributed as follows:—

						Rs.
Consolidated debt due to the Government	42,71,401
Port debt not repayable	17,65,000
4½ per cent. debenture loan of 1881	10,00,000
4½ ditto ditto of 1883	20,00,000
5½ ditto ditto of 1886	30,00,000
Total	1,20,36,401

The debt due to Government was reduced during the year by Rs. 1,29,534, and for the repayment of the debenture loans a sum of Rs. 1,24,000 was set aside, making the total amount at credit of the sinking fund account on the 31st of March 1890 Rs. 6,51,000.

The cost of the works constructed or acquired by the Commissioners, and the sources from which the expenditure has been met, are shown in the subjoined table:—

Cost of works constructed or acquired by the Commissioners.				Sources from which the expenditure has been met.			
		Rs.				Rs.	
Expenditure on jetties and appliances for sea-going vessels to the end of March 1890	...	83,42,943		By loan from Government (repayable)	...	60,25,100	
Expenditure on inland vessels' wharves, landing stages, tramway, &c., on the Calcutta bank of the river	...	61,89,543		By loan from Government (not repayable)	...	17,65,000	
Expenditure on inland vessels' wharves, landing stages, tramway, &c., on the Howrah bank of the river	...	16,20,605		By loan on 4½ per cent. debentures of 1881	...	10,00,000	
Expenditure on dock for docking and repairing vessels, &c.	...	5,25,484		By loan on 4½ per cent. debentures of 1883	...	20,00,000	
Expenditure on moorings, anchor-vessels, Harbour Master's boats, light-ships, survey vessels, &c.	...	38,21,321		By loan on 5½ per cent. debentures of 1886	...	30,00,000	
Expenditure on reserve funds	...			Contribution from Government towards purchase of land for new river-side road	...	74,584	
Jetties Reserve Fund	...	99,244		Contribution from Government for landing stage at Prinsep's Ghât...	...	10,000	
Jetty Insurance Fund	...	50,000		Contribution from Government for Port approaches' block	...	7,19,203	
Port Reserve Fund	...	3,64,250		From sale of surplus land	...	4,09,367	
Port Depreciation Fund	...	1,99,995		From revenue derived from works since formation of Trust	...	69,11,131	
Port Approaches Depreciation Fund	...	50,000					
Debenture Loan Sinking Fund...	...	6,51,000					
Total	...	2,19,14,385		Total	...	2,19,14,385	

On the 31st of March 1890 the advances received from the Government on account of the Kidderpore Dock Works amounted to Rs. 1,73,39,038. On the same date the expenditure on these works had reached Rs. 1,70,65,321. Towards the close of the year the Government received from the Commissioners a revised estimate of the cost of constructing the Tidal Basin and Dock No. 1. This estimate amounted to Rs. 2,53,38,737, and it has been raised by the Government of India to Rs. 2,64,01,605 on the assumption that the Docks will not be completed and earning revenue until the commencement of 1892-93. The accidents which have recently happened on the works will necessitate additional expenditure, but it is hoped that the Docks will be completed before the end of next year, and that the total expenditure will not exceed the estimate as revised by the Government of India.

In February 1890 the Government appointed a Committee to consider and advise on the arrangements to be adopted for the working of goods traffic into and out of Calcutta after the completion of the Kidderpore Docks. Owing, however, to the inability of the Port Commissioners to furnish information asked for by the Committee, the enquiry could not be completed before the close of the year.

The year 1889-90 opened with a balance of Rs. 2,86,308. The receipts during the year amounted to Rs. 26,82,730. The expenditure of the year amounted to Rs. 25,90,391, including Rs. 2,24,689 credited to the sinking funds and Rs. 96,276 spent on new works. The year closed with a credit balance of Rs. 3,78,647.

The receipts on capital account during the year amounted to Rs. 1,89,000, including an opening balance of Rs. 14,883 and the sum of Rs. 96,276 contributed from revenue, the balance having been taken from depreciation funds. The expenditure amounted to Rs. 1,83,302, leaving a closing balance of Rs. 5,698.

The receipts at the jetties amounted to Rs. 11,73,907, being Rs. 33,977 over those of the previous year; but the increase of revenue was derived entirely from the petroleum wharf, where the receipts amounted to Rs. 1,58,940. There was a considerable falling off in the receipts from exports, which were less than those realized in any year since 1881-82. The jetties were not worked at their full power. In 1887-88 the number of vessels berthed was 232, and the average length of their stay at the jetties was 9.9 days. Last year only 203 vessels were berthed, and they occupied the jetties on an average for 10 days each.

The total quantity of tea brought into Calcutta during the year was 101 million pounds, of which 30 million pounds passed through the tea warehouse built by the Commissioners. The receipts from the warehouse amounted to Rs. 76,455, including a sum of Rs. 17,542 which was realized by letting out the ground-floor for storing piece-goods and grain. The tea warehouse, which, excluding the value of the site on which it stands, cost Rs. 8,51,010, has not yet become a financial success.

In the Harbour Master's Department, although the number of vessels which came to the port was less than in the previous year, the receipts from mooring hire show an increase of Rs. 17,931. This increase is due to the fact that many sailing vessels made long stays in port with the object of getting better freights.

The receipts from the tramways amounted to Rs. 3,02,022, against Rs. 3,26,697 in the previous year, showing a falling off of Rs. 24,675. On the other hand, there was an increase of Rs. 5,846 in expenditure, which amounted to Rs. 1,99,442, against Rs. 1,93,596 in the previous year. After providing Rs. 50,354 for interest on the capital expenditure incurred on the tramway, the net revenue derived by the Commissioners from this source amounted to Rs. 1,02,580, against Rs. 1,33,101 in the previous year. The falling off in the gross receipts was due to the decline in the export of grain and pulses.

The expenditure of the year on surveying, buoying, and lighting the approaches to the port amounted to Rs. 4,98,424. The average annual expenditure on this account during the past five years has been Rs. 4,93,558.

The imports of petroleum have increased. Last year 3,726,670 cases were imported as compared with 2,380,652 cases in the previous year. The Batoum oil, of which 534,880 cases were imported in 1888-89, does not appear to have found favour with consumers. Some of this oil which was imported in January 1889 still remained at the depôt on the 31st of March 1890. There were no imports of Batoum oil in 1889-90.

Petroleum trade.

There were nine accidents to vessels in charge of Assistant Harbour Masters, for seven of which the officers concerned were more or less to blame. None of the accidents caused very serious damage, and the result of the year's working compares favourably with that of the previous year.

Casualties.

Rules under the Explosives Act.

Since the close of the year special rules for the Port of Calcutta have been made under the Explosives Act, 1884.

Surveys and inspections.

The total number of surveys made by the Engineer and Shipwright Surveyor, including surveys of vessels belonging to the Commissioners, was 254, of which 229 were surveys of vessels and 25 of boilers and condensers on emigrant vessels. The fees levied in respect of these surveys did not cover the expenses incurred in making them. Since the close of the year the Commissioners have been relieved of the duties connected with the survey of vessels under the several Acts relating to merchant shipping, and a revised scale of fees has been adopted which is calculated to cover the expenses of making the surveys.

During the year 5,886 cargo-boats and 1,532 passenger-boats were surveyed and licensed, the total amount realized being Rs. 29,731, including Rs. 6,957 from fines for breaches of port rules.

No changes of any great importance occurred in the river channels during the year. The establishment maintained for the survey of the river carried out its duties efficiently.

River channels.

All the light-houses and light-vessels on the coast of Bengal were inspected towards the close of the year by the Engineer appointed by the Government of India to inspect and report on all Indian light-houses. The lights of the approaches to the Port of Calcutta require some small alterations, but are generally efficient.

Light-houses and light-vessels.

The Calcutta Port Act, 1890, consolidating the several Acts relating to the Port Trust, came into force on the 1st day of June 1890. Under it the Commission is composed of a Chairman, Vice-Chairman, and five Commissioners who are appointed by the Government, five Commissioners elected by the Bengal Chamber of Commerce, one by the Calcutta Trades' Association, one by the Commissioners of the Town of Calcutta, and one by such body as the Government may select as best representing the interests of the native mercantile community. The Bengal National Chamber of Commerce has been recognized as the body best representing those interests.

Consolidation of Calcutta Port Trust Acts.

During the year the Commissioners submitted, at the request of the Government, a draft of revised port rules under the Indian Ports Act, 1890. A legal difficulty has arisen affecting some of the most important of the rules, and they are still under consideration.

Port rules.

The rice trade of the port of Chittagong, a somewhat fluctuating one, again fell off during the year under review, owing, it is stated, to the exportation to Central Bengal and to Lushai of the rice produced in the northern districts of the Chittagong Division; but the loss was more than compensated by a considerable increase both in the quantity and the value of the jute exported, and the results of the year were, on the whole, satisfactory.

Port of Chittagong.

Chittagong Port Trust.

Although a Port Trust was constituted in 1887-88, the Chittagong Port Commissioners' Act, 1887, not having been brought into operation, the Trust had no legal status, and the appointments and elections were subsequently cancelled. The law came into force from the 25th April 1888, and in June of that year a Trust was lawfully established. The entire management of the Port and of the Port Fund

was not, however, made over to the Commissioners until the 1st April 1889, and the year under review is the first in which the Act has been in full operation.

The management of the Pilot Service at Chittagong was transferred to the Commissioners during the year, with a contribution of Rs. 1,000 per annum to their revenues to meet the charges which will be incurred by them on clerical establishment, &c., in connection therewith.

Pilot Service.

Permission was given to the Commissioners to deal with moveable property up to the value of Rs. 1,000. Since the close of the year rules have been made under sections 17 and 45 of Act IV (B.C.) of 1887 (the Chittagong Port Commissioners' Act), and the scale of charges prepared under section 33 and the bye-laws made under section 64 of the Act have been approved. New rules under section 6 of the Indian Ports Act, 1889, have also been made for the port.

Port rules.

The purchase of a steam-tug for the port was sanctioned during the year, and the Commissioners are now making arrangements for procuring the vessel. The cost of the tug will be advanced to the Commissioners by the Government.

Steam-tug.

The financial position of the Port Trust is satisfactory. The Port Fund opened on the 1st April 1889 with a credit balance of Rs. 67,958, being the sum made over to the Commissioners of the Port by the Accountant-General, Bengal; and it closed with a balance of Rs. 90,197 on the 31st March 1890. These figures are exclusive of a sum of Rs. 20,200 invested in Government securities. The receipts for the year amounted to Rs. 56,218, and the charges to Rs. 33,979.

Financial condition of the Port Trust.

The following statement shows the number and net tonnage of vessels which visited the port during the year as compared with the figures of the preceding year:—

Shipping.

		1889-90.		1888-89.	
		Number.	Tonnage.	Number.	Tonnage.
European vessels trading with Foreign ports.	{ Entered	39	60,701	41	55,774
	{ Cleared	37	59,365	44	59,055
Native craft trading with Foreign ports	{ Entered	4	808	4	814
	{ Cleared	4	701	6	949
Vessels trading with Home ports	{ Entered	982	176,550	845	165,318
	{ Cleared	983	180,053	836	165,495

The number of vessels engaged in the foreign trade fell off by 11, but their tonnage exceeded that of the previous year by 4,373 tons. The decrease in the number of vessels is attributed to the decline in the grain exports, while the increase of tonnage is due to the employment of larger vessels in the jute trade.

Of the 41 sea-going vessels which cleared for foreign ports during the year, the destination of 25 was the United Kingdom, of 3 the Mauritius, of 4 the Maldives, of 8 the United States, and of 1 Trinidad. Those for the United Kingdom and the United States carried jute; the remaining 8 rice. The number of vessels that cleared with rice in the preceding year was 22.

The increase in the number and tonnage of vessels entering the port from Home ports is due chiefly to Chittagong and other native vessels engaged in the jute trade making more frequent trips between Chittagong and Naraingunge in tow of steamers belonging to the jute exporters. There was a decrease in the tonnage of steamers, although their number was in excess of that of the previous year. This was owing to the British India Steam Navigation Company having run bi-weekly steamers of small tonnage for several months of the year.

The subjoined table gives the statistics of the principal articles of export and import for the past eight years :—

Trade.

	1882-83.		1883-84.		1884-85.		1885-86.		1886-87.		1887-88.		1888-89.		1889-90.

* These figures represent the quantity exported to Foreign ports.

The importation of mineral oil, which fell off during 1888-89, made a considerable advance during the year under review, and there was an increase of Rs. 1,84,007 in the value of the oil imported as compared with the figures of the previous year. The falling off of Rs. 1,32,693 in the value of salt imported during the year is attributed to the unusually large importation of the year before.

The health of the shipping in the port was not so good as in the year before. There were 73 admissions into the hospital, against 28 in the preceding year, and the number of deaths was 6, against 2 in 1888-89.

With a view to provide proper medical attendance and sufficient hospital accommodation for the shipping at the port, the levy of hospital port dues at the rate of one anna per ton on all ships manned by European crews has been sanctioned under section 49 of Act X of 1889 (the Indian Ports Act), with effect from the 1st April 1890.

There were four wrecks during the year against two in 1888-89. Three of these were brigs wrecked in the Megna river on the voyage from Naraingunge to Chittagong. Their jute cargoes were totally lost. The fourth wreck was that of a brig bound to Chittagong with a cargo of planks. It occurred to the south-west of Kutubdia. The vessel and her cargo were lost, but the crew was saved. Two fires occurred in the port on vessels laden with jute, one of which was totally lost.

The barque *Grosvenor*, which grounded on the D'Après shoal near Chittagong, and was given up as lost, was found drifting about near the mouth of the Shabazpore river. The wreck has since been salvaged, the vessel and her cargo having suffered little damage.

The lights at Kutubdia and Norman's Point are both inefficient, and it is hoped that new lights will be provided at both places before the close of the current year.

The Pilotage Fund is in deficit. The year under review opened with a debit balance of Rs. 2,938, and it closed with a similar balance of Rs. 4,970. The receipts during the year amounted to Rs. 12,137, and the charges to Rs. 14,170.

The subjoined table exhibits the shipping trade and income of the Orissa ports during the past two years :—

NAME OF PORT.	Year.	ENTREED.		CLEARED.		Value of imports.	Value of exports.	Port dues.
		Vessels.	Tonnage.	Vessels.	Tonnage.			
False Point ... {	1888-89	36	42,967	43	48,895	Rs. 39,558	Rs. 9,73,283	Rs. 3,694
	1889-90	62	82,834	68	82,709	1,01,652	16,78,647	5,135
Pooree ... {	1888-89	10	13,169	10	13,169	398	62,013	221
	1889-90	19	20,475	19	20,475	2,139	2,21,362	294
Balasore ... {	1888-89	316	89,344	350	88,706	58,42,090*	44,11,538	4,375
	1889-90	314	69,466	313	69,057	60,50,496	40,84,335	2,689

* Includes Rs. 4,689 on account of kerosene oil landed from the wrecked ship *Continental*.

In the arrivals at False Point there was an increase of 24 steamers with a tonnage of 38,462, and of two sailing vessels with a tonnage of 1,405, or a total of 26 vessels with a tonnage of 39,867 tons. In the departures there was an increase of 24 steamers with a tonnage of 38,062 tons, and of 1 sailing vessel; but the tonnage of the latter fell off by 4,248 tons. The increase in the exports was owing to the increased exports of rice. The British India Steam Navigation Company's weekly steamers from Calcutta to Bombay, which called regularly at that port, carried kerosine oil and other articles, and to this is attributed the improvement in imports.

At Pooree there was a considerable increase both in the exports and imports during the year, notably in the former, which showed an improvement of Rs. 1,59,790 over the result of the previous year.

The receipts from port dues at the Balasore Ports fell off by Rs. 1,685-14-3 owing to the levy of the dues once in 60 days, in accordance with the provisions of the Indian Ports Act, 1889, instead of once in thirty days as before.

Balasore, including Dhamra
(Chandbally) and minor ports.

The number and tonnage of steamers that entered and cleared during the year fell off by 95 and 48,216 respectively; but the number of sailing vessels rose by 26 and their tonnage by 8,637. The decline in the steam tonnage is attributed to the dullness of the coasting trade, and the increase in the number of sailing vessels to increased exports of rice to foreign ports.

IV.—PRODUCTION AND DISTRIBUTION.

Meteorology.

THE system of work commenced in 1889 has been maintained, and as the changes and improvements then carried out were very thorough, the work of the department has gone on smoothly throughout the year 1889-90, and no change of any sort has been required.

Working of the Meteorological Department.

As mentioned in last year's report, the observatory at Tezapore in Assam had not been working satisfactorily for some time past, and it was decided to close it. On the other hand, a new observatory was opened at Mozufferpore, chiefly for the benefit of the indigo-planting community.

The number of observatories in Bengal and Assam during the year were—

- Observatories.
- 1 First class observatory at Alipore under the direct control of the Meteorological Reporter to the Government of India.
 - 15 Second class observatories.
 - 35 Third class observatories.
 - 10 Additional observatories reporting for the storm-warning service only.

Returns were also received from four voluntary observatories, viz., Tura, Demagiri, Shortt's Island, and Lungleh. The last two stations commenced observations from 1st April and 9th July, 1889, respectively.

There were also 258 rain-recording stations, which generally despatched their daily returns of rainfall with great regularity.

Of the 15 second class and 35 third class observatories under the control of the Bengal Meteorological Department, the following only were inspected during the year:—

Inspection of observatories.

Second class observatories.

Burdwan.
Darjeeling.
Dhubri.
Durbhunga.
Hazareebagh.
Patna.

Third class observatories.

Bankoora.
Bhagulpore.
Gya.
Julpiguri.
Motihari.
Purneah.
Rungpore.

The observatories at Bankoora, Bhagulpore, Burdwan, Durbhunga, Gya, Hazareebagh, Motihari, and Patna were found in a satisfactory condition, and nearly all the instruments were kept in good order. At Darjeeling the instruments were found somewhat defective, but were put right as far as possible. At Chupra the observer was very careless and kept the instruments out of order. Arrangements were made to transfer this observatory from the Public Works to the Telegraph Department. There was a change of observers at Dhubri, Julpiguri, and Rungpore, and an officer of the Meteorological Department was sent to instruct those men in setting and reading the instruments. The observatory at Purneah was not in good order in several important particulars.

The storm-signal service has maintained a state of high efficiency, as is shown by the accuracy with which the movement of storms is followed in the Bay. With a view to obtaining daily meteorological observations from the pilot brigs cruising at the Sandheads, a special code was devised by means of which the observations taken in the brigs could be reported by a single hoist of four flags in passing Saugor Island Lighthouse.

Storm-signal service.

During the year storm-signals were hoisted seven times on the Bengal and Orissa coasts, viz., on 9th and 26th June, 15th July, 17th September, 7th and 26th October, and 19th November.

Last year, on the representation of the Madras Port authorities, the Calcutta Meteorological Office has been entrusted with the duty of giving daily information, as to the weather passing over the Bay, to the Port Officer of Madras.

The various regular reports of the department were issued throughout the year. A special report was prepared giving a full account of the cyclonic storm in the Bay, of 21st to 28th August, 1888, and published as "Cyclone Memoir, Part II."

The meteorological conditions of the year in Bengal are usually considered by dividing the year into four periods, viz., (1) the cold weather season, or the months of January and February; (2) the hot weather period, consisting roughly of the months of March, April and May; (3) the south-west monsoon period, lasting from about the end of May or early in June till about the end of October; and (4) the two north-east monsoon or cold-weather months of November and December.

During the greater part of January, weather was of the ordinary character, the chief peculiarities being rather high pressure in the east and north, temperature variable, but giving in the mean an excess of over 2°, and a larger amount than usual of humidity and cloud. There were three occasions of unsettled weather, lasting in each case for one or two days; the one at the end of the month being the most important of the three. The first case was when a small depression, moving along the foot of the Himalayas on the 13th and 14th, gave general rain to all districts except Orissa and South-West Bengal. The second commenced on the 25th, a small depression entering Bengal from Central India and rapidly crossing to the east, after which weather remained settled till the 30th, when two depressions—one from Northern India and the other from Central India—simultaneously approached Bengal. Rain fell in all districts on the 30th and 31st; but as the depression again passed rapidly over the province, settled weather recommenced on the 1st of February, except that a few showers fell on that day in South-West and East Bengal.

In consequence of the disturbance at the end of January, very cool weather prevailed during the first day or two of February, and a steady north-westerly current continued till the 7th, when a slight depression caused southerly winds in Lower Bengal, without otherwise affecting prevailing conditions. A more serious disturbance commenced on the 11th, when a small depression moved over Bengal from Central India, causing general rain on that day in Behar, and in all other districts on the 12th, when its centre was over East Bengal. During these days temperature was high, but it fell shortly afterwards, and normal weather began, and continued till a third depression formed in Behar on the 17th, after which unsettled weather prevailed till the 20th, and in East Bengal till the 21st. Almost general rain fell in the southern districts on the 19th and 20th, and more scattered showers in the west and north. During this month pressure and temperature were both above the normal, the latter being subject to rather large variations. Rainfall was also above the normal except in East Bengal, while humidity was above and cloud proportion below the normal.

During March there was a larger proportion of fine weather than usual, the only cases of unsettled conditions occurring in the early part of the month, when almost general rain fell, and between the 13th and 23rd, when more or less scattered showers fell in all districts excepting Chutiá Nagpur. The disturbance at the beginning of the month was due to a depression which appeared in Chutiá Nagpur and the adjacent districts of Central India and the North-West Provinces. It moved in an easterly direction, rain falling in Behar and Chutiá Nagpur on the 1st, and in the other districts, with the exception of Orissa and the greater part of North Bengal, on the 2nd and 3rd. Fine dry weather then prevailed till the 13th, when scattered showers fell in Orissa and South-West Bengal, and continued in the other districts except Behar till the 23rd; but throughout rainfall was very local. The storms were most numerous about the 20th, when, commencing in Chutiá Nagpur, they were reported from stations along the western portion of

South-West Bengal, South Bengal and Chittagong, some of the storms being very severe. One of these occurred at Hazaribagh, about 7-30 P.M. on the 20th, and at intervals after this storms were heard of at stations between it and Saugor Island, at Raneegunge at 10-30 P.M., at Calcutta at 8 A.M. on the 21st, and Saugor Island between 10 and 11. It is of course impossible to state with certainty that this was a single storm, but from the intervals elapsing between the reports, and the fact that these intervals are roughly in proportion to the distances between the stations, there most probably was some sort of continuity in the weather conditions throughout, but not necessarily the same severity. These slightly disturbed conditions continued up to the 23rd, when ordinary hot weather again set in and continued till the 27th, when, owing to large barometric changes, a rather deep depression formed in North Bengal, stormy weather prevailed in the hill districts, and a gale of wind was reported from Darjeeling; but beyond cloudy skies at many of the stations in the plains, the influence on the general weather was very slight. The chief peculiarities noticed in the weather of this month are—high mean pressure, nearly a twentieth of an inch in excess; high temperature, especially on the western side of the province; humidity and cloud proportion both above the average, but rainfall everywhere very deficient.

Weather similar to what has been described for March prevailed in the early part of April in all districts, and in Behar throughout the month, being very dry with high temperature and pressure. Pressure fell at the end of the first week, and thunder-storms were general from the 9th to the 11th in all districts except Orissa, North Bengal and Behar. After that till the end of the month local showers occurred almost every day in East Bengal and the adjacent part of North Bengal; but as the showers were frequently light and generally very scattered, the average fall in these parts was more than half an inch below the normal. After the 11th practically no rain fell in Chutiá Nagpur. The thunder-storms were usually not severe, one exception being that which occurred in Rajshahy district on the 15th, when the wind blew almost with tornado violence. The rainfall in North Behar for the month was only 4 per cent. of the normal, in South Behar about 15 per cent., and in Orissa 35 per cent. In all the other districts there was a large deficiency, except in Chutiá Nagpur, where there was a slight excess owing to the heavy rain that fell between the 9th and 11th.

In May, as during the two preceding months, rainfall was deficient and temperature high, while pressure was practically normal, the slight excess not exceeding .01 inch. At the commencement of the month, ordinary hot weather prevailed with very high temperature, and, with the exception of scattered showers in parts of South-West, East and North Bengal, very dry weather was general till towards the middle of the month, when owing to a feeble barometric depression which formed over the west of the province and caused cyclonic circulation of winds, unsettled weather commenced. From the 14th to the 17th general rain fell, thunder-storms occurring in all districts except Behar and Chutiá Nagpur. Normal hot-weather conditions then recommenced, but lasted only till the 21st, when a series of irregular barometric changes was followed by local storms and rain in all districts. Scattered showers went on till nearly the end of the month, but the falls were as a rule very light. In the western districts the last three days were fine, and in South-West Bengal the last two, while in East and North Bengal the showers, though more scattered, fell till the end.

The weather during these five months has been peculiar because of the numerous cold weather storms and heavy rain during the first two, and the very dry hot weather, with deficient rain, which has prevailed throughout the last three.

At the end of May hot dry weather had set in, except in the north and east, where showers continued to fall. These conditions went on till the 8th in the western districts, and there were three fairly dry days in East Bengal, but in North Bengal and the northern part of East Bengal rain was becoming more heavy and general. The course of the monsoon current up the Bay had been indicated during the latter half of May by the strong winds and squally weather in the south-west and by the formation of a small storm near the Andamans, the depression afterwards passing through the Gulf

South-west monsoon period—
June to October and part of November.

of Martaban over Burmah, and giving the commencement of the monsoon in those parts. In the northern half of the Bay weather continued fine till the end of the first week of June, when the moist winds moving northwards to the east of the Bay were deflected westwards in consequence of the high pressure in the north-east corner of the province. The first signs of the depression forming appeared on the 9th, when pressure fell on the Orissa coast, though it was rising elsewhere; but after this very little further intensification took place. As it crossed the coast, it appeared to have two centres, one going between Saugor Island and False Point on the 10th, and the other following on the 11th passed in a north-north-easterly direction between Bogra and Mymensingh, and thence into Behar. Light winds accompanied the depression, but over the Bay, to the south of the area where it formed, squally weather was experienced. After the passage of this shallow low-pressure area, rainfall became more general in the western districts, and the monsoon may be said to have begun in Orissa and South-West Bengal on the 11th, and in Chutiá Nagpur and Behar a day or two later.

While pressure still remained low over the Bay, two other depressions formed, the first of which moved from the north-east of the Bay into the centre of Bengal and afterwards towards Central India; while the second, forming off the Orissa coast, passed between False Point and Balasore on the night of the 26th, after which it moved in a north-westerly direction. Both these depressions gave heavy rain, which spread over rather a wide area, and this with the early commencement of the rains caused the general rainfall of June to be considerably above the normal. These storms in June, though due to the formation of depressions of the same nature as those of other years, have differed, in that generally light winds accompanied them, and that when squally weather did exist it failed to reach the head of the Bay.

The conditions during the first week of July were similar to those of June: a shallow depression began to form in Bengal on the 1st, intensified on the 2nd, and then moved to the north-west. While it lasted, westerly winds were blowing over the whole of Chutiá Nagpur, and the Bay current being rather fresh heavy rain fell in all districts during the first four days and more lightly till the 7th or 8th, when a partial break in the rains set in in the western districts and extended over the whole province before the 10th. High pressure and temperature obtained from the 10th to the 15th in all districts, and in the west of the province till the 19th, when the unsettled weather, which had been gathering over the north-west of the Bay for some days, began to move over Bengal. On the 13th, from being almost normal, pressure began to fall, and the usual signs of a shallow depression appeared at the Orissa coast stations. Without materially altering its position, the depression slowly intensified the area of low pressure, extending in a north-westerly direction. On the 17th there was every sign of the depression having moved inland, westerly winds blew on the Orissa coast, and pressure was rising; but on the following day it again fell and was as low as 29.35 inches between Saugor Island and False Point. Cyclonic conditions reappeared and extended over the whole province, and on the 20th the centre approached the coast, crossing between Saugor Island and Balasore. It then moved rapidly in a north-westerly direction, being over Behar on the 21st. A rapid rise of pressure followed, and squally weather prevailed in the north-west of the Bay, heavy rain falling in Orissa before the 20th, but after the passage of the depression it became general over the whole province and continued so till the 27th, after which there was a second partial break in the monsoon.

The scattered rainfall, which was general at the end of July, continued in all districts except Orissa and the northern districts of North Bengal till about the 12th of August, but in Orissa and South-West Bengal the first four days were very dry. The general weather conditions in Bengal were affected by the trough of low pressure which, forming towards the end of July, extended from the head of the Bay in a north-westerly direction into the North-Western Provinces, and remained without changing its position till after the middle of August. While it kept its position well to the west of Bengal, passing over Orissa and Chutiá Nagpur, wind directions within it were irregular, and to the east of it the indraught gave easterly winds in all the other districts. The rainfall, therefore, during this part of the month was due entirely to the Bay current, and as it had a rather strong easterly deflection,

the amounts received were considerably below the normal. Within the trough of low pressure and at its southern end over the Bay several low-pressure areas formed, and taking their course along it passed in a north-westerly direction, generally crossing the northern half of Orissa. The rainfall accompanying these whirls was confined chiefly to the south-west, and therefore it was heavier in Orissa and the adjacent part of South-West Bengal than usual. Only two of these depressions were of any importance. The first formed on the 4th, and rapidly approaching the Orissa Coast passed inland on the 5th. At 8 A.M. on the 6th the centre was between Cuttack and Gopalpur, and a diffused low-pressure area covered part of the Central Provinces, Orissa and the north-west of the Bay. Light winds followed the depression, and weather was not seriously disturbed, but heavy rain fell in Orissa, while over the rest of the province rain was light and temperature rising. As two very slight depressions followed before the middle of the month and also passed over Orissa, the general rain continued there, while only local showers were falling in the east and north. The second more important depression appeared at the head of the Bay about the 15th, and moved in a more northerly direction, passing over Calcutta on the evening of the 16th. On the 17th it was near Burdwan, on the 18th in Behar, and by the 19th, beyond the general rain which was following it, it had no influence on the weather in Bengal. General rain continued in all districts till the 21st. After this the trough of low pressure closed up and westerly winds blew over almost the whole province, but pressure continued low over Bengal, falling slightly between the 22nd and 23rd, and again towards the end of the month.

The trough of low pressure, which had such an important influence on the weather conditions during the whole of August, continued, though not so uninterruptedly, in September. Instead of being well over the western districts of Bengal, it was displaced to the west, and in consequence the mean pressures for the month are everywhere above the normal, while a more important influence was produced in the rainfall distribution. The west coast current flowing towards this low-pressure area did not extend over the western districts to the same extent as in other years; and as it appears to have withdrawn before the usual time, the rainfall in these western districts in this month was probably derived entirely from the Bay current. This, on the other hand, having to supply the whole of Bengal, was deflected more to the west, as shown by the deficient amounts received in the eastern half of the province.

A further reason for the comparative absence of rain in the western districts is the small number of influential depressions or cyclonic storms which, generally forming in the northern half of the Bay, pass in a north-westerly direction over this part of Bengal and give heavy rain, especially near the centre of the depression. Several of these depressions occurred during the month, but the only one of importance was further south than usual, and during the first few days of its existence took a westerly course, crossing the coast near Vizagapatam and keeping that direction till it was well into the Central Provinces, after which it moved to the north. The centre was therefore nearest the province while it was crossing the coast and afterwards on approaching the Himalayas, and then heavy rain fell in Orissa and Behar, but the amount was considerably under what would have been received had this, the only important depression of the month, taken the usual course.

During the first half of the month two shallow depressions of very slight influence formed at the head of the Bay: one at the beginning, followed by a strong monsoon current over the Bay and general rain in Bengal; the second, on the 7th, disappeared within twenty-four hours. During this period pressure was very high over the Bay, and a light monsoon current was blowing till about the 16th, when signs of disturbed weather in the centre of the Bay appeared. The formation of the storm was first indicated by a brisk fall of pressure at the Orissa stations and a shift of winds in Bengal. On the 16th the centre of the depression appeared to be about midway between Diamond Island and Vizagapatam, and to be moving in a westerly direction, so as to pass near the latter station. At 8 A.M. on the 18th it was about 100 miles to the east of Vizagapatam, and moving with moderate rapidity it passed inland on the evening of that day, and was due west of Gopalpur when observations were taken on the following morning. Wind circulation was cyclonic over the whole

of India and very heavy rain fell to the south of the centre, and lighter amounts in Orissa and Lower Bengal. It moved rather slowly on the 20th in a north-westerly direction, after which it partly filled up and began to move more to the north, skirting the western boundary of the province and causing cyclonic winds of increasing strength over the whole of Bengal and heavy rain in the north-western districts. On the 22nd the centre was in Cudh, close to the Himalayas, and on the following day the depression had disappeared. The disturbed conditions that followed the rapid breaking up of the storm extended over Behar, and heavy general rain fell, especially in North Behar, on the 23rd. On the 24th weather began to clear in all districts, and, probably owing to a shallow depression which formed near Burmah, the moist winds almost entirely ceased to blow over Bengal. This shallow depression moved slowly in a northerly direction over the eastern corner of the Bay and East Bengal, where it slowly filled up. Moist winds followed it, and showers fell at a few eastern stations, but from the 24th the regular monsoon current ceased to flow.

At the commencement of October the south-west monsoon current was very feeble, and rainfall had practically ceased over the greater part of the province, though in Orissa light and fairly well-distributed rain continued to fall. Pressure from being relatively low at the end of September rose steadily, and the area of lowest pressure was gradually transferred southwards along the west coast of the Bay. This distribution continued during the first half of the month, but, notwithstanding this, two areas of relatively low pressure formed—the first on the 5th in Lower Bengal and the second on the 10th in Northern Bengal, both, however, rapidly disappearing without influencing the general conditions beyond causing increased cloud and scattered showers. During this period also a low-pressure area with squally weather was formed in the Bay, probably to the west and south-west of Diamond Island, but it did not develop into a definite storm, and in its westward advance it only gave rise to squally weather and heavy rain along the Orissa coast from the 5th or 6th up to about the 9th. With these disturbed conditions, however, showers continued to fall in most of the districts of the province except Behar up to the 13th or 14th, when fine settled weather commenced in all districts except Orissa. Immediately after this a feeble storm formed off the Madras coast and crossed the coast near Nellore on the 16th, advancing first nearly across the Peninsula and then moving in a north-easterly direction into Central India. A wave of moist southerly winds caused by it drifted northwards along the west coast of the Bay, giving heavy rain in Orissa from about the 18th, while also fairly numerous showers fell in Chutiā Nagpur and South-West Bengal. On the 21st and 22nd another barometric depression began to form in the Bay, apparently off the Orissa and Ganjam coasts, which continued to develop slowly and perhaps to approach more nearly to the Orissa coast up till the 25th of October, when it began to move slowly in a north-easterly direction. On the morning of the 25th the small storm, which was only of moderate strength, was about south of Saugor Island and south-east of False Point, and on the 26th its centre was to the south-east of Saugor Island. It then moved over the Sunderbuns, its centre being near Burrisal on the 27th, and on the 28th it was well inland and rapidly filling up. During the formation of the storm rain continued to be general and fairly heavy in Orissa, and as it moved inland heavy rain fell in the districts over which it passed. A complete reversal of the weather conditions was caused by the storm over Lower Bengal, and instead of the fine settled weather which had previously obtained, skies became overcast, pressure diminished, temperature and humidity rose, and heavy rain fell. After the rapid filling up of the depression the damp winds were at once driven back by a dry northerly or north-westerly current, and by the end of the month conditions appeared to be settled for the north-east monsoon.

As in 1888, the account of the weather conditions in November belongs to that of the south-west monsoon season, because of the heavy and very unusual rain which fell in Lower Bengal between the 13th and 20th. This rainfall was caused by the most severe storm of the season, the storm differing from those that usually occur in November, in that it recurved towards the north when close to the Madras coast, instead of crossing the south of the peninsula. The weather up to the 12th was of ordinary cold-weather character. In the Bay also conditions were fairly normal during this period;

except for the fact that there was an area of deficient pressure in the east of the centre of the Bay, probably extending into the south-east, and causing the delay in the setting in of the Madras rains. Unsettled weather began about the 12th, and probably consisted of squalls with no well-defined depression for two or three days. The storm, however, concentrated and drifted towards the Madras coast, pressure there falling steadily till the 17th. On the morning of the 18th it began a more northerly course, the centre being off the coast between Nellore and Masulipatam; and on the 19th it was opposite Vizagapatam. During the 19th the slow northerly motion continued, and it passed the coast, about 4 A.M. on the morning of the 20th, close to Gopalpur. After passing inland the depression rapidly broke up, and twenty-four hours afterwards, except for the generally disturbed weather, very little trace remained. The influence of the storm on weather conditions in Bengal was very marked, heavy general rain falling in the southern districts from the 14th to the 21st, and in the northern districts on the 16th, 17th and 18th. Very stormy weather prevailed over the part of the Bay in the neighbourhood of the storm, and unsettled conditions apparently extended rapidly over the south of Bengal; or perhaps it is more probable even that a small offshoot from the main body of the storm may have travelled northwards over Bengal, a heavy wave of moisture-laden winds following it about the 14th. On the 15th general, and in many cases heavy, rain was reported over Orissa, South-West and East Bengal; over Pubna, Bogra, and Rajshahye districts of North Bengal; Sonthal Pergunnahs in South Behar; and the Singbhoom, Manbhoom and Hazaribagh districts of Chutiá Nagpur. The greater part of South Behar, the whole of North Behar, and a considerable part of North Bengal, however, remained quite rainless up to the 16th or 17th, but after that showers fell even in these districts. Easterly winds with high humidity and temperature continued for some days after the depression filled up, but on the 25th or 26th only light cloud remained, and by the 28th clear skies everywhere prevailed. Thus from the 13th to the 28th weather was in every respect similar to that occurring in the months of the ordinary monsoon season.

The most important features of the monsoon season of 1889 have been—

1. The advance of the monsoon current in the Bay took place at about the usual date in May, but it passed up the Bay more quickly than usual, so that it advanced and the rains commenced over Bengal several days (from three to five) earlier than usual.
2. The monsoon current was of considerable strength in June and of moderate strength in July, August and September, but it retreated from the province rather earlier than usual in October.
3. The number of barometric depressions and of cyclonic storms which formed during the season was small, most of them being feeble in character, and only two of moderate intensity.
4. Owing to the formation of a cyclonic storm in the middle of the Bay in the second week of November, and its advance towards the Orissa coast, which it struck on the 20th, a wave of moist winds was forced over the southern part of Bengal, and rain became very heavy and general for some days in Orissa, and rather heavy over South-West and East Bengal, while moderate but general rain fell over the whole of the remainder of the province.

Weather of the ordinary cold season type commenced at the end of October, but only lasted till the 13th of November, when the

North-east monsoon period—
November and December.

disturbed conditions described above set in and continued almost till the end of the month. The

chief features of the meteorology of December were the complete absence of storms of the usual cold weather kind which form in Northern India and advance in a south-easterly direction: the occurrence of two cyclonic storms in the Bay, the first of which, commencing about the 16th and moving as storms usually do at that season, crossed the extreme south of the peninsula. The second occurred from the 20th to 26th, later in the year than any hitherto recorded storm, and forming well to the south advanced in a north-westerly direction towards the Madras coast. A few light showers fell in Lower Bengal between the 24th and 26th. The meteorological elements differed considerably from the normal

towards the end of the year, pressure being below the normal, and temperature, humidity, and cloud proportion all above.

Except for the variations caused by the passage of depressions, changes of pressure in January were of no great importance.

Pressure.

In South-West Bengal and round the coast at the head of the Bay the distribution was nearly normal, but inland there was considerable excess, averaging about $\cdot 17$ inch in Bengal and Assam. In the early part of February this excess increased, the average during the first two weeks being between a twentieth and a tenth of an inch, but the fall during the days between the 17th and 20th reduced the distribution to nearly normal. The important changes occurred about the 8th, 12th, and 20th. The mean excess was again large in March, averaging nearly a twentieth of an inch, and the differences from the normal at the various stations, though fairly uniform, were largest at the western stations. In April rather large oscillations of pressure occurred. The uniformly high distribution in March continued till the end of the first week of April, after which a rapid fall prevailed for a day or two, but it was quickly restored, and during the second week increased to a tenth of an inch, when a series of more or less rapid falls gave defect of about two-tenths of an inch. The mean pressure was very nearly normal in South-West Bengal and Orissa, while in the north and west of the province excess of about $\cdot 02$ inch prevailed. The mean pressure for May was slightly in defect along a line running almost north and south through the centre of the province, while on either side there was slight defect. The mean for the whole province was very nearly normal, excess of a hundredth of an inch being recorded. Changes in June were not large, though three small depressions passed over the province, and the means at the different stations were all above the normal by about $\cdot 02$ inch. There was excess in the early part of July and again at the end, but the means are not much above the normal in consequence of the depression which lay over the province during the third week, when a large defect prevailed, especially in the lower districts. In August a series of very shallow depressions formed at the head of the Bay and passed over the south-western districts. The mean differences from the normal were therefore larger in the west of the province than in the eastern districts, but defect was general, and varied from $\cdot 01$ inch in North Bengal to $\cdot 05$ inch in Orissa. Mean pressure was again above the normal in September by small amounts, but in October there was everywhere a large defect, largest in Orissa and South-West Bengal and Behar, and averaging for the whole province about $\cdot 04$ inch. In November the principal variations of pressure were those connected with the development and advance of the cyclonic storm from the Bay, where the fall was very rapid. These changes had a marked influence on the mean monthly pressure, which was everywhere below the normal, defects ranging from six to eight hundredths of an inch in Orissa and the south-western districts generally to about three hundredths in East and North Bengal. In December mean pressure was again below the normal, defect averaging about $\cdot 02$ inch.

The mean temperature was from month to month, almost without intermission, above the normal in all districts of the province, more especially in the first five and

Temperature.

last two months of the year. The average excess in January was about $2\cdot 2^{\circ}$ and in Assam $2\cdot 4^{\circ}$; in February between a half and one degree and in Assam $1\cdot 3^{\circ}$, but in the early part of the latter month variations were large, and at one time temperature was considerably below the normal. In March the average for the whole province was $1\cdot 6^{\circ}$, the largest excess temperatures being confined to the districts of Chutiá Nagpur and South Behar. In April excess was larger than in March, exceeding 2° in all districts except Orissa and Chutiá Nagpur, and some very high maximum temperatures were recorded. The highest in South-West Bengal was $115\cdot 4^{\circ}$, in Orissa $112\cdot 4^{\circ}$, and in South Behar $111\cdot 4^{\circ}$. One of the chief features of the meteorology of May was the unusually high mean temperatures at many stations during the first half of the month, when temperatures of from 10° to 15° above the normal were registered at many stations. Excess amounts had again increased largely in all districts except Orissa, and exceeded 4° in North Behar and Chutiá Nagpur, and $3\cdot 5^{\circ}$ in South-West Bengal, North Bengal and North Behar. The highest maximum temperatures, with the exception of that in East Bengal, ranged from 109° in

Chutiá Nagpur to 115.5° in South-West Bengal. In June the means for North Bengal, South Behar and Assam were below the normal, and in the other districts less than a degree above; but in July and August they were again above in all districts, excess being about 1° , except in North Bengal and North Behar. In September there was a slight excess in Lower Bengal and defect of about 1° in the northern districts. In October there was defect of $.7^{\circ}$ in Orissa and excess elsewhere, less than half a degree in South-West, East and North Bengal, and between 1° and 2° in the North-West. In November means for Orissa, Chutiá Nagpur and South-West Bengal were 1° , and in the other districts from 2° to 3° above the normal. Cool weather prevailed during the first three weeks of December, but temperature rose so much towards the end of the year that the monthly means were again above the normal. The mean maximum temperature for representative stations in the last week of December was from 4° to 8° above, and the mean night temperature from 3.5° to 6° above the corresponding normals.

In the western districts the influence of the cold weather storms was very decided in causing clouded skies, but generally over the province during the first four months of the year weather was not quite so clear as usual, humidity, however, remaining fairly low. In Orissa and Lower Bengal cloud proportion was below the average during January and February, and above in March and April. During the monsoon months, as usual, humidity varied very slightly from the normal, but in Orissa and Chutiá Nagpur there was a considerable excess of cloud, while in Bengal the normal amount prevailed, except in October, when cloud was slightly more dense. During the latter half of November high humidity and dense cloud prevailed, so that the means for this month are above the normal, and differences are larger than at any other time of the year. In December humidity was low and cloud proportion practically normal.

During the cold-weather months, especially in Lower Bengal, air currents were not northerly with so much regularity as in average years; and though the steadiness of the current was somewhat above the average, southerly winds frequently blew. In January between the 12th and 20th and towards the end of the month, these southerly winds blew almost without interruption. In February the northerly current was more regular than in January, and on the Orissa coast easterly directions were not uncommon. The hot weather winds commenced about the end of the first week of March; and as the pressure distribution characteristic of that season was established shortly afterwards, winds increased in velocity at the head of the Bay, and, though more southerly than usual, continued with great steadiness. In the west and north of the province velocity was considerably above the average in March and April, and about 20 per cent. below in East Bengal, but in the two following months it was either up to or above the average. During the monsoon months directions had rather a strong southerly element at the head of the Bay; still at inland stations the current was steady and blew from the usual monsoon directions. In July velocity was again below the normal in the east of the Bay and East Bengal, while at some of the south-western stations a considerable deficiency appears in the velocity throughout this period, and in fact to the end of the year, most notably at Calcutta and Burdwan. Southerly winds continued till the end of October, when a dry current from the North-West became general, but continued for a short time only, as a prolonged interruption occurred from the middle of November and lasted almost till the end of the month. During this interval steady south-easterly winds blew, and the easterly element is hence considerably greater than usual in the average direction. The cold-weather current recommenced at the end of November and blew steadily throughout December.

Depressions were rather numerous during the first two months of the year, but they were usually feeble and had little influence beyond causing cloudy skies and general rainfall. In January three occurred, the first travelling along the line of the hills in a south-easterly direction; the second advanced from Central India into Chutiá Nagpur on the 24th; and the third, the most considerable of the three, came from Northern India on the 30th. Two important depressions passed over the province during the second and third weeks of February. In March

and April weather was unusually fine and settled, only a few unimportant local storms occurring; but in one case, on April 15th, in the Rajshahye district, a storm was of almost tornado violence. In May also the periods of disturbed conditions were not frequent, the only periods of general disturbance occurring in the middle of the month, and between the 20th and 26th.

The first storm of the monsoon season in the northern half of the Bay began in a very shallow depression off the Orissa and Ganjam coasts on the 8th of June. It appeared to have two centres of lowest pressure, one of which crossed the coast on the 10th, and the second on the 11th, the wave of moist winds following in the rear giving general rainfall over the province. During June two other depressions formed, the first of which moved from the north-east of the Bay into Central Bengal, and afterwards towards Central India, while the second formed off the Orissa coast, and passed between False Point and Balasore on the night of the 26th.

During the first part of July settled weather prevailed, and the only depression of the month began to form, probably near the east coast about the 11th. It did not exist as a definite storm till it appeared off the Orissa coast on the 12th, where it remained almost stationary till the 18th, intensifying slowly. It then advanced along the coast, and the centre passed between Saugor Island and Balasore, after which it moved in a north-westerly direction into Behar. The storm was accompanied by very bad weather in the northern part of the Bay, and during its advance it gave very heavy rain in North Behar and North Bengal.

August was also comparatively free from the barometric depressions which usually occur in the rainy season, and only two shallow and unimportant whirls were formed, the first lasting from the 4th to the 10th, and the second from the 16th to the 20th. The first passed through Orissa into the Central Provinces, and the second from the north-west corner of the Bay through Chutiá Nagpur and South Behar into the North-West Provinces.

In September there were two depressions: one giving a cyclonic storm of considerable intensity, and the other being shallow, diffused, and of minor importance. During the first half of September pressure was becoming steadily more uniform, so that by the 15th, when the depression first began to form, differences of pressure were very small. On the 16th a diffused low pressure area covered the whole Bay, and considerable changes were probably occurring towards the centre. It drifted slowly in a westerly direction till the 18th, when pressure was falling very rapidly in the Circars, and the centre of the depression was to the east of Vizagapatam. On the 19th the centre was inland and west of Gopalpur, after which it passed into the Central Provinces, where it remained fairly stationary, filling up till the 21st. It then took a northerly direction, and moved rapidly till it reached the Himalayas after passing over Oudh. Between the 21st and 22nd it had intensified considerably, and before it broke up its influence extended over the north-western districts of Bengal, so that the effects of this storm were felt in Bengal when it was crossing the coast near Orissa, and afterwards when during its northerly motion it was passing over Oudh. The shallow depression at the end of the month began to form on the 25th, and without any further intensification it moved in a northerly direction over the east of the Bay and the eastern districts of Bengal, filling up on the 28th.

Several very feeble depressions formed in the Bay during October, but the only one that influenced the weather conditions in Bengal was towards the end of the month. It commenced to form off the Orissa coast on the 21st, and after drifting slowly in a westerly direction till the 25th, it moved to the north-east, and passing the coast to the east of Saugor Island it moved over East Bengal and filled up in Assam on the 28th. Squally weather prevailed near the head of the Bay and in Lower Bengal from the 26th to the 28th, but after the depression filled up, fine weather immediately followed and continued till about the 11th of November, when the most severe storm of the season began to form in the south of the Bay.

For the first few days the disturbance probably consisted of squally weather over a wide area, with local depressions which collected before it approached the Madras coast on the 16th or 17th. The centre of the wind circulation on the 17th was a little to the south of east from Madras, and there had been

considerable intensification during the previous 24 hours. There was very little motion and only slightly increased intensity during the following day, and it appeared likely that the depression would cross the Madras coast; but on the 19th the centre had moved to the north and was east of Masulipatam. As the depression moved parallel to the coast pressure fell steadily, and the stations nearest the centre rarely recorded amounts below 29·7 inches, but deficiency was steadily increasing, as the motion was towards an area of normally increasing pressure. Defect was a quarter of an inch at Masulipatam on the 19th, and a third at Vizagapatam on the 20th. When the storm centre crossed the coast near Gopalpur, pressure must have been very low, as, when the centre was still some distance off, it had fallen to 29·478 inches, or nearly half an inch below the normal. Contrary to the usual behaviour of large storms, the one under consideration did not advance far inland, but began to break up immediately after it crossed the coast. At 8 A.M. on the 20th, at Gopalpur, pressure had risen to 29·684 inches, and by the following morning to 29·819 inches, when the storm had almost entirely ceased to exist, though a diffused depression still lay over the northern half of the Bay.

During December two cyclonic storms occurred in the south of the Bay, the first, of the usual character, forming in the south and advancing in a westerly direction across the extreme south of the peninsula. The second was a most unusual storm, occurring as it did later in the year than any cyclonic storm has hitherto done. It was severe and drifted in a north-westerly direction towards the North Madras coast.

During January and February, owing to the fairly large number of depressions which passed over the province, rainfall was in excess in nearly all districts. In January excess amounted to 2·2 inches in North Behar, nearly 2 inches in North Bengal, and 1·7 inches in South Behar, while in other districts the amounts were almost normal, except in Orissa, where only 0·6 inch fell. In February the average fall slightly exceeded one inch in Orissa, South-West Bengal and Behar, but in the other districts it was only slightly under that amount, excess ranging up to ·8 inch in South Behar. During the following three months hot weather of somewhat unusual severity prevailed, interrupted by only a few periods of disturbed conditions. As the rainfall during these months is entirely due to nor'-westers occurring during these disturbed periods, it was unusually light, exceeding the normal in Chutiá Nagpur only in April. The actual rainfall in March was not above 20 per cent. of the normal in Orissa, East and North Bengal, and under 50 per cent. in all the other districts, except South Behar, where it was 73 per cent. In April falls were under 50 per cent. in Orissa, North Bengal and Behar, 62 per cent. in South-West Bengal, and 86 per cent. in East Bengal. In May the distribution was much more uniform, varying from 40 per cent. in North Bengal to 75 per cent. in Orissa.

Up therefore to the end of May rainfall was much heavier than usual during January and February, and much lighter than usual in March, April and May.

Rainfall of January to May 1889 expressed as a Percentage of the Normal Fall.

METEOROLOGICAL DIVISIONS.	January.	February.	March	April.	May.	Actual fall of first five months of 1889 expressed as a percentage of the normal fall of the period.
Orissa ...	16	120	18	26	75	62
South-West Bengal ...	182	122	35	62	55	65
East Bengal ...	79	81	20	86	67	65
North Bengal ...	553	170	10	46	40	60
North Behar ...	480	260	23	40	43	103
South Behar ...	339	291	73	14	57	117
Chutiá Nagpur ...	121	122	47	130	46	75

The first advance of the monsoon current was brought by a feeble cyclonic whirl, which crossed the Orissa coast about the 10th or 11th of June, after which general rainfall

was received in the western districts. As usual, also rainfall in East and North Bengal, commencing earlier than in the western districts, was general from the 4th of June. The rains may therefore be said to have broken from three to five days earlier in Bengal than in average years. Later in the month two other depressions formed in the Bay, one passing into Central Bengal, the other across Orissa, and both these depressions gave heavy rain, which spread over the whole area. This, in addition to the comparatively early setting in of the rains, caused the general rainfall in June to be about a third above the normal fall, while in North Behar it was no less than 62 per cent. in excess of the usual amount. Excessive falls were received in the Chumparun district, where the excess amounted to about $9\frac{1}{2}$ inches, the actual fall being 213 per cent. of the normal. Next to this stood the Mozufferpore district, where, with an actual fall of 199 per cent. of the normal, excess was 7 inches. A third district which received very heavy rain was Patna, where excess was nearly 6 inches. On the other hand, Balasore, Chittagong and Maldah districts received falls about 25 per cent. in defect of the normal.

In July the south-west monsoon, considered as a rain-bearing current, was a little weaker than usual, most districts receiving less than the normal. Rainfall was, however, fairly well distributed throughout the month, except for some days from about the 11th to the 15th or 16th, when a small cyclonic storm, generating in the Bay, caused indraught, which prevented moist winds from flowing over the province. The rainfall for this month was again about a third in excess of the normal in North Behar, while in North Bengal the excess equalled about a fifth of the normal, but in all other districts the falls were somewhat in defect. The district of Chumparun again received exceptionally heavy rain, the fall averaging more than 20 inches, or 8 inches in excess of the normal, and the actual fall expressed as a percentage equalled 166. The Mozufferpore and Patna districts, which in June also received such heavy falls, in July only received moderate amounts, Mozufferpore showing a slight excess and Patna a defect. But in July also the Cooch Behar, Purneah, and Julpigoree districts received exceptionally heavy rainfall. On the other hand, very defective falls were registered in the Midnapore, Lohardugga and Singbhoon districts.

In August the monsoon current was weaker than usual, the average fall over the whole province being only 90 per cent., while in South-West Bengal and Chutia Nagpur the falls equalled only about 75 per cent. of the normal. Orissa received about a fifth more than the normal. South Behar and East Bengal practically normal, but in all other districts there was a deficiency. The principal districts receiving excessive rainfall were Pooree, where excess amounted to 7 inches, Shahabad, Patna, and part of Bhagulpore, excess in these districts varying from 2 to 4 inches, or a quarter of the normal fall. The Chumparun district, on the other hand, which had received excessive falls during June and July, was in defect by 5 inches in August. The other districts, where largely deficient falls were registered, were Darjeeling and Tipperah (defect 9 inches), Bankoora, Beerbhoon, Moorshedabad and Maunbhoon (defect 5 inches). A curious defect of about 5 inches also occurred over the southern part of the Bhagulpore district, while, as above stated, the northern part of the same district received an excess fall.

The rainfall in September was largely in excess of the normal in North Behar, where the falls were about half as large again as usual. Moderate excess falls amounting to about a sixth of the normal were received in South Behar and North Bengal, but in the other districts the deficiency was small in South-West and East Bengal, moderate in Chutia Nagpur, and large in Orissa. Chumparun again received about $6\frac{1}{2}$ inches more than usual, the actual fall being 170 per cent. of the normal. North Bhagulpore also showed an excess of about 70 per cent., and Purneah 60 per cent., while excess falls of about 50 per cent. of the normal were recorded in Durbhunga, Mozufferpore, Monghyr, Sonthal Pergunnahs, Dinagepore, Maldah and Bogra. In Cuttack, Balasore, Howrah, Gya and Singbhoon falls were below the normal by from 30 to 50 per cent.

At the commencement of October the monsoon current flowing over the province had become extremely feeble, and general rainfall had practically ceased, though there were a few isolated showers in North Bengal. This

practical cessation of the monsoon current from flowing over the province took place rather earlier than usual, for in most years general rainfall is brought up quite to the beginning of October, and in some cases to the second week. Towards the end of the month a depression formed off the Orissa coast, thence passing over East Bengal, and to this was due a large proportion of the rainfall of October, which was largely in excess of the normal in Orissa. Rather heavy falls were also received in East and South-West Bengal, where the amounts were from a third to an eighth in excess of the normal. But in all other districts the falls were below the normal, defect being moderate in Chutiá Nagpur, very large in North Bengal and South Behar, while in North Behar rainfall was almost absent. Rainfall was particularly heavy in the following districts:—Khoolna, 24-Pergunnahs, Pooree, Backergunge, Jessore, Howrah, Dacca, Tipperah, Furreedpore and Cuttack, while it was largely in defect in Mozufferpore, Chumparun, Sarun, Patna, Durbhunga, Monghyr and Bhagulpore, where the falls scarcely equalled ten per cent. of the normal.

As described above, very unusual conditions prevailed from the middle to the end of November, excessive rainfall being caused in Orissa and Lower Bengal by the storm which formed in the south of the Bay, and moved northwards as far as Gopalpore. Rain fell from the 14th of November to the 22nd over a considerable part of Bengal, and after that the north-east monsoon conditions began to return. The following are some of the more important average district falls which were received during this period:—In Pooree and Cuttack districts 10 inches or above; in Balasore, South-West Midnapore and South 24-Pergunnahs, Burdwan, Nuddea, and Furreedpore from 6 to 10 inches; in Beerbhoom, West Burdwan, Jessore, Khoolna, Chittagong Hill Tracts, Dacca and Purneah districts from 4 to 6 inches; and in Midnapore, 24-Pergunnahs, Howrah, Hooghly, Bankoora, Murshidabad, Backergunge, Noakhally, Comilla, Mymensingh, Rajshahye, Manbhoom and Singbhoom from 2 to 4 inches.

In December rain fell towards the end of the month in some of the southern districts, but Behar and Chutiá Nagpur were rainless. As no cold weather storms occurred during the month, rainfall was below the normal everywhere.

The following tables give briefly the amount and variation of the rainfall in each of the seven meteorological divisions of the province, month by month, for the monsoon season, June to November inclusive:—

Actual Rainfall in Inches.

METEOROLOGICAL DIVISIONS.	June.	July.	August.	September.	October.	November.	Monsoon season.
Orissa	10.58	11.09	13.04	5.70	9.21	9.85	59.50
South-West Bengal	12.70	10.07	9.03	8.17	4.88	4.72	49.57
East Bengal	20.13	15.01	11.86	10.81	7.19	3.48	71.51
North Bengal	22.55	16.79	11.87	15.91	2.11	1.07	70.33
North Behar	15.00	16.09	10.10	14.51	0.28	0.32	56.30
South Behar	9.51	11.47	10.63	9.09	1.38	0.73	42.81
Chutiá Nagpur	10.04	10.36	10.54	7.23	2.18	1.36	41.71

Variation of actual Rainfall from the average in Inches.

Weather, Crops and Prices, and Material condition of the people.

THE following is a brief account of the results of the harvests, of the prices prevailing, and of the economic condition of the people in the several Divisions of Bengal during the year 1889-90.

The following table shows the rainfall in the districts of the Burdwan Burdwan Division. Division during the past three years:—

		1889-90.	1888-89.	1887-88.
		Inches.	Inches.	Inches.
Burdwan	47·09	60·32	52·86
Bankoora	54·93	53·95	52·58
Beerbhoom	...	53·82	67·4	51·58
Midnapore	...	50·8	66·23	56·48
Hooghly	43·0	59·82	45·05
Howrah	59·9	69·7	46·16

In Beerbhoom and Howrah the rainfall of the year 1889-90 was sufficient, but elsewhere it was not only insufficient, but most unevenly distributed. During May and June cultivation was generally retarded for want of rain, and although in July and August the rainfall was abundant, it again became scanty in September and October, and in addition to this there was heavy and unseasonable rain in November, which did damage to the *aman* and still more damage to the *rabi* crops. The want of rain was severely felt in the Cutwa and Culna sub-divisions of the Burdwan district, where large tracts of cultivable land lay fallow. In Beerbhoom the outturn of *aman* was above the average, and in Howrah it was a fairly average one; but, as might have been expected, the general outturn of the crops for the whole Division fell somewhat short of the average.

The following table compares the prices of rice in the several districts of the Division during the past three years:—

		Quantity per rupee.		
		1889-90.	1888-89.	1887-88.
		S. c.	S. c.	S. c.
Burdwan	15 4	19 2	21 13½
Bankoora	18 3	19 15	21 11½
Beerbhoom	...	15 6½	19 4½	21 12
Midnapore	...	16 4½	20 6½	23 6
Hooghly	14 0	18 5	18 13½
Howrah	13 12	17 2½	18 13

The year was therefore one of exceptionally high prices, but as this was due not so much to bad harvests in the Division itself as to bad harvests elsewhere and in the two preceding years, the people benefited by being able to sell their crops at high prices, and were fairly well off. The wages of labour remained almost stationary.

The following table gives the average rainfall in each of the districts of the Presidency Division during the past three years:—

		1889-90.	1888-89.	1887-88.
		Inches.	Inches.	Inches.
24-Pergunnahs	...	60·41	67·85	58·56
Nuddea	54·91	63·55	50·10
Jessore	55·46	49·38	46·94
Khoolna	53·6	52·50	56·09
Moorshedabad	...	51·96	51·19	63·47

There was a paucity of rain at the beginning of the year; later on there were local floods in Moorshedabad and Nuddea; but the chief and most widely

spread characteristic of the season was the unusually heavy rain in November, which damaged the cold-weather crops and in some places the *amun* harvest. In the result the harvests generally were slightly better than those of the preceding year. The estimated outturn of the *aus* and *amun* crops in the several districts is given below:—

			Aus.	Amun.
			As.	As.
24-Pergunnahs	14	16
Nuddea	8	7
Jessore	11·5	12·6
Khoolna	10	14·3
Moorshedabad	9	13·5

There was a marked rise in the price of rice, as will be seen from the table below:—

		Quantity obtainable for a rupee.					
		1889-90.		1888-89.		1887-88.	
		S.	c.	S.	c.	S.	c.
24-Pergunnahs	...	14	5½	16	15½	20	0
Nuddea	...	13	4	17	2	18	9
Jessore	...	13	10	20	10	23	9½
Khoolna	...	11	0	15	10	22	5
Moorshedabad	...	15	2	18	7½	23	4

The scanty harvests of 1888 were followed by high prices in 1889, and there was some pressure in the Diamond Harbour sub-division of the 24-Pergunnahs, and in the Lalbagh and Jungipore sub-divisions of Moorshedabad, which necessitated relief operations until a good *aus* and jute crop put an end to further anxiety. There was also some scarcity in the Magura and Bongong sub-divisions of Jessore. In all other parts of the Division the condition of the cultivating classes was one of fair prosperity, while the labouring and middle classes, who are dependent on service and fixed income, suffered on account of the high prices of food.

The wages of labour were not affected by fluctuations in price, and remained almost identically the same as in the two preceding years.

The subjoined table shows the average rainfall in the different districts of the Rajshahye Division during the year as compared with the previous two years:—

Rajshahye Division.		1889-90.	1888-89.	1887-88.
		Inches.	Inches.	Inches.
Dinagopore	...	62·47	54·51	72·92
Rajshahye	...	55·69	49·21	58·60
Pubna	...	61·67	49·78	52·24
Bogra	...	65·5	51·24	58·57
Rungpore	...	88·53	66·48	96·00
Julpigoree	...	126·70	107·89	117·32
Darjeeling	Hills	138·10	110·70	128·24
	Terai	123·88	97·03	116·44

The rainfall of 1889-90 was generally sufficient, and although in some cases excessive rain and floods caused much damage, the outturn of the different crops was not much below the average. Prices were nevertheless high owing to a deficiency in the harvest of 1888-89. The prices of rice for the last three years are given below:—

		Quantity sold per rupee.					
		1889-90.		1888-89.		1887-88.	
		S.	c.	S.	c.	S.	c.
Dinagopore	...	16	6	20	14	21	13
Rajshahye	...	15	0	19	12	22	10
Pubna	...	14	13	19	0	21	2
Bogra	...	15	15	21	15	24	6
Rungpore	...	13	5	18	3	21	13
Julpigoree	...	16	12	17	13	18	15
Darjeeling	...	12	10	14	1	15	5

There was a tendency to a rise in wages: the rates increased in regard to masons, blacksmiths and carpenters in Rajshahye and, unskilled labour in Julpigoree.

Public health was better than in 1888, and the agriculturists, who comprise the bulk of the population, are said to have been comparatively well off. On the other hand, the high prices of food affected injuriously those who live on fixed incomes, among whom are specially mentioned those engaged on clerical work in its different forms.

The rainfall for the past three years in the districts of the Dacca Division has been as follows:—

		1889-90.	1888-89.	1887-88.
		Inches.	Inches.	Inches.
•	Dacca ...	83·06	66·15	56·11
	Furreedpore ...	62·4	50·2	42·55
	Backergunge ...	80·7	81·8	71·09
	Mymensingh ...	99·74	75·76	72·12

The rainfall in 1889-90 was plentiful all over the division. It was, however, very unevenly distributed in Dacca and Furreedpore, where the outturn of the *aus* crop was about 9 annas, of the *aman* crop 11 annas, and of the winter crops less than 8 annas; but the jute crop on the whole was pretty fair. In Backergunge and Mymensingh the outturn of the crops was quite an average one, although partial damage was done to the rice and *rabi* crops by the high wind and heavy rain in November.

The price of rice, the staple food of the people, was abnormally high all over the division, as the table below shows:—

		Quantity obtainable per rupee.		
		1889-90.	1888-89.	1887-88.
		S. c.	S. c.	S. c.
Dacca	13 8	18 14	20 10
Furreedpore	12 14	19 10	19 10
Backergunge	13 5	17 0	19 14
Mymensingh	13 7	19 9	19 10

There was no marked change in the price of labour, skilled or unskilled.

The condition of the agricultural classes was as good as ever, and it is said that the only classes which suffered were those with small fixed incomes. In Dacca and Furreedpore, however, some pressure is said to have been felt on account of the partial failure of the food crops.

The subjoined statement shows the rainfall at the sudder sub-division of each of the districts of the Chittagong Division during the year as compared with the preceding two years:—

		1889-90.	1888-89.	1887-88.
		Inches.	Inches.	Inches.
Chittagong	86·59	118·00	84·66
Noakholly	108·58	121·49	85·73
Tipperah	72·97	84·87	58·45
Chittagong Hill Tracts	...	75·88	86·58	73·29

The rainfall of the year was everywhere below average, but it was on the whole well distributed, and the crops were exceptionally good. The increase in jute cultivation was very marked, and the value of the crop in the Tipperah district was calculated at about 42 lakhs of rupees. The only district which did not share in the agricultural prosperity of the year was the Hill Tracts,

where the rice crop was fair, but the cotton crop, on which the people depend for luxuries, was very poor.

As will be seen from the annexed table, rice was everywhere dear, and this was owing to the demand from the west and for export :—

				Quantity sold per rupee.		
				1889-90.	1888-89.	1887-88.
				Seers.	Seers.	Seers.
Chittagong—						
Sudder	14½	16½	18½
Cox's Bazar	15½	20½	20½
Noakholly—						
Sudder	15½	22½	23½
Feni	17½	23½	27
Tipperah—						
Sudder	14½	20½	22½
Brahmunberiah	15	21	23½
Chandpore	15½	21	21½
Chittagong Hill Tracts—						
Sudder	11½	14½	14½

Wages of labour continue at a high range. In Chittagong and Noakholly the rates for both skilled and unskilled labour showed a tendency to rise. The good harvest of the year, combined with high prices, has raised the condition of the agricultural classes, who form the bulk of the population, to a point not reached for many years. The increased prosperity is proved by the facts that rents were easily collected, loans were repaid, and exports were large. The material condition of the hillmen is said to have retrograded in consequence of the expeditions of the last two years, which interfered with their ordinary avocations.

Patna Division.

The rainfall in the districts of the Patna Division for the last three years has been as follows :—

				1889-90.	1888-89.	1887-88.
				Inches.	Inches.	Inches.
Patna	51·62	43·54	37·44
Gya	40·74	55·78	43·91
Shahabad	43·24	43·04	40·22
Mozufferpore	48·18	47·64	44·95
Durbhunga	50·26	41·48	56·66
Sarun	40·85	39·37	39·33
Chumparun	75·73	42·17	57·81

Throughout the division the rainfall was abundant, but unevenly distributed, and it closed early. The *bhadoi* crops were considerably damaged by excessive rain and floods in July and August. The want of rain in October reduced the outturn of the winter rice crop, while the *rabi* and poppy crops suffered to some extent from deficiency of rain during the cold weather. The results of the *bhadoi*, *aghani* (winter rice) and *rabi* harvests are shown below :—

				Bhadoi.	Aghani.	Rabi.
				As.	As.	As.
Patna	12	12	12
Gya	15	11	12
Shahabad	12	12	12½
Mozufferpore	10½	14	12
Durbhunga	17 nearly	17	13½
Sarun	12	13	16
Chumparun	11½	16	15

The average prices of common rice and wheat in the several districts were—

	RICE PER RUPEE.			WHEAT PER RUPEE.		
	1889-90.	1888-89.	1887-88.	1889-90.	1888-89.	1887-88.
	S. c.	S. c.	S. c.	S. c.	S. c.	S. c.
Patna ...	14 8 $\frac{3}{4}$	16 2 $\frac{3}{4}$	20 2 $\frac{1}{2}$	15 13 $\frac{1}{4}$	15 9 $\frac{3}{4}$	16 3 $\frac{1}{2}$
Gya ...	15 12	15 0	19 8	15 11	15 8	17 10
Shahabad ...	14 0	15 0	16 12	15 8	16 0	15 0
Mozufferpore ...	14 12	14 12	21 0	13 2	14 2	18 4
Durbhunga ...	15 15	16 8	19 4	14 6	15 9	17 8
Sarun ...	13 5	16 1	20 9	15 1	15 12	15 6
Chumparun ...	14 12	15 12	17 15	13 3	14 10	17 9

The rise in prices throughout the division was the natural result of the failure of a portion of the crops in the previous year. From Gya and Sarun it is reported that the high prices were artificially caused by combination among the traders. Wages are returned as having risen in the district of Durbhunga, and it is considered that there was an upward tendency elsewhere in the division.

The Commissioner considers that, with the exception of some semi-aboriginal tribes in the south of Gya and the Shahabad plateau, the people in the Patna Division are on the whole not badly off. Trade is steadily increasing, and there is great demand for labour in all districts. The special circumstances of the year 1889-90, however, were very unfavourable, as prices were high, the harvest of the previous season was bad, and, except in Chumparun, fever was prevalent. Distress was felt in the districts north of the Ganges in consequence of the heavy floods in August and September.

The following table compares the rainfall in each district of the Bhagulpore Division.

	1889-90.	1888-89.	1887-88.
	Inches.	Inches.	Inches.
Monghyr ...	44.8	57.6	37.6
Bhagulpore ...	53.96	53.36	51.26
Purneah ...	80.35	55.75	73.70
Maldah ...	41.20	45.08	43.43
Sonthal Pergunnahs ...	54.82	56.52	55.36

Taking the division as a whole, the year 1889-90 may be fairly described as an average one from an agricultural point of view. The distribution of the rainfall was not generally favourable to the *bhadoi* and spring crops, but these crops were not on the whole bad, and in some places good harvests were obtained. The winter rice crop was generally good, and the average outturn was much above that of the previous year.

The prices of rice and wheat in the several districts were:—

	RICE PER RUPEE.			WHEAT PER RUPEE.		
	1889-90.	1888-89.	1887-88.	1889-90.	1888-89.	1887-88.

Prices were generally higher than in the previous two years, perhaps because stocks had been depleted, and the harvest, though tolerable, was not sufficient to replenish them.

In Maldah wages of unskilled labour are reported to have risen during the last two years with the price of food, being 3 to 4 annas a day, against 2 to 3 annas in 1887-88, and a similar tendency was observed in the district of Purneah. In Monghyr, Bhagulpore, and the Sonthal Pergunnahs there was no change in the former rate of 2 annas a day.

It is stated that the general condition of the people affords no ground for despondency, and that they were distinctly better off at the close than at the beginning of the year. Some distress was felt in certain tracts of Bhagulpore, where relief operations were undertaken. It is probable that the ryots have derived advantage from the high price of rice during the year, their harvests not being deficient, though some portion of the surplus must have gone to replenish stocks and pay debts contracted during the bad season of 1888-89. The labourers north of the Ganges have received full compensation for the enhancement in the cost of living by a rise in wages, and the fact is one of the most assuring observed in recent years. South of the Ganges, in so far as they are paid in money, the working classes must have suffered.

The subjoined table shows the rainfall recorded in the principal centres of each of the districts of the Orissa Division during the year as compared with the figures of the previous two years:—

Orissa Division.

		1889-90.	1888-89.	1887-88.
		inches.	Inches.	Inches.
Cuttack	{ Sudder 30·8	52·21	54·06
	{ Jajpore 39·57	62·96	52·09
	{ Kendrapara 1·25	46·78	60·55
	{ Banki 18·67	45·46	41·59
Pooree ...	{ Sudder 7·15	39·72	37·50
	{ Khoorda 0·70	44·98	41·16
Balasore	{ Sudder 2·75	59·98	58·25
	{ Bhuddruck 31·14	52·05	54·36

The rainfall of 1889-90 was copious everywhere except in Banki and the Sudder sub-division of Balasore, but it was not evenly distributed throughout the division. In Pooree want of rain in the early part of the year retarded cultivation, while in Cuttack the crops were injuriously affected by the somewhat scanty fall of September. In both these districts, as also in the Bhuddruck subdivision of Balasore, the crops were considerably damaged by the heavy rain and storm in November; but the outturn of the *saral* rice, which at one time promised to be a full crop, was still not less than 14 annas except in the Jajpore and Kendrapara sub-divisions of Cuttack, where it was 12 and 10 annas respectively. In a tract of about 300 square miles in the Sudder sub-division of the Balasore district, comprising thana Balasore and the neighbouring part of Soro thana, the rainfall was very scanty up to the beginning of October, and more than two-thirds of the crops perished.

The year was one of high prices, as will be seen from the figures given below:—

		Average price of rice per rupee.		
		1889-90.	1888-89.	1887-88.
		S. c.	S. c.	S. c.
Cuttack	...	16 8	17 15	19 3
Pooree	...	17 15	18 3	21 5
Balasore	...	19 12	23 5	25 12

The general condition of the people was the reverse of prosperous. The price of food was high owing to the shortness of the harvest in 1888-89, and the effect of this on the condition of the working class was not counteracted, as it was in some other parts of the country, by unusually steady demand for labour, or by any general rise in wages. The crop gathered during the year was not exceptionally bad, but, on the other hand, it was not good enough to compensate for the deficiency in the two preceding seasons by replenishing the exhausted stocks. Distress was felt in Banki in the district of Cuttack

and in parts of the Sudder sub-division of Balasore, where it was found necessary to undertake measures for affording relief.

The following statement shows the total quantities of rainfall registered in the several districts of the Chota Nagpore Division during the past three years:—

			1889-90.	1888-89.	1887-88.
			Inches.	Inches.	Inches.
Hazaribagh	43·07	55·03	51·26
Lohardugga	{ Ranchi	...	56·39	49·93	60·44
	{ Palamow	...	34·49	50·40	50·96
Singbhoom	50·84	41·76	54·63
Manbhoom	45·69	60·10	49·44

The rainfall of 1889-90 was generally sufficient and well distributed, and consequently the harvests were everywhere good except in Palamow, where, with the exception of Indian-corn, the outturn of all other crops was below the average.

The following were the average prices of rice and wheat in the several districts:—

	RICE PER RUPEE.			WHEAT PER RUPEE.		
	1889-90.	1888-89.	1887-88.	1889-90.	1888-89.	1887-88.
	S. c.	S. c.	S. c.	S. c.	S. c.	S. c.
Hazaribagh	16 13	15 15	19 9	14 10	14 12	15 6
Lohardugga	17 14	16 11	21 13	12 2	12 7	18 15
Singbhoom	20 0	19 5	26 1	10 8	12 2	20 6
Manbhoom	19 6	13 14	25 8	12 9	12 4	15 9

The price of food was high—a condition favourable to the ryot in his character of a producer, but injurious to such labourers as are paid in money. The yield of the different crops was good, with the result that there was a large increase in the export trade. In the Lohardugga district there was a distinct rise in the rate of wages, and a similar tendency was observed in Manbhoom. Public health was better than in the preceding year, and there were also some minor causes at work to improve temporarily or permanently the condition of the masses, which in this division is generally the reverse of satisfactory.

Statement showing the average retail price of common rice at the head-quarters station of each district during the year 1889.

N.B.—The statement shows roughly the distribution of rainfall according to the needs of the agriculturists. The fall to the end of April may be called "the ploughing fall," and that to the end of June "the sowing fall." The fall between June and August matures the *amun*, and is essential to the transplanting of the *amun*. The fall in September matures the *amun*, while that after September fills out the ear of the *amun* and determines the prospects of the *rabi*.

[illegible]

Famine and Flood Relief Administration.

THE distress from scarcity in North Behar continued for nearly the first seven months of the year under report; considerable distress prevailed for a time in Angul and the Tributary Mehals in Orissa; parts of the Contai subdivision of Midnapore district, and portions of the district of Balasore continued to be affected to some extent by the effects of previous bad seasons; and damage was done by floods in the districts of Moorshedabad, Nuddea, and Purneah.

In North Behar there had been a partial failure of the rains in the critical months of September and October 1888, so that relief operations had to be commenced as early as

North Behar.

January. In March it was reported that the outturn of the *rabi* was fulfilling expectations, and that the condition of the people on the whole was as good as could be expected, except in part of Durbhunga. These anticipations, however, were not realised, and in April and May the conditions were very unfavourable. During the fortnight ending with the 31st May the symptoms of distress increased to a considerable extent, and the activity with which relief operations were being conducted also increased. The number of labourers employed during this fortnight was approximately 46,000. In these two months the Lieutenant-Governor sanctioned the allotments of Rs. 80,326 and Rs. 37,675 for loans under the Land Improvement and Agriculturists' Loans Acts respectively; and sanction was accorded to an expenditure of Rs. 75,000 on civil agency works in Gya, Durbhunga, Mozufferpore, and Chumparun, and to a grant of Rs. 20,000 for roads in Mozufferpore outside the area previously classified as distressed. With regard to the strong recommendation of the Commissioner that the construction of the railway from Durbhunga to Sita-marhi, a survey of which had been completed, should be undertaken, the Lieutenant-Governor authorised the commencement of earthwork on this line as a measure of relief, observing that, even should the railway not be ultimately approved, the work would have some utility as an ordinary means of communication.

On the 26th June 1889 relief works in Chumparun were temporarily closed on account of the abundant rain, which ensured full employment for the people on agricultural labour. It was reported that sowings were nearly complete, transplantation of winter rice well started, the *bhadoi* looking healthy, the mahajans freely lending money and grains, and increased gratuitous relief, as a substitute for employment, unnecessary. In the Durbhunga district there was a large reduction of 70 per cent. in the attendance at the works around Balua and Benipatti, where the conditions had previously been especially bad, and very heavy rain fell in the district. The prices-current return of food-grains for the fortnight ending on the 15th June showed that up to that date the previous high rates of 11 seers and 12 seers the rupee, respectively, had been maintained at Chumparun and Mozufferpore, while there had been a slight rise from 13 seers 4 chittacks to 12 seers 9½ chittacks at Durbhunga.

The rainfall during the fortnight ending with the 30th June and in first week of July 1889 was nowhere deficient. In some places, indeed, it was excessive and gave rise to apprehensions of new and special difficulties. In Chumparun the crops were damaged by superabundance of rain, sunshine was much needed, and destitution was not diminished. There were nearly seven inches of rain in the week ending on the 6th July 1889. In all the three northern districts of Behar a large proportion of the people on the relief works left to pursue their own agricultural operations, but a considerable number still remained, and now that tank work was impossible, and much of the road work completed, it became necessary to provide for these partly by new works, and mainly by enlarging the sphere and strengthening the system of charitable relief, till such time as the autumn crop, which formed a very important element of the food-supply in these districts, was assured. In Mozufferpore

and Durbhunga the rainfall lowered the number of labourers on the works from 17,278 and 14,656,—total 31,934,—to 10,114 and 6,270,—total 16,384,—during the fortnight ending with the 30th June; but it also tended to interrupt communications, and in this way caused an increase in prices in certain localities. In spite of the heavy rain (5·56 inches) in Durbhunga, ploughing, sowing, and transplanting were vigorously pushed on.

In the week ending on the 20th July great heat prevailed but within the next few days there were falls of as much as 10 inches at Bettiah, the same at Sitamarhi, and at Pupri, further east, of 17 inches, and a general heavy and continuous downpour at Durbhunga and Mozufferpore. The minor relief-works had to a great extent been closed, but the Sitamarhi-Durbhunga railroad was still open.

The Lieutenant-Governor made a tour in the affected districts in North Behar between the 15th July and the 7th August, and inspected as much of the affected area as was not inaccessible by reason of the floods.

In Mozufferpore floods occurred after the heavy rain of the 23rd to the 25th July. The overflow of the Bor-Gunduk which rose this year above its highest recorded level, was aggravated by the breach in the long Toorki embankment south of the Bagmutti, and these floods were the immediate cause of much injury to the crops in the centre of the district. To the south-west the water from the main Gunduk came down from the Chumparun district, and in the Sitamarhi division the overflow from several hill streams was locally severe enough not only to interfere with the use of the main roads, but to threaten communications in the interior for a time. The damage done to the *bhadoi* crops, which had been previously very promising, was estimated at 6 annas in the Mozufferpore thana, 5 in Kuttra, 3 in Paru, or an average of 5 annas in the Sudder subdivision, 3 annas in the Sitamarhi thana, 1 in Sheohur, 6 in Pupri, or an average of 3 annas in the Sitamarhi subdivision. All relief works were practically closed by the 12th July, with the exception of the employment obtainable on the Durbhunga-Sitamarhi-Bairagnia extension of the Tirhoot State Railway under professional agency. During the fortnight ending on the 31st July the number of persons (3,027,) requiring gratuitous relief increased, uncooked food was distributed at 13 centres to 2,609 persons, and cooked food at three places to nearly 500 recipients, zemindars providing gratuitous relief for some 2,765. Arrangements were made to facilitate communications by boats where roads had been breached or were unbridged. Stocks showed no sign of depletion, but prices rose from 12 seers 8 chittacks to 11 seers the rupee, and to 8½ seers and 10½ seers in places in the Sitamarhi subdivision. Pending the receipt of more complete information the Lieutenant-Governor directed liberal grants to be made for agricultural loans and gratuitous relief, and allotted for these purposes as a provisional grant Rs. 15,000 and Rs. 5,000 respectively, besides strengthening the staff at the Collector's disposal.

During this fortnight relief works on roads in Durbhunga were being closed, though 5,726 persons were still daily at work on the dressing and turfing of roads and tanks at the end of July. In the Madhubani subdivision, which contained the affected area, prices were almost stationary, ranging from 10 seers 12 chittacks to 12 seers 8 chittacks the rupee for common rice at the various marts, and at one place touching 8 seers the rupee. At Durbhunga the previous fall of price from 11 seers 6 chittacks to 12 seers 8 chittacks the rupee continued and reached the rate of 13 seers 6 chittacks. After the heavy rain on the 25th July the rivers Daus and Kumla rose, and a considerable tract of country was inundated, especially near Bulwa, but as the floods subsided in three or four days no great damage was done, some of the *bhadoi* only in the low lands being washed away.

The Lieutenant-Governor made a long excursion from Durbhunga through the most severely affected tracts of the Madhubani subdivision *via* Raika, Benipatti, and Umgaon on the Nepal frontier, and then down to Gangour. He was very well satisfied with the condition and prospect of the crops actually seen by him. He inspected famine relief tanks, finished and unfinished, at Benipatti, Gaibipur, Maini, Barohur, Satgaon, Umgeon, Durgapati, and Gangour, only some of which were still open. At Satgaon 26 persons were being fed daily at a relief kitchen, the number there never having exceeded 81.

In Chumparun unusually heavy rain had caused floods, which seriously aggravated the sufferings of the people. In the Bettiah subdivision the Gunduk, on the western boundary, reached a higher level than had been attained in the six previous years, and a heavy flood also came down the Sakrana and its kindred streams. On the whole, however, the damage was comparatively slight in this subdivision, as most of the tract covered is liable to inundation and suffers to some extent annually; but Tuppa Bahas in the Sudder subdivision, outside the affected area, suffered so severely that it was necessary to regard it as affected. The Gunduk embankment was breached at the 60th mile opposite Saroya, and the spill extended eastwards until it met the Byah nullah at the 83rd mile, so that the inundated area was estimated at approximately 50 square miles. The Lalbakeya, a branch of the Bagmutti, and the Bagmutti itself, also overflowed and caused damage to certain villages. The *bhadoi* was estimated to be a twelve-anna crop, and the rice crop in the inundated area to be not more than four annas. The villages affected by the bursting or cutting of the Tikaha bund lost eight annas of their paddy and twelve annas of their *bhadoi*. Several in the area previously affected were seriously damaged by the floods, but in most of them the prospects were good. The inundations subsided rapidly. The rainfall up to the 15th August doubled the normal amount, but there had been a break. The submerged *aghani* dhan had been for the most part retransplanted. Relief works were all closed, and none of any value could be carried on in the inundated tracts. Gratuitous relief was distributed to 153 persons in the affected area and to 135 in Motihari, the recipients numbering over 1,000 in the middle of August. Prices slightly rose all round, and common rice ranged from 9 seers 12 chittacks to 10 seers the rupee. Works of any value being practically impossible in a flooded country, the Lieutenant-Governor sanctioned a grant of Rs. 3,500 for distribution by way of gratuitous relief, and a sum of Rs. 30,000 for advances under the Agriculturists' Loans Act, after the usual enquiries, in addition to that already sanctioned for this purpose.

As the floods appeared likely to prolong the scarcity and intensify the consequent suffering, Sir Steuart Bayley paid another visit to Mozufferpore.

In the district of Durbhunga the number of persons on relief works rose from 5,726 at the end of July to 19,174 and 19,570 during the fortnights ending 15th and 31st August, respectively, in consequence of the crowding of the people on the only work then available, viz., that of finishing, sloping, and turfing the roads and the side of the tanks. The number fell to 9,158 by the 15th September and to 6,213 by the 22nd idem. The floods did not last long in this district, and therefore did but little harm. The prices of food-grains fell fast, rice going down from 12 seers to 14 seers 13 chittacks the rupee, *murwa* improving from 20 seers 9 chittacks to 24 seers the rupee, and *makai* from 17 seers 2 chittacks to 22 seers 13 chittacks, at which it stood on the 15th September. The numbers on charitable relief also decreased. On the 15th September there were 4,894 employed on tanks, including the 1,437 women and children on special tanks. Heavy rain fell in Durbhunga on the 22nd September; there was since the 1st September, up to 8 a.m. on the 29th, 11.20 inches as compared with an average of 9.25 inches during the same period; and as the *bhadoi* was sufficient to carry the people on till the harvesting of the winter crop, Sir Steuart Bayley directed on the 3rd October that relief works should be closed, and that no further gratuitous relief should be given at the expense of Government.

The Sikran a flood had fallen considerably by the 14th September. The floods of the Great Gunduk destroyed the crops over an area of 117 square miles, with a population of 58,500 souls, of whom about 10 per cent. were regarded as distressed. Part of the country inundated to the east of Motihari was the same as the old drought-distressed area. The prospects of the winter crops not submerged by the floods were excellent. Prices fell considerably, rice being at the time sold at 13 seers the rupee at Bettiah and 12 at Motihari, and 17 seers of *murwa* and 14 of *makai* being obtained for a rupee, on the 15th September. On the 14th there were 1,600 men employed on the relief works at Segowli, on the Nepal road: there were also works in the Dhaka thana. Cooked food was provided at Motihari to about 426 persons daily, and uncooked food was distributed

by canoongos to about 200 persons daily in the old affected area, and by other canoongos in the parts of the flooded area which were not included in the Bettiah Raj or planters' villages. In this newly-affected area a total of 2,700 persons received gratuitous relief in this shape. Indigo-planters afforded material assistance, relief in some cases being given entirely at the private expense of the factories, and in others shared with Government. The Bettiah Raj took all their own villages off the hands of Government, and the zemindar of Madhuban also undertook some charitable relief. A canoongo and some police officers were sent round with money for distribution where required in the area submerged by the Gunduk. On the application of the Collector, the grant of an additional sum of Rs. 20,000 for loans under the Agriculturists' Loans Act was sanctioned.

To the south of the Toorki bund and the Bagmutti, a tract of about 27 miles in length and varying from 1 to 3 miles in breadth, thus covering approximately 81 square miles, suffered most severely, the entire crops having been washed away chiefly in consequence of the junction of the flood from the Bagmutti with the spill from the Bor-Gunduk. The worst part of all was about 12 miles east by west from Mozufferpore, between Athar factory and Katara thana. To the north of the former factory there was little hope of any crop.

In the Sitamarhi subdivision there were, during the fortnight ending on the 15th September, 14 Government relief centres where cooked or uncooked food was provided, and the management remained in the hands of responsible officers and planters, under the general supervision of the Sub-Deputy Collectors. The numbers reported as having received charitable relief at Government centres were 426 men, 2,668 women, 2,656 children, total 5,750, for 14 days. The daily average relieved by zemindars was 1,930 persons, and there were 1,131 persons, almost entirely children, at the kitchens. There were also four large centres of private charity. The numbers subsisting on gratuitous relief fell off daily, labour being found in connection with the harvesting of the *bhadoi* crop. As many as 3,350 persons were employed on the 6th September on the light work of turfing the embankment of the Sitamarhi-Durbhunga railway extension. Between the 28th August and the 11th September there was on professional agency works on this railway extension a daily average of 2,078, which in August fell to 1,057 and in July to 1,156 persons. The cessation of the distribution of uncooked food was directed on the 15th September as far as possible, the kitchens being maintained only for the young and the weak. Arrangements were also made for the opening of light works, if necessary, in the north of the subdivision on the completion of the *bhadoi* harvest. The Commissioner considered Sitamarhi to be out of danger, though cholera was still prevalent.

In the Sudder subdivision relief in cooked food was given daily at the American Mission and at the cutchery at Mozufferpore, and in the shape of uncooked food at 16 indigo factories. Four canoongos were also engaged in going about from place to place to make enquiries and draw up lists of people in want, and were supplied with money to relieve urgent distress wherever they found it. To ensure that the canoongos left no village unvisited, and to supervise their work in detail, an Assistant Superintendent of Police, Mr. Gayer, was transferred from Bankipore and placed under the Collector's orders. Prices were stationary, rice being at $12\frac{1}{2}$ seers the rupee at Mozufferpore on the 14th and at Sitamarhi, and 9 seers 12 chittacks at Bela. *Makai* was at 16 seers the rupee at the Sudder station.

The daily average number of men, women, and children receiving charitable relief in the Sudder subdivision of Mozufferpore between the 28th August and the 11th September were reported to be as follows :—

At cost of	Men.	Women.	Children.	Total.	Cost.
Indigo factories ..	645	2,279	3,482	6,406	Rs. ...
Zemindars ...	92	102	156	350	...
Government ...	221	611	545	1,377	...
Total ...	958	2,992	4,183	8,133	3,333

The sum of Rs. 81,854 was advanced in Mozufferpore in agricultural loans. These were made on three distinct systems. Under the first the planters received the loans from Government at $6\frac{1}{2}$ per cent. interest, and were themselves responsible to Government: no further enquiry was made by the Collector, and no names but those of the planters were on the Collector's books. In other cases individual ryots took the loans with the assistance of the planters, i.e., the ryots were responsible, though their respectability was vouched for by the planters: the lists were tested by the planters, but only the ryots' names appeared in the bonds, and the planters were not legally responsible. Ryots outside the factory areas received loans on joint and several security under the rules, each recipient being asked for an assurance, by a separate letter apart from the bond, that he would not recover more than $6\frac{1}{2}$ per cent. interest. Similarly proprietors were allowed to give the required security and take loans where they were known to the authorities; but care was taken to prevent them from making a business out of the loans, or regarding them as affording opportunities for a financial venture.

During the fortnight ending with the 30th September 1889 the distress caused by the autumn floods diminished, and in most places altogether disappeared.

During the fortnight ending on the 15th October distress in the Patna Division was confined to the flooded area from the Bor-Gunduk to the Bagmutti, the similar but smaller area near Sareya, the narrow strip in Chumparun adjoining this, and a very small bit near Sursand; but the resources at the Commissioner's disposal were ample to meet all requirements. Instructions were issued on the 26th October for closing gratuitous relief as far as possible, and the Commissioner was informed that, if relief was to be continued at all, it should be in the shape of works as directed by the Lieutenant-Governor when at Mozufferpore in the preceding month. The last remaining relief centres—the kitchens at Motihari and Sursand—were closed towards the end of October; and relief works and gratuitous relief were stopped everywhere by that time. In November distress disappeared everywhere, and prospects were good. Of the Rs. 30,000 last sanctioned for loans in Mozufferpore, Rs. 17,000 were expended.

In Soopul rice rose to 13 seers the rupee in May 1889, and up to that time employment had been found for the people requiring it on excavating tanks, of which 27 had been finished at the expense of private persons or of the Court of Wards. One road was under construction, and there was no great demand for labour on it, only 31 persons having sought employment. In June, however, distress deepened, and considerable works were in progress in the affected tract at the expense of private zemindars and of the Local Board. The situation, however, soon changed for the better with the more favourable rains, which succeeded and admitted of the completion of the *bhadoi* sowings and the preparation of late rice seed-beds. In July the prospects of late rice were excellent all over the district, and labourers obtained sufficient work in the fields and received their wages generally in kind.

Out of the grant of Rs. 20,000 sanctioned by Government in April 1889 for advances under the Agriculturists' Loans Act, Rs. 14,566 were expended up to about the middle of July, Rs. 4,021 in the Sudder subdivision, Rs. 2,085 in Banka, and Rs. 8,460 in Soopul. In addition to this the sum of Rs. 7,936 was in the middle of July disbursed in agricultural loans on the Srinagar ward's estate.

In June relief works were opened at 13 places in the Sudder, Banka, and Soopul subdivisions, and these were attended on the 15th of that month by 1,412 persons, on the 29th by 1,965, and on the 13th July by 741 only. In July all tank works were of necessity closed in consequence of the rains, and the unexpended balance of Rs. 5,000 granted by Government in the previous month of April for the excavation of tanks was applied in other directions. In August works were closed in all excepting six places—two in Banka and four in Soopul; and two were then in progress in Soopul under the District Board.

In September copious rain fell, and all relief works were stopped.

In addition to the relief operations carried on at the cost of the District Boards and Government, measures were undertaken by the Durbhunga Raj to

relieve the distress of its tenants, and contributions were received from the Maharaja of Bettiah and the zemindars of Sursand towards the cost of the operations carried on in their zemindaris. The circles more or less affected in the Durbhunga Raj were Parihar, Naridigar, Rahika, Jale, and Alapur. A sum of Rs. 1,38,096 was expended on relief works and charitable relief and in advances to ryots.

The following statement shows the expenditure incurred under the several heads from the commencement up to the close of the relief operations in the affected tracts of the Patna and Bhagulpore Divisions:—

DISTRICT.	Period to which the expenditure refers.	PRIVATE EXPENDITURE ON—		DISTRICT BOARD'S EXPENDITURE ON—		GOVERNMENT EXPENDITURE ON—			Advances under the Land Improvement Act.	Advances under the Agriculturists' Loans Act.	Total.

(a) Of this Rs. 817 represents the pay of the Famine establishment paid direct by Government, and the balance through District Board. Total expenditure in Patna Division Rs. 8,48,042-14-9. Rupees 260 were advanced by Durbhunga Raj for digging wells. Rupees 5,450 were given as tucavi advances by the Srinagar estate. The accounts for Durbhunga have not been finally closed.

In consequence of the partial failure of crops caused in the preceding year by scanty rainfall, there was general scarcity in most of the Tributary Mehals of Orissa. The day-labourers, consisting of aborigines and semi-Hindus, were the principal sufferers, and were the persons who chiefly benefited by the relief measures adopted by Government and the Native States.

Early in the year, as soon as the pressure consequent on the failure of the preceding year's harvest began to be felt, the agriculturists found themselves unable to keep the field labourers in their service and discharged them. The latter were thus suddenly thrown out of employ, and were unable to find work elsewhere. In ordinary years they might have subsisted for some time upon the edible roots, fruits, etc., of the jungles, but unfortunately in the year under review there was no rain in several of the States from November till about the end of June, and jungle produce either failed or became very scarce. The labourers therefore being suddenly deprived of all sources of subsistence, could only be supported by special measures until a demand again arose for their services.

In Athgarh, Dhenkanal Pal Lehar, Nilgiri, Keonjhar, and Mourbhunj there was no great pressure, and relief operations were not needed. Hindole, Rampore, and Talchere suffered to some extent, and small measures of relief were adopted. But in Angul, Tigiria, Baramba, Narsingpur, Athmullik, Khondmals, Boad, Daspalla, Khondpara, and Noyagarh distress was more or less severe, and it was in these ten mehals that the larger measures of relief were adopted.

The distress during the months of April and May and part of June was naturally at its height, there being no work available in the fields, and the mango and mohwa crops having proved indifferent. In the latter part of June

A short account of each of the ten States referred to above is given below.

Tigiria.—This being the poorest and smallest of the Tributary States, the Raja borrowed Rs. 6,000 from Government for relief purposes. He is reported to have spent Rs. 8,088 in relief measures.

Baramba.—This is one of the States that suffered most from the scarcity: it had suffered from two successive bad harvests, and relief measures, which had been commenced in August 1888, were continued with a short intermission until November 1889. As soon as symptoms of distress were visible, the forest rules were relaxed, and the poorer classes were thus enabled to earn a livelihood by selling fuel and bamboos. The relief expenditure was as follows:—

	1888-89.	1889-90.	Total.
	Rs. A. P.	Rs. A. P.	Rs. A. P.
Gratuitous relief	30 3 0	1,646 10 3	1,676 13 3
Ordinary public works	2,618 13 9	2,202 4 4	4,821 2 1
Extraordinary relief works	1,126 9 9	6,422 3 5	7,548 13 2
Work for artisans	744 13 1	744 13 1
Advances to agriculturists and { cash	4,090 8 0	3,958 8 0	7,989 0 0
artisans { kind	2,480 0 0	859 0 0	3,339 0 0
Advances to grain-dealers	750 0 0	...	750 0 0
Miscellaneous relief expenditure	3,325 14 4	44 5 4	2,370 3 8
	13,362 0 10	15,877 12 5	29,239 13 3

Narsingpur.—This State, like Baramba, was severely affected by the scarcity. Relief operations commenced here a little later than in Baramba, in consequence of which the need for gratuitous relief became greater ; but from the time the operations were taken in hand they were carried on vigorously. Rupees 19,990 and Rs. 1,615 were expended respectively by the State and private persons on relief measures. The State borrowed Rs. 10,000 from Government for the purpose of relief.

Athmullik.—The distress was as great here as in the neighbouring States, but owing to the measures adopted by the Maharaja, it was not felt severely. The total expenditure incurred by him in the relief of distress amounted to Rs. 31,361, while remissions to the extent of Rs. 5,343 were made in land revenue and miscellaneous demands of the State. The expenditure includes Rs. 23,884 on account of advances. The Maharaja borrowed Rs. 5,000 from Government.

Khondmals.—The measures organised for the relief of distress in this State consisted chiefly in giving agricultural loans; making advances, which after the field season were to be repaid, not in cash, but in labour; providing works for those willing to work on road and tanks; making advances to weavers, and opening centres for gratuitous relief on a small scale. The total expenditure amounted to only Rs. 7,620.

Boad.—Relief measures were organised rather late in this State. Of the different measures adopted, one only, viz., the advancing of grain, was on a sufficiently large scale, and was of material help to the agriculturists, and of assistance, through them, to the labourers; but the other measures of relief were not carried out in a systematic way. Nevertheless, a large number of landless people, who might otherwise have perished, did receive substantial help. The total relief expenditure is reported to have been Rs. 55,112, including Rs. 40,435 on account of advances, made chiefly in food-grains. Small contributions towards relief were also made by private persons.

Daspatha.—That portion of the State which lies on both banks of the Mahanaddy was principally affected by the failure of crops. No adequate measures were adopted until the Government took the relief administration into its own hands in August 1889. By the middle of November, when the harvest of the early amun had been reaped, the need for relief entirely disappeared and the relief centres were closed. Rupees 9,000 were advanced by Government, out of which only Rs. 7,000 were paid to the State for relief operations, the balance Rs. 2,000 having been refunded to the treasury. The total relief expenditure incurred by or on account of the State amounted to Rs. 10,641, of which Rs. 8,395 consisted of advances. The Raja repaid the Government loan with interest since the close of the year.

Khondpara.—In this State the distress was comparatively the greatest, but the measures of relief were inadequate. The Raja reported that his total expenditure on relief amounted to Rs. 59,192, inclusive of Rs. 50,809 on account of advances, which consisted chiefly of the value of food-grains calculated at famine rates. The Raja took a loan of Rs. 15,000 from Government.

Noyagarh.—Here, too, the distress was great; relief operations were commenced late, and large expenditure on gratuitous relief had to be incurred. The State treasury was empty, and relief was not commenced till the receipt of the first instalment of a Government loan in the latter end of June. This State incurred a loan of Rs. 25,000 from Government, and reported having spent Rs. 19,806 in relief measures.

Relief in grain was continued to be given in the affected tracts from funds obtained from the Calcutta Famine Committee: it was only distributed once a month. Four hundred and twelve persons were relieved during the fortnight ending the 31st August 1889. The work in the Balliaghya branch canal was stopped on account of the rains. Only half the amount of rice was given to the necessitous in pergunnah Bajarpore in October, and it was altogether stopped in November.

In the centre of the Balasore district there was a rainfall of only 28 inches from 15th April to 6th October, as against an average of 55 for the same period. With scarcely half their usual supply, the tanks were everywhere drying or dried up, and there arose a panic among all classes of a water famine. This terrible evil was happily averted by the unseasonable rain of October and November, which helped to bring up the average for the year, but failed to revive the dying rice. The result was that in a tract of some 300 square miles more than two-thirds of the crops perished. In this tract there is no *rubbi* cultivation, and the ryots had reaped but a scanty harvest in 1888, so that they were put to no little distress. In Jellasore the harvest was poor, and in Balasore and the neighbouring tract of Soro thana very poor. From April till October there was considerable distress in Bhograi, where Rs. 1,350 were spent in feeding beggars. Similarly at Talpada it was found necessary in February to maintain a limited number of old, infirm, and destitute persons, and to provide a few hundred able-bodied labourers with employment. Gratuitous relief in both cases was afforded at the expense of private individuals, who subscribed liberally for the purpose. The cost of relief works was borne partly by the District Board and partly by Government.

The river Bhagiruthee rose this year to an unprecedented height, and extensively flooded the parts of the district unprotected by the embankment. Notwithstanding the

Moorshedabad.

high pressure from the mass of water, the embankment stood firm, but on the 31st August (the very day on which the Berhampore gauge showed 30 feet $4\frac{1}{2}$ inches, the highest on record), it was wilfully cut at Bairamgunge, half-way between the civil station of Berhampore and the City of Moorshedabad, by villagers on the lower side to obtain water for their *amun* rice. The breach was 90 feet wide, and the water flowed in with great violence in a northern direction to the Motijheel, and inundated all the southern part of the town. On the 1st September the embankment was also cut at a place called Rampal, about 12 miles north of Azimgunge, by villagers on the upper side with a view to let off the water which endangered the foundations of their houses. The width of this breach extended up to 900 feet. The water passed over the causeway of the Bhugwangola road and inundated the low-lying part of the tract of country between the Bhairab and the Jellinghee. At Gouribag on the Gobra nulla the Rampal flood-water joined the flood from the Bairamgunge breach. There was a sheet of water with the villages and trees rising out of it, and only the higher crops appeared out of the water near the uninjured villages. The water was generally 4 to 6 feet deep over the fields; but as the village sites were all well above the water level, the villagers were able to stay there with their cattle, and remained until the level of the river subsided. The water drained off by the Gobra nulla, and ultimately met the Jellinghee, so that the country between the Bhagiruthee and the Jellinghee was the seat of the damage. The area in square miles of the country affected was between 250 and 300.

Immediately on the occurrence of these floods, the Nawab Bahadur of Moorshedabad permitted all persons rendered houseless to take refuge in his palace compound and buildings and in the Nizamut stables; and the Collector received private donations amounting to Rs. 5,100, which he utilised in feeding the very poor, in giving grants-in-aid to people to rebuild their huts, and organising arrangements for procuring fodder for the cattle. Moodies' shops were sent out on boats to the isolated villages with officers to see that food was supplied at proper rates, and that assistance was given if any cases of real distress were met with.

On the 12th September the Lieutenant-Governor visited the Moorshedabad district, and was satisfied that everything possible was being done to relieve the immediate wants of the people.

The general condition of the people was good, and there was no distress in the sense of want of means of subsistence, although there was temporarily much discomfort and inconvenience. Ten annas of the *aus* rice were harvested in the Jungipore and Sudder subdivisions, and the damage in the other subdivisions was not at all serious.

In the beginning of September there was a high flood in parts of this district, and the embankments on the left bank of the Jellinghee river were in danger from the

Nudda.

increasing flood in that river. An embankment on the left bank of the Kumar river burst and flooded a small area of the Kushtea subdivision; in the Tehatta thana of the Meherpore subdivision the water rose to the foot of the houses, some of which had fallen; and to the east and south of the Sudder subdivision the waters increased, having surmounted and breached the embankments in the Jellinghee and Matabhanga. Sub-Deputy Collectors and Canongos were deputed to make a detailed examination of the flooded tracts, and the Collector himself visited them. The loss of crop was about 4 annas on the average, and there was no loss of life or cattle, and no distress anywhere.

In July the (main) Kosi river overflowed its banks, and flooded the extreme north of the Purneah district. Much of the water passed through various channels down

Purneah.

the Kara Kosi, $2\frac{1}{2}$ miles west of the Sudder station. The jurisdiction of the Nawabgunge outpost was completely submerged, and the *bhadoi* and *aghani* crops were seriously injured. But the flood soon subsided, no distress was felt by the people, and work on village roads failed to attract any labour. The Kosi flood also passed into the Panar river, and 40 square miles near Arrareah were under water for about a month. The people were put to serious

inconvenience, and the cattle suffered from want of pasturage. At the end of August the water was 4 to 5 feet deep over the fields, but the people had settled down and resumed their ordinary habits. The *bhadoi* had yielded an eight-anna crop, and a bumper *aghani* crop was expected. In the Sudder subdivision a large area was submerged, but the inundation quickly subsided, and retransplantation of seedlings was easily effected. The Collector made local investigations and found that no interference or relief was required from Government. In the Sudder subdivision lands on the banks of the big Kosi also were inundated. Nowhere were supplies deficient. Only a few hundred rupees were spent on road works, and no advances were required as loans. The floods did not cause more than temporary distress and inconvenience.

Land Records, Agriculture, and Horticulture.

THE statement annexed to this chapter shows at a glance the nature and amount of work done and the cost incurred under the supervision of the Department of Land Records and Agriculture in connection with survey and settlement operations in these provinces during the year under review.

Mr. A. C. Sen submitted a careful analysis of the Dacca district, which was sent to the Commissioner and Collector for their remarks, and has since been returned. Both the Commissioner and Collector speak highly of the report, and approve of nearly all the suggestions made in it. Some new and important facts in connection with the physical geography and geological formation of the district are brought to light in Mr. Sen's report. The existing system of agriculture is carefully described, and suggestions for improvement are offered.

These suggestions may be summarised thus:—

(1) One of the most important physical features of this and other riparian districts is the constant changes in river courses, in consequence of which churs or small islands are thrown up in the midst of streams near one of the river banks, and large tracts of land are carried away by the encroachment of the river on the other side. These changes prove a fruitful source of litigation and lead to serious disturbances of the peace, which, the Collector says, are inconsistent with good administration. Mr. Sen proposes that the Collector should be empowered to decide, summarily, the question of possession in such cases, and that a staff of surveyors should be permanently employed for the purpose of mapping the changes which take place from year to year.

(2) He points out that, in Dacca and other districts similarly situated, rivers, khals, and boats form more important means of communication than roads, bridges, and carts. In many cases the principal, if not the only, means by which native boatmen can get their boats up stream, with a strong current flowing against them, is by towing, known locally as *gooning*. It is therefore an object of importance that towing-paths should be kept in order. At present they are entirely neglected. Mr. Sen suggests that they should be taken charge of and kept in order by District Boards.

(3) Mr. Sen further states that the cultivation of cotton, potatoes, wheat, and sugarcane in the Dacca district might be improved with much advantage, and that creeks and public water-courses, which here, as elsewhere in Bengal, are silting up, should be taken charge of by Government.

The Collector is being consulted on the feasibility of carrying out these proposals.

The report of the Lohardugga district by Mr. B. C. Basu is under revision, and will shortly be sent to the Commissioner and Collector of Chota Nagpore for their remarks.

Mr. Basu, in his report, draws special attention to the scantiness of supply of food-grains in Lohardugga, which makes it necessary for the poorer sections of the population to supplement cereals by wild products gathered in the jungles; to the general indebtedness to Hindu money-lenders of the aboriginal peasantry; to the increasing efflux of what are called "free" emigrants from the district to the almost entire extinction of registered emigration; to the extremely backward character of the agriculture of the district; to the deficient supply of manure; to the rapid extension of cultivation, and the consequent diminution of the grazing area, which has led to a large decrease in the number of cattle. The Sudder subdivision of the district, comprising the plateau of Chota Nagpore Proper, possesses, in Mr. Basu's opinion, almost

perfect immunity from famine, while the subdivision of Palamow is as liable to it as the adjoining districts of Behar.

Messrs. B. C. Basu and N. N. Banerjee are now employed in preparing analyses of the Nuddea and Cuttack districts.

In connection with the duty of supervising agricultural improvements in Government and Wards' estates, Mr. Basu visited the Western Dooars in Julpigoree, and submitted a report regarding the agricultural resources of the Western Dooars. The report suggests various improvements, among which are the reclamation of jungle land by the opening out of roads and markets; the provision of supply of good water; and the introduction of potatoes, vegetables, and various crops suitable for cultivation in the estate. Major Boileau, the Deputy Commissioner of Julpigoree, has generally concurred in Mr. Basu's recommendations. The cultivation of potatoes and various vegetables was tried by some of the raiyats, and was found successful.

It was noticed in last year's report that crops in large tracts of Midnapore had been destroyed or damaged by floods; that a committee, consisting of Major MacArthur, Mr. Reily, and the Director of Land Records, had been deputed to enquire into the causes, and that a report had been submitted, in which these causes were analysed and remedial measures were suggested. Some of these measures were adopted, with markedly beneficial results, during the year under report, and others have lately been approved. The realisation of rent from the tracts submerged by flood—to which certain parts of Bengal are peculiarly liable owing to the system of embanking rivers, thus in time raising their beds above the level of the surrounding country—must always be precarious.

At the conference of the Directors of the Departments of Agriculture held at Delhi in 1888, the question of relieving the surplus population of overcrowded districts was discussed, and it was suggested, with reference to the congested districts of Behar, that it would be desirable to obtain and circulate information as to the precise terms on which lands could be had in Burmah, the nature of the soil, and the prevailing climatic conditions. The Government of India subsequently expressed a wish that the Government of Bengal should depute an officer to Burmah, for the purpose of discussing with the local authorities the procedure which should be adopted in order to attract settlers from Behar and the terms on which lands might be obtained. In March 1889 it was suggested that the most practicable way to test the feasibility of promoting emigration to Burmah would be to take some representative zemindars and capitalists to Burmah, to show them the lands that may be available for settlers from Behar, and to let them decide for themselves whether it would be desirable for them to take such lands, and to settle Behar cultivators on them, on such terms as might be agreed upon. This proposal was accepted by the Government of Bengal, and the Director of Land Records was deputed, accompanied by Rai Jai Prakash Lal, Manager of the Dumraon Raj; Mr. Hudson, Secretary, Behar Indigo Planters' Association, Mr. G. Walker, of Messrs. Gisborne and Company, and a party of cultivators from Dumraon. The results of the visit were—

- (1) That detailed rules were drawn up and approved, under which land can be obtained in Burmah on very favourable terms by Behar cultivators and capitalists.
- (2) That Rai Jai Prakash Lal, Manager of the Dumraon Raj, applied for and obtained a grant of fifteen thousand acres of land in one district, for settlement upon it of Behar cultivators, and that another Behar gentleman applied for and obtained a grant of fifteen thousand acres of land in another district.
- (3) That the Chief Commissioner of Burmah undertook to pay a subsidy of Rs. 8,000 per annum to the British India Steam Navigation Company, with a view to encourage immigration to Burmah, on the condition that the Government of India or the Government of Bengal was willing to pay a similar amount for encouraging emigration from Behar. The precise terms on which this subsidy is to be granted are still under the consideration of Government.

In accordance with the orders of the Government of India, enquiries are being made with a view to ascertain what lands are available for purposes of fuel and fodder reserves in the neighbourhood of recently constructed or projected railway lines. It has been ascertained that suitable lands can be obtained near the Assam-Bohar line in Dinagepore, near the Tirhoot extension line in Chumparun, near the East Indian Railway in the country between the Khanu Junction and Lukeosera. In the country through which the Bengal-Nagpore Railway passes, there would be no difficulty in selecting land suitable for fuel and forest reserves, nor would there be any in the country through which the projected line from Chittagong to Assam will pass.

The question of the future management of those parts of the Khymore hills over which Government exercises a right of easement, but is not proprietor, is still under consideration. There is now unanimity of opinion that the Ruhul and Rhotas plateaus, of which Government is sole proprietor, should be converted into fuel and fodder reserves, and managed by the Forest Department.

The subject continued to receive attention during the year. A list of plants available at the Botanical Gardens at Seebpore was again forwarded to all Commissioners of Divisions with a view to their applying to Dr. King for the plants mentioned in it. Fifty-eight thousand nine hundred and one plants and 3,619 packets of seeds were supplied as against 31,183 in the previous year. The increase is attributed by Dr. King to the interest awakened in the subject by the efforts of the Department of Land Records and Agriculture.

Apple, pear, orange, peach, and plum trees, which were supplied last year to certain gentlemen at Hazaribagh and Ranchi, are thriving. At Ranchi the peach and apple trees are bearing fruit. At Hazaribagh some of the apple trees are also bearing fruit. The plum and pear trees have grown to the height of six or seven feet, but have shown no signs of blossoming. The success of grape vine supplied to the Superintendent of the Reformatory School at Hazaribagh has, it is reported, been most surprising.

The Deputy Commissioner of Hazaribagh reports that of 400 seedlings of date-palm reared from seeds during 1888, 163 have died, and the remainder, 237, are in good condition, and have grown about 12 inches in height. Some seeds were also supplied to the District Engineer, Patna district, who reports that 85 young trees have survived and are thriving.

The Collector of Shahabad reports that the seeds of the date-palm sown in the Arrah, Buxar, and Dumraon gardens are in good condition, and that they have grown to a height of $2\frac{1}{2}$ feet. Some seeds were also sown at Sasseram, from which 10 plants have appeared above ground.

It was stated in last year's report that Eucalyptus plants which had been introduced in Hazaribagh and Lohardugga did not thrive there. The Deputy Commissioner, Hazaribagh, has since reported that the plants that were topped last year have thrown out lateral branches and are in good condition. The Superintendent, Tributary Mehals, has lately been supplied with some Eucalyptus seeds.

The Deputy Commissioner, Sonthal Pergunnahs, reports that there are now about 360 divi-divi trees in the compound of Katikund bungalow, and that they are thriving.

It was mentioned in former reports that Mr. Maries, who was formerly Superintendent of the Maharajah of Durbhunga's gardens, experimented with these trees on "usar" lands, and that he found that, not alone did they grow, but that they had the effect of reclaiming the land. Seed was therefore distributed in the districts of Behar and Bhagulpore for experiment.

The Commissioner of Bhagulpore reports that the seedlings planted in Maldah are thriving, but the seedlings did not thrive in Monghyr. The Commissioner of Patna reports that the seedlings planted in Sarun, Mozufferpore, Patna, and Shahabad are thriving. Mr. Hudson says these trees appear to grow best in *usar* land, where nothing else grows, while others say the plants

have no effect in the reclamation of *usar*. It is premature to form an opinion on the subject.

Cuttings of vanilla, which produces pods of high commercial value, were supplied to Mr. Doobay, Manager, Gurgung Jhora Tea Estate, Dooars, who reports that they are thriving.

Vanilla.

The work originally undertaken by Government at Berhampore for the eradication of *pebrine* among silk-worms, by the supply of untainted seed, was carried on during the year under the supervision of a committee of merchants interested in the trade, with Sir Alexander Wilson as President. There appears to be no doubt that the action taken has been judicious, and may ultimately result in reducing very largely the loss suffered from the disease; but last year the success obtained was not as great as had been expected. Of 7,295 maunds of seed raised, only 1,358 maunds were sold—a result which indicates no particular eagerness on the part of the villagers to obtain the improved production. Some experiments undertaken in Midnapore on a small scale were more successful. The sum of Rs. 5,000 a year is contributed by Government towards these experiments, and the services of Mr. N. G. Mookerjee, Probationary Deputy Collector, who has studied the subject in Europe, have been lent for the purpose. It is hoped that the work will be continued steadily for a series of years, as from its nature no great improvement can be expected to result at once, while perseverance will probably result in success, such as has been obtained by similar methods in other countries.

During the year under report several specimens of insects injurious to agricultural crops were obtained from district officers and forwarded to Mr. E. C. Cotes of the Indian Museum for examination, and with a view to his suggesting means of mitigating the injury caused by them. Mr. Cotes has embodied all the information supplied to him in notes entitled “Notes on Indian Insect pests” and “Notes on Indian Economic Entomology,” which have been distributed.

An investigation was made into the injury caused by *locusts*, and the result shows that they have not done very great damage in these provinces in recent years.

The Settlement Officer of pergunnah Serail reports that there was an invasion of locusts in that part of the country six or seven years ago. They did no appreciable damage to the paddy, which had become ripe and hard, but other crops suffered from their ravages. Protective fences were found partially efficacious in obstructing their flight.

The last locust flight in the district of Dacca was so far back as 25 years ago. Locust plagues are now unknown there.

In Shahabad the last locust plague occurred 11 or 12 years ago. No great damage was, it is reported, done to crops, and no special steps were taken to prevent their flight.

Agricultural experiments are now being carried on in three small farms at Dumraon, Burdwan, and Seebpore, and a series of experiments were tried in these places during the year under review. Experiments were made on wheat, sugarcane, potatoes, fodder crops, maize, paddy, fodder grasses, jute, cotton, gram, barley and oats, sorghum and *ulatkambal* (*Abroma augusta*).

In regard to the fodder grasses tried, the Director of Land Records observes:—

At Burdwan—

“From the statement given below it will be seen that bone-meal, applied at the rate of one maund per bigha, gave excellent results with *sorghum*, raising the outturn to more than twice that of an unmanured plot.—

Manure applied per bigha.			Outturn per bigha	
			Mds.	s.
Bone-meal, per maund	280	36
Unmanured	118	0

"This experiment further showed that *sorghum* succeeds as a rainy-weather crop where it had been found to fail as a cold-weather crop. In the absence of any demand for the grass, the whole of the produce was given to the bullocks of the farm, which did well on it, and used it with the greatest avidity."

At Seebpore—

"Experiments made with this crop last year confirmed the opinion expressed in the annual report of the previous year that *sorghum* can be profitably grown as a fodder crop in Bengal. The produce was sold at 2 annas 6 pies per maund to a Calcutta dairy, the manager of which, Mr. G. C. Bose, a Cirencester scholar, reported very favourably on it. The yield of milk of a number of cows was increased from 20 to 25 seers by the substitution of *sorghum* for straw; while the cost of feeding was at the same time reduced. Mr. Bose has been so far encouraged by the results that he proposes to grow *sorghum* as a fodder for his milch cows. The cultivation of *sorghum* realized a net profit of Rs. 12-12-3 per bigha."

The other experiments were attended with more or less success.

During the year demonstration farms were opened by Mr. Reily in five mehals of the Burdwan Raj, viz. Hukmapur, Nayar, Kanurambati, Bhedia Nursingpur, and Sayadpur, in order to bring home to the cultivators a knowledge of the results of certain experiments which proved satisfactory in the central farm. Experiments were made only with potatoes, but the financial results were not satisfactory, as the expenditure exceeded the receipts by Rs. 73-14-6.

Mr. Reily attributes this to the novelty of the experiments, which must not, he says, be judged by the results of one year.

The results of the experiments in potato cultivation in the Darjeeling Hills had shown that the place was full of disease germs, and that for some time to come it would appear to be unlikely that healthy potatoes could

Potato cultivation in the Darjeeling district.

be grown in Darjeeling. In order to investigate the spread of the disease, Mr. Basu visited the Darjeeling district in December last, and made enquiries of several European and Native gentlemen who were known to take interest in the cultivation of potatoes. From these enquiries and from the results of experiments made in the previous season, it was supposed that the disease might be mitigated by growing potatoes only on newly-reclaimed land, by avoiding the use of tainted seed-potatoes, by avoiding the use of dung which may have harboured the germs of the disease, by using ashes and chemical manures in its place, and by planting the crop early in January, so that it may be gathered in before the rainy season begins. In order to practically test these measures, fifty maunds of Sutton's seed-potatoes were imported from England, through the Agri-Horticultural Society of India, and distributed among a certain number of European and Native gentlemen and hill cultivators. The potatoes were planted in January and the first fortnight of February; but the sowing was immediately followed by an unusually long drought which, extending up to the second week of April, retarded germination. Notwithstanding this drought, the crop was reported to be in a healthy condition until the beginning of June, when the blight made its appearance and again spread with great rapidity over the district. The reports of the results of these experiments have not yet been received; but it is feared that potato experiments in Darjeeling will be as fruitless as they were in the previous year.

Agricultural implements.

The Seebpore plough has met with some recognition, though not very generally successful.

Mr. J. W. Crowdy, of Durbhunga, writes:—

"I find the Seebpore ploughs very useful, especially in light soils. I have now over 40 in use, and the great advantage I find is that they are so light that any bullock who can draw a common plough can work them with the greatest ease, so I have not to keep a large complement of bullocks, as I should have to do if they were heavy and unwieldy."

The Director of Land Records adds, as to other agricultural implements,—

"*Sugar turbine*.—The centrifugal sugar drier, also called the turbine, was exhibited at the Khoolna Exhibition, and an experiment made there in manufacture of *dolo* sugar by this machine proved successful. The turbine is coming into use for making *dolo* or *kutchu* sugar out of cane *rab* in the district of

Shahabad, and it is not improbable that it may be introduced for the same purpose in Central Bengal, where the manufacture of sugar from date-palm juice is an important industry.

Butter-making machines.—An interesting series of experiments was made during the year by Mr. Howman, who had been deputed to India by the Dairy Supply Company of London to show the working of the centrifugal cream separator and other dairy machines, with the ultimate view of creating a market for them in India. The experiments were made at the Metcalfe Hall in Calcutta, at the Khoolna Exhibition, and at Bankipore. A comparative trial between the English method of butter-making by these machines and the native process resulted in favour of the former; but the trials of the dairy machines were far from being conclusive, and leave it an open question which system, Native or European, gives the larger yield of butter. Since Mr. Howman left, Messrs. Basu and Banerjee have made a comparative trial between the European dairy machines and the Native churn, and have found that, not only in respect of quantity, but also of quality, the former are preferable. Attempts will be made to bring the dairy machines to notice at *mélas* and elsewhere."

The cost of these experiments is about six thousand rupees a year.

Within the last few years the collection of bones from village wastes for exportation to Calcutta has become the regular profession of a low caste of Hindus—Chamars—in the central and western districts of Bengal Proper, and is gradually extending to the outer parts of Bengal, in proportion to the increasing demand of the Calcutta mills and the extension of railway communication. Heaps of raw bones collected for transport to Calcutta may now be seen along the railway and principal river routes of Bengal. Bones are also collected by the indigo-planters of Behar for use on their indigo land. Many of them have erected mills for grinding them to dust. In Lohardugga many tea-planters make their own bone-meal and use it as a manure for tea plants. The bones are collected locally and coarsely ground by the *dhenki*. The fragments are not so fine as are turned out by the mill, nor are they required to be very fine for a slow-growing perennial like tea. The bones brought into Calcutta are bought up for manufacture into bone-meal. There are four or five bone-grinding mills at the present time in and near Calcutta. With the exception of a comparatively small quantity of bone-meal sent out to tea-gardens, the whole of the output of the mills is destined for export.

Raw bones as they come from the Chamars may be bought in the *mofussil* at eight annas per maund or less. In the tea-gardens in and near Ranchi they are delivered by the collectors at the rate of five annas a maund. At Dumraon, in Shahabad, bones have been collected at a cost of four annas a maund, and at Julpigore Mr. Donald Sunder, Settlement Officer of the Western Dooars, has arranged with Chamars to have bones delivered at the jail at a price not exceeding six annas a maund.

A comparative trial was made in the Seebpore farm as to the relative merits, in grinding bones to dust, of the *dhenki* and an English-made bone-mill supplied to the Department by Messrs. T. E. Thomson and Company. The results were that it cost two annas a maund less to prepare bone-meal with the *dhenki* than with the mill. Under the circumstances, the *dhenki* can be safely recommended as a cheap and effective means of crushing bones. If ryots ever take to the use of bone meal for manure, they will not have recourse to complicated machinery, but will use the *dhenki* in very much the same way that they grind wheaten and barley flour themselves, rather than buy the machine-made article.

Numerous experiments to test the efficiency of bone-meal as a manure for paddy have been made in Burdwan and Hooghly with more or less success. It is, however, satisfactory to note that a beginning has already been made by ryots in the use of bone-meal as manure in the districts of Burdwan and Hooghly. Arrangements have been made at Belcooly, Pearapole, and Khanian in the Hooghly district, and also in the Burdwan and Dumraon farms, and at Jheria in Manbhoom, to have bones collected and to have them fermented and ground into meal, and then to distribute the bone-meal at cost price to the ryots of the neighbourhood. In this way it may be possible to offer bone-meal at prices not exceeding Re. 1 per maund. At the suggestion of Mr. Donald

Sunder, Settlement Officer of the Western Dooars, and with the concurrence of Dr. Lethbridge, Inspector-General of Jails, it has been arranged to utilise the labour of Mahomedans, low-caste Hindus, and aboriginal prisoners at the Julpigoree and Purulia Jails for the grinding of bones. The bone-meal prepared in the jail will be available for sale at cost price to parties applying for it. Mr. Sunder believes that he will be able to induce the jotedars of the Western Dooars to use it largely. He has already purchased 50 maunds of bone-meal from Messrs. Croft, Wells and Company, of Bally, and distributed it among the jotedars of the Western Dooars.

The quantity of bones exported from Bengal is not exactly known, but it can represent only a small fraction of the total quantity available. It is only parts which are easily accessible from Calcutta by rail and river that are visited by bone-collectors, while in Behar and Lohardugga bones are collected and used up locally by the planters. The present export of bones cannot be said to be directly prejudicial to the country. It is better that the bones should be utilised in foreign countries than not at all; but it would, as a matter of course, be preferable that they should be utilised in India, if this can be done with profit to cultivators.

The total net cost to Government of agricultural experiments and enquiries conducted under the supervision of the Agricultural Department, and of collection of agricultural statistics and information during the year, exclusive of the salary of the two Agricultural Assistants, has been Rs. 6,034-2-9, or about one-third of the Government contribution to the Zoological Gardens. Whatever else may be said of these experiments and enquiries, it cannot at least be said that they are very expensive.

Experiments on various matters were conducted during the year in all the Divisions of Bengal except that of Chota Nagpore. The experiments consisted of the cultivation of arrowroot, castor seeds, safflower, coffee, mulberry, wheat, potato, cabbages, tobacco, paddy, &c.

In the Jaipore estate in Bogra, a new *hūt* was opened at a cost of Rs. 735; six new wells were dug at a cost of Rs. 60; some new roads constructed and old ones repaired. The cultivation of Buxar wheat was carried on, and sissou and other valuable trees, which had been planted in former years, were maintained at a cost of Rs. 82-5-7.

An important improvement was made in the Burdhankothi estate, in the district of Rungpore, under the managership of Moulvie Bazlal Haq. In January 1889, the Manager induced 76 families of Sonthals, including 318 persons, to immigrate into the estate for the purpose of bringing jungle land under cultivation. Since then there has, during the year under report, been an addition of 10 families with 40 persons, so that now a total of 350 persons have settled in the Sonthal colony in the Ghoraghat jungle. They reclaimed a tract of land and reaped the first harvest of Indian-corn in August last. The crop is reported to have been most successful. A second crop of mustard was grown by the settlers, and they promised to grow sugarcane and jute this year. The headman of these Sonthals has been sent to his own country to induce more families to immigrate, as the area to be reclaimed is very extensive, and at the present rate would take about 25 years before the whole of it could be brought under the plough.

The statement given below shows the expenditure incurred under this head :—

DIVISION.	In digging tanks and wells.	In draining and irrigation.	In dams and embankments.	In planting trees.	In agricultural experiments properly so called.	In sundry works.	TOTAL.

The necessity of such an institution has long been felt, and the question was again considered during the year. It came to notice that there has been recently established at

Veterinary College.

Sodepore, in the neighbourhood of Calcutta, a pinjrapole or asylum where 1,300 animals (cows, bullocks, horses, sheep) are fed and medical treatment is given to them. This institution was founded by some native gentlemen, and has been supported by donations from the public, which already amount to three lakhs of rupees. It was suggested that a veterinary school might be established in the same place and worked in connection with the pinjrapole. The committee of management of the pinjrapole accepted the proposal, and undertook to provide a site free of charge for the proposed school and hospital, and to contribute Rs. 30,000 towards the construction of the necessary buildings. The scheme is now under the consideration of Government.

It was stated in last year's report that merino rams had been supplied to Mr. Abbott of Jaintpore, Mozufferpore; Mr. Peppe of Ranchi, and to Baboo Thakurai Bhagwat Dyal

Sheep-breeding.

Singh. Mr. Abbott reports that the two rams supplied to him died during the year. Mr. Peppe's experiments, conducted at the Tesil tea estate, were attended with satisfactory results, and go to prove that Behar sheep thrive better there than in Behar itself. The sheep seemed to thrive on grass alone, which they found for themselves in the tea-gardens without in any way injuring the tea-bushes, and even when there was scarcely a blade of grass to be seen, they did exceedingly well on *mowah* berries and the fresh green leaves of the *sâl* tree. Experiments were made with crossing country ewes with a merino ram. Samples of the wool of the cross breeds were sent to Mr. Orrah of the Bhagulpore Jail, who declared them to be far superior to the wool of country sheep. Where the country sheep wool would realise Rs. 16 per maund, the cross-bred wool would, he says, readily sell for Rs. 35 per maund. It therefore appears advisable to encourage cross-breeding with carefully selected merinos in Chota Nagpore.

Forecasts of the wheat and jute crops were prepared during the year and found to contain correct information. They have also been found useful to traders. Under the orders of Government, statements showing the estimated outturn of the bhadoi, of the winter rice, and of the rabi harvest, and of special crops, such as sugarcane, tobacco, ganja, opium, and others, were prepared by the Director of Land Records during the year.

As noticed in last year's report, a circular was issued to district and divisional officers, and managers of Government and Wards' estates, on the subject of the compilation of agricultural statistics from examination of actual areas sown under various crops in typical villages in Wards' and Government estates, of which maps have been prepared. Statements have been received in the office of the Board of Revenue containing statistics relating to crop areas, land tenures, and incidence of land revenue for certain districts, and the statistics for the remaining districts are being compiled in the office of the Director of Land Records and Agriculture.

Agri-Horticultural Society.

The report for the four years ending December 1889 shows that the following works have been done by the Society :—

- (1) The introduction and distribution of trees, plants and seeds of economic or horticultural value.
- (2) The experimental cultivation of indigenous and exotic products.
- (3) The collection and diffusion of information relating to agriculture and horticulture.
- (4) Inquiries relating to tea fertilizers.

The Society distributed 14,647 plants of economic value in the four years. Seeds of cotton, maize, sorghum, reana luxurians, rubber and timber trees were also distributed.

The following experiments of special interest were made :—

- (1) *Cotton*.—A series of trials was made with different varieties of cotton seed by Mr. J. Cameron for the Mysore Government. The enquiries made by the Society, in connection with the collection of seeds for Mr. Cameron, showed that the American types of cotton can be thoroughly naturalized in this

country, and some of the superior varieties may be thus introduced into Bengal with profit.

(2) *Erythroxylon Coca*.—The Society has made efforts to introduce the cultivation of this anæsthetic drug, which have been very successful. The cultivation may be now said to have passed out of the stage of experiment, and it is hoped that private agencies will take it up as a commercial undertaking.

(3) *Musatextilis* (*Manilla hemp*).—A small quantity of fibre prepared from two stems of the Manilla plantain grown on the Society's garden is reported to have been of good quality.

(4) *Potato cultivation in Darjeeling*.—An attempt was made to cross *Solanum tuberosum* (ordinary potatoes) with *S. maglia*, in order to produce a variety which may resist disease, but it failed.

(5) *Sugarcane*.—Mauritius sugarcane cuttings were distributed in 1887, but failed.

(6) *Tea*.—A kerosine emulsion was tried in a tea-garden in Kangra Valley as an insecticide against the scale insect, and proved efficacious.

3. *Tea fertilizers*.—A joint committee, composed of members of the Society and of the Indian Tea Association, has been formed to make arrangements for complete investigation into soils of tea-gardens and into the changes which the tea leaf undergoes in the course of manufacture. For this purpose it is proposed to engage the services of a competent European chemist, and money has been subscribed by members of the Tea Association for the purpose.

The Society has horticultural gardens in the neighbourhood of Calcutta, and is managed by a Committee. This Government contributes Rs. 6,000 per annum to the funds of the Society. The Agri-Horticultural Society does useful work in distribution of flowers, ornamental and other plants, vegetable and other seeds, and in various other ways.

The Botanical Gardens have been maintained in a high state of efficiency; the herbarium in particular has been especially attended to, and organised exploration in Burma and Assam has added to it some valuable collections. Under the recent order of the Government of India this exploration will be extended. The control of Indian botanical operations has been centralised in the Calcutta Gardens, and the Superintendent has been appointed Director of the Botanical Survey of India. The grants promised by the Administrations of Burma and Assam will enable collections to be made on a larger scale and more continuously. As this work will constitute a separate Department, it has been ordered that in future years a separate report should be submitted on the subject. During the year the Superintendent of the Gardens issued a monograph on jack-fruits, oaks and chestnuts of the Indo-Malayan region. This forms the second volume of the Garden annals. The third and concluding part of his monograph on the genus *Ficus* has lately been issued. The Curator of the harbarium has also published several important papers.

Forests.

THE area of the Reserved forests on the 31st March 1890 amounted to 5,195 square miles, of Protected forests to 2,239 square miles, of Unclassed State forests and Wastelands to 4,034 square miles—in all 11,468 square miles, being $5\frac{1}{2}$ per cent. of the total area of the province (193,198 square miles). The forests are confined to the districts bordering on the sea, the sub-Himalayan tracts, and the plateau of Central India, so far as it stretches into Chota Nagpore and Orissa. The rich districts of the interior of Bengal are, most unfortunately, altogether without public forests, and are consequently supplied in a very deficient degree with fuel. An area of 207 square miles was added to the Reserves during the year, and an area of 25 square miles of Protected forests in the Sunderbuns was farmed out for reclamation. The average cost per mile of delimitating boundaries was Rs. 7-3, against Rs. 16 in 1888-89.

During the year many criminal charges were not preferred against officers of the Department, and in only one case brought to trial the prosecution proved abortive. Three forest guards on the Kassalong Range in Chittagong were murdered by a gang of Chakmas, who made away with over Rs. 2,000. Of those who were found to be implicated in the crime, 30 have been sentenced, since the close of the year under review, to various terms of imprisonment ranging from 10 to 5 years. The ringleader is still at large. Owing to the large number of cases compounded, only 120 prosecutions were instituted as against 254 in 1888-89, while the percentage of convictions remained practically the same, viz. 79.6 per cent. The number of cases compounded rose from 1,450 to 2,524. These came chiefly from the Darjeeling and Sunderbuns Divisions, where the delay and other inconveniences which attend an appeal to the courts have led Forest officers to prefer compounding.

In the result, the special measures taken to protect a portion of the forests against fire were successful—95 per cent. of the areas thus dealt with having escaped, in spite of the dryness of the season, against 72.9 per cent. in the previous year. On the other hand, there was a failure in the area not specially protected, but on which some attempt was made at preservation. In illustration of the advantages of protection, reference may be made to the fact that the savannahs in Buxa are in many places fast clothing themselves with tree growths, a result which is due to consecutive years of exemption from fires. Similar improvement was observed in the savannahs of the Raidak sâl tract, but it was not so marked in those of the Bholka forest. The area of regular plantations was extended by 116 acres, and that of cultural operations by 18 acres. The cost, including maintenance of former areas, was Rs. 6,604 as compared with Rs. 6,837 last year.

The outturn of wood, including timber and fuel, during the year was 29,973,004 cubic feet, against 27,793,504 cubic feet in the previous year. The demand for charcoal at Darjeeling almost trebled during the year, and there was a large increase in the demand for timber from the Sunderbuns Division. A notable change was introduced in the Darjeeling Division, where, in spite of the extra work entailed, all growing trees are now marked for felling by gazetted officers.

Financial results.

The following figures show the financial results of the four preceding years:—

		Receipts.	Charges.	Surplus.
		Rs.	Rs.	Rs.
1885-86	...	5,97,432	3,70,399	2,27,033
1886-87		6,53,634	4,22,781	2,30,853
1887-88		6,57,794	3,90,368	2,67,426
1888-89		6,76,907	3,68,169	3,08,738
1889-90		7,68,717	3,90,264	3,78,452

It will be seen that there is a large and increasing surplus, so that the general result is satisfactory. The profit is very great in the Sunderbuns Division, from which Calcutta is supplied with fuel, and also the important sugar and other works scattered through Khoolna and Jessore.

It is considered desirable to devote greater attention to the preparation of working plans, a duty which has hitherto been generally neglected, by freeing more officers for the work and by reducing establishments where they do not pay, namely, in Chota Nagpore and Orissa. In the latter province operations will probably be considerably reduced when the forest boundaries have been re-aligned by the exclusion of village grazing and fuel grounds, a measure to which the Lieutenant-Governor attaches great importance in the interests of the cultivators.

Manufactures, Mines and other Industries.

THE usual statement below, obtained from materials furnished by Messrs. Moran and Company, indicates the actual yield of indigo during 1888-89 as compared with the estimate for that year and the probable outturn for 1889-90 :—

		Estimated yield for 1888-89.		Actual yield for 1888-89.		Estimated yield for 1889-90.	
		Mds.		Mds.		Mds.	
Jessore	3,060		3,140		980	
Krishnaghur	4,935		5,541		2,030	
Midnapore	975		1,122		970	
Burdwan	550		554		305	
Maldah	1,315		1,155		1,000	
Moorshedabad	6,360		6,495		2,575	
Rajshahye and Pubna	1,230		1,248		790	
Bhagulpore	3,005		3,270		2,200	
Purneah	3,730		3,908		4,050	
Rungpore and Nattore	1,840		2,469		1,100	
		<hr/>	27,000	<hr/>	28,902	<hr/>	16,000
Monghyr	2,900		3,077		1,700	
Tirhoot	28,750		28,792		25,250	
Chumpurun	13,850		14,804		16,250	
Chupra	13,500		13,562		9,300	
		<hr/>	59,000	<hr/>	60,235	<hr/>	52,500
<i>Benares—</i>							
European	7,200		7,258			
Native	6,300		7,067			
		<hr/>	13,500	<hr/>	14,325	<hr/>	6,500
<i>Doab—</i>							
European	3,500		3,445			
Native	35,000		37,811			
		<hr/>	38,500	<hr/>	41,256	<hr/>	20,000
Total ...		<hr/>	1,38,000	<hr/>	1,44,718	<hr/>	95,000

It will thus be seen that the actual outturn of 1888-89 exceeded the estimate for that year by 6,718 maunds, and the actual yield of 1887-88 by 12,364 maunds. The produce of the year 1888-89 was thus very satisfactory as compared with that of 1887-88, and more so as compared with 1886-87, the percentage of increase over the yield of the latter year being 9.33. The estimated crop of 1889-90 compares very unfavourably with the actual yield for 1888-89.

The following table details the exports of indigo to foreign countries during the past two years :—

			1888-89.		1889-90.	
			Cwt.	Rs.	Cwt.	Rs.
To United Kingdom	30,436	93,64,582	35,012	89,85,854
„ Austria—Trieste	10,700	36,05,738	11,119	36,19,821
„ France	9,677	31,35,992	9,439	27,91,744
„ Germany	8,073	26,52,981	9,546	25,58,066
„ Italy	1,115	3,67,518	990	3,11,163

„ Other countries	2,661	9,22,297	2,690	8,28,459
Total ...			<hr/>	<hr/>	<hr/>	<hr/>
			86,701	2,73,46,873	91,835	2,49,06,266
Quantity in Indian maunds and average value per Indian maund.			1,18,010	@ Rs. 232 per Indian maund.	1,24,988	@ 199 per Indian maund.

In comparison with 1888-89 the exports of indigo during the past year increased by 6 per cent., but the average price realized per maund was much below that of 1888-89. The quality of the crop generally was not good, and prices, except for certain special kinds, were below those of the previous year. The average declared value of the stuff was by far the lowest yet tabulated. About the close of the year prices were affected unfavourably by the tightness of money and the sudden rise in exchange. The United Kingdom and Austria took a larger quantity of the dye as compared with the year 1888-89. France shows a small decline, while Germany does an increase counterbalanced by a decrease of almost the same quantity exported to the United States.

There was no increase in the area under tea cultivation during the year, which on the contrary fell slightly from 79,962 to 79,006 acres, the number of gardens also declining from 402 to 399, owing to amalgamations. The falling off in the area is under the head of "Immature plants, Darjeeling," the entry against which was 9,170 acres in 1888 and only 5,993 in 1889. The difference is not explained. The outturn of tea rose from 22,231,944lb to 25,089,423lb, showing an increase of 2,857,479lb, and the average yield per acre rose from 343.2lb to 375.47lb.

The following is a *resumé* of the reports received from the several tea-producing districts:—

The number of gardens in this Division remained the same (6) as in the last year, and the total outturn amounted to 1,130lb, against 1,215lb of the previous year. The average yield per acre fell from 44.1lb to 41.0lb.

Dacca Division.

Tea is grown only in the Chittagong and Hill Tracts districts of this Division, and returns were received from 23 out of the 26 gardens.

Chittagong Division.

In the Chittagong district the outturn amounted to 1,123,177lb, against 1,102,572lb last year, but the average yield per acre fell from 308.6lb to 297.37lb. In the Hill Tracts only one garden was worked, as in the previous year. The yield rose from 23,540lb to 26,407lb, the average yield per acre being 264.07lb against 235.4lb.

Chota Nagpore Division.

Hazaribagh and Lohardugga are the only tea-growing districts in this Division.

In Hazaribagh the number of gardens worked was the same (6) as in the two preceding years; the total outturn was 102,369lb, against 115,277lb the last year; and the average yield per acre fell from 131.4lb to 104.6lb. The decrease is due to the stock of one of the gardens (Paresh Nath) having been accidentally destroyed by fire.

In Lohardugga 30 gardens were worked, as in the two preceding years, and only 26 furnished returns. The total outturn amounted to 365,240lb, against 339,383lb last year; but the average yield per acre of mature plants decreased from 163.9lb to 158.6lb. The increased outturn of 25,857lb was due to a greater area being under mature plants.

Rajshahye Division.

Julpaiguri and Darjeeling are the only tea-growing districts of this Division.

In Darjeeling the number of gardens worked was 165, against 174 of the year 1883, the decrease being due to the fact that nine gardens were amalgamated with others during the year. The areas under mature and immature plants were 35,978 and 5,993 acres, against 35,755 and 9,170 acres respectively of the preceding year. The total outturn amounted to 10,838,220lb against 10,274,131lb, and the average yield per acre rose from 287.3lb to 301lb.

There was nothing new during the year under report relative to the character of tea plants, machinery and labour. The tea market was fairly satisfactory.

In Julpaiguri the number of gardens rose from 159 in 1888 to 166; the area under mature plants was 23,658 acres against 21,997 acres, and that under immature plants 5,399 acres against 4,919 acres. The total outturn amounted to 12,632,880lb, against 10,375,826lb of the preceding year; and the average yield per acre rose from 471.692lb to 533.97lb. The increase in yield is attributed to the rapid growth of the plants under improved cultivation, and to the unusually excellent weather for tea.

As in previous years, hybrid plants were most common in this district, while China plants were found in a few of the older gardens. The indigenous seed of Assam is highly valued. In almost all the gardens machinery has been introduced for purposes of manufacture, and as a consequence much time, labour and money are saved. The labour employed in these gardens is free; that is to say, it is not regulated by Act I of 1882, which is no longer applied in any part of Bengal: the coolies are either Nepaulese or *Dhangars* from Chota Nagpore. The wages earned average Rs. 6 for men, Rs. 5 for women, and Rs. 4 for children. Cholera prevailed, and the rate of mortality among the coolies during the year was very high.

The following statement illustrates the state of tea cultivation in Bengal during the calendar year 1889 :—

1	2	3	4	5	6	7	8	9	10	11	12

Total		399	...	66,820 1 0	12,196 2 0	79,006 3 0	37,666	27,710,031	340,380	28,050,411	375.47

Lohardugga, the only district in these provinces in which the coffee plant is as a rule cultivated, produced no coffee during 1889, and only 30lb of coffee were produced in a few bushes in the Hill Tracts of Chittagong.

At the close of the year the Government cinchona plantation consisted of 4,682,401 trees of various ages and of a nursery stock containing 261,000 seedlings. The crop collected amounted to 304,705 pounds, against 373,100 pounds in 1888-89. It was composed of 140,310 pounds of red or *succirubra* bark, 131,055 of Ledger's *calisaya*, 5,310 of *calisaya verde* and *morada*, and 28,030 of hybrid bark.

The outturn of the factory, which is regulated by the demand, was 1,833 pounds of sulphate of quinine and 6,578 pounds of febrifuge. The entire quantity of the quinine and a greater portion of the febrifuge were manufactured by the new fusel oil process which has now entirely taken the place of the old acid and alkali method of manufacture. The quinine is of excellent appearance, and in purity compares favourably with most of the brands of European manufacture. The issues from the factory rose from 7,489 pounds in 1888-89 to 7,680 pounds in 1889-90, as will be seen from the following table :—

	1889-90.	1888-89.
	lb oz.	lb oz.
To Medical Depôt, Calcutta	2,197 0	2,140 0
Ditto, Bombay	2,224 0	1,250 0
Ditto, Madras	...	1,300 0
To Inspector-General of Civil Hospitals, Bengal	352 8	425 0
To Inspector-General of Jails	149 9	121 12
Sold to Government officers and to the public	2,756 0	2,251 4
Given as samples	1 0	1 4
Total	7,680 1	7,489 4

The revenue derived from the sale of sulphate of quinine, cinchona and crystalline febrifuge, cinchona bark and other products of the plantation amounted to Rs. 1,13,693-12-6 in 1889-90, against Rs. 1,29,160-3 in the previous year, as shown below:—

	1889-90.			1888-89.		
	Rs.	A.	P.	Rs.	A.	P.
By sale of febrifuge, sulphate of quinine and bark to the public	43,112	13	0	37,706	0	0
By credit from the Medical Depôts ...	63,374	11	6	82,322	3	0
By credit from the Inspector-General of Civil Hospitals, Bengal ...	5,056	2	0	7,059	0	0
By credit from the Inspector-General of Jails, Bengal ...	2,150	2	0	2,073	0	0
Total ...	1,13,693	12	6	1,29,160	3	0

The net profit on the working of the cinchona estate amounted to Rs. 18,967-9-10 in 1889-90, against Rs. 27,844 in 1888-89, and is not unsatisfactory when the depressed condition of the cinchona industry is taken into consideration. It is understood that the exportation from Ceylon has at last begun to fall off, and in this case quinine will probably soon rise in price, and the demand for cinchona febrifuge will also increase.

There was nothing requiring special mention under this head in the Bhagulpore Division. The manufacture of silk fabrics is steadily decreasing, while the manufacture of raw sugar, carried on chiefly in the Kishenganj sub-division of Purneah, is on the increase. The *sabi* grass trade in Rajmahal is in a very flourishing condition, there being two or three presses now at work. One thousand six hundred and eighty-five guns were manufactured at Monghyr and transported to Calcutta and other places. The Madankota coal-mine was worked with satisfactory results during the year, while Government borings for coal continued at Simra in the Damin. The stone quarries in the Sonthal Pergunnahs also worked well.

To the manufactures enumerated under this head in 1888-89 have been added rugs, carpets, blankets, silk, and paper. The manufacture of sugar fell off during the past year in Gya, but increased in Shahabad, Durbhunga, Sarun, and Chumparun. The trade in this article was flourishing. The outturn of mica in the Gya district was estimated during the year at 1,000 maunds.

The principal manufactures of the Division are iron, pottery, silk, indigo, brass and bell-metal wares, cotton fabrics, shell-lac, rope, mats, molasses, sugar, and paper. The Government iron factory at Burakar was made over to a private company, who intend to work it on a much larger scale. The manufacture of cotton cloth is decaying in almost every district owing to the introduction of cheap English piece-goods. The export from the Raniganj coal-mines is steadily increasing.

There is nothing under this section requiring special mention in the Rajshahye Division, excepting that the cultivation of sugarcane and the manufacture of molasses are gradually being extended in the district of Rajshahye. Coal of marketable value has been discovered comparatively close to the Brahmaputra, and ironstone and limestone in close proximity.

The manufactures of this Division are few and unimportant. The year was very favourable for lac, the outturn of the manufactured article being larger everywhere. The output of coal in both Hazaribagh and Manbhoom shows a decline as compared with the year 1888-89, as per table below:—

		1888-89.	1889-90.
Hazaribagh	...	508,795 tons.	475,265 tons.
Manbhoom	...	131,762 „	89,606 „

The total output of copper ore from Baraganda mines during the year was 4,620 tons as compared with 2,734 tons in the previous year. The mica mines were worked during the year with almost the same results, the outputs for the years 1888-89 and 1889-90 being 1,489 and 1,499 maunds respectively. The stone quarry at Mahta in Manbhoom was not so extensively used as during the previous year. In consequence of favourable reports having been submitted by mining geologists, syndicates have been formed for the purpose of working gold mines in various parts of the Division.

The manufactures of this Division, which are not of much importance, continued unchanged during the year. There are no mines in the Division, heavy black ironstone being only found at certain places in pergunnah Bhowal in the Dacca district: 6,897 tons of such stone were used for metalling roads in Dacca during the year.

There are no mines in the Division, but sandstone and laterite are extensively quarried for road metal and building purposes. Iron ore to a small extent is also obtained from the tributary states and melted by the village smiths in Cuttack. Salt is the principal item of manufacture in the Division. The manufacture has, however, been discontinued in Cuttack and Balasore of late years owing to the abolition of punga salt and the introduction of revised rules under the new Act. The Cuttack filigree work still continues to maintain its position.

The number of mills, presses, and factories at work in the 24-Pergunnahs was the same during the year of report as in the previous year, viz., 46. The bone-crushing factory at Tengra was closed and a saltpetre refinery started during the year. These mills gave employment to 57,000 persons. The mills and factories manufacture cotton twist and yarn, gunny-bags and cloth, sugar, paper, silk, ice, shell-lac and lac-dye. The presses press and bale jute for export. The outturn of the jute mills was smaller than in 1888-89. Ten thousand seven hundred and eighty-three tons of cotton were worked up during the year by four mills, against 6,785 tons in the year preceding. The outturn of the paper mills at Titagurh was 1,864 tons, against 1,686 tons in the previous year. The sugar mill at Cossipore worked with success, and the manufacture of the article according to the native process continued in the Baraset and Bushirhat sub-divisions. Some 3,60,600 maunds of unrefined sugar, valued at Rs. 23,73,779, were manufactured in the district of Jessore during the year. Indigo formed the chief manufacture of the districts of Nuddea and Jessore during the year, the produce in both cases exceeding that of the previous year. The outturn and value of silk thread manufactured in the district of Moorshedabad were larger during the year as compared with the previous year, being 352,860lb, of an estimated value of Rs. 27,53,981, against 285,948lb, worth Rs. 21,95,331. Experimental silk-rearing was carried on during the year by Mr. N. G. Mukherjee under the direction of a committee of merchants in Calcutta. The experiment was, however, not very successful. There are no mines in the Division.

Two ships only were built during the year in Chittagong, against three in the previous one. There was a decrease of nearly 40,000lb in the quantity of tea exported. There was similarly a reduction in the importation of rice, which affected the outturn of milled rice, only 1,02,668 maunds having been milled, against 1,69,000 in the previous year.

Trade.

THE following statement shows the total value of the sea-borne trade of the Bengal Presidency during the last five years, exclusive of Government transactions :—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
	Rs.	Rs.	Rs.	Rs.	Rs.
Imports—					
Foreign trade ...	22,62,34,178	24,41,23,240	24,58,21,406	27,11,87,243	26,31,48,033
Coasting trade ...	5,24,71,617	5,38,06,615	5,51,30,014	5,39,50,225	5,25,04,528
Total of imports ...	27,87,05,795	29,79,29,855	30,09,51,420	32,51,37,468	31,56,52,561
Exports—					
Foreign trade ...	33,21,15,247	35,73,42,394	37,19,63,063	37,87,54,789	39,80,60,437
Coasting trade ...	7,63,94,987	7,66,38,032	8,77,05,872	7,78,21,397	7,75,18,542
Total of exports ...	40,85,10,234	43,39,80,426	45,96,68,935	45,65,76,186	47,55,78,979
GRAND TOTAL ...	68,72,16,029	73,19,10,281	76,06,20,355	78,17,13,654	79,12,31,540

There was a fall in the value of imports from Rs. 32,51,37,468 to Rs. 31,56,62,561, principally in piece-goods. The export foreign trade, exclusive of treasure, shows an advance from Rs. 37,82,25,789 to Rs. 39,67,26,895, which is due chiefly to the high prices obtained for rice, jute, linseed, and raw silk. Taking exports and imports together, the total value of the trade of the province increased by nearly a crore of rupees, or from Rs. 78,17,13,654 to Rs. 79,12,31,540.

As usual, the bulk of the trade is carried on with the United Kingdom, the proportion of the trade absorbed by that country being no less than 61·71 per cent. of the whole trade of Bengal. This percentage is, however, less than that of the preceding ten years. The second place is occupied by China, due to opium transactions (10·1 per cent.), and next stands the United States (6·47 per cent). The trade with Germany continues to show a considerable increase.

The proportion of the foreign trade of Calcutta carried through the Suez Canal to the total foreign trade of Calcutta declined from 65·8 per cent. in 1888-89 to 63·7 per cent. in the year under review.

The statement below shows the values of the principal articles imported into Calcutta during the last two years :—

Foreign trade of Calcutta.

IMPORTS.

	1888-89.	1889-90.
	Rs.	Rs.
Cotton goods ...	14,54,76,859	13,12,43,435
Metals ...	1,65,31,166	2,46,68,410
Oils ...	85,07,955	1,18,08,390
Machinery ...	86,30,301	74,07,618
Salt ...	76,35,910	73,38,054
Woollen goods ...	66,41,405	70,11,664
Liquors ...	52,39,310	49,00,323
Apparel ...	40,35,825	41,33,901

The trade in cotton piece-goods was not remunerative: large stocks were in hand, while at the close of the year money was scarce and the Bank rate of interest very high.

Cotton goods. It is reported that the trade of native houses continues to expand and was larger than in any previous year.

The very large increase in the import of metals is due to the trade righting itself after the collapse of the Copper Syndicate.

Metals.

The increase in petroleum oil is entirely from the United States, and there was a decrease both from the United Kingdom and from Russia.

Although there is a decrease in machinery, the figures of the year are far in excess of those in any year previous to 1888-89.

Under the head of liquors there is an increase in ale, beer and porter, a large decrease under spirits, and a very small decrease under wines and liqueurs.

Among minor items it may be observed that the trade in umbrellas has declined owing to accumulation of stock. The value of matches imported now amounts to Rs. 7,39,000, and the quantity is estimated to be about 152 millions of boxes. Most of these are manufactured in Sweden and Norway, and the wholesale value is about Rs. 35 per case of 50 gross. With this low price the matches of Bryant and May, which are of a more substantial nature, cannot compete.

The following statement gives the value of the principal articles of Indian produce and manufacture exported in 1888-89 and 1889-90 :—

EXPORTS.

		1888-89.	1889-90.
		Rs.	Rs.
•	Raw jute	... 6,94,28,984	7,26,67,026
	Opium	... 6,41,48,256	6,37,25,170
	Tea	... 5,16,52,620	5,12,39,079
	Oilseeds	... 3,57,89,078	4,13,04,984
	Indigo	... 2,73,46,873	2,49,05,266
•	Gunny-bags	... 2,33,35,337	2,31,92,559
	Rice	... 2,07,02,266	2,48,74,668
	Hides and skins	... 1,90,82,457	1,84,21,934
	Wheat	... 1,08,24,635	60,11,810

There was a slight falling off in the quantity of jute exported, although prices ruled higher than in the previous year, but the deficiency of Calcutta was more than supplied by the shipments from Chittagong, which increased to the extent of 222,846 cwt.

The export of tea declined slightly in value, but advanced in quantity, being 101,750,725lb in 1889-90, against 95,749,163lb in 1888-89. The cost per pound last year was 8 annas 1 pie, against 8 annas 6 pies in the previous year.

The importations of tea into the United Kingdom during the last two years are—

		1888.	1889.
		lb	lb
India	...	92,387,000	96,693,000
Ceylon	...	20,325,000	31,191,000
China, &c.	...	109,285,000	93,208,000

It cannot be said that any material progress has been made in opening out new markets for Indian tea. Australia is the only country where Indian tea is being rapidly taken; the increase last year was over half a million pounds, or 18½ per cent. In America the export is falling off, and China tea still finds favour in Russia. In India itself the efforts to popularise tea have hitherto failed.

Although the value of rice exported last year shows an increase, the quantity was less owing to a shorter crop. Ceylon continues to hold its first place as the consumer of Bengal rice, and the United Kingdom stands next.

There was a further large fall in the export of wheat from nearly 3 million cwt. to a little over 1½ millions. The continent of Europe has received nearly the whole of its Indian wheat from the Western side of India. The total quantity of Indian wheat sent to the United Kingdom was 9,217,332 cwt., while Russia exported 21,321,628 cwt. and the United States 17,061,250 cwt.

There was a small increase in the quantity of indigo exported, but the average declared value was the lowest ever recorded in the Custom House.

Indigo.

The trade in raw cotton, which had declined in 1888, showed an improvement of about 20½ per cent. The increase was entirely in the export to continental countries.

Cotton, raw.

The import of treasure during the last year decreased by Rs. 31,38,497, but while silver declined by nearly 50 lakhs, the import of gold advanced by 18½ lakhs.

Treasure.

The value of the coasting or interportal trade with Calcutta declined in 1889-90 by about 52 lakhs, and is observable both in the export and import of Indian produce and of foreign merchandise.

Coasting trade of Calcutta.

The value of the trade of Chittagong, which had fallen off during 1888-89, greatly augmented during the year under review, and amounted to Rs. 3,16,96,703, which is the highest on record. The enormous expansion of the trade in raw jute has materially contributed to the prosperity of this port.

MINOR PORTS.

Chittagong port.

The following table shows the trade of the Orissa ports for the past year as compared with that of the previous year:—

The Orissa ports.

	Balasore.		Cuttack.		Pooree.	
	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Foreign ...	1,32,209	4,37,513	8,23,691	13,15,803	39,386	39,842
Coasting ...	95,35,236	93,03,035	1,68,554	4,39,940	20,426	1,76,934

It will be seen that there has been a considerable increase in the trade of Cuttack and Pooree.

Naraingunge was in November 1889 declared to be a Customs port for the shipment and landing of goods, and a warehousing port. The year was a prosperous one, and the total value of trade was Rs. 1,14,90,150, consisting principally of jute consigned to Chittagong.

Port of Naraingunge.

In the following statement the total quantity and value of the registered trade of Calcutta with the interior are compared with the figures of the preceding year:—

Trade of Calcutta with the interior.

The subjoined abstract shows the total import trade of Calcutta with each Revenue Division in Bengal, and with other provinces in India as a whole, in

the principal staples of traffic during the year 1889-90, as compared with the totals of the year 1888-89:—

ARTICLES.	IMPORTS INTO CALCUTTA FROM—												Grand total of traffic by internal routes.	Percentage borne by supplies from the Lower Provinces to the total imports.
	Burdwan Division.	Presidency Division.	Rajshahye Division.	Dacca Division.	Chittagong Division.	Patna Division.	Bhagulpore Division.	Orissa Division.	Chota Nagpore Division.	Total of Provinces under the Lieutenant-Governor of Bengal.	Other provinces in India.

The total import trade of Calcutta in the articles enumerated in the foregoing statement represents 55.58 per cent. of the entire import traffic of Calcutta during 1889-90, against nearly 58 per cent. in 1888-89, and 61½ per cent. in 1887-88.

The following statement furnishes similar details in respect of the export traffic of Calcutta in cotton goods and salt during the past year as compared with the figures of the previous year:—

EXPORTS FROM CALCUTTA TO—

The three staples specified above make up no less than 41·23 per cent of the entire exports from Calcutta during 1889-90, against 43·26 per cent. in the previous year and 45·63 per cent. in 1887-88.

The following statement gives the total quantity of raw cotton imported into, and exported from, Calcutta during the past year as compared with the totals of the preceding two years:—

COTTON, RAW.

		1838-89.	1889-90.
		Mds.	Mds.
Imports	...	9,64,705	10,93,958
Exports	...	5,52,394	6,40,597

While the total import trade during the year showed an increase of 13·40 per cent. as compared with 1888-89, it was 7 per cent. below the figures of 1887-88.

The total quantity of raw cotton exported from Calcutta during the past year was 15·97 per cent. in excess of the figures for 1888-89, but 26·43 per cent. below those for 1887-88. The bulk of the trade was sea-borne, and its destination was as follows:—

		1888-89.		1889-90.	
		Cwts.	Mds.	Cwts.	Mds.
To Foreign ports—					
United Kingdom	...	109,550	1,49,110	104,150	1,41,760
Other ports	...	265,603	3,61,597	347,984	4,73,645
Total	...	375,213	5,10,707	452,134	6,15,405
To Indian ports—					
Bombay and other ports...		2,070	2,817	1,781	2,424
GRAND TOTAL	...	377,283	5,13,524	453,915	6,17,829

Quantity not exported before the close of the year. Last year the total quantity of raw cotton not exported before the close of the year was 4,53,361 maunds, against 4,12,311 maunds in 1888-89, and 3,05,499 maunds in 1887-88.

The registered trade of Calcutta in cotton twist and yarn, carried by internal routes during the past year, as compared with the total of the previous year, was as follows:—

COTTON TWIST AND YARN.

		1888-89.			1889-90.		
		European.	Indian.	Total.	European.	Indian.	Total.
		Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
Imports	...	1,84,481	2,43,263	4,27,744	2,91,398	1,90,556	4,81,954
Exports	...	1,38,414	2,33,395	3,71,809	2,71,750	2,69,245	5,40,995

The figures relating to the imports by sea represent the total clearances for consumption from shipboard and from bond. The supply during the past year showed a considerable decrease of 25·05 per cent. and 26·64 per cent. in comparison with 1888-89 and 1887-88 respectively. The sources of supply during the past two years are shown in the subjoined statement:—

WHENCE IMPORTED.	1888-89.		1889-90.	
	lbs.	Mds.	lbs.	Mds.
From Foreign ports—				
United Kingdom	14,717,269	1,78,856	10,851,278	1,31,873
Other Foreign ports	339,040	4,120	445,110	5,410
Total of Foreign Trade	15,056,309	1,82,976	11,296,388	1,37,283
Total of Interportal Trade	83,360	1,013	50,060	608
GRAND TOTAL	15,139,669	1,83,989	11,346,448	1,37,891

As regards the imports of Indian twist and yarn, the figures remained practically unchanged, the fluctuation being only 4·06 per cent. below the figures of 1888-89.

Indian twist and yarn.

The exports of European twist and yarn during the past year showed a decline of 6·74 per cent. in comparison with the year preceding, and of 10·03 per cent. on the total of 1887-88. The details of the supplies carried

Exports.

European twist and yarn.

by internal routes and by sea during the past two years are given separately in the following statements:—

Exports by internal routes.

		1888-89.	1889-90.
		Mds.	Mds.
Into Bengal	...	1,36,905	1,48,072
„ N.-W. P. and Oudh	...	47,192	37,371
„ Punjab	...	11,453	9,294

Total	...	6,742,209	81,937	4,550,510	55,301

The different marts on river routes to which this class of goods was largely exported by country boats during the past two years are shown below:—

Principal river marts.

Marts.	Districts.	1888-89.	1889-00.
		Mds.	Mds.
Ghatal	Midnapore	14,861	8,981
Midnapore	Ditto	5,878	5,610
Hooghly	Hooghly	2,049	1,865
Tumlook	Midnapore	1,911	1,569
Nuddea	Nuddea	1,604	1,504
Santipore	Ditto	1,376	1,434

Besides these supplies, the traffic returns of the Midnapore canals show that 3,724 maunds of twist and yarn were sent during the year to the Midnapore district direct from the local cotton mills without passing the Port Commissioners' wharves. The gross imports of that district, therefore, amounted to 23,685 maunds.

In return for twist, Calcutta received country-made piece-goods from the Midnapore district worth Rs. 1,32,060 against Rs. 3,43,691 in 1888-89 and Rs. 1,44,600 in 1887-88. The other districts which imported European twist and yarn largely from Calcutta during the past year were—Dacca (25,637 maunds against 17,202 maunds), Nuddea (21,168 maunds against 21,359 maunds), Backergunge (16,073 maunds against 12,563 maunds), Jessore (8,854 maunds against 9,860 maunds), Hooghly (8,223 maunds against 9,827 maunds), and Furreedpore (7,291 maunds against 13,088 maunds).

The export trade of Calcutta in Indian twist and yarn shows steady development. Last year the exports by internal routes rose from 1,08,217 maunds in 1888-89 to 1,17,810 maunds, and those by sea from 82,339 maunds to 1,51,435 maunds. The quantities carried by the East Indian Railway during the past two years were distributed thus:—

Marts.	Districts.	1888-89.	1889-90.
		Mds.	Mds.
Barrakur ...	Manbhoom ...	12,013	11,088

Patna ...	Patna ...	2,850	2,443
Bhagulpore ...	Bhagulpore ...	2,851	3,575
Burdwan ...	Burdwan ...	2,262	2,615
Rajmehal ...	Sonthal Pergunnahs ...	2,050	1,302

The destination of the exports by sea during those years is shown in the following statement:—

WHITHER EXPORTED.	1888-89.		1889-90.	
	lbs.	Mds.	lbs.	Mds.
To Indian ports—				
Burma ...	1,923,478	23,375	1,953,622	27,742
Orissa ...	265,400	3,225	2,294,200	27,881
Chittagong ...	1,850	23	8,300	101
Madras ...	179,005	2,175	601,550	7,310
Bombay and other Indian ports ...	53,950	656	69,224	841
Total of Coasting Trade ...	2,423,683	29,454	4,926,896	59,875
To Foreign ports—				
United Kingdom ...	4,351,600	52,885	7,534,105	91,560
Other Foreign ports ...				
Total of Foreign Trade ...	4,351,600	52,885	7,534,105	91,560
GRAND TOTAL ...	6,775,283	82,339	12,461,001	1,51,435

Compared with the previous year, the exports to Indian ports showed a rise of 103·28 per cent., and those to foreign ports of 73·13 per cent.

The total quantity of cotton twist and yarn, both European and Indian, exported during the year was 1,69,186 maunds in excess of the quantity imported, against a similar deficit of 54,210 maunds in 1888-89 and 57,800 maunds in 1887-88.

The following statement gives details as to the total value of European cotton piece-goods brought to, and carried from, Calcutta during the past two years:—

COTTON PIECE-GOODS.

		1888-89.	1889-90.
		Rs.	Rs.
Imports ...		14,44,58,105	13,05,81,313
Exports ...		14,69,29,468	15,57,52,554

These figures represent declared values in all cases, with the exception, however, of piece-goods carried by railway and by inland steamers, in which cases they are registered by weight only. In the case of imports by rail, the value of these goods has been calculated according to the value rates of the different exporting provinces. Under all other heads values have been calculated at Rs. 70 per maund, which has been taken to represent the average value of a maund of European piece-goods of all sorts in Bengal.

The value of European piece-goods cleared for consumption represents the total clearances from shipboard and from bond. Compared with 1888-89, the transactions of the past year indicate a decrease to the extent of 9·58 per cent., while as compared with 1887-88 the result shows an increase of 4·24 per cent. The supplies during the past two years were obtained from the different ports mentioned in the table below:—

FROM	Imports by sea.	
	1888-89. Rs.	1889-90. Rs.
Foreign ports—		
United Kingdom ...	14,30,09,921	12,94,33,792
Other Foreign ports ...	8,75,055	7,30,082
Total of Foreign trade ...	14,38,84,976	13,01,63,874
Indian ports—		
Bombay ...	2,34,548	1,72,108
Madras ...	69,696	9,481
Burma ...	71,002	86,994
Other Indian ports ...	3,721	13,743
Total of interport trade ...	3,78,967	2,82,326
GRAND TOTAL ...	14,42,63,943	13,04,46,200

The total advance in the export trade was 6 per cent. as compared with the year preceding, and 11·41 per cent. as compared with 1887-88. The destination of the piece-goods sent out from Calcutta, province by province, during the past year as compared with the figures of the preceding year, is shown as follows:—

		Exports from Calcutta.	
		1888-89. Rs.	1889-90. Rs.
To Bengal	5,33,09,065	5,72,21,249
„ Behar	3,45,15,687	3,70,85,030
„ North-Western Provinces and Oudh	3,46,86,829	3,66,22,950
„ Punjab	1,22,91,741	1,10,20,170
„ Assam	37,48,059	59,25,080
„ Burma	27,51,502	27,37,029
„ Chota Nagpore	17,02,260	17,71,070
„ Orissa	17,25,084	13,19,570
„ Madras	11,01,794	7,96,639
„ Rajputana	4,07,799	5,10,580
„ Central Provinces	3,65,526	3,81,710
„ Foreign ports	2,59,966	2,62,060
„ Bombay	26,894	49,515
„ Other Indian ports	39,158	41,712
„ Other places	6,111	8,190
Total	14,69,29,468	15,57,52,554

It will be remembered that the valuation of Rs. 70 for a maund of piece-goods is 25 per cent. in excess of the values registered in the Custom House. In order, therefore, to strike any correct balance between imports and exports, it will be necessary, in the first instance, to establish an equilibrium between these two sections of the trade. If therefore, as in previous years, 25 per cent. be added to the imports by sea, the total of the year's traffic would be raised to Rs. 16,31,92,863, against Rs. 18,05,24,091 in the previous year. Deducting from this the total supply of piece-goods, amounting to

Rs. 15,57,52,554, shown above, exported from Calcutta, there remains a surplus of Rs. 74,40,309, against Rs. 3,35,94,623 in 1888-89 and Rs. 1,67,71,873 in 1887-88.

The total value of Indian piece-goods imported into, and exported from, Calcutta during the past year is compared below with the totals of the preceding year:—

INDIAN PIECE-GOODS.

		1888-89.	1889-90.
		Rs.	Rs.
Imports	...	42,22,757	46,65,338
Exports	...	7,82,479	13,53,653

The imports have advanced by 10·47 per cent. in comparison with 1888-89 and by 6·25 per cent. on the figures for 1887-88.

The indigo trade of Calcutta during the past year as compared with the figures of the preceding year was as follows:—

INDIGO.

		1888-89.	1889-90.
		Mds.	Mds.
Imports	...	1,28,208	1,46,719
Exports	...	1,19,509	1,26,397

The foregoing statement shows an improvement both in imports and exports. The season's outturn was over 10,000 maunds in excess of the figures for 1888, but the quality of the crop generally was not good, and prices, except for certain special kinds, were below those of the previous year. The average declared value per Indian maund shown in the Customs returns was Rs. 199, against Rs. 232 and Rs. 231 in 1888-89 and 1887-88, respectively; the price is said to be far the lowest yet tabulated. About the close of the year prices were affected unfavourably by the tightness of money and the sudden rise in exchange.

There was an increase in imports of 14·44 per cent. as compared with 1888-89, and of 11·36 per cent as compared with 1887-88. The distribution of the imports is classified by provinces in the subjoined statement:—

			1888-89.	1889-90.
			Mds.	Mds.
Behar	77,820	74,158
North-Western Provinces and Oudh	37,199	51,198
Bengal	12,169	20,419
Other places	1,020	944
Total	1,28,208	1,46,719

The total quantity of indigo exported during the year showed an advance of 5·76 per cent. on the returns of 1888-89 and of 5·52 per cent. on those of 1887-88.

Exports.

During the year under report, the surplus of imports over exports was 20,322 maunds, against 8,699 maunds in 1888-89 and 11,153 maunds in 1887-88.

Quantity not exported before the close of the year.

The total quantity of the Calcutta trade in raw jute during the past year as compared with the trade of the previous year is given below:—

JUTE, RAW.

		1888-89.	1889-90.
		Mds.	Mds.
Imports	...	1,70,62,724	1,69,40,516
Exports	...	1,28,61,634	1,21,57,157

The imports practically remained unchanged, the decrease being only 72 per cent. below the figures of 1888-89, but 17·10 per cent. above those of 1887-88.

Imports.

The usual statement showing the different localities from which supplies were largely drawn to the Calcutta market during the past two years is subjoined, the supplies carried by rail being also noted :—

Last year the proportion of imports by rail to the total trade was 51·56 per cent. against 46·42 per cent. in 1888-89 and 48·12 per cent. in 1887-88.

The exports were 5·38 per cent. less than those of 1888-89, but 5·96 per cent. in excess of those of 1887-88. The subjoined statement shows the destination of the quantity shipped from Calcutta by sea during the past two years :—

		1888-89.		1889-90.	
		Cwts.	Mds.	Cwts.	Mds.
To Foreign ports	9,269,483	1,26,16,818	8,739,895	1,18,95,968
„ Indian „	30,576	41,617	29,079	39,580
Total	9,300,059	1,26,58,435	8,768,974	1,19,35,548

The imports balanced the exports with a surplus amounting to 47,83,359 maunds, against 42,01,090 maunds in 1888-89 and 30,05,194 maunds in 1887-88.

Quantity not exported before the close of the year.

The total number of gunny bags carried to and from Calcutta during the past two years was as follows :—

GUNNY-BAGS.

	1888-89.	1889-90.
	No.	No.
Imports 23,514,284	18,606,721
Exports 156,741,201	154,769,684

The import trade fell off by 20·93 per cent. and 30·29 per cent. on the returns of the two years 1888-89 and 1887-88 respectively.

Imports.

The following abstract shows the districts from which gunny-bags were largely sent to Calcutta during the past two years:—
Principal supplying districts.

DISTRICTS.	1888-89.			1889-90.		
	Power-loom.	Hand-made.	Total.	Power-loom.	Hand-made.	Total.
	No.	No.	No.	No.	No.	No.

It will be seen that the decrease last year in the export trade amounted to 1·26 per cent. in comparison with 1888-89, but when compared with 1887-88 the figures exhibit an increase of 12·95 per cent. The destination of the sea-borne trade was as follows:—

	1888-89.			1889-90.		
	Power-loom.	Hand-loom	Total.	Power-loom.	Hand-loom	Total.
	No.	No.	No.	No.	No.	No.
To Indian ports ...	35,869,655	1,723,160	37,582,815	36,048,488	1,829,400	37,877,888
„ Foreign „ ...	95,862,173	1,044,450	96,906,623	94,681,874	631,375	95,313,249
Total ...	131,721,828	2,767,610	134,489,438	130,730,362	2,460,775	133,191,137

The exports balance the imports with a deficit amounting to 136,162,963 bags, against a deficit of 133,226,917 bags in 1888-89 and 110,353,813 bags in 1887-88. This result is due to the large manufacture of gunny-bags in Calcutta and the Suburbs.

The imports and exports of gunny-cloth into and from Calcutta during the past two years were as follows:—

GUNNY-CLOTH.

			1888-89.	1889-90.
			Pieces.	Pieces.
Imports	40,452	34,992
Exports	2,547	8,730

The total traffic carried to and from Calcutta by sea during the past two years was as follows:—

			1888-89.	1889-90.
			Yds.	Yds.
Imports	700
Exports	20,460,906	44,178,915

Last year the imports by internal routes showed a slight decrease of 13·50 per cent. as compared with the figures of 1888-89, and of 7·27 per cent. when compared with 1887-88.

Imports.

Compared with the transactions of 1888-89 and 1887-88, the past year's exports by sea showed an advance of 115·92 per cent. and 138·92 per cent. respectively. The destination of this traffic during the past two years is shown below :—

	1888-89.			1889-90.		
	Power-loom.	Hand-loom.	Total.	Power-loom.	Hand-loom.	Total.
	Yds.	Yds.	Yds.	Yds.	Yds.	Yds.
To Indian ports ...	5,442,522	213	5,442,735	6,782,941	460,440	7,243,381

Total ...	20,280,693	180,213	20,460,906	43,702,855	476,060	44,178,915

Last year there was a deficit in the imports over exports of 43,280,911 yards, against a similar deficit of 19,301,900 yards in 1888-89 and 18,001,485 yards in 1887-88. This represents part of the outturn of the steam mills in and around Calcutta.

In addition to the registered supplies mentioned above, the consignments of power-loom gunny-cloth sent up-country direct from the neighbouring mills without passing the Port Commissioners' wharves are detailed below :—

Importing districts.				Total of district.	
				1888-89.	1889-90.
				Pieces.	Pieces.
Monghyr	48,450	39,850
Durbhunga	16,750	29,320

Patna	4,175	...
Other districts	7,760	7,000
Total				150,573	111,120

During the year under report there were 23 jute mills at work in the neighbourhood of Calcutta, against 23 in 1888-89 and 22 in 1887-88. The amount of raw jute worked up was 3,508,000 maunds, showing an increase of 2·79 per cent. as compared with the previous year, and a decrease of 5·85 per cent. in comparison with 1887-88.

The harvests of the year under report were better than those of the preceding year, but owing to a failure of the crops in 1888, consequent on inundations and floods, there was an exorbitant rise in the price of all sorts of food-grains. The statistics of traffic show that there was an aggregate decrease of 42,78,824 maunds, or 16·11 per cent., in the importation of food-grains into Calcutta during 1889-90 as compared with the previous year, and of 83,86,229 maunds, or 27·35 per cent., on the total of 1887-88. In the export trade, there was a decrease of 47,71,512 maunds, or 23·73 per cent., as compared with 1888-89, and of 96,64,160 maunds, or 38·65 per cent., in comparison with 1887-88. The

following abstract exhibits the total trade, import and export, under each kind of food-grains separately during the past two years :—

	Imports into Calcutta.		Exports from Calcutta.	
	1888-89.	1889-90.	1888-89.	1889-90.
	Mds.	Mds.	Mds.	Mds.

	{ Ditto for 1889 ...	13 2	17 11	11 7	15 15	21 6	21 4	15 10	15 14

The foregoing statement shows that very high prices prevailed for all sorts of food-grains in the Lower Provinces during the past calendar year. In comparison with the average price ruling in the three years ending with 1888, the rise in the price of wheat was 17·32 per cent., of barley 23·10 per cent., of best rice 16·82 per cent., of common rice 20·31 per cent., of marwa 12·76 per cent., of Indian corn 25·27 per cent., of gram 16·94 per cent., and of arhar 11·80 per cent.

The gross weight of the Calcutta traffic in wheat during the past year, as compared with the figures of the previous year, was as follows:—

WHEAT.				1888-89.	1889-90.
				Mds.	Mds.
Imports	55,18,907	38,57,102
Exports	41,61,722	22,75,264

The import trade showed a steady decrease, the figures for the year under report being 30·11 per cent. and 46·95 per cent. below those for 1888-89 and 1887-88 respectively. The different provinces which contributed to the trade during the past two years were as follows:—

				1888-89.	1889-90.
				Mds.	Mds.
North-Western Provinces and Oudh	22,25,226	18,99,657
Behar	24,73,931	9,69,846
Bengal	6,94,095	4,95,291
Punjab	35,846	4,02,101
Central Provinces	76,739	87,421
Other places	13,070	2,786
Total				55,18,907	38,57,102

The total quantity exported during the last year showed a decrease of 45·33 per cent. as compared with 1888-89, and of 62·26 per cent. on the returns of 1887-88. The supply exported by sea during the past two years was distributed as follows:—

		1883-89.		1889-90.	
		Cwts.	Mds.	Cwts.	Mds.
To Foreign ports	...	2,949,304	40,14,331	1,550,838	21,10,863
„ Indian „	...	56,792	77,300	57,216	77,877
Total	...	3,006,096	40,91,631	1,608,054	21,88,740

After deduction of the total exports from the total imports into Calcutta, there remained a surplus of 15,81,838 maunds, against 13,57,185 maunds in 1888-89 and 12,41,630 maunds in 1887-88.

Under this heading are included *mutter*, *khesari*, *mushuri*, *maskalai*, *moog*, *bool* or *chhola*, and *arhar*. The aggregate quantity carried to and from Calcutta during the past two

GRAM AND PULSE.
years was as follows:—

				1888-89.	1889-90.
				Mds.	Mds.
Imports	39,86,129	36,11,235
Exports	22,02,228	15,55,025

The importation of gram and pulses was below the trade of 1888-89 and 1887-88 by 9·40 per cent. and 32·36 per cent. respectively. In the following statement the total

imports into Calcutta from the different provinces during the past two years are arranged according to the volume of trade:—

			1888-89.	1889-90.
			Mds.	Mds.
From Bengal	21,61,461	14,54,150
" Behar	13,13,730	11,27,294
" North-Western Provinces and Oudh	2,59,492	7,43,877
" Punjab	1,56,703	1,87,873
" Madras	74,134	62,418
" Central Provinces	6,946	12,879
" Other places	13,663	22,744
Total			39,86,129	36,11,235

In the export trade there was a considerable decrease of 29·39 per cent. and 55·15 per cent. in comparison with the two previous years. The largest falling off occurred in the exports by sea, the details whereof during the past two years are given in the subjoined table:—

		1888-89.		1889-90.	
		Cwts.	Mds.	Cwts.	Mds.
To Foreign ports	...	699,689	9,52,356	376,371	5,12,283
" Indian "	...	522,215	7,10,794	338,128	4,60,230
Total		1,221,904	16,63,150	714,499	9,72,513

The surplus of imports over exports amounted to 20,56,210 maunds, against 17,83,901 maunds in 1888-89 and 18,71,850 maunds in 1887-88.

The following statement shows the total trade of Calcutta in rice and paddy registered during the past two years:—

GRAND TOTAL OF EXPORTS BY SEA	85,625	62,908	60,756	44,637

The stocks of rice at all the markets and warehouses in Calcutta and the Suburbs, in the first week of April 1890, was 29,98,735 maunds against 28,62,768 maunds in 1889 and 26,91,992 maunds in 1888. The total imports of paddy during the past year being 13,06,721 maunds, and the total exports 6,16,222 maunds,

Stocks of rice in Calcutta.

there remained a balance of 6,90,499 maunds which, at the rate of 25 seers of rice to a maund of paddy, is equivalent to 4,31,562 maunds of rice.

The principal staples comprised under this head are barley, *kodo*, *shama*, Indian corn, oats, millets and other crops, which are reaped during the spring and rainy seasons. The total quantity of the Calcutta trade in these grains during the past two years is shown below:—

MISCELLANEOUS SPRING AND RAIN CROPS.

		1888-89.	1889-90.
		Mds.	Mds.
Imports	...	3,72,806	4,03,571
Exports	...	1,36,671	1,81,388

The increase in the import trade was 8.02 per cent. as compared with 1888-89, and 6.99 per cent as compared with 1887-88. The following are the different provinces which contributed to the trade during the past two years:—

			1888-89.	1889-90.
			Mds.	Mds.
Behar	2,22,663	2,67,177
Bengal	94,749	30,597
North-Western Provinces and Oudh	37,771	61,349
Punjab	41,184
Other places	17,623	3,264
Total	3,72,806	4,03,571

The total exports from Calcutta during the past year were 32.72 per cent. in excess of the figures for 1888-89, but 14.67 per cent. below those for 1887-88. The bulk of the trade was sea-borne, and its destination during the past two years was as follows:—

		1888-89.		1889-90.	
		Cwts.	Mds.	Cwts.	Mds.
To Foreign ports	...	64,375	87,622	115,336	1,56,985
„ Indian „	...	30,767	41,878	15,584	21,212
Total	...	95,142	1,29,500	130,920	1,78,197

The total quantity of miscellaneous spring and rain crops not exported before the close of the year was 2,22,183 maunds against 2,36,135 maunds in 1888-89 and 1,64,645 maunds in 1887-88.

The import and export trade of Calcutta in hides during the past year, as compared with the totals of the previous year, is given below:—

HIDES.

		1888-89.	1889-90.
		No.	No.
Imports	...	5,233,623	4,763,095
Exports	...	5,681,812	5,840,107

The falling off in the hide trade noticed in the last report was further extended during 1889-90, and the Customs' Collector observes that the proportion of the Bengal trade in raw hides with the United Kingdom has steadily declined during the past three years.

The import trade of last year was below that of 1888-89 and that of 1887-88 by 8·99 per cent. and 19·93 per cent., respectively. The following comparative statement shows the importation of hides from the several provinces during the past two years:—

				1888-89.	1889-90.
				No.	No.
Bengal	1,724,571	1,852,525
Behar	1,476,571	1,543,007
North-Western Provinces and Oudh	1,092,904	683,352
Orissa	270,785	328,626
Punjab	442,536	131,152
Chota Nagpore	90,128	94,440
Madras	75,233	55,208
Central Provinces	9,944	38,472
Burma	39,330	17,553
Other places	21,621	18,760
Total				5,233,623	4,763,095

The total exports of hides from Calcutta during the past year were 2·79 per cent. in excess of those of 1888-89, but they were 2·99 per cent. less than the figures for 1887-88. The supply exported by sea during the past two years was destined as follows:—

		1888-89.		1889-90.	
		No.	Cwts.	No.	Cwts.
To Foreign ports—					
United Kingdom	...	3,707,222	252,990	3,248,907	211,745
Other ports	...	1,916,116	175,183	2,488,474	196,131
Total	...	5,623,338	428,173	5,737,381	407,876
To Indian ports	...	21,538	1,543	35,321	2,232
GRAND TOTAL	...	5,644,876	429,716	5,772,702	410,108

If the imports be deducted from the exports, a deficit of 1,077,012 pieces will be found, against a deficit of 448,189 pieces in 1888-89 and 116,217 pieces in 1887-88.

Comparison of imports with exports.

The salt trade of Calcutta during the past year is compared below with the figures of the preceding year:—

SALT.

YEAR.		IMPORTS INTO CALCUTTA BY SEA.			EXPORTS FROM CALCUTTA AND HOOGHLY.						
		From foreign ports.	From Indian ports.	Total.	Inland exports.						Exports by sea.
					By the East Indian Railway.	By the Eastern Bengal State Railway.	By inland steamer.	By boat.	By road.	Total.	
1888-89	...	Mds. 93,72,239	Mds. 6,06,482	Mds. 99,78,721	Mds. 34,61,936	Mds. 10,22,196	Mds. 4,65,875	Mds. 32,40,341	Mds. 50,338	Mds. 83,40,686	Mds. 2,12,005
1889-90	...	93,20,598	3,81,975	97,02,573	34,00,312	9,71,604	4,40,043	30,33,735	49,559	78,95,153	2,03,677
											Mds. 84,53,591
											80,98,830

There was a large falling off in this trade during the past year. The customs duty on imported salt was raised from Rs. 2 to Rs. 2·8 with effect from the 9th July 1888.

The total trade under imports showed a decrease of 2·77 per cent. in comparison with 1888-89, but the figures exhibited an increase of ·67 per cent. when compared with 1887-88. The sources of supply, port by port, during the past two years were as follows:—

	Quantities in tons.		Quantities in Indian maunds.	
	1888-89.	1889-90.	1888-89.	1889-90.
Liverpool ...	287,945	246,193	78,38,510	67,01,914

Madras ...	1,226	3,007	33,360	81,868
Mozanga	22	...	589
Mozambique ...	800	...	21,782	...
Port Elizabeth
Total ...	366,565	356,421	99,78,721	97,02,573

The imports of indigenous salt into Calcutta by the East Indian Railway during the past year was 1,319 maunds against 730 maunds and 353 maunds in 1888-89 and 1887-88 respectively. Of the past year's supply, 915 maunds were received from the Punjab, 87 maunds from the North-Western Provinces and Oudh, and 317 maunds from Rajputana and Central India.

The export trade shows a falling off of 4·20 per cent. on the total of 1888-89, and of 4·21 per cent. on that of 1887-88. The comparative table below shows the exportation of salt to the several provinces during the past two years:—

			1888-89.	1889-90.
			Mds.	Mds.
To Bengal	45,97,127	44,26,337
" Behar	26,02,671	24,44,921
" North-Western Provinces and Oudh	3,11,816	3,21,334
" Assam	5,15,948	4,72,353
" Chota Nagpore	1,81,297	1,94,275
" Orissa	31,819	35,925
" Other Provinces	8	8
Total	82,40,686	78,95,153
" Sea ports	2,12,905	2,03,677
GRAND TOTAL	84,53,591	80,98,830

After deducting the gross exports from the total quantity imported into Calcutta, there remained 16,05,062 maunds against 15,25,860 maunds in 1888-89 and 11,83,596 maunds in 1887-88.

The following statement furnishes in detail the quantities on which duty was paid in Calcutta and the 24-Pergunnahs during the past two years as compared with the inland despatches from Calcutta in those years:—

			Sea-imported salt.	Clearances.	Sent into the interior.
			Mds.	Mds.	Mds.
1888-89	93,09,586	93,09,586	84,53,591
1889-90	90,93,993	90,93,993	80,98,830

According to the foregoing figures, the amount of salt retained for consumption in Calcutta and the Suburbs, Hooghly, and a part of the 24-Pergunnahs district, and also available for export to the interior, was 9,95,163 maunds, against 8,55,995 maunds in 1888-89 and 9,00,444 maunds in 1887-88.

The different marts in the interior to which salt was carried from Calcutta to the extent of 1,00,000 maunds and upwards during the past year were Serajgunge (3,63,252 maunds), Durbhunga (2,41,684 maunds), Patna (2,36,858 maunds), Raneegunge (1,95,526 maunds), Balagunge (1,93,173 maunds), Jhalokati (1,85,500 maunds), Naraingunge (1,55,176 maunds), Gya (1,24,798 maunds), Sahebgunge (1,23,580 maunds), Arrah (1,16,881 maunds), Bhoyrub Bazar (1,16,500 maunds), Bhagulpore (1,10,402 maunds), and Goalundo (1,00,681 maunds).

The total quantity of saltpetre imported into, and exported from, Calcutta during the past two years was as follows:—

		1888-89.	1889-90.
		Mds.	Mds.
Imports	...	6,85,820	7,20,475
Exports	...	5,69,346	5,76,646

The advance shown in the last report was maintained and further extended during the past year, when the imports increased by 5.05 per cent. and 12.64 per cent. over those of 1888-89 and 1887-88 respectively. The sources of supply during the past two years, classified by provinces, are specified below:—

		1888-89.	1889-90.
		Mds.	Mds.
Behar	...	4,68,059	4,56,508
North-Western Provinces and Oudh	..	1,65,940	2,08,650
Punjab	...	51,001	53,110
Other places	...	506	2
Rajputana and Central India	...	314	2,205
Total	...	6,85,820	7,20,475

The total quantity of saltpetre exported from Calcutta during the past year was 1.28 per cent. above the figures for 1888-89, and 9.98 per cent. in excess of those for 1887-88. The quantity exported by sea during the past two years was distributed as follows:—

		1888-89.		1889-90.	
		Cwts.	Mds.	Cwts.	Mds.
To Foreign ports—					
United Kingdom	...	187,634	2,55,391	164,254	2,23,568
Other foreign ports	...	226,242	3,07,941	254,671	3,46,635
Total	...	413,876	5,63,332	418,925	5,70,203
To Indian ports—					
Madras	...	1,835	2,498	1,883	2,563
Other Indian ports	...	414	563	489	666
Total	...	2,249	3,061	2,372	3,229
GRAND TOTAL	...	416,125	5,66,393	421,297	5,73,432

The result of the past year's traffic was a surplus of imports over exports of 1,43,829 maunds, against 1,16,474 maunds in 1888-89 and 1,15,296 maunds in 1887-88.

Quantity not exported before the close of the year.

The gross import and export traffic of Calcutta in linseed during the past two years was as follows:—

		1888-89.	1889-90.
		Mds.	Mds.
Imports	...	75,42,288	70,51,004
Exports	...	77,06,700	69,79,031

There was again a small crop of linseed last year, but the Collector of Customs, Calcutta, observes that prices being higher in sympathy with the home market, supplies were forthcoming which otherwise might have been kept back.

The import trade fell off by 6·51 per cent. and 11·75 per cent. on the returns of 1888-89 and 1887-88 respectively. The different provinces which contributed to the trade during the past two years are mentioned below :—

			1888-89.	1889-90.
			Mds.	Mds.
Behar	41,99,502	35,25,812
North-Western Provinces and Oudh	20,33,292	19,81,928
Bengal	12,19,966	13,42,229
Assam	59,079	1,09,950
Rajputana and Central India	15,978	55,548
Central Provinces	3,777	23,047
Other Provinces	10,694	12,490
Total			75,42,288	70,51,004

The decrease in the export trade during the past year was 9·44 per cent. and 13·12 per cent. on the figures for the two previous years respectively. The details of the sea-borne trade during the past two years are given in the following statement :—

		1888-89.		1889-90.	
		Cwts.	Mds.	Cwts.	Mds.
To the United Kingdom	...	4,592,024	62,50,255	4,000,953	54,45,741
„ other Foreign ports	...	1,067,468	14,52,942	1,123,332	15,28,980
Total of Foreign ports	...	5,659,492	77,03,197	5,124,285	69,74,721
To Indian ports	...	4	5	7	10
GRAND TOTAL	...	5,659,496	77,03,202	5,124,292	69,74,731

A deduction of exports from imports shows a surplus of 71,973 maunds during 1889-90, against a deficit in imports over exports of 1,64,412 maunds and 42,914 maunds in 1888-89 and 1887-88 respectively.

The subjoined statement shows the trade of Calcutta in mustard seed during the past year as compared with the totals of the preceding year :—

MUSTARD SEED.

		1888-89.	1889-90.
		Mds.	Mds.
Imports	...	20,28,008	33,66,906
Exports	...	8,68,842	20,34,495

It will be seen that the imports during the past year exceeded the figures for 1888-89 and 1887-88 by 13,38,898 maunds (66·02 per cent.) and 10,78,455 maunds (47·13 per cent.) respectively. The following statement illustrates the places of supply, province by province, during the past two years :—

			1888-89.	1889-90.
			Mds.	Mds.
Behar	5,48,534	14,46,944
Assam	2,75,732	8,05,606
Bengal	3,15,850	6,33,492
North-Western Provinces and Oudh	8,36,854	4,26,506
Other places	51,038	54,358
Total			20,28,008	33,66,906

The advance last year in the export trade was 11,65,653 maunds, or 134·16 per cent., on the figures of 1888-89, and 9,18,265 maunds, or 82·26 per cent., as compared with 1887-88. The exports by sea rose from 5,05,889 maunds in 1887-88 and 3,31,216 maunds in 1888-89 to 16,18,650 maunds in the year under report. The details of this latter traffic for the past two years are shown in the following statement:—

		1888-89.		1889-90.	
		Cwts.	Mds.	Cwts.	Mds.
To Foreign ports—					
United Kingdom	...	187,804	2,55,623	800,202	10,89,164
Other Foreign ports	...	54,033	73,545	230,658	3,13,951
Total	...	241,837	3,29,168	1,030,860	14,03,115
To Indian ports	...	1,505	2,048	158,352	2,15,535
GRAND TOTAL	...	243,342	3,31,216	1,189,212	16,18,650

The total quantity of mustard seed not exported before the close of the year was 13,32,411 maunds, against 11,59,166 maunds in 1888-89 and 11,72,221 maunds in 1887-88.

The total quantity of raw silk, including cocoons, imported into, and exported from, Calcutta, during the past two years, is shown in the subjoined statement:—

SILK, RAW.

		1888-89.	1889-90.
		Mds.	Mds.
Imports	...	31,475	28,864
Exports	...	27,727	27,426

The quantity imported during the past year decreased by 8·29 per cent. as compared with that of 1888-89, but it was 3·82 per cent. in excess of the trade of 1887-88.

There was very little change in the total exports from Calcutta during 1889-90 and 1888-89, but when compared with 1887-88, the past year's figures show an advance of

14·10 per cent. The distribution of the export trade by sea during the past two years will be seen from the statement appended—

		1888-89.		1889-90.

Total	...	251,196	3,053	246,164	2,992
GRAND TOTAL	...	2,150,813	26,139	2,101,537	25,540

The total quantity of raw silk imported into Calcutta was 1,438 maunds in excess of that exported during the year, against a similar surplus of 3,748 maunds in 1888-89 and of 2,929 maunds in 1887-88.

In the following statement the sugar trade of Calcutta during the past year is compared with the figures of the preceding year:—

		1888-89.		1889-90.	
		Mds.		Mds.	
Imports	Refined	...	4,13,947	...	4,87,837
	Unrefined	...	11,83,888	...	12,13,193
Exports	Refined	...	2,01,926	...	2,85,312
	Unrefined	...	4,38,391	...	5,74,725

There was a recovery in the import trade both in refined and unrefined sugar. The advance under the former head was 17·85 per cent. compared with the previous year, but in comparison with 1887-88 the figures exhibited a decrease of 10·66 per cent., while in the case of unrefined sugar the traffic was in excess of those years by 2·47 per cent. and 13·08 per cent. respectively. The subjoined statement shows the places of supply, province by province, during the past two years:—

		Refined sugar.		Unrefined sugar.	
		1888-89.	1889-90.	1888-89.	1889-90.
		Mds.	Mds.	Mds.	Mds.
Bengal	...	1,57,272	1,06,788	9,05,230	8,06,163
Behar	...	12,323	23,739	46,808	2,30,558
North-Western	Provinces				
and Oudh	...	9,261	16,382	7,446	47,783
Madras	...	43,105	36,852	98	...
Bombay	...	30,999	25,363
Other places	...	1,60,987	2,78,713	2,24,306	1,28,689
Total	...	4,13,947	4,87,837	11,83,888	12,13,193

The quantity of refined sugar exported during the last year showed an increase of 83,386 maunds, or 41·29 per cent., as compared with 1888-89, and of 56,001 maunds, or 24·42 per cent., as compared with 1887-88. The trade in unrefined sugar showed also a rise of 1,36,334 maunds, or 31·09 per cent., and of 2,00,623 maunds, or 53·62 per cent., in comparison with those years respectively. The largest advance is observable in the exports by sea, which exhibited an increase of 185·40 per cent. under refined and of 79·51 per cent. under unrefined sugar in comparison with the previous year, as will be seen from the figures given below:—

	REFINED SUGAR.				UNREFINED SUGAR.			
	1888-89.		1889-90.		1888-89.		1889-90.	
	Mds.	Cwts.	Mds.	Cwts.	Mds.	Cwts.	Mds.	Cwts.
To Foreign ports	5,164	3,794	61,856	45,445	89,493	65,750	1,44,121	106,885
„ Indian	31,726	23,309	43,428	31,906	7,392	5,431	29,797	21,892
Total	36,890	27,103	1,05,284	77,351	96,885	71,181	1,73,918	127,777

After converting refined into unrefined sugar at the rate of one maund of the former to 2½ maunds of the latter, the total of the year's traffic aggregated 24,32,785 maunds under imports and 12,88,005 maunds under exports, leaving a balance of 11,44,780 maunds not exported before the close of the year, against a similar surplus of 12,75,549 maunds in 1888-89 and 14,90,629 maunds in 1887-88.

The traffic of Calcutta in Indian tea during 1889-90 as compared with the figures of the previous year is shown below:—

		1888-89.		1889-20.	
		Mds.	lbs.	Mds.	lbs.
Imports	...	11,23,252	92,427,594	11,49,524	102,817,943
Exports	...	11,78,851	97,002,629	12,57,514	103,475,451

The figures exhibit a larger increase than was noticed in the two previous reports. The quality of the crop was better than last year, and the market was generally firm and prices were fairly good. On the other hand, the China crop was poor in quality, and this increased the demand for Indian tea in the London market. The average price according to the Customs returns was 8 annas 1 pie per pound during the past year, against 8 annas 6 pies in 1888-89 and 9 annas 5 pies in 1887-88.

The import trade showed a considerable increase of 1,26,272 maunds, or 11·24 per cent., on the returns on the previous year, and of 2,30,820 maunds, or 22·66 per cent., as compared with 1887-88. The following statement shows the imports of tea during the past two years, classified according to the provinces from which it was imported:—

		1888-89.		1889-90.	
		Mds.	lbs.	Mds.	lbs.
Assam	...	8,07,628	66,456,247	9,14,397	75,241,810

N.-W. P. and Oudh	...	10,548	867,950	6,885	566,537
Punjab	...	7,096	583,899	6,017	544,484
Chota Nagpore	...	2,799	230,318	3,151	259,282
Behar	...	735	60,480	589	48,466
Other places	...	30	2,469	123	10,091
Total	...	11,23,252	92,427,594	12,49,524	102,817,943

The importation of Indian tea into Calcutta by sea during the past two years consisted of shipments from the following customs ports:—

		1888-89.		1889-90.	
		Mds.	lbs.	Mds.	lbs.
Chittagong	...	13,894	1,143,269	14,137	1,163,315
Madras	...	7	616	45	3,673
Burma	...	6	500	3	220
Other Indian ports	...	12	936	67	5,496
Total	...	13,919	1,145,321	14,252	1,172,704

The exports of tea were 6·67 per cent. greater than the trade of 1888-89, and 18·99 per cent. over that of 1887-88. The details of the sea-borne trade during the past two years are shown in the following statement:—

		1888-89.		1889-90.	
		Mds.	lbs.	Mds.	lbs.
To Foreign ports—					
United Kingdom	...	11,24,684	92,545,445	11,90,923	97,995,920
Other Foreign ports	...	38,934	3,203,718	45,631	3,754,795
Total of Foreign ports	...	11,63,618	95,749,163	12,36,554	101,750,725
To Indian ports—					
Bombay	...	10,442	859,259	14,588	1,200,390
Madras	...	681	56,022	3,401	279,858
Other Indian ports	...	659	54,220	1,105	90,934
Total of Indian ports	...	11,782	969,501	19,094	1,571,182
GRAND TOTAL	...	11,75,400	96,718,664	12,55,648	103,321,907

During the year under report, the imports were 7,990 maunds below the exports. In 1888-89 the deficit of imports over exports was 55,599 maunds, and in 1887-88, 39,779 maunds.

Quantity not exported before the close of the year.

The total weight of tobacco imported into, and exported from, Calcutta, during the past year is compared below with the trade of the year 1888-89 :—

TOBACCO.

		1888-89.	1889-90.
		Mds.	Mds.
Imports	...	5,75,858	5,54,069
Exports	...	4,04,733	3,73,124

As regards the imports, the result of the last year's traffic showed a falling off of 3.78 per cent. as compared with 1888-89, and of 8.25 per cent. as compared with 1887-88.

Imports.

The total supply brought to Calcutta from each province during the past two years is shown in the subjoined statement :—

			1888-89.	1889-90.
			Mds.	Mds.
Bengal	5,09,515	4,84,002
Behar	52,534	57,978
Madras	4,664	4,621
Orissa	1,705	1,740
North-Western Provinces and Oudh	416	298
Other places	7,024	5,430
Total	5,75,858	5,54,069

It will be seen that the total exports of tobacco from Calcutta during the past year were less than the figures for 1888-89 and 1887-88 by 7.80 per cent. and 12.50 per cent. respectively. The destination of this traffic by sea during the past two years was to the following places :—

Exports.

		1888-89.		1889-90.	
		lbs.	Mds.	lbs.	Mds.
To Indian ports—					
Madras	...	85,542	1,040	90,117	1,095

Other Indian ports	...	2,482,699	30,171	2,085,395	25,343
Total	...	17,455,777	2,12,136	15,625,979	1,89,899
To Foreign ports—					
United Kingdom	...	11,526	140	407,858	4,957
Other Foreign ports	...	2,313,961	28,121	999,387	12,145
Total	...	2,325,487	28,261	1,407,245	17,102
GRAND TOTAL	...	19,781,264	2,40,397	17,033,224	2,07,001

Last year the imports balanced the exports with a surplus amounting to 1,80,945 maunds, against 1,71,125 maunds in 1888-89 and 1,77,461 maunds in 1887-88.

Quantity not exported before the close of the year.

INLAND AND SEA-BORNE TRADE OF CHITTAGONG.

The sea-borne trade of Chittagong is dealt with in the report of the Collector of Customs, Calcutta, on Trade and Navigation, and it is also noticed in this report for purposes of comparison with the inland trade.

In the following statement the total quantity of the trade carried to, and from, Chittagong by country boats during the past year is compared with the figures of the previous year:—

		1888-89.	1889-90.
		Mds.	Mds.
Imports	...	19,54,586	13,55,746
Exports	...	6,13,248	5,48,088
		<hr/>	<hr/>
Total	...	25,67,834	19,03,834
		<hr/>	<hr/>

The total value of the above trade during the last two years is shown below, compared with the sea-borne trade of Chittagong in those years:—

				Imports.	Exports.	Total.
				Rs.	Rs.	Rs.
Inland trade	...	{ 1888-89	...	59,87,650	37,04,376	96,92,026
		{ 1889-90	...	49,80,639	36,70,715	86,51,354
Sea-borne trade	...	{ 1888-89	...	1,22,94,665	1,42,88,916	2,65,83,581
		{ 1889-90	...	1,41,78,274	1,75,18,987	3,16,97,261

The large increase noticed in the previous report was not maintained during 1889-90, the total quantity imported being 14,985 maunds, against 47,139 maunds and 20,163 maunds in 1888-89 and 1887-88 respectively. The supply shipped from Naraingunge aggregated 14,985 maunds, of which 12,150 maunds were carried by country boats and 2,835 maunds by coasting vessels, against 21,700 maunds and 25,439 maunds respectively in 1888-89. The Collector of Customs, Chittagong, attributes the decrease to larger importation in the preceding year.

The amount of caoutchouc exported from Chittagong by coasting vessels showed a decrease of Rs. 9,430 and Rs. 16,434 in value over the figures of 1888-89 and 1887-88 respectively. There were smaller imports of this article from the Hill Tracts during the year, and the Collector of Customs, Chittagong, states that the decline was probably owing to the continued disturbed state of that place politically. The Commissioner of the Division, however, remarks that "the trade in India-rubber has almost died out, and it is feared that the rubber-yielding trees are exhausted. I certainly saw none when beyond the frontier last year."

The total exports from Chittagong remained practically the same as in the previous year. The quantity of raw cotton shipped for Naraingunge during the past year was 30,897 maunds, which showed a decrease of 1,650 maunds and 38,769 maunds on the returns of 1888-89 and 1887-88 respectively.

There was a further large decrease of Rs. 42,273 in value in the imports by coasting vessels of this class of goods on the returns of 1888-89, and of Rs. 1,17,898 on those of 1887-88.

The total value of European piece-goods imported by sea-going vessels was Rs. 10,35,026, showing a falling off of Rs. 3,84,697 on the trade of the previous year, and of Rs. 5,32,105 as compared with 1887-88, the decline being "due to the effect of the bad harvest of 1888-89." The exports by country boats for consumption in the interior of the Chittagong district aggregated Rs. 5,74,208, against Rs. 4,09,406 and Rs. 4,47,148 in the above two years respectively.

There was a considerable recovery in the jute trade, the total quantity sent by coasting vessels from Naraingunge to Chittagong showing an advance of 4,85,486 maunds and 1,80,587 maunds on the returns of 1888-89 and 1887-88 respectively.

The amount of jute shipped for Europe from this port during the past two years was as follows :—

			1888-89.	1889-90.
Quantity	...	Mds.	17,46,109	20,49,430
Value	...	Rs.	95,37,959	1,36,56,771

There was a large falling off in the trade in gunnies, the total imports into Chittagong by sea-going vessels amounting in value to Rs. 1,04,334, against Rs. 1,43,870 in 1888-89 and Rs. 1,74,555 in 1887-88.

According to the country-boat returns, the number of cocoanuts imported into Chittagong was 1,817,800, showing a decrease of 1,059,600 as compared with 1888-89 and of 66,800 as compared with 1887-88. The falling off is attributed to a smaller local demand.

The amount of rice imported into Chittagong by country-boats showed a heavy decline of 2,87,493 maunds and 10,31,360 maunds over the figures of 1888-89 and 1887-88 respectively. There was also a very large decrease under paddy, as will be seen from the subjoined table :—

		1888-89.	1889-90.
		Mds.	Mds.
Rice	...	5,79,354	2,91,861
Paddy	...	3,61,034	2,16,838

The total quantity of rice exported to foreign countries during the past year is compared below with the figures of the preceding year :—

		1888-89.	1889-90.
Rice	... { Cwts.	372,461	213,995
	... { Mds.	5,06,961	2,91,271

After deducting the quantities exported to foreign ports from the imports by country boats, the result is as follows :—

		1888-89.	1889-90.
Rice	... { Cwts.	53,186	433
	... { Mds.	72,393	590
Paddy	... { Cwts.	264,073	295,141
	... { Mds.	3,59,433	2,16,838

Out of the above supplies, the quantities shipped for the different customs ports in connection with the coasting trade were as follows :—

		1888-89.	1889-90.
Rice	... { Cwts.	206,105	123,567
	... { Mds.	2,80,532	1,68,188
Paddy	... { Cwts.	196,100	153,072
	... { Mds.	2,66,914	2,08,348

The total value of the export trade carried by coasting vessels under this head showed a decrease of Rs. 14,059 on the total of 1888-89, and of Rs. 59,241 on that of 1887-88. The Collector attributes the falling off to late cattle epidemic.

The total value of oils carried to Chittagong coastwise amounted to Rs. 83,584 during the past year, against Rs. 83,887 in the previous year and Rs. 78,038 in 1887-88.

According to the boat traffic returns, the figures for the past year show an increase of 7,706 maunds and 36,929 maunds on the total of 1888-89 and 1887-88 respectively, due to a larger quantity of kerosine oil imported from Calcutta.

The aggregate quantity carried to Chittagong by country boats amounted to 42,600 maunds against 37,440 maunds in 1888-89 and 22,910 maunds in 1887-88. The decrease under brass and copper was 790 maunds in comparison with the total of the year preceding, the chief sources of supply being

Calcutta and Dacca. The increase under iron amounted to 2,797 maunds, and was due to the larger importation of building and bridge materials from Calcutta. Under "Other metals," which consisted of steel, lead, etc., imported from Calcutta for local use, the advance amounted to 3,153 maunds on the returns of the previous year. The coasting trade returns also show that Rs. 39,247 worth of metals were imported from Calcutta, against Rs. 46,150 in 1888-89 and Rs. 42,368 in 1887-88, the decrease being due to less local demand.

The large increase noticed in 1888-89 under this head was not maintained during the year under report, the quantity imported into Chittagong from Foreign ports being 3,31,675 maunds, against 4,99,827 maunds in the year preceding, and 3,48,060 maunds in 1887-88.

The total exports by country boats amounted to 2,61,121 maunds during the year, against 2,12,926 maunds and 2,17,240 maunds in 1888-89 and 1887-88 respectively, and were distributed during the past two years thus:—

		1888-89.	1889-90.
		Mds.	Mds.
To Chittagong	...	1,85,082	79,685
„ Noakholly	...	24,524	28,246
„ Dacca (Naraingunge)	1,50,700
„ Other districts	...	3,320	2,500
Total	...	2,12,926	2,61,131

Last year the increase was mainly due to larger clearances for Naraingunge, which also received largely by coasting vessels, the total imports amounting to 1,41,210 maunds against 1,14,679 maunds in 1888-89 and 1,21,657 maunds in 1887-88.

The total quantity of mustard and rape seed imported into Chittagong by country boats amounted to 33,605 maunds during the past year, against 31,040 maunds in 1888-89 and 11,652 maunds in 1887-88. The increase was due to larger importation from Naraingunge, which is the chief source of supply.

The imports of betelnuts into Chittagong by country boats fell off by 8,485 maunds in comparison with 1888-89, and by 3,945 maunds as compared with 1887-88, the decrease being due to smaller quantity shipped from Noakhally. Under the head "Spices, all other kinds," the figures showed an advance of 1,130 maunds on the total of 1888-89, but a decrease of 370 maunds on that of 1887-88. The increase during the past year was due to more chillies imported from the interior of the Chittagong district, chiefly for exportation to Naraingunge and Chittagong. As regards the coasting trade, the total value of the imports showed a rise of Rs. 5,147 on the returns of the previous year, chiefly in curry spices from Calcutta and Cochin, the increase being attributed to smaller importation in the previous year. Under exports, however, there was a heavy falling off amounting to Rs. 36,546 in value, and the Collector remarks that the decrease occurred in the exports of chillies, the price of which ruled high in the Chittagong market.

There was very little change in the import sugar trade of Chittagong carried by country boats during the past year, as the following figures will show:—

		1888-89.	1889-90.
		Mds.	Mds.
Sugar, refined	...	8,030	6,500
„ unrefined	...	86,640	35,043

Refined sugar was chiefly imported from Calcutta, Naraingunge and Jessore for local consumption. Unrefined sugar came partly from the interior of the Chittagong district, and partly from Jessore and Burrisaul. The imports by coasting vessels from Naraingunge and Calcutta during the past year showed a considerable increase, the total value amounting to Rs. 88,582,

against Rs. 68,208 in 1888-89 and Rs. 73,086 in 1887-88. The increase was chiefly due to greater demand in the Chittagong Hill Tracts.

Last year the supply of tea sent to Calcutta from Chittagong by coasting vessels was 1,163,315 lbs., and to other Indian ports 9,234 lbs., altogether 1,172,549 lbs., against 1,222,766 lbs. in 1888-89 and 1,116,116 lbs. in 1887-88, the decline being due to a short crop last year. The value of the trade was Rs. 5,99,811, against Rs. 6,28,244 in 1888-89 and Rs. 5,97,871 in 1887-88. The quantity sent to foreign ports was 19,725 lbs., against 8,988 lbs. in 1888-89 and 5,165 lbs. in 1887-88. The destination of the past year's supply was to the United Kingdom, Mauritius, Tasmania and Victoria.

The imports of tobacco into Chittagong from Naraingunge showed a falling off of 5,069 maunds, but the figures were in excess of those of 1887-88, as shown below:—

		By country boats.	By sea-going vessels.	Total.
		Mds.	Mds.	Mds.
1888-89	...	12,050	9,159	21,209
1889-90	...	16,140	...	16,140

The quantity of tobacco shipped for foreign ports aggregated 27,604 lbs. against 15,317 lbs. in 1888-89 and 26,573 lbs. in 1887-88. The increase was due to larger shipments for Maldives during the year under report.

SEA-BORNE TRADE OF ORISSA.

The total value of merchandise imported into, and exported from, the Orissa ports by sea during the past two years, exclusive of Government transactions, are shown in the following statement:—

PORTS.	IMPORTS.			EXPORTS.			GRAND TOTAL.		
	Goods traffic.	Specie.	Total.	Goods traffic.	Specie.	Total.	Goods traffic.	Specie.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

There was a satisfactory revival in the trade during the past year, the increase in the aggregate value being 9·28 per cent. as compared with 1888-89, but the figures are still 10·03 per cent. below those of 1887-88. The import trade showed a rise of 6·65 per cent. on the returns of the year preceding, and the export trade of 11·90 per cent.

The following statements show the places from which, and to which, the supplies went during the past year, as compared with the figures of the preceding year:—

	Imports from—		Exports to—	
	1888-89.	1889-90.	1888-89.	1889-90.
	Rs.	Rs.	Rs.	Rs.
Calcutta ...	53,59,159	56,71,052	37,66,697	35,48,705
Other Indian ports ...	9,128	3,171	5,89,882	6,48,949
Foreign ports ...	9,041	60,810	9,86,245	17,80,380
Total ...	53,77,328	57,35,033	53,42,224	59,78,034

The trade with Calcutta showed a rise of 5·82 per cent. under imports, but a falling of 5·78 per cent. under exports in comparison with the previous year, while there was a decrease of 65·26 per cent. in the trade with other Indian ports under the former head, and an increase of 10·01 per cent. under the latter.

As regards the trade with foreign ports, the figures showed a rise of 572·60 per cent. under imports, and of 80·52 per cent. under exports on the returns of 1888-89.

The chief articles of commerce imported into Orissa during the past year as compared with the figures of the previous year are shown below:—

PRINCIPAL ARTICLES.			QUANTITY.				VALUE.	
			English weight.		Indian weight.		1888-89.	1889-90.
			1888-89.	1889-90.	1888-89.	1889-90.

	Rs.	1,22,731	1,48,600

There was no change in the quantities of European twist and yarn imported during the past year as compared with 1888-89, but the figures were 20·14 per cent. in excess of the trade of 1887-88. In the case of Indian twist and yarn, however, the supplies showed an increase of 73·41 per cent. on the returns of 1888-89, and a decrease of 34·79 per cent. on those of 1887-88. European twist and yarn sent to Balasore from Calcutta was 45,212 maunds, against 45,708 maunds in 1888-89 and 37,632 maunds in 1887-88.

The total value of European piece-goods imported into Orissa showed a decrease of Rs. 2,96,107 or 25·69 per cent. on the figures of 1888-89, and of Rs. 7,98,953 or 48·26 per cent. on those of 1887-88. On the other hand, traffic in Indian piece-goods rose from Rs. 1,950 in 1888-89 to Rs. 9,841 in 1889-90; but this latter figure was Rs. 11,847 below that of 1887-88.

The quantities and values of the important articles exported from Orissa during the past two years are given in the sub-joined table:—

PRINCIPAL ARTICLES.			QUANTITY.				VALUE.	
			English weight.		Indian weight.		1888-89.	1889-90.
			1888-89.	1889-90.	1888-89.	1889-90.		
Rice	Cwts.	...	829,327	974,345	Mds. 11,28,808	Mds. 13,26,193	Rs. 25,60,756	Rs. 34,13,358
Paddy	20,478	31,048	27,873	42,260	32,374	46,910
Hides	No.	...	221,571	314,096	2,21,571	3,14,096	8,02,456	7,89,625
Lao, stick and other kinds	Cwts.	...	5,320	6,041	7,240	8,223	1,24,211	1,16,605
Oilseeds	17,508	47,764	23,899	65,011	88,306	2,54,219
Timber and sleepers	13,296	17,162	18,099	23,360	32,120	30,284
Silver (treasure)	Rs.	10,03,676	8,04,488

The export trade in rice rose from 11,28,808 maunds in 1888-89 to 13,26,193 maunds during the past year, and that in paddy from 27,873 maunds to 42,260 maunds during the two years respectively.

COUNTRY. BOAT TRAFFIC ON THE NUDDEA RIVERS.

The following statement shows the amount of downward and upward traffic carried on the Nuddea rivers during the past year as compared with the previous year :—

			DOWN-STREAM.		UP-STREAM.		TOTAL.	
			Weight.	Value.	Weight.	Value.	Weight.	Value.
			Mds.	Rs.	Mds.	Rs.	Mds.	Rs.
1888-89	69,67,953	2,56,10,239	18,74,082	66,56,254	88,42,035	3,22,66,493
1889-90	68,49,750	2,45,35,034	20,89,019	70,15,578	84,38,763	3,15,50,612

The falling off in the gross weight of goods registered was 4·56 per cent. as compared with 1888-89 and 10·72 per cent. in comparison with 1887-88. As regards the down traffic, there was a decrease of 6,18,203 maunds as compared with the figures of 1888-89, and of 10,67,079 maunds as compared with those of 1887-88. The upward traffic, however, showed a recovery, the quantity carried during the past year being 2,14,931 maunds in advance of that of 1888-89, and only slightly in excess of that of 1887-88. The condition of the Bhagiruthee and the Matabhanga rivers is still unsatisfactory, the traffic having been less than that of any of the preceding years.

The number of laden boats, the cargoes of which were registered during the past two years, was 25,350, against 27,824 in 1888-89 and 3,100 in 1887-88.

The quantities and values of the chief articles of traffic carried downward during the past two years were as follows :—

* Piece-goods are shown according to value in rupees.
† Hides are shown according to number.

The figures for the past year under rice showed a considerable decrease of 3,86,008 maunds and 2,01,152 maunds in comparison with 1888-89 and 1887-88 respectively, but the trade in paddy remained stationary, as will be seen from the subjoined table of traffic during the past two years:—

			1888-89.	1889-90.
			Mds.	Mds.
Rice not in the husk	14,12,619	10,26,611
„ in the husk (paddy)	14,03,784	14,19,067
Total in rice after converting paddy into rice at the rate of 25 seers of rice to a maund of paddy			22,89,984	19,13,528

The supply imported into, and exported from, Calcutta aggregated 9,84,040 maunds of rice and 5,57,519 maunds of paddy, and the trade of the other districts was 42,571 maunds of rice and 8,61,548 maunds of paddy.

BOAT TRAFFIC ON THE ORISSA CANALS.

The total weight and value of goods registered on the Orissa canals during the past year, as compared with the trade of the previous year, were as follows:—

ORISSA CANALS.		Weight of goods registered by weight.		Value of all articles of trade.	
		1888-89.	1889-90.	1888-89.	1889-90.
		Mds.	Mds.	Rs.	Rs.
Down traffic	...	4,10,341	6,28,002	18,55,391	21,44,809
Up traffic	...	3,36,917	3,45,806	9,29,374	13,01,399
Total	...	7,47,258	9,73,808	27,84,765	34,46,208

The total number of laden boats, the cargoes of which were registered on these canals during the past three years, was 7,489, against 7,004 and 7,348 in 1888-89 and 1887-88 respectively.

The abstract below shows those articles of traffic which were most largely carried by these routes during the past two years:—

NAMES OF ARTICLES.	Quantity.		Value.	
	1888-89.	1889-90.	1888-89.	1889-90.
	Mds.	Mds.	Rs.	Rs.
Cotton twist and yarn (European)	545	1,455	32,973	88,937
Turmeric ...	4,751	550	24,943	3,025
Jute, raw ...	570	980	2,422	4,042
Gram and pulse	18,163	16,040	40,867	40,100
Rice not in the husk	1,77,844	3,79,312	4,44,610	10,90,522
Do. in the husk	1,06,990	1,24,417	1,47,111	2,02,178
Oil, kerosine	21,120	32,234	84,480	1,36,994
Salt	21,109	21,317	68,604	69,280
Other oilseeds	22,507	23,620	64,708	67,907
Sugar, unrefined	41,534	24,025	1,50,561	1,08,113
Timber	78,179	89,522	1,56,358	1,90,234

BOAT TRAFFIC ON THE ORISSA COAST CANAL.

The total amount of merchandise carried along the Orissa Coast Canal during the past year is compared below with the figures of the previous year:—

ORISSA COAST CANAL.			1888-89.		1889-90.	
			Quantity.	Value.	Quantity.	Value.
			Mds.	Rs.	Mds.	Rs.
Down	3,08,208	11,98,010	3,11,549	14,73,708
Up	9,84,879	20,39,012	7,05,891	16,57,872
Total	12,93,087	32,37,022	10,16,940	31,31,580

The number of loaded boats registered during the past year was 12,415, against 13,667 and 12,233 in 1888-89 and 1887-88 respectively.

The principal articles of traffic carried along the coast canal during the past two years are shown in the following statements:—

STATEMENT OF BENGAL RAILWAY TRAFFIC.

In the following statement the total weight and value of the rail-borne trade of Bengal with other provinces in India during the past year are compared with the trade of the year preceding:—

		1888-89.		1889-90.	
		Quantity.	Value.	Quantity.	Value.
		Mds.	Rs.	Mds.	Rs.
Imports into Bengal	...	1,04,36,404	8,21,90,450	1,12,29,963	9,37,97,630
Exports from Bengal	...	1,25,09,165	8,61,34,843	1,16,54,330	8,95,65,464
Total	...	2,29,45,569	16,83,25,293	2,28,81,293	18,33,63,094

The following abstracts show, province by province, the sources of supply and the places of destination, in respect of the above traffic during the past two years:—

Imports into Bengal.

Total ...	{ 1888-89 1889-90	76,87,324 66,43,080	16,99,095 17,01,345	30,54,333 32,29,605	68,413 80,300	1,25,09,165 1,16,54,330

As regards the imports, the largest advance (62·69 per cent.) occurred in the quantities carried from the Punjab, owing to larger supplies of wheat, gram and pulse, and other food-grains. The deliveries from the North-Western Provinces and Oudh showed an increase of 2·33 per cent., the chief staples showing an improvement being gram and pulse, stone and lime, and cotton raw. From the Central Provinces the imports were 34·25 per cent. greater than the figures of the preceding year, the advance being chiefly observable under linseed and stone and lime. Transactions with Rajputana and Central India exhibited a rise of 65·28 per cent., owing to increased supplies of linseed.

The chief fluctuation in connection with the export traffic is a decrease of 5·97 per cent. in the despatches to the North-Western Provinces and Oudh, the articles affected being rice not in the husk and coal and coke. The next largest decrease occurred in the consignments to the Central Provinces, where the demand for rice not in the husk and coal and coke was limited, causing a falling off in the traffic in those articles. In the case of Rajputana and Central India the despatches from the Lower Provinces declined by 12·19 per cent., the fall under coal and coke and rice not in the husk making up almost the entire decrease. The fluctuations in other cases are unimportant.

The quantity and value of the different articles carried each way during the past two years are shown in the following statement:—

TRAFFIC ALONG THE STATE RAILWAYS.

The total weight and value of all articles of traffic carried by the different State Railways in Bengal during the past two years, are exhibited in the statement below :—

	1888-89.		1889-90.	
	Mds.	Rs.	Mds.	Rs.
Eastern Bengal State Railway ...	1,85,51,736	14,21,02,763	2,04,10,676	15,45,45,464
Calcutta and South-Eastern State Railway	12,32,563	38,23,495	13,15,259	39,78,379
Northern Bengal State Railway ...	90,17,737	6,54,72,446	1,04,89,655	7,79,43,218
Dacca State Railway	12,51,524	1,85,19,753	28,08,416	2,80,79,239
Nalhati ditto ...	6,01,088	93,03,553	5,60,848	92,75,491
Tirhoot ditto ...	74,16,572	6,22,92,385	1,05,98,793	7,47,91,613
Patna-Gya ditto ...	15,38,409	1,27,24,563	18,75,092	1,40,24,510
Assam-Bihar ditto ...	11,63,833	96,53,220	10,45,662	97,94,584
Total ...	4,07,73,462	32,39,22,178	4,91,04,401	37,24,32,527

The total quantity and value of the downward and upward traffic along the Eastern Bengal State Railway during the past two years, exclusive of railway materials, were—

TOTAL.				
	Downward traffic.	Upward traffic.	Quantity.	Value.
	Mds.	Mds.	Mds.	Rs.
1888-89 ...	1,41,83,457	40,68,249	1,85,51,736	14,21,02,763
1889-90 ...	1,63,60,463	40,50,213	2,04,10,676	15,45,45,464

The most important items of traffic carried by this route during the past year, as compared with the figures of the previous year, are shown in the following statement :—

CHIEF STAPLES OF TRAFFIC.		Downward traffic.	Upward traffic.	Total.	
				Quantity.	Value.
		Mds.	Mds.	Mds.	Rs.
Coal and coke ...	1888-89	12,04,906	54,942	12,59,848	4,72,413

EXTERNAL TRADE OF BENGAL WITH NEPAL, TIBET, SIKKIM, AND BHUTAN.

During the year under report, no change was made in the system under which the trade of Bengal with Nepal, Tibet, Sikkim, and Bhutan is registered in these provinces. The classification of commodities formerly prescribed by the Government of India also remained unaltered, but the number of registering stations was increased from 38 in 1888-89 to 40 in 1889-90, there being an increase of two posts for the registration of the Tibet and Sikkim trade.

The abstract below shows the total value of the trade to and from Bengal only during the past year, as compared with the previous year:—

	Imports into Bengal.			Exports from Bengal.	
	1888-89.	1889-90.		1888-89.	1889-90.
	Rs.	Rs.		Rs.	Rs.
From Nepal ...	93,97,491	1,03,92,153	To Nepal ...	74,30,836	79,06,026
„ Tibet and Sikkim ...	1,27,804	2,67,101	„ Tibet and Sikkim ...	79,904	2,32,528
„ Bhutan ...	1,48,708	1,79,649	„ Bhutan ...	1,53,044	1,84,111
Total ...	<u>96,74,003</u>	<u>1,08,38,903</u>	Total ...	<u>76,63,784</u>	<u>83,22,665</u>

The value of the registered trade with other provinces, which passed through Bengal during the past two years, is shown in the following statement:—

YEARS.	Imports into other provinces from Nepal.		Exports from other provinces to Nepal.	
		Rs.		Rs.
1888-89	1,81,334		2,01,527
1889-90	98,163		1,85,105

The gross value of these two sections of the registered trade during those years was as follows:—

YEARS.	Imports.	Exports.	Total.
	Rs.	Rs.	Rs.
1888-89 ...	98,68,337	78,65,311	1,77,23,648
1889-90 ...	1,03,37,066	85,07,770	1,91,44,836

The total value of the trade between Bengal and Nepal registered during the past two years is shown in the subjoined statement:—

YEARS.	Imports from Nepal.	Exports to Nepal.	Total.
	Rs.	Rs.	Rs.
1888-89 ...	93,97,491	74,30,836	1,68,28,327
1889-90 ...	1,03,92,153	79,06,026	1,82,98,179

The aggregate value of the trade of the past year was 8.03 per cent. in excess of that of the previous year, but it was still 1.54 per cent. below the figures for 1887-88.

The usual comparative statement showing the total quantity and value of all the principal staples carried both ways during the past two years is appended. The figures shown here, however, are exclusive of the registered trade with other provinces which passed through Bengal.

The largest increase in the import traffic was under food-grains (7,38,174 maunds) and mustard seed, and the largest decrease under treasure (Rs. 5,31,371), linseed, and timber; while in the export traffic European cotton

piece-goods alone showed an advance of Rs. 6,17,501, against slight decreases under silk and woollen piece-goods :—

In September 1889, the Deputy Commissioner of Darjeeling having reported that a new road had been opened direct from Pakyong to Pedong, by which traffic from Sikkim to Dandim could be carried without passing the registering stations at Rhenok and Kalimpong, a change in the existing stations for the registration of traffic with Tibet and Sikkim became necessary. Mr. Paul accordingly proposed to remove the registration station from Kalimpong to Laba, and that at Rhenok back to Pedong, the Runjeet station remaining where it was. This arrangement was approved by Government, and registration of trade was started at the new stations from the 1st January 1890. The total value of the trade registered during the past year is compared below with that of the previous year:—

	Trade with Tibet.		Trade with Sikkim.	
	1888-89.	1889-90.	1888-89.	1889-90.
	Rs.	Rs.	Rs.	Rs.
Imports into British territory ...	3,168	1,49,254	1,24,636	1,17,847
Exports from ditto ...	4,181	1,31,458	75,723	1,01,070
Total ...	7,349	2,80,712	2,00,359	2,18,917

It is apparent from these figures that the restrictions on trade across the Sikkim-Tibet frontier have now been partially, if not wholly, withdrawn. The subjoined statement shows the chief articles of merchandise imported from Tibet and Sikkim during the past year, as compared with the totals of the preceding year:—

Imports from Tibet.

	1888-89.	1889-90.		1888-89.	1889-90.
	Rs.	Rs.		Rs.	Rs.
Yak-tails ...	842	37,394	Silver	15,920
Wool, raw ...	358	33,978	Silk, manufactured
Horses, ponies, and mules	990	27,360	(Indian)	6,920
Wool, manufactured	Musk	5,241
(Indian) ...	707	16,054	Tea, Foreign ...	271	4,393

Imports from Sikkim.

	1888-89.	1889-90.		1888-89.	1889-90.
	Rs.	Rs.		Rs.	Rs.
Other rain crops ...	41,946	45,859	Hides of cattle ...	3,521	2,509
Brass and copper ...	6,954	14,500	Spices other than betel-nuts ...	4,107	2,489
Gram and pulse ...	7,030	13,417	Cotton, raw ...	3,664	1,551
Vegetable oil	9,650	Horses, ponies, and mules	2,070	1,530
Fresh fruits and vegetables ...	40,215	9,519	Cotton piece-goods (Indian) ...	3,053	1,341
Silver ...	1,763	4,300			
Cattle ...	1,587	2,721			

The following statements show the total value of each of the principal articles in the export trade between Bengal and these two States:—

Exports to Tibet.

	1888-89.	1889-90.		1888-89.	1889-90.
	Rs.	Rs.		Rs.	Rs.
Cotton piece-goods (European) ...	2,256	40,910	Silk, manufactured (Indian)	3,090
Indigo	19,872	Cotton twist and yarn (European)	3,026
Wool, manufactured (European) ...	1,862	14,817	Iron	1,565
Brass and copper	8,066	Chinese and Japanese ware	1,000
Tobacco ...	61	6,807	Jewellery	760
Earthenware and porcelain	6,790	Other kinds of dyeing materials	420

Exports to Sikkim.

	1888-89.	1889-90.		1888-89.	1889-90.
	Rs.	Rs.		Rs.	Rs.
Cotton piece-goods (European) ...	28,020	33,775	Cattle ...	4,301	5,194
Rice, husked ...	10,233	13,477	Salt ...	3,782	4,799
Tobacco ...	10,287	7,271	Fresh fruits and vegetables	2,789	2,888
Intoxicating drugs other than opium.	6,480	Brass and copper ...	854	2,470
Provisions other than ghee	2,006	6,301	Other kinds of living animals ...	341	1,676

Last year the trade between Bengal and Bhutan was registered at Ambari, Buxa, and Hantupara, in the Julpigoree district, and at Rhenok, Kalimpong, Pedong, and Laba in the Darjeeling district. The following statement shows the total value of the trade registered during the past year as compared with the figures of the preceding year:—

	Imports from Bhutan.	Exports to Bhutan.	Total.
	Rs.	Rs.	Rs.
1888-89	1,48,708	1,53,044	3,01,752
1889-90	1,79,649	1,84,111	3,63,760

These are unimportant fluctuations, but the general tendency of the traffic is to increase. The value of each of the principal articles of import trade was as follows:—

Imports from Bhutan.

	1888-89.	1889-90.		1888-89.	1889-90.
	Rs.	Rs.		Rs.	Rs.
Wool, raw ...	45,765	65,733	Horses, ponies, and mules	10,710	12,330
Do., manufactured (Indian) ...	26,132	32,294	Cattle	4,850
Musk ...	15,192	20,903	Fresh fruits and vegetables	11,947	2,270
Wax ...	13,000	16,801	Ghee ...	2,240	1,858
Yak-tails ...	10,236	14,792	Caoutchouc ...	5,762	1,218

The following abstract shows the value of the chief items of export traffic:—

Exports to Bhutan.

	1888-89.	1889-90.		1888-89.	1889-90.
	Rs.	Rs.		Rs.	Rs.
Cotton piece-goods (European) ...	33,062	40,754	Brass and copper ...	1,681	7,978
Betelnuts ...	31,065	36,790	Cotton twist and yarn (European) ...	885	7,066
Tobacco ...	45,561	32,876	Silk, manufactured (Indian) ...	3,357	3,378
Rice, husked ...	19,064	29,504	Sugar, undrained ...	4,602	3,117
Wool, manufactured (European) ...	9,204	13,824			

PUBLIC WORKS.

Roads and Buildings.

THE outlay of the year 1889-90 on Civil and Military works amounted to Rs. 78,61,872.

The expenditure under the various service heads is shown in the following table compared with the grants of the year:—

• SERVICE HEADS.	ORIGINAL WORKS.		REPAIRS.		TOTAL.	
	Grant.	Outlay.	Grant.	Outlay.	Grant.	Outlay.

IMPERIAL WORKS.

The old block of offices known as Loudon's Buildings, Calcutta, occupied by some of the Departments of the Government of India, was condemned and dismantled, and on its site the erection of a new building for the Secretariat of the Government of India was commenced. The foundations were completed before the close of the year. An estimate, amounting, to Rs. 11,38,276, has since been sanctioned for the work.

New Secretariat building for the Government of India. The buildings for the accommodation of the Survey of India Offices at Calcutta were practically completed during the year. The total expenditure amounted to Rs. 8,55,743.

Survey of India Offices. The combined post and telegraph offices at Agiaon and Nasrigunge were completed during the year.

Postal. A new post office at Chyebassa was nearly completed.

The post office at Dacca with its out-offices was completed during the year.

Opium. A new office and weighing shed was constructed at Ekdari, near the Nepal frontier, in the Chum-parun district.

Military. The cantonment land and buildings at Berhampore were made over to the Local Government during the year.

The sum of Rs. 2,48,400 was spent during the year on works connected with the Chin-Lushai expedition. The road from Demagiri to Lungleh was improved. About 10 miles of it were widened, and a new alignment was made between the Saraul and the Phyrang rivers. Quarters for the officers were constructed in Fort Lungleh. A stockade was constructed at Lungsin. The Burkal Tramway was completed in December 1889. Quarters for the officers and troops and other works necessary to facilitate the advance of troops were constructed along the line of road.

An upper storey to the telegraph office at Dullunda was completed.

Telegraph. A telegraph office was constructed at Guntuk.

Several alterations were made in the Telegraph Office at Calcutta.

Currency building. The drainage of the Currency building premises at Calcutta was improved.

PROVINCIAL WORKS.

Police Court building at Calcutta.

The new Police Court at Calcutta was commenced in March 1889, and was roofed over before the end of the year.

The extension of the Small Cause Court, Calcutta, was commenced in

Extension of Small Cause Court, Calcutta.

January 1890, and was in progress at the end of the year. Considerable difficulties were encountered in the foundations on account of the soil proving treacherous: several old walls and a large sewer were also met with. These works formed part of Calcutta as it existed 100 years ago.

Additional accommodation was provided for the Collector's court at Balasore.

Land Revenue and Magisterial.

The subdivisonal court and the subdivisonal residence at Somastipore were completed.

An additional building was completed at Arrah for the towji offices, and a treasure guards' house was commenced at the same place.

A new court-house for the Deputy Commissioner at Doomka was nearly completed.

The additions and alterations to the Deputy Commissioner's office at Julpigoree were completed. The Commissioner's Court at Julpigoree was also completed. The subdivisonal court-house at Naraingunge was commenced, and more than half of the work was done. The khas tehsil office at Cox's Bazar was completed.

During the year the brickwork in the superstructure of the new public offices at Chittagong was all completed, except the domes and cornices and a portion of the north-east wing, and corresponding progress was made with the other portions of the work.

The alterations to the old circuit-house at Julpigoree to convert it into a residence for the Commissioner were completed.

Circuit-houses.

The new circuit-house at Pubna was completed. The work of converting the old Judge's court-house at Mymensingh into a circuit-house, dâk bungalow, and quarters to let, was completed.

Improvements were made in the Russa distillery. The distilleries at Rajnehal and Godda, which were in progress during the previous year, were completed during the year under review.

Excise.

An improved arrangement for cooling the liquor during distillation was introduced at the Mozufferpore distillery.

Improved arrangements for cooling the liquor during distillation were commenced in the Chupra and Arrah distilleries, and an extension of the still shed at the Kamraon distillery, near Bankipore, was also commenced.

A new distillery was commenced at Durbhunga, and some progress was made in sinking two wells and in the collection of materials.

Museum.

The extension of the Museum at Calcutta was continued from the preceding year, and the work

was nearly completed.

The new Port and Shipping Office at Calcutta was taken in hand towards the close of the year. Good progress was made

Port and Shipping Office.

with the foundations, which had to be taken down to an average depth of 14 feet on account of bad soil. In this case also remains of old Calcutta were discovered, and a number of cannon balls were found in the excavations.

On the Maidan, Calcutta, the two tanks north and south of the Presidency Jail were cleansed and deepened, the excavated silt being used to form two raised rides in the vicinity. Some paths were also provided for foot passengers.

Maidan.

High Court buildings.

Improvements were made in the sanitary arrangements of the High Court buildings at Calcutta.

Police.

Dead-houses at Durbhunga and Chupra were commenced, and the latter was nearly finished.

The new Police office at Cuttack was completed.

The additions and alterations to the Mill barracks at Dacca, to make them suitable for occupation by the Reserve Police, which were taken in hand in the previous year, were completed.

The additions to the Judge's court-house at Purneah were completed and the record-room fitted with iron record-racks. An additional record-room for the Judge's Court at

Judicial.

Arrah was commenced.

The site for a new Judge's Court at Noakhally was cleared and the foundations were commenced.

The subjoined statement shows the progress made during the year in providing improved accommodation for Munsifs' Courts:—

Munsifs.

Name of place.	Number of Courts for which accommodation is provided.	Progress made.
Bishenpore ...	Double ...	Completed.
Katiyar ...	Single ...	Ditto.
Banka ...	Do. ...	Ditto.
Karaset ...	Double ...	Ditto.
Somastipore ...	Single ...	Ditto.
Gya ...	Double ...	Ditto.
Dinagapore ...	Do. ...	Ditto.
Gaibandha ...	Do. ...	Ditto.
Kishoregunge ...	Do. ...	Ditto.
Bongong ...	Do. ...	Ditto.
Raigunge ...	Single ...	Ditto.
Hajipore ...	Do. ...	Nearly completed.
Balarghat ...	Do. ...	Ditto.
Hathazari ...	Do. ...	Approaching completion.
Dantoon ...	Do. ...	In progress.
Satkhira ...	Double ...	Ditto.
Arrarcach ...	Single ...	Ditto.
Kusba ...	Do. ...	Materials collected at site.
Nabinagar ...	Double ...	Ditto ditto.
Kurigram ...	Treble ...	Manufacture of bricks well advanced.
Nelphamari ...	Do. ...	Ditto ditto.
Bogra ...	Single ...	Ditto ditto.
Naraingunge ...	Conversion from single to double.	In abeyance pending further orders.
Durbhunga ...	Double ...	Commenced.

Cast-iron railings were fixed to the gallery windows of St. John's Church, Calcutta.

Churches and cemeteries.

A new shed for the caretaker and a protective embankment, with some other minor works, were carried out at the Durbhunga cemetery, and similar improvements were effected in the Arrah cemetery.

The second barrack in the Central Jail at Bhagulpore was completed, and an overbridge was built to connect the roof of the woollen factory and the engine-house.

Jails.

The following works were done in the Presidency Jail:—Additions and alterations to the jail; building of two corrugated iron sleeping wards; erection of dacoit railing and gates; construction of a new civil debtors' ward; construction of new press sheds.

An upper floor was added to the workshop in the Reformatory School at Alipore, and an upper storey over the dormitory in that school.

An intermediate jail at Doomka was in progress when the year closed.

Certain additions and alterations to buildings in the Dacca Central Jail were completed, as also the additions and alterations to the intermediate jail at Khulna, which were commenced in the previous year.

The lock-ups at Deoghur, Gaibandha, Somastipore, and Pakour were completed. The hajut at Rajmehal was converted into a lock-up.

Lock-ups.

New gate buildings were erected for the lock-up at Cutwa.

The municipal water-supply was extended to the Government school at Bhagulpore.

Colleges and Schools.

A hostel for the Mahomedan students in the training school at Bankipore was commenced.

The reconstruction of the survey school in connection with the Ravenshaw College, Cuttack, was completed.

The north-west wing to the school building attached to the Rajshahy College was completed. The additions to the zillah school at Julpigoree were commenced and nearly half done during the year. The gymnasium in the Dacca College was completed.

A Police dead-house with a lecture hall was added to the Medical College at Calcutta.

The new Medical School at Dacca, which was commenced in June 1887, was completed in July 1889. A dead-house was also constructed during the year.

The drainage and water-supply of the Campbell Hospital at Scaldah were improved.

Hospitals and Dispensaries.

At the Eden and Medical College Hospitals servants' quarters and a steam laundry were erected.

The drainage of the grounds of the Presidency General Hospital was improved.

The alterations to the old Bhutia school at Darjeeling to convert it into a residence for the medical officer attached to the Eden Sanitarium, which were commenced in January 1889, were completed.

Some additions and alterations were made to the lunatic asylum at Cuttack, namely—

Lunatic asylums.

(1) The construction of two additional wards and two extra cells, with the object of enlarging the existing building; and (2) a change in the position of the wall at the front of the asylum, which was brought up to the margin of the public road, so as to increase the area of the enclosure.

Materials were obtained for improving the lightning-conductor of the light-house at Shortt's Island by the addition of a branch conductor, which was required in order to

Light-houses.

protect the flagstaff from injury.

Materials were also collected for the purpose of adding iron gutters to the corrugated iron store-house to enable the rainfall to be utilised for drinking purposes, and a thermometer shed was constructed for the Meteorological Department.

The most important work in progress at False Point during the year was the construction of a stone revetment on the slopes of the mound which surrounds the refuge-house.

Refuge-houses.

This work, which was found necessary in order to protect the slopes of the mound from erosion by the waves of the sea, was estimated to cost a sum of Rs. 11,313, and at the close of the year about seven-eighths of the work had been completed.

The laying of the 10-inch pipe, which formed part of the original estimate for piping, was carried out as far as the pipes in stock admitted. A separate estimate for additional distributary pipes was sanctioned, and a supply of 4-inch, 3-inch, and 2-inch pipes was ordered.

Bhagulpore Water-works.

The trial coal-boring operations which were in progress in the Rajmehal Hills at the end of 1888-89 were completed. The results were reported by the Director of the Geological Survey, and it was decided to make one additional experiment of three borings taken down to a depth of 300 feet each. The position of the new bore-holes was fixed by the Director of the Geological Survey, and work was commenced. At the end of the year one bore-hole had been taken down to 145 feet and another had been commenced.

Miscellaneous.

The work of constructing an embankment with a sluice gate along the banks of the Ichamutty river to protect the civil station of Pubna from floods was commenced, and two-thirds of the earthwork done, during the year.

The construction of a causeway on the 46th mile of the Poooree road was sanctioned during the year, in order to avoid the inconvenience to the traffic which had been caused

Communications.

by frequent breaching of the road at this place during the flood season, and at the close of the year the work was nearly finished.

The earthwork, bridges and culverts, and the metalling of the Hazaribagh-Ranchee and the Ranchee-Purulia road were completed. There has been a large increase of traffic on the latter road; the only break now being at the Suburnarekha river near Thoolin, where a bridge is much required. The girders for this bridge are now at site.

The first section of the Ranchee-Chyebassa road was completed with the exception of five miles, and on the second section a good start was made with the bridges, six being well in hand at the end of the year: the metal collection was completed and the earthwork nearly finished. Metal collection was started on the third section during the year, and new alignments were being surveyed in view to reducing the road gradients. The only break in the fourth section is the Sungai river crossing near Chuckurdharpore. The estimate for bridging the river was completed and the iron girders required were ordered and are being conveyed to site.

The earthwork and minor culverts on the Chass-Goolbera road were completed, and the estimates for five major bridges which are required are under revision.

The reconstruction of the Benajore nullah bridge on the 4th mile of the Raneegunge-Midnapore road was completed.

The extension of the Goompahar Cart Road from Sukrapokri to Jorpokri, commenced in November 1888, was completed during the year.

The first section of the Cart Road from Darjeeling bazar to Lebong was commenced during March 1890.

The demarcation of the Government lands alongside the Calcutta and Jessore road within the Jessore and Bongong subdivisions and the erection of cast-iron boundary pillars was in abeyance pending the preparation by the Collector of fresh plans showing the correct boundaries.

The iron girder bridge over the Mahanady river on the Hill Cart road near Silliguri was commenced, and the iron girders were received during March 1890. The other materials were being collected.

The Secretary of State having called for information regarding the length of road communication maintained by public authorities in Bengal, the following statement was drawn up and forwarded to the Government of India.

Statement showing the length of road communication maintained by public authorities in Bengal during the year 1888-89.

[This statement does not include roads and streets within municipal limits.]

The slope of the river bank at Moorshedabad has been giving way for the last few years. It has been undermined and washed away in several places, all more or less in proximity to the Nawab's buildings at that

Miscellaneous public improvements.

place. During the year under review the damage done to the slope was very great, and protective works had to be undertaken to prevent further erosion.

For the protection of the right bank of the river Bhyrub and the European quarter of the town of Khulna, an expenditure of Rs. 6,810 was incurred. The work embraced the construction of new spurs and repairs of the existing spurs.

The improvement of the civil station of Khulna, commenced in April 1888, was completed. The conversion of the Government brick-field at Khulna into a public garden, also commenced in April 1888, was completed during the year.

The Burrakur Iron Works, which had been under the management of the Public Works Department for some years, were leased to the Bengal Iron and Steel Company, which was formed with the object of acquiring them. The works were transferred to the Company on the 1st of October 1890.

Floods, storms, accidents.

The Akra Brick Factory, from which all the bricks required for works in Calcutta and its vicinity are obtained, was also leased out during the year on conditions by which the Government will obtain all the bricks it requires at fixed rates.

Owing to the limited expenditure on Public Works and the nature and situation of the works in progress, the Seebpore Workshops were not fully employed during the year. The damages caused by the earthquake of 23rd December 1888 were repaired during the year.

Owing to the heavy rain that fell in July and August 1889, several large slips occurred on the Teesta Valley and the Darjeeling Hill Cart roads, and the rise of the river caused great damage to some of the bridges and culverts, and revetment walls on the former road. The spur at the Reang Suspension bridge and the timber bridges over the Zakmoo, Ropee, and Simli Jhoras were washed away. Prompt measures were taken to restore the roads.

In the Dacca district the floods were also high during the year. The floor of the old Munsif's court at Manickgunge was about 6 inches under flood level. The flood lasted for about a month.

The flood of the year under review in the Brahmini river was higher than that of the previous year, and rose below the weir at Janapore to a height of only 6 inches below the flood of 1881, which is the highest that has occurred since the weirs were constructed.

The floods did some injury to the metalling of that section of the Orissa Trunk road which lies between the Brahmini and Byturni rivers, but the damage done was not extensive and was repaired at a small cost.

Exceptionally high floods occurred in the Boor Gunduck river in Mozufferpore on the 11th and 27th July and 25th September 1889, which did some damage to the crops and to the Tirthoot State Railway. High floods in the Gunduck also in July 1889 caused three extensive breaches in the Chumparun embankment of that river. The weir of the Madhubani canal on the Teur river was damaged by floods.

The Grand Trunk road from the Sone at Dchree to the Kurumnassa river, on the borders of the North-Western Provinces, was made over to the Sone Circle during the year.

During the year the Grand Trunk road from Chotekhund to Burrakar, 97½ miles; the Rancegunge-Midnapore road from Rancegunge to the Damoodah river, 3 miles; the Lithoria road from the Damoodah river to the Grand Trunk road, 3½ miles, were transferred to the District Board of Burdwan. The Rancegunge and Midnapore road from the Damoodah to Kurkasole, and the Bishunpore Loop Line road, 4 miles, were transferred to the District Board of Bankoora.

The Grand Trunk road from Bhullua Chuttee to the Sone river was transferred to the District Board of Gya at the end of the year.

The surveys in connection with the Damoodah and Roopnarain rivers were almost completed at the close of the year.

The Chittagong Trunk road, passing through the districts of Chittagong, Noakholly, and Tipperah, was made over on the 1st April 1889 to the respective District Boards for future maintenance.

Irrigation.

THE actual transactions of the Irrigation Branch for the year 1889-90 are shown below in comparison with the budget and revised estimates of that year:—

	Budget estimate.	Revised estimate.	Actuals.
RECEIPTS.	Rs.	Rs.	Rs.
XXIX.—Major works—Direct receipts—			
Provincial	13,58,000	14,44,000	15,04,474
XXX.—Minor works and Navigation—			
Irrigation and navigation works—			
Provincial	8,92,000	7,91,000	7,79,218
Agricultural works—			
Provincial	8,000	9,000	9,007
Total	22,58,000	22,44,000	22,92,699
CHARGES.			
42.—Major works—Working expenses—			
Provincial	14,20,000	14,36,500	13,38,765
43.—Minor works and navigation—			
Irrigation and navigation works—			
Provincial	8,73,500	7,62,100	6,07,162
Agricultural works—			
Provincial	7,81,500	9,33,900	8,11,601
Contributions	22,723	12,362
49.—Irrigation works—			
Capital expenditure not charged			
against revenue	6,60,000	*4,56,000	*4,28,513
Total	37,35,000	36,11,223	31,98,403

* Exclusive of expenditure in England.

In addition to the expenditure shown in the above statement, a sum of Rs. 1,15,465 was expended on embankments and drainage works, and was charged to the suspense head "Tuccavi." The expenditure under this head in the previous year was Rs. 24,873. The increase is chiefly due to an outlay of Rs. 76,419 incurred on the Churrial khal drainage project which was sanctioned during the year. Besides, the expenditure during the year on the Rajapore drainage project, chargeable in the civil accounts under the head "Local loans," was Rs. 2,36,200.

I.—MAJOR IRRIGATION WORKS.

Capital outlay.

The total capital outlay (direct charges) not charged against revenue to end of the year 1889-90 amounted to Rs. 5,93,18,586, against sanctioned estimates aggregating Rs. 6,93,53,626, leaving an unspent balance of Rs. 1,00,35,040 at the close of the year:—

MAJOR IRRIGATION WORKS.	Amount of sanctioned estimate.	Expenditure during 1889-90.	Expenditure to end of 1889-90.	Balance for expenditure from 1st April 1890.
	Rs.	Rs.	Rs.	Rs.
Orissa Canals	3,13,96,220	3,49,008	2,38,86,330	75,09,890
Midnapore Canal	82,96,010	14,122	82,80,132	15,878
Hidgellee Tidal Canal	17,72,699	17,95,489	(—)22,790
Sone Canals	2,78,88,697	71,953	2,53,56,635	25,32,062
Total	6,93,53,626	4,35,083	5,93,18,586	1,00,35,040

The indirect charges (Capital expenditure not charged against revenue) to end of the year 1889-90 are compared with the sanctioned estimates in the table following:—

MAJOR IRRIGATION WORKS.	Amount of sanctioned estimate.	Charges during 1889-90.	Charges to end of 1889-90.	Balance available on 1st April 1890.
	Rs.	Rs.	Rs.	Rs.
Orissa Canals ...	9,19,625	8,035	5,39,516	3,80,109
Midnapore Canal ...	1,83,711	263	1,83,974	(—)261
Hidgellee Tidal Canal ...	41,807	44,807	Nil.
Sone Canals ...	13,99,607	4,008	9,02,567	4,97,040
Total ...	25,47,750	12,306	16,70,864	8,76,886

The amount of simple interest during 1889-90 on the debt incurred on the abovenamed works was Rs. 23,64,042 against Rs. 23,39,849 of the previous year. The charges on this account to the end of the year under review amounted to Rs. 3,64,27,969.

Revenue Receipts and Expenditure.

The direct revenue receipts and working expenses (direct charges) of the Major Irrigation Works for the year 1889-90, compared with those of the previous year, are shown in the following statement:—

MAJOR IRRIGATION WORKS.	1889-90.			1888-89.		
	Receipts.	Working expenses.	Net result.	Receipts.	Working expenses.	Net result.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals ...	3,04,124	4,31,697	(—)1,27,473	2,43,294	3,86,916	(—)1,43,652
Midnapore Canal ...	2,77,423	2,00,491	76,929	2,52,610	2,00,062	51,448
Hidgellee Tidal Canal ...	41,962	25,715	16,237	55,097	75,273	(—)20,176
Sone Canals ...	8,80,975	6,80,959	2,00,016	8,31,278	7,42,619	88,659
Total ...	15,04,474	13,38,765	1,65,709	13,81,179	14,04,900	(—)23,721

It will thus be seen that compared with the previous year there is an increase in the receipts of Rs. 1,23,295 and a decrease in the working expenses of Rs. 66,135, the net result being a profit of Rs. 1,65,709 in place of a deficit of Rs. 23,721 in the previous year.

In the operations of the year under review all the canals classed as major works show a profit except the Orissa project, the working expenses of which are in excess of the receipts.

II.—MINOR WORKS AND NAVIGATION.

IRRIGATION AND NAVIGATION WORKS.

WORKS FOR WHICH CAPITAL AND REVENUE ACCOUNTS ARE KEPT.

(1)—Capital outlay.

The capital outlay (direct charges) is shown in the table below:—

WORKS.	Amount of sanctioned estimate.	Expenditure during 1889-90.	Expenditure to end of 1889-90.	Balance for expenditure from 1st April 1890.
	Rs.	Rs.	Rs.	Rs.
<i>Canals in abeyance or abandoned.</i>				
Tirhoot project ...	3,51,079	...	5,31,425	(—) 1,80,346
Damoodur project ...	1,43,974	(—)1,200	1,40,941	(—) 5,967
<i>Canals under construction.</i>				
Calcutta and Eastern canals	(—) 169	52,27,259	...
Orissa Coast canal ...	43,46,873	63,774	42,17,847	1,29,026
Remodelling Hidgellee Tidal canal ...	7,69,150	49,414	49,414	7,19,736
<i>Canals completed.</i>				
Sarun project ...	6,63,521	340	6,69,570	(—) 6,049
Total	1,12,159	1,08,45,466	...

The expenditure during the year under review was Rs. 1,12,159 against Rs. 1,44,473 expended during the year 1888-89. The credit expenditure of Rs. 1,200 shown against the Damoodur project represents the amount of rent realized annually from the Raghunathchuck estate, and treated as receipts on capital account.

(2)—*Revenue Account.*

The actual receipts and direct charges during the year 1889-90 compared with those of the previous year are shown below:—

		1889-90.	1888-89.
<i>Receipts.</i>		Rs.	Rs.
Calcutta and Eastern canals	4,95,543	5,75,125
Orissa Coast canal	65,333	66,174
Sarun canals	23,113	20,814
Total	...	<u>5,83,939</u>	<u>6,62,113</u>
<i>Charges.</i>			
Calcutta and Eastern canals	2,66,968	2,81,948
Orissa Coast canal	68,011	74,568
Sarun canals	38,313	34,897
Total	...	<u>3,73,292</u>	<u>3,91,413</u>

The gross receipts from canals classed as minor works during the year under review fell short of those of the previous year by Rs. 78,124. The falling off in the toll receipts on the Calcutta and Eastern Canals, on which the revenue of the Minor Works mainly depends, is chiefly attributed to the unsatisfactory condition of the rice trade, but may also be to some extent due to the Bengal Central Railway, which competes with the canals between Khoolna and Calcutta.

The total charges were also less than those of the previous year by Rs. 18,121. The net revenue of the year amounted to Rs. 2,10,697 against Rs. 2,70,700 of the previous year, showing a decrease of Rs. 60,003.

WORKS FOR WHICH ONLY REVENUE ACCOUNTS ARE KEPT.

		1889-90.	1888-89.
<i>Receipts.</i>		Rs.	Rs.
Nuddea rivers	1,85,823	1,91,888
<i>Charges.</i>			
Nuddea rivers	87,594	1,34,694

WORKS FOR WHICH NEITHER CAPITAL NOR REVENUE ACCOUNTS ARE KEPT.

		1889-90.	1888-89.
<i>Receipts.</i>		Rs.	Rs.
Eden canal	9,370	3,772
Madhuban canal	36	20
Total	...	<u>9,406</u>	<u>3,792</u>
<i>Charges.</i>			
Eden canal	24,780	17,498
Madhuban canal	9,337	4,194
Total	...	<u>34,117</u>	<u>21,692</u>

The net revenue for the year 1889-90 under these two heads is Rs. 73,518 against Rs. 39,294 for the year 1888-89.

AGRICULTURAL WORKS.

The particulars in connection with this class of works are given below :—

	1889-90.	1888-89.
<i>Receipts.</i>	Rs.	Rs.
Government embankments	5,966	5,221
Tuccavi embankments under contract ...	3,145	4,512
Total ...	9,111	9,733
<i>Charges.</i>		
Government embankments	6,59,934	6,53,360
Tuccavi embankments under contract ...	1,51,667	1,29,796
Other works from contributions	12,362	9,773
Total ...	8,23,963	7,92,929

Of the total expenditure on Government embankments during the year, a sum of Rs. 5,22,086 was spent on works and maintenance and repairs against Rs. 5,38,805 expended during the year 1888-89. The balance was spent on establishment and other sub-heads of account. The share of establishment charges borne by Government embankments was Rs. 1,32,301 against Rs. 95,812 charged in the previous year; for tuccavi works the cost of establishment was Rs. 43,681 against Rs. 38,856, and the expenditure on works and maintenance and repairs was Rs. 1,04,112 against Rs. 1,00,269 of the previous year. The sum of Rs. 12,362 received from contributions was expended on village channels for the Sone canals, on sluices in the Moorshedabad, 24-Pergunnahs, and Sarun districts, and on sluice channels in Orissa.

The state of account of tuccavi works proper is explained below—

DIVISION.	Opening debit balance.	Debits during year.	Total.	Credits during year.	Net debit balance at end of year.
	Rs.	Rs.	Rs.	Rs.	Rs.
Northern Drainage and Embankment ...	15,695	87,357	1,03,052	8,545	94,507
Cossye ...	4,318	8,705	13,023	4,339	8,684
Gunduck ...	17,747	14,370	32,117	18,298	13,819
Balasore	160	160	...	160
Burdwan ...	861	2,868	3,729	2,142	1,587
Eastern Sone ...	1,019	2,005	3,024	1,018	2,006
Total ...	39,640	1,15,465	1,55,105	34,342	1,20,763

The total credits during the year have amounted to Rs. 34,342, which is slightly less than those in 1888-89, so that the outstanding balances, Rs. 1,20,763, show a considerable increase. Some of them represent expenditure during the year and others incomplete expenditure, the certificates for which will be accepted by the Collector on completion of the works concerned.

The transactions of the three circles will now be described as in previous years.

ORISSA CIRCLE.

The following statement compares the expenditure in this circle under the different heads of account for the year 1889-90 with that of the year 1888-89 :—

	1889-90.	1888-89.
MAJOR IRRIGATION WORKS.	Rs.	Rs.
<i>Capital Expenditure not charged against revenue.</i>		
Orissa canals (Imperial)	3,49,008	6,23,439
<i>Working Expenses (direct charges).</i>		
Orissa Canals (Provincial)	4,31,597	3,86,946
MINOR WORKS AND NAVIGATION.		
<i>Agricultural Works—Provincial.</i>		
Orissa Embankments	2,01,623	1,98,896
Sluice channel in Orissa (contributions) ...	263	270
Total ...	9,82,491	12,09,551

MAJOR IRRIGATION WORKS.

Capital expenditure not charged against Revenue.

ORISSA CANALS.

The expenditure (direct charges) by main heads of account charged to the capital account of these canals during the year 1889-90, compared with the year 1888-89, is shown below :—

	1889-90.	1888-89.
	Rs.	Rs.
I.—Works—		
(1) Head works	31	391
(2) Main canal and branches ...	1,64,902	2,73,485
(3) Distributaries	28,514	63,588
(4) Drainage and protective works ..	75,315	1,50,988
Total works ...	2,68,762	4,88,452
II.—Establishment	55,842	1,06,375
III.—Tools and plant	9,232	15,043
IV.—Suspense accounts	15,267	21,307
Grand Total ...	3,49,103	6,31,177
V.—Less receipts on capital account ...	95	7,738
Not total ...	3,49,008	6,23,439

The budget grant under capital originally amounted to Rs. 5,00,000, of which Rs. 3,90,000 was for works; but as it was found impossible to expend the whole of this amount during the year, a sum of Rs. 1,75,000 was surrendered to the Government of India, thereby reducing the total grant from Rs. 5,00,000 to Rs. 3,25,000, and that for works from Rs. 3,90,000 to Rs. 2,54,500. The actual expenditure on works, however, amounted to Rs. 2,68,762. The excess expenditure of Rs. 14,262 is entirely due to the increased outlay in the Mahanuddy Division upon the lock at Paradeep, the earthwork of the Taldundah extension canal, and the main drainage cut which forms the boundary between the irrigable areas of the Taldundah and Machgong extension canals, the expenditure in the Brahmini-Byturni and Aquapadda-Jajepore Divisions having fallen short of the grants made to them for the year.

The revised estimate of capital expenditure on the Orissa canals, exclusive of the grant for expenditure in England, amounted to Rs. 3,16,400, and the actual expenditure being Rs. 3,46,993, the excess over the total grant was Rs. 30,593, which is due partly to an actual excess of Rs. 14,262 over the grant for works as shown above, and partly to an increase of Rs. 15,267 in the suspense balances not provided for.

The following statement shows the state of the expenditure on "works" and other sub-heads of account as compared with the sanctioned revised estimate of the Orissa project:—

NAME OF WORK.	Amount of estimate sanctioned by Secretary of State.	EXPENDITURE.		Balance.
		During the year.	Total to end of 1889-90.	
	Rs.	Rs.	Rs.	Rs.
Total "Works," Mahanuddy series ...	1,75,73,075	2,40,421	1,35,46,382	40,26,693
Total "Works," Brahmini-Byturni series	54,71,734	28,341	36,25,669	18,46,075
I.—Grand Total "Works" ...	2,30,44,809	2,68,762	1,71,72,041	58,72,768
II.—Establishmentt ...	57,86,354	55,842	43,59,512	14,26,842
III.—Tools and plan ...	23,79,528	9,232	20,10,787	3,68,741
IV.—Suspense accounts	15,267	1,61,792	(—)1,61,792
Loss by exchange ...	2,94,089	2,68,070	26,019
Total ...	3,15,04,780	3,49,103	2,39,72,202	75,32,578
V.—Less receipts on capital account ...	1,08,560	95	85,872	22,688
Net total ..	3,13,96,220	3,49,008	2,38,86,330	75,09,890

During the year under review the following works, chargeable to Capital, were carried out. In the Mahanadi series the only outlay under "Head works" was a sum of Rs. 31 spent upon the lock-keeper's quarters at Jobra. Work was still in progress upon the extension of the Taldundah Canal between the 27th mile and the outfall at Paradeep, at $51\frac{3}{4}$ miles from the head. The locks and weirs at Tirtole and Taldundah were completed. At the end of the previous year the excavations for the foundations of the outfall lock at Paradeep had been completed, the sheet piling had been driven, and of the Gyle piling 1,937 piles had been driven out of a total of 7,694 piles which were allowed for in the sanctioned estimate. At the end of the year under review the pile-driving had all been completed, and the whole of the concrete above the heads of the Gyle piling had been constructed. The quantity of earthwork executed upon the Taldundah Canal was smaller than that in the previous year, in consequence of less labour being available. As regards the state of the work at the close of the year under review, flood banks between Taldundah and Paradeep were nearly completed, berms had been made at all the river crossings, the gaps in the country bank between Munigunga and Taldundah had been closed, and the canal was then navigable by boats to within a quarter of a mile of the outfall lock at Paradeep.

The earthwork of the Machgong Extension Canal has been fully completed as far as its present termination at the 33rd mile, and the only work done upon it during the year consisted in the maintenance of the earthwork and turfing. The banks of the remodelled portion of the canal, near the site of the Boglah weir, still, however, remain to be brought up to proper section; but this cannot be done until a decision is come to upon the question as to where the weir is to be built. The regulating weirs at Nowada, Chattra, and Paddampore are now fully completed, as also the escapes at Nowada and Nalliah. The head sluices of the existing distributaries on the first 19 miles of this canal, as well as some of the syphons in the same length, had to be altered to suit the remodelled sections of the canal banks, and this work has now been fully carried out at a total cost of Rs. 5,298. The head sluice of No. 19 distributary,

and the earthwork required for the first reach of the same work, were completed during the year.

The surveys of all the distributaries which it is proposed to construct at present have been finished. The inspection bungalow at Nagpore has been fully completed, and small sums were spent during the year upon the bungalows at Panchpah and Alipingole. A sum of Rs. 32,447 was expended upon the main drainage cut, which has been completed.

The Daib embankment is now fully completed, with the exception of the short length of embankment which has still to be constructed at the outfall of the Tumpooah into the Daib river.

The only works in progress upon the High Level Canal, Range I, during the year were the minor drainage works between distributaries. At the close of the year the scheme had been fully completed, with the exception of a syphon under the Korai escape channel, part of which has to be rebuilt. No progress was made on the work of widening and deepening the head of the Kendrapara Canal. Distributary No. 15 from that canal and its branches, and also distributary No. 17, have been completed. There was an outlay of Rs. 170 on the Gobri Extension Canal during the year upon the construction of certain cattle crossings. On the Pattamoondi Canal some further progress was made with the raising and strengthening of the flood embankment on the left bank of the canal.

On the distributaries Nos. 2, 4, 5, 9, 11, 12, 13, 14, and 15 from this canal, the work done consisted in marking out centre lines and boundaries of the permanent and temporary lands for a length of about $51\frac{1}{2}$ miles out of a total length of 74 miles. No. 7 distributary is reported to be completed, with the exception of the boundary and mile-stones required. An outlay of Rs. 3,204 was incurred on account of the Gobri river improvements during the year under review. The work is now complete, except that some of the land which is occupied by spoil banks and cuttings has still to be demarcated and acquired.

In the Brahmini-Byturni series under High Level Canal, Range II, the Jajepore Canal is complete and in actual operation. The old marginal embankment at the village of Luckhanpore, in the second mile of this canal, was connected with the flood embankment of the main canal at its upper end, so as to prevent injury to the houses in the village by a rush of water between the old and new embankments during high floods. Quarters were also constructed at the Mollandpore lock, at the head of this canal, in order to accommodate the lock establishment at that place. The building was completed at a cost of Rs. 371. The surveys for the distributaries from the Jajepore Canal (which have a total length of about 113 miles) have been completed.

The whole length of the distributaries which have been sanctioned in connection with the High Level Canal, Range III, have now been practically completed, and are in use for purposes of irrigation. The work done during the year principally consisted in the completion of the dressing and turfing of the distributary banks and the fixing of irrigation pipes. During the year parallel channels have been laid out above and below the head sluices of Nos. 3, 4, 5 and 7 distributaries, and between the syphons at Bhandaripokree and Bansai. A proposed new distributary, No. $3\frac{1}{2}$, and its branch, No. $3\frac{1}{2}$ A, have also been aligned.

Working expenses.

The expenditure on maintenance and repairs for the year 1889-90 compared with that for the previous year is shown below:—

SUB-HEAD.		1889-90.	1888-89.
		Rs.	Rs.
IB.—Maintenance and repairs	...	2,31,068	2,36,694
II.—Establishment	...	1,80,807	1,29,096
III.—Tools and plant	...	19,722	21,156
Total		4,31,597	3,86,946

The revised estimate for the year under the head of revenue repairs amounted to Rs. 2,35,000, and the expenditure shown above being Rs. 2,31,068, there was

a short outlay of Rs. 3,932 only, which occurred chiefly in the Mahanuddy, Acquapadda-Jajepore, and Pooree Divisions. The grants for establishment and tools and plant being Rs. 1,92,500 and Rs. 16,000 respectively, there was a short outlay of Rs. 11,693 in the former and an excess expenditure of Rs. 3,722 in the latter sub-head of account. The total short outlay under working expenses was therefore Rs. 11,903.

The following statement shows the total lengths of canals and distributaries in operation at the close of the year 1889-90, and the areas which were protected from flood, commanded, and provided with distributaries, as compared with those of the previous year:—

NAME OF CANAL.	1889-90.						1888-89.					
	LENGTH OF CANAL OPEN.		Length of distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	LENGTH OF CANAL OPEN. Jajepore	6½	70,000	...	6½	70,000	...
Total	177	75	764½	375,808	511,272	252,866	177	75	760½	375,808	511,272	250,919

* In the return of distributaries for 1889-90 the Jajepore canal has been shown as the first section of Byturni distributary with a length of 6½ miles.

There was an increase of 4½ miles in the length of distributaries and village channels from the Kendrapara canal and High Level canal, Range III, and of 1,947 acres in the area provided with distributaries. The length of the main canals was the same as last year.

Rainfall.—The rainfall at Cuttack during the year 1889-90 was 76.49 inches, or 29.03 inches more than that of the previous year. It was also in excess of the average fall at Cuttack for 30 years by 19.37 inches.

The following statement shows in detail the areas leased in 1889-90 as compared with those of the previous year:—

NAME OF CANAL.	1889-90.				1888-89.			
	Kharif.	Rabi.	Sugar-cane.	Total.	Kharif.	Rabi.	Sugar-cane.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Kendrapara	51,469	3,988	36	55,493	49,467	2,338	40	51,845
Gobri	2,300	215	3	2,608	2,000	22	...	2,022
Do. extension	2,101	7	...	2,108	1,499	1,499
Pattamoondi	11,223	543	...	11,766	10,541	8	...	10,549
Taldundah	10,483	384	12	10,879	10,040	222	14	10,285
Machgong	27,748	222	14	27,984	27,240	1	...	27,241
High Level, Range I	25,148	480	3	25,631	17,000	266	2	17,268
Ditto, " II	2,392	61	...	2,453	1,824	60	...	1,884
Ditto, " III	34,400	...	88	34,488	23,309	...	134	23,443
Total	167,353	5,900	156	173,409	142,939	2,917	190	146,046

Thus there is an increase of leased areas on each of the canals, being greatest on the High Level canal, Range III. Almost the whole of the irrigated area is under five years' lease, 167,230 acres being so leased against 142,815 acres in the previous year. The revision of the assessments carried out by the Deputy Revenue Superintendent has contributed to this increase.

The particulars of water-rates during the year 1889-90 compared with those of the previous four years are given below :—

YEAR.	Amount out- standing at commence- ment of year.	Amount falling due during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1885-86	77,869	1,05,019	1,82,888	1,06,842	11,162	64,884
1886-87	64,884	1,25,676	1,90,560	98,976	6,126	87,458
1887-88	87,454	1,50,297	2,37,755	1,37,869	7,777	92,109
1888-89	92,109	1,96,765	2,88,874	1,51,365	22,912	1,14,597
1889-90	1,14,597	2,87,277	4,01,874	1,99,844	25,208	1,76,762

The assessment of the year therefore increased by Rs. 90,512 and the collections by Rs. 48,479. The actual realizations during the year (Rs. 1,99,844) are larger than those of the previous four years.

The following statement shows the particulars of traffic upon the canals for the last five years :—

YEAR.	Number of boats.	Tonnage.	Value of cargo.	Tollage (assessed or earn- ings).
		Tons.	Rs.	Rs.
1885-86	20,662	169,709	46,33,133	64,407
1886-87	14,405	136,119	41,81,650	57,120
1887-88	24,892	176,362	50,32,093	67,985
1888-89	21,120	189,595	47,40,957	67,767
1889-90	25,765	186,020	48,68,255	77,650

The period during which the canals were closed for silt clearance was slightly shorter than in the previous year, and the receipts are better by Rs. 9,883. There was also an increase in the number of boats, tonnage, and value of cargo compared with the year 1888-89.

The revenue and working expenses of the Orissa Canals for the past five years are shown below :—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.

MINOR WORKS AND NAVIGATION.

Under this head there was no expenditure in the Orissa Circle during the year under review.

AGRICULTURAL WORKS.

The expenditure on the Orissa embankments is given below for the last two years:—

	1889-90.	1888-89.
	Rs.	Rs.
Works ...	23,296	8,257
Maintenance and repairs ...	1,19,440	1,47,145
Establishment ...	51,955	37,681
Tools and plant ...	4,908	5,909
Suspense accounts ...	2,024	(—) 96
Total ...	2,01,623	1,98,896

Under the head of original works a sum of Rs. 18,490 was expended in the Mahanadi Division upon additions to the stone groynes constructed on the left bank of the Katjoori river at Boglah, and in the Brahmini-Byturni Division Rs. 4,406 was paid on account of the land ordered to be acquired for the Rahasurpara embankment on the left bank of the Brahmini river. The length of embankments maintained in the Orissa Circle is 793·82 miles.

SOUTH-WESTERN CIRCLE.

The expenditure in this Circle during the year 1889-90, compared with that of the year 1888-89, is shown in the following statement:—

	1889-90.	1888-89.
MAJOR IRRIGATION WORKS.		
<i>Capital expenditure not charged against revenue.</i>	Rs.	Rs.
Midnapore canal (Imperial) ...	14,122	2,665

Total ...	16,40,881	18,64,248

MIDNAPORE CANAL.

The following statement shows under the different sub-heads of account the capital outlay (direct charges) on the Midnapore canal for and to end of 1889-90, compared with the sanctioned estimates:—

PARTICULARS.	Amount of estimates sanctioned by Secretary of State.	EXPENDITURE.		Unspent balance of estimate.
		1889-90.	Total to end of 1889-90.	
<i>Direct charges.</i>	Rs.	Rs.	Rs.	Rs.
I.—Works ..	53,52,623	7,344	53,50,007	2,616
• II.—Establishment	19,24,645	1,689	19,24,044	601
III.—Tools and plant	9,11,239	9,048	9,02,537	8,702
IV.—Suspense accounts	43,496	(—)3,959	39,537	3,959
Loss by exchange	94,800	94,800
Total	83,26,803	14,122	83,10,925	15,878
Less receipts on capital account.	30,793	30,793
Net total	82,96,010	14,122	82,80,132	15,878

The sanction to the construction estimate for this canal was withdrawn by the Government of India as mentioned in last year's report, and a sum of Rs. 30,000 was sanctioned by that Government for expenditure during the year on the submission by this Government of a revised schedule, such as that referred to in Public Works Code, volume II, Chapter XV, paragraph 156. Rupees 6,372 was spent on works for the relief of the drainage which crosses No. 1 distributary, and Rs. 971 on the improvement of the Jakpur drain. The dredging plant was increased by five new mud-boats constructed for Rs. 16,250, the same account being credited with Rs. 7,202, the proceeds of the sale of the launch *Midnapore* and of some miscellaneous tools.

The sub-heads of expenditure chargeable to working expenses are compared with those of the previous year in the following statement:—

	1889-90.	1888-89.
	Rs.	Rs.
IB.— { Maintenance and repairs	1,10,060	1,03,696
{ Charges for Government steamers, &c.	3,447	2,443
II.— Establishment	59,375	69,588
III.—Tools and plant	27,612	24,335
Total	2,00,494	2,00,062

The increase over the expenditure of the previous year is chiefly due to the large quantity of silt taken from the main canal in the first five miles and distributaries. The excess of Rs. 3,277 over the expenditure on tools and plant of the previous year is due to the repairs of dredgers.

Rainfall.—The rainfall registered at Midnapore was 48·71 against 68·00 inches of the preceding year.

The total area irrigated by the Midnapore canal during the year under review was 68,810 acres, as compared with 65,865 acres of the previous year, showing an increase of 2,945 acres. No remarks have been offered by the Deputy Revenue Superintendent in regard to this increase in the area irrigated, but it is stated that the leased area received canal water fairly, and that if more water could have been supplied, a larger area would have been leased.

The following statement shows the balances, assessments, and recoveries of water-rates on the Midnapore Canal for the year 1889-90 as compared with those of the four previous years:—

YEAR.	Amount out- standing at commence- ment of year.	Amount falling due during the year.	Total for recovery.	Cash realizations.	Remitted or written off.	Balance at the end of the year.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1885-86 ...	1,11,212	1,10,868	2,22,080	1,08,709	43,399	69,972
1886-87 ...	69,972	1,06,760	1,76,722	1,08,834	17,139	60,740
1887-88 ...	60,749	1,02,532	1,53,281	90,837	6,951	56,493
1888-89 ...	56,493	1,23,337	1,79,830	91,016	4,041	84,773
1889-90 ...	84,773	1,17,202	2,01,975	1,16,424	34,907	60,644

The assessments show a decrease of Rs. 6,135 in comparison with those of the previous year, but are still in excess of the figures relating to the years 1887-88 and 1886-87. The cause of this decrease may be the fact that in 1888-89 there was a very scanty rainfall which caused a rush for canal water. Cash realizations show a marked improvement over last year's actuals, and are in excess of the revised estimate. The former have been exceeded by more than Rs. 25,000 and the latter by Rs. 1,424. A regrettable feature in the above table is the largeness of the amount which it was found necessary to remit. It was not, however, unexpected, for while the losses of crop in 1888-89 from floods and embankment breaches in the Cossye were known to have been severe, the supply available from the same river during the drought which occurred at the end of the kharif season was admitted to have been insufficient for the area leased.

The following statement shows the navigation earnings of the canal for the past five years:—

YEAR.	Number and tonnage of boats.		Value of cargo.	Tollage (assessed or earn- ings).
	No.	Tons.	Rs.	Rs.
1885-86 ...	44,261	385,250	1,27,54,989	1,23,409
1886-87 ...	45,799	360,927	95,95,779	1,13,238
1887-88 ...	49,628	409,866	1,18,44,844	1,25,722
1888-89 ...	54,214	470,806	1,31,70,269	1,47,689
1889-90 ...	52,060	462,418	1,45,12,442	1,44,091

The small decrease in the navigation receipts as compared with those of the previous year is entirely attributable to slackness in the paddy export trade. The number and tonnage of boats show also a decrease, although the estimated value of the cargo carried is greater.

Portions of the canal were closed for nearly a month, viz. from 25th April to 20th May 1889.

The total revenue and working expenses of the Midnapore canal for the past five years are shown in the following statement:—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
<i>Receipts.</i>					
Water-rates ...	Rs. 1,08,709	Rs. 1,08,834	Rs. 90,837	Rs. 91,016	Rs. 1,16,424
Navigation ...	1,37,678	1,09,693	1,26,574	1,46,760	1,45,356
Miscellaneous ...	16,197	16,668	16,967	14,019	15,824
Total ...	2,62,484	2,34,185	2,34,378	2,51,795	2,77,604
Less refunds of revenue	211	453	285	181
Total receipts ...	2,62,484	2,33,974	2,33,925	2,51,510	2,77,423
<i>Working expenses.</i>					
Direct charges ...	2,09,860	2,26,161	2,39,613	2,00,062	2,00,494
Indirect charges ...	8,267	8,877	10,788	9,742	8,312
Total ...	2,18,127	2,35,038	2,50,396	2,09,804	2,08,806
Balance net revenue ...	44,357	(—) 1,004	(—) 16,471	41,706	68,617

The net revenue of the year under review shows an increase of Rs. 26,911 over that of the previous year.

HIDGELLEE TIDAL CANAL.

There was a capital expenditure of Rs. 49,414 incurred on the remodeling of this canal during the year under review against the estimate, amounting to Rs. 7,69,150, sanctioned by the Secretary of State.

The expenditure is thus apportioned:—

			Rs.
(1) Works	48,642
(2) Establishment	(—) 1,742
(3) Tools and plant	2,514
Total	49,414

The traffic on the Hidgellee Tidal canal for the past five years is given below:—

YEAR.	Number and tonnage of boats.		Value of cargo.	Tollage (assessed or earnings).
	No.	Tons.	Rs.	Rs.
1885-86	19,316	163,535	32,74,961	52,476
1886-87	17,542	149,747	30,86,680	51,701
1887-88	13,503	124,903	27,03,307	40,047
1888-89	16,481	165,635	33,01,123	55,420
1889-90	13,785	124,605	27,29,720	39,459

The foregoing statement shows that the traffic on the Tidal canal during the year compares unfavourably with that of the previous year. The large reduction in the receipts is due to the closure of Range I for two months and 20 days in comparison with 26 days in the previous year. The loss of crops in Hidgellee in the rainy season of 1888-89 also doubtless affected the tollage returns of the earlier months of the year.

The following statement shows the receipts, working expenses, and net revenue of this canal for the past five years:—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
<i>Receipts.</i>	Rs.	Rs.	Rs.	Rs.	Rs.
Navigation	52,143	51,904	40,406	53,910	40,338
Miscellaneous	312	2,500	1,452	1,260	1,614
Total	52,455	54,404	41,858	55,170	41,952
Less refunds of revenue	...	910	...	73	...
Total receipts	52,455	53,494	41,858	55,097	41,952
<i>Working expenses.</i>					
Direct charges	48,609	21,925	61,895	76,273	25,715
Indirect charges	1,538	810	2,081	2,767	1,007
Total	50,147	22,735	63,976	79,040	26,722
Balance net revenue	2,308	30,759	(—) 25,118	(—) 22,943	15,230

The net revenue of the year is Rs. 15,230 against a deficit of Rs. 22,943 in the previous year; this large increase is due to the marked decrease of Rs. 51,318 in the working expenses compared with the year 1888-89.

ORISSA COAST CANAL.

The capital outlay (direct charges) on this canal for and to end of 1889-90, compared with the sanctioned estimate, is shown in the following statement :—

PARTICULARS.	Amount of revised estimate.	EXPENDITURE.	
		1889-90.	Total to end of 1889-90.
<i>Direct charges.</i>	Rs.	Rs.	Rs.
I.—Works	33,86,609	38,076	32,57,179
II.—Establishment	7,36,203	(—) 1,362	7,24,769
III.—Tools and plant	2,24,061	31,756	2,06,572
IV.—Suspense accounts	(—) 4,696	32,615
Total	43,46,873	63,774	42,21,125
Less receipts on capital account	3,278
Net total	43,46,873	63,774	42,17,847

There has been a large lapse of grant under capital account; the budget estimate provided for expenditure to the extent of Rs. 1,20,000, which was increased to Rs. 1,32,800 in the revised estimate, whilst the actuals have amounted to Rs. 63,774 only. The short outlay was caused by some transfers and write-backs from "Works" and "Establishment," and postponement of certain expenditure expected. The original construction work done during the year comprised completion of minor works, such as toll collector's and khallasees' quarters, ferry ghâts, turfing banks, &c.

The following statement shows the receipts and working expenses of the canal for the past four years :—

	1886-87.	1887-88.	1888-89.	1889-90.
<i>Receipts.</i>	Rs.	Rs.	Rs.	Rs.
Navigation	28,587	52,828	65,010	63,724
Miscellaneous	901	1,026	1,418	1,624
Total	29,488	53,854	66,428	65,348
Less refunds of revenue	17	254	15
Total receipts	29,488	53,837	66,174	65,333
<i>Working expenses.</i>				
Direct charges	59,704	80,868	74,568	68,011
Indirect charges	1,722	2,639	2,450	975
Total	61,426	83,507	77,018	68,986
Net revenue	(—) 31,938	(—) 29,670	(—) 10,844	(—) 3,653

The receipts for the year under review were almost the same as last year, but the working expenses were less by Rs. 8,032, hence there was a reduction in the deficit balance of Rs. 7,191.

CALCUTTA AND EASTERN CANALS.

The capital account (direct charges) of these canals for and to end of 1889-90 is shown in the following statement:—

			Outlay during 1889-90.	Outlay to end 1889-90.
			Rs.	Rs.
Direct charges—				
Old outlay	24,91,012
I.—Works	(—) 157	20,35,156
II.—Establishment	(—) 800	3,84,396
III.—Tools and plant	2,420	3,48,236
IV.—Profit and loss	847
V.—Suspense accounts	1,269	12,066
Total			2,732	52,71,713
VI.—Less receipts on capital account	2,901	44,454
Net total			(—) 169	52,27,259

The original grant of Rs. 20,000 for expenditure on capital account was reduced to Rs. 14,000 in the revised estimate, and against this the actuals have amounted to Rs. (—) 169. The actual short outlay on works was Rs. 4,864, but a sum of Rs. 5,021, spent in March 1880 on the construction of mud barges, and erroneously debited to works, was written back during the year to Tools and Plant, thus reducing the expenditure of the year on works to Rs. (—) 157. The credit under Establishment is due to the credit under Works. There was an increase of Rs. 1,269 in the suspense balances, but this was more than counteracted by the sum of Rs. 2,901 credited to receipts on capital account on account of sale proceeds of land belonging to the canals.

The works under this head consisted of the following:—

1. Construction of two wrought-iron caissons for closing the Chitpore and Dhappa locks.
2. Inspection bungalow with out-offices at Bassirhaut.
3. Masonry ghât to the Bhangore bungalow compound tank.
4. Wreck godown at Soorkhally.

The following statement shows the receipts and working expenses of the canals for the past five years:—

		1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
		Rs.	Rs.	Rs.	Rs.	Rs.
<i>Receipts.</i>						
Navigation	...	5,01,141	4,77,199	5,74,766	5,69,592	4,87,853
Miscellaneous	...	—21,657	6,455	5,168	5,552	7,768
Total	...	4,79,484	4,83,654	5,79,934	5,75,144	4,95,621
Less refunds of revenue	19	78
Total receipts	...	4,79,484	4,83,654	5,79,934	5,75,125	4,95,543
<i>Working expenses.</i>						
Direct charges	...	1,86,747	1,82,888	2,12,312	2,81,948	2,66,968
Indirect charges	...	9,462	9,376	12,344	11,853	12,165
Total	...	1,96,209	1,92,264	2,24,656	2,93,801	2,79,133
Balance net revenue	...	2,83,275	2,91,390	3,55,278	2,81,324	2,16,410

There was a reduction of Rs. 79,582 in the receipts during the year 1889-90 compared with those for the year 1888-89. This was partly caused by the competition of the Bengal Central Railway, which diverted a portion of the canal traffic, and partly by the unsatisfactory condition of the rice market.

The working expenses showed a decrease of Rs. 14,668 under all the sub-heads of charges except maintenance and repairs, where they were Rs. 1,659 in excess of those of the preceding year.

Under Tools and Plant only the reduction amounted to Rs. 15,544, and under Navigation Establishment it was Rs. 1,403, chiefly in the salary and commission of the supervisor, consequent on the decrease in the collections.

The traffic on the Calcutta canals during the year 1889-90, compared with that of the previous year, is shown in the following statement:—

	Number of boats.		Tonnage of boats.		Value of cargo.		Tollage (assessed or earnings).	
	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.
	No.	No.	Tons.	Tons.	Rs.	Rs.	Rs.	Rs.
Circular canal	80,008	77,435	2,005,703	1,797,810	5,48,68,336	5,15,10,525	4,32,228	3,76,007
Tolly's nullah	78,120	70,740	796,275	652,219	1,62,80,400	1,53,88,628	1,53,303	1,05,672
Total Calcutta canals ..	158,128	148,165	2,801,978	2,450,029	7,11,54,835	6,68,99,053	5,85,491	4,82,279

It will be seen from above that reduction has taken place in all the items of traffic. The causes of this general decrease have been mentioned in the foregoing paragraph.

NUDDEA RIVERS.

The receipts and working expenses of these rivers for the past five years are shown in the following statement:—

		1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
<i>Receipts.</i>		Rs.	Rs.	Rs.	Rs.	Rs.
Navigation	1,83,382	2,02,707	1,98,318	1,91,749	1,85,082
Miscellaneous	399	543	357	139	61
Total	1,83,781	2,03,250	1,98,675	1,91,888	1,86,043
Less refunds of revenue	220
Total receipts	1,83,781	2,03,250	1,98,675	1,91,888	1,85,823
<i>Working expenses.</i>						
Direct charges	77,668	60,213	92,022	1,34,894	57,594
Indirect charges	6,075	5,395
Total	77,668	60,213	92,022	1,40,769	92,989
Balance net revenue	1,06,113	1,43,037	1,06,653	51,119	92,834

The receipts for the year 1889-90 have fallen short of those of the previous year by Rs. 6,065. In fact they continue to show a steady decline since the year 1886-87. The cause of this decline is stated to be the unfavourable condition of the Bhagiruthi and Matabhanga rivers during the dry months, and the reduction of rates for freight by the East Indian Railway, which has attracted a portion of the traffic formerly found on the rivers. The working expenses were also less than those of the previous year by Rs. 47,780.

The traffic on the Nuddea rivers during the last two years is shown in the following comparative statement:—

	Number of boats.		Tonnage of boats.		Value of cargo.		Tollage (assessed or earnings).	
	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.
	No.	No.	Tons.	Tons.	Rs.	Rs.	Rs.	Rs.
Nuddea rivers...	61,069	58,381	839,502	792,453½	3,67,98,548	3,59,73,315	1,91,751	1,85,982

It will be seen from above that, compared with the year 1888-89, the traffic during 1889-90 shows a general decrease in all the items.

EDEN CANAL.

During the year under review the total outlay on this canal amounted to Rs. 24,780 against Rs. 17,498 of the previous year. The following is a comparative statement by sub-heads of the expenditure:—

SUB-HEAD.	1889-90.	1888-89.
	Rs.	Rs.
Works	1,786	5,034
Maintenance and repairs	15,692	20,379
Establishment	7,032	(—) 304
Tools and plant	270	(—) 7,611
Total	24,780	17,498

The cold and hot weather supply in the canal was kept up by a sand dam across the Damooda at Joojooty. Four timber bridges and six pucca ghâts were constructed during the year. The supply of water to the Burdwan water-works was thoroughly maintained during the year.

Some irrigation was carried on in Burdwan district during the rainy season of the year, and 29,080 bighas, mostly of *amun* paddy lands, were irrigated. The fixed water-rate per bigha was 4 annas, and the actual demand for water for the area irrigated was Rs. 7,292, of which Rs. 6,171 was realized in advance during the year, and Rs. 591 had been realized after the surveys were made. The balance remaining, it is expected, will all be realized shortly.

The irrigation carried out was entirely from the excavated portion of the canal and not from the natural channels, and was adopted as an experimental measure which promises to be successful.

AGRICULTURAL WORKS.

(1)—DRAINAGE.

The Baliaghye branch canal conversion into a drainage channel, recommended by the Drainage Committee, was pushed on vigorously during the year. Ten millions three hundred and twenty-one thousand six hundred and nine cubic feet of earthwork were executed at a cost of Rs. 30,539.

(2)—GOVERNMENT EMBANKMENTS.

With the exception of the Bhagiruthee left embankment in Moorshedabad, the whole of the embankments in the South-Western Circle were maintained in good order, and no breaches occurred. Owing to the very extensive damage caused by the flood of the previous year, a good deal of extraordinary expenditure was incurred in repairing breaches in the Midnapore district, but no new expenditure on this account was incurred. In Moorshedabad, owing to an unprecedented flood in the Bhagiruthee, great strain was thrown on the left embankment. Considerable percolation occurred in places, and was with great difficulty stopped. There was much anxiety concerning the heavy retired line at Laltakoi, owing to slips and percolation. Three breaches occurred in the left embankment at Rampal, Berhamgunj and Plassey; the breaches in the two last-named places caused the flooding and destruction of crops over an area of about 160 square miles. The expenditure incurred on these embankments during the year was Rs. 4,20,733, of which Rs. 16,427 was on works and Rs. 3,32,384 on maintenance and repairs.

TUCCAVI EMBANKMENTS UNDER CONTRACT.

These embankments are entirely in the Midnapore district. Their total length is about 242 miles 320 feet. The total outlay during the year was Rs. 41,475 against Rs. 48,121 of the previous year.

THE DAMOODAH AND ROOPNARAIN SURVEY.

The surveys in connection with the floods in the Damoodah and Roopnarain rivers were almost completed with the close of the year, and a full report on the subject has been submitted by the Superintending Engineer, South-Western Circle. The following are the drainage projects carried out in the Circle.

DANCOONEE DRAINAGE WORKS.

The whole system was efficiently maintained throughout the year.

HOWRAH DRAINAGE WORKS.

These works were maintained in good order throughout the year. The crops in the Howrah jullah were very good. Owing to a scanty rainfall the outfall sluice at Nazirgunge was extensively used for irrigation purposes. The outlets on the right bank of the Ballykhal were kept open throughout the year, and there was no complaint regarding damage to crops or imperfect drainage.

RAJAPORE DRAINAGE WORKS.

Most of the works comprised in this scheme were completed before the close of the year, and only some minor works still remain to be done. Although the outfall sluice and the channels were not completed before the last rains, the sluice was nevertheless opened for the drainage of the country, and much of the accumulated rain water of the Rajapore and Ampta basins was drained out through the sluice, which enabled the villagers to bring under cultivation nearly one-half of the waste lands in the swamps which used to remain permanently under water during the rains and the cultivating season.

Of the works proposed in the scheme, the following remain to be carried out:—

- (1) Inspection bungalow at Rajapore.
- (2) Sluicing the Howrah and Ampta road bridge over Surusuttee at Jhaporda, and the Jhaporda and Andool road bridge over the Sootee Khal at Bamonpara. The Burra jullah portion of this scheme was taken in hand in 1888, and all the works in connection with it were completed during the year under review.

CHURRIAL KHAL DRAINAGE WORKS.

To improve the drainage system of the country to the left bank of the river Hooghly, the Churial Khal Drainage Works were taken in hand during the year, and very good progress made with the works.

SONE CIRCLE.

ADMINISTRATIVE CHANGES.

The Sewan and Basantapore subdivisions were amalgamated into one, called the Sewan subdivision.

The following statement shows the expenditure in the Sone Circle during the year 1889-90, compared with that of the year 1888-89:—

PARTICULARS.	1889-90.	1888-89.
MAJOR IRRIGATION WORKS.	Rs.	Rs.
<i>Capital expenditure not charged against revenue.</i>		
Sone canals (Imperial)	71,953	1,48,443
<i>Working expenses.</i>		
Sone canals (Provincial)	6,80,959	7,42,619
MINOR WORKS AND NAVIGATION.		
<i>Provincial.</i>		
WORKS FOR WHICH CAPITAL AND REVENUE ACCOUNTS ARE KEPT.		
<i>Revenue account.</i>		
Sarun canal (Capital account)	340	...
Ditto (Revenue ")	38,313	34,897
WORKS FOR WHICH NEITHER CAPITAL NOR REVENUE ACCOUNTS ARE KEPT.		
Madhuban canal	9,337	4,194
<i>Agricultural works.</i>		
Sarun tuccavi embankments under contract ...	33,757	27,449
Tirhoot ditto ditto ...	18,891	18,719
Chumparun ditto ditto ...	57,541	36,507
Village channels, Sone canals (contribution) ...	2,596	1,807
Sluices in Sarun district	168	...
Embankments and drainage works (tuccavi)	19,264
Total ...	9,13,858	10,32,899

The outlay charged to the Capital account of the Sone canals during the year 1889-90, compared with that of the year 1888-89, is shown in detail below:—

		1889-90.	1888-89.
		Rs.	Rs.
I.—Works—			
(1) Head works	...	9,304	4,745
(2) Main canal and branches	...	42,525	54,243
(3) Distributaries	...	49,794	28,020
(4) Drainage and protective works	...	26,947	6,242
	Total	1,28,570	93,250
II.—Establishment	...	28,179	20,691
III.—Tools and plant	...	9,301	21,776
IV.—Suspense accounts	...	(—) 31,693	12,770
	Total	1,34,357	1,48,487
V.—Less receipts on capital account	...	62,404	44
	Net total	71,953	1,48,443

Under “Head works” planting of waste lands at Dehree was continued, and some 26,600 trees were planted during the year at an expenditure of Rs. 9,304. Under the other heads the expenditure incurred was on docks at Baroon, Deegah, and Arwal, a post and telegraph office, a godown for dredgers, stores, &c., a toll-house at Baroon, and an office for the Executive Engineer at Bankipore. Rest-houses on the Sukla, Kuruth, and Koormoory distributaries were nearly completed. Considerable progress was made with permanent outlets. Some regulators, syphons, parallel channels, drainage cuts and several smaller works were constructed or under construction during the year.

45. The lengths of canal and distributaries in operation at the close of the year are shown in the tabular statement following:—

DIVISION.	MILES OF NAVIGABLE CANAL.			MILES OF BRANCH CANAL.			MILES OF DISTRIBUTARIES.		
	Completed at the commencement of the year.	Completed during the year.	Total.	Completed at the commencement of the year.	Completed during the year.	Total.	Completed at the commencement of the year.	Completed during the year.	Total.
Eastern Sone	86½	...	86½	358	...	358
Arrah	74½	...	74½	71½	...	71½	467½	...	467½
Buxar	58	...	58	77½	...	77½	343	11½	354½
Government village channels in Buxar Division	14	...	14
Total	218½	...	218½	148½	...	148½	1,182½	11½	1,194

The statement below shows the area irrigated during the year and that preceding:—

YEAR.	Kharif.	Rabi.	Sugar-cane.	Five years' leases.	Hot weather crops.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1888-89	69,628	69,817	4,600	200,102	11,762	355,909
1889-90	41,917	20,336	5,004	224,263	13,757	305,282

The most noticeable feature in this table is the extension of area under long leases, brought about chiefly by the conversion of kharif into five-year leases.

The smaller total area irrigated was caused by the reduction in rabi irrigation, due to seasonable rainfall.

Rainfall.—The rainfall for the year under review compared with that for the previous year is shown below:—

	1889-90.	1888-89.
	Inches.	Inches.
Arrah Division, five stations ...	41·20	46·53
Buxar do., four do. ...	37·48	43·00
Eastern Sone Division, three stations...	39·26	44·44

In each of the three divisions the rainfall during the year was less, as the fall, which was fairly normal till the latter part of September, almost failed after that time.

The expenditure on maintenance of the works of the Sone canals (direct charges) during the year 1889-90, as compared with that of the previous year, was as follows:—

	1889-90.	1888-89.
	Rs.	Rs.
IA.—Extensions and improvements ...	4,712	10,426
IB.— { Maintenance and repairs ...	2,91,352	3,27,605
{ Transport service ...	779	577
IC.—Compensation ...	861	...
II.—Establishment ...	3,49,795	3,70,091
III.—Tools and plant ...	33,460	33,920
Total ...	<u>6,80,959</u>	<u>7,42,619</u>

On several bridges on the Chowsa and Gurra Chowbey Branch Canals the existing wooden tops were replaced by masonry arches. The Western Main Series of the Sone Canals was closed from 1st to 11th May 1889, and from 27th November to 6th December 1889, and the Eastern Main Series from the 6th April to the 1st May 1889.

The repairs to these canals were executed as usual, and there was no particular work calling for notice. A much larger quantity of silt than usual was cleared during the year, and about double the quantity of weeds were taken out. The dredging was less owing to the large quantity of silt which was cleared by hand during the closures.

The following statement shows the progress made in the collection of water-rates on the Sone Canals during the past five years:—

YEAR.	Amount out-standing at commencement of the year.	Amount falling due during the year.	Total for recovery.	Cash realizations.	Remitted or written off.	Balance at end of the year.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1885-86 ...	6,95,208	8,07,702	15,02,910	9,78,323	1,26,266	3,98,321
1886-87 ...	3,98,321	6,95,086	10,93,407	8,26,461	95,964	2,31,582
1887-88 ...	2,31,582	7,25,810	9,57,392	5,19,586	26,525	4,11,281
1888-89 ...	4,11,281	7,53,217	11,64,498	7,59,556	24,329	3,80,613
1889-90 ...	3,80,613	7,52,789	11,33,401	8,16,394	85,225	2,81,782

The cash realizations (Rs. 8,16,394) are better than the revised estimate of the year and the realizations of the previous year by Rs. 33,394 and Rs. 56,838 respectively. The decrease in the assessments during the year is very trifling, less than Rs. 500, and is probably due to there being a larger number of long leases at lower rates than in any preceding year. The increase in remissions, amounting to Rs. 10,896, is accounted for by the sum of Rs. 11,071, which was sanctioned in Bengal Government No. 767J, dated 20th May 1889, for damages caused to a considerable area of ripe *dhan* by hail-storms in November 1888. The reduction in the outstanding balances is due to the increase in the realizations and in the remissions.

The traffic on the Sone Canals during the past five years is shown in the following statement:—

YEAR.	Number of boats.	Tonnage.	Value of cargo.	Tollage (assessed or earnings).
		Tons.	Rs.	Rs.
1885-86 ...	7,210	77,008	36,16,358	41,707
1886-87 ...	8,573	104,835	64,65,851	49,936
1887-88 ...	8,116	95,072	56,80,508	51,542
1888-89 ...	8,096	106,788	58,04,029	52,412
1889-90 ...	8,068	104,390	49,36,564	50,315

The revenue account of the past five years is shown below—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
<i>Receipts.</i>	Rs.	Rs.	Rs.	Rs.	Rs.
Water-rates ...	9,78,323	8,26,461	5,19,586	7,59,556	8,16,394
Navigation ...	46,243	54,254	55,904	57,829	57,759
Miscellaneous ...	38,080	37,714	28,459	26,504	23,342
Total ...	10,62,646	9,18,429	6,03,949	8,43,389	8,97,495
Less refunds of revenue ...	10,857	15,737	15,331	12,611	16,520
Total receipts ...	10,51,989	9,02,692	5,88,618	8,31,278	8,80,975
<i>Working expenses.</i>					
Direct charges ...	5,41,713	5,65,724	7,01,979	7,42,619	6,80,959
Indirect charges (a) ...	31,632	32,097	50,369	51,813	48,971
Total charges ...	5,73,345	5,97,821	7,52,348	7,94,432	7,29,930
Balance net revenue ...	4,78,644	3,04,871	(—)1,63,730	36,846	1,51,045

The net revenue of the year under review shows an increase of Rs. 1,14,199 over that of the previous year. This is due to the decrease in the working expenses of Rs. 64,502 and increase of Rs. 59,697, mostly in the water-rate receipts. The navigation and miscellaneous receipts are almost the same as those of the previous year.

MINOR WORKS AND NAVIGATION.

The only works coming under this head, for which capital and revenue accounts are kept in the Sone Circle, are the Sarun Canals, of which the capital account was virtually closed in 1886 at a total outlay (direct charges) of Rs. 6,69,230.

During the year under review, however, a sum of Rs. 340 was expended on tools and plant under the capital account of the canals against the provision of Rs. 1,000 made in the revised estimate. There was also an expenditure of Rs. 2,876 incurred on the collection of material for the Hirapookur regulator, chargeable to the grant of Rs. 3,000 under capital, but as the work has been stopped, the materials have been transferred to stock.

The revenue account of the canals for and to end of 1889-90 is given below :—

HEADS OF ACCOUNT.	RECEIPTS.		HEADS OF ACCOUNT.	CHARGES.	
	During 1889-90.	To end of 1889-90.		During 1889-90.	To end of 1889-90.
	Rs.	Rs.		Rs.	Rs.
Water-rates	23,990	1,75,141	Maintenance and repairs	24,900	2,17,684
Miscellaneous and other receipts	123	7,827	Establishment ...	12,422	66,333
			Tools and plant ...	991	(—) 5,840
			Total ...	38,313	2,78,177
			Indirect charges ...	1,739	10,000
			Total charges ...	40,052	2,88,177
			Balance net revenue ...	(—) 16,939	(—) 1,06,209
Total ...	23,113	1,82,968	Total ...	23,113	1,82,968

The receipts during the year amounted to Rs. 23,113 against Rs. 20,814 of the previous year, while the expenditure was Rs. 40,052 against Rs. 36,332 of the year 1888-89. Thus the net revenue of the year was a deficit of Rs. 16,939 against a deficit of Rs. 15,518 of the previous year. The usual silt-clearing and maintenance operations in connection with the feeders were carried out, and eight new spurs were constructed as an additional protection to the Siswa head-works. The occurrence of a breach in the bank of the Roopunchap, a natural high level spill channel which feeds three of the four Sarun canals, and the formation of a diversion cut leading from the breach into the Gundak, caused great anxiety. A long embankment extending across the cut on to high ground on either side, and protected by flank embankments, was designed and commenced towards the end of the year. It is hoped that these measures may prove successful in restoring the old channel.

MADHUBAN CANAL.

The floods of 1889 were unusually severe and caused considerable damage to the Teur weir. An estimate amounting to Rs. 10,186 was sanctioned for necessary repairs to the same, and the work was in progress at end of the year. The usual repairs to the canal were executed during the year.

There were receipts of Rs. 36 only on account of sale of grass and rent of side pits, and an expenditure of Rs. 9,337 incurred on works and maintenance and repairs, establishment and tools and plant, against Rs. 4,194 expended under the same heads of account in the previous year. The area irrigated during the year was 9,134 acres as compared with 8,560 acres in the previous year.

AGRICULTURAL WORKS.

There are no D schedule (Government) embankments in the Sone Circle.

There are three embankments, classed as tuccavi and maintained at the cost of the zemindars, under contract, viz. the Sarun, Chumparun and Tirhoot:—

- (1) The Sarun embankment. This embankment was maintained in good condition at a total cost of Rs. 33,757, of which Rs. 2,045 was expended on works and Rs. 17,320 on maintenance and repairs. An unusually high flood occurred in September, which breached a small inner embankment maintained by the civil authorities, and flooded the town of Sonapore.
- (2) The Chumparun embankment. There were three high floods during the year, which breached the embankment in three places and washed away the Gobindgungo sluice and protecting spurs. The breaches were so wide that it was found necessary to construct retired lines,

and the works were in progress at the end of the year. The cost incurred in maintaining and repairing the embankment was Rs. 57,544.

- (3) The Tirhoot embankment. This embankment was maintained in good repair at a cost of Rs. 18,891. It sustained no damage from the high floods. The total expenditure during the year on these embankments aggregated Rs. 1,10,192 against Rs. 81,675 of the previous year.

The tuccavi embankments not under contract in this Circle are—

- (1) The Turki embankment on the right bank of the river Bagmati in the Tirhoot district.
- (2) The Bazitpore embankment on the left bank of the river Ganges in the Durbhunga district.
- (3) The Monghyr embankment on the left bank of the river Ganges in the Monghyr district.
- (4) The Sukri embankment on the left bank of the river Sukri in the Gya and Patna districts.

All of the above embankments were maintained in good order during the year at a total cost of Rs. 16,375 against Rs. 19,264 of the previous year.

FLOODS.

There were floods in the rivers Ganges, Sone and Gunduck during the year. Those in the Ganges and Gunduck were higher than usual. In the Sone they were not so high as in the previous year. In North Behar the floods of the smaller rivers were not only unusually high, but also of unusually long duration.

Provincial Railways.

GENERAL REVIEW.

THE following Railways come within the Bengal Presidency:—

State Railways for which financial responsibility has been accepted.

			Miles.
Eastern Bengal State Railway System	...	broad gauge	231½
Ditto	ditto	metre	478½
Ditto	ditto	2' 6"	37
Tirhoot State Railway	...	metre	273
Nalhati State Railway	...	4-feet	27½

Other Railways.

Bengal Central Railway	...	broad gauge	125
Darjeeling-Himalayan Railway	...	2-feet	51
Deoghur Railway	...	metre	479
Tarkessur do.	...	broad	22
Patna-Gya do.	...	"	57

Railways coming partly within the Presidency.

East Indian Railway	...	broad gauge	729
Bengal-Nagpur Railway	...	"	118
Bengal and North-Western Railway	...	metre	92

On the Eastern Bengal State Railway System new mileage to the extent of 74 miles was added to the Northern Section by the opening to traffic of the Katihar-Raiganj and Kasba-Forbesganj Sections of the Assam Behar State Railway. A few miles only now remain to complete the connection between the Eastern Bengal and the Tirhoot State Railways. Good progress is being made, and through communication should shortly be an accomplished fact.

The Budge-Budge extension of 13½ miles was also completed and passed for traffic during the year. The object of this extension is to free the town and shipping from the danger of the large and increasing river traffic in petroleum.

With a view of obtaining a permanent workable river station on the right bank of the Ganges, the extension to Rhyta was resurveyed. Surveys for a connection between the Dooars Tramway and the main line were also undertaken.

The construction of the Sitamarhi extension of the Tirhoot State Railway, which was only commenced during the year, made very satisfactory progress, and this branch, it is expected, will shortly be opened for traffic.

A survey for a project to connect Taki with the Bengal Central Railway was undertaken by that Railway.

The East Indian Railway, with a view of obtaining a shorter route to Calcutta, put a party in the field to examine the country between Mogul Serai

and Howrah. A second survey party, under the orders of the Director-General for Railways, examined a new southern route passing through Palamow, Purulia, and Tarkeshwar. The reports of these surveys have not as yet been received.

The Bengal-Nagpur Railway Company added 118 miles to the lines open to traffic in this Presidency. The length is temporarily worked by the East Indian Railway. A reconnaissance of a route down the Mahanuddy valley to Poori was also undertaken by the Bengal-Nagpur Railway.

Branch lines to Revilganj and Bahramghat were surveyed by the Bengal and North-Western Railway.

The results of the year's working have been extremely satisfactory, the amount credited to Provincial Funds being Rs. 29,87,100, as against Rs. 25,23,480 and Rs. 22,92,740 in 1887-88 and 1888-89 respectively. The details are—

			+	Rs.
Eastern Bengal State Railway		26,33,138
Tirhoot ditto		3,39,259
Nalhati ditto		14,703
				<hr/>
Total	+29,87,100	<hr/>

Under the Provincial contract the Imperial Government gets credit for any increase over 30 lakhs gross revenue on the broad-gauge section of the Eastern Bengal System of Railways. For the year under review this excess amounted to Rs. 11,69,119, a fair advance over that for last year which stood at Rs. 7,85,152.

The net receipts for the broad and narrow gauge portions of the Eastern Bengal Railway System during the last three years have been—

	1887-88.	1888-89.	1889-90.
	Rs.	Rs.	Rs.
Broad gauge (Eastern and Southern Sections) ...	32,09,936	37,85,152	41,69,119
Narrow gauge (Northern, Assam-Bihar, Kaunia-Dharla, and Dacca Sections) ...	15,27,245	19,45,023	21,84,976

The prospects of the lines north of the Ganges are most hopeful. The Assam-Bihar Section, though but recently opened, is already bringing in heavy receipts, and a traffic equal to that on the Northern Section will no doubt be obtained in a few years.

The Dacca line is now being worked without a loss and shows signs of a developing traffic.

The Tirhoot State Railway, towards the latter half of the year, showed enormous development in traffic receipts, and the net working for the year showed a surplus of Rs. 1,206,290. Great credit is due to Lieutenant-Colonel G. F. Boughey, R.E., the Manager of the Eastern Bengal System of Railways, and to Major H. G. Kunhardt, R.E., Manager of the Tirhoot State Railway, and their respective staffs, for the able management of the Railways under their control.

On the Eastern Bengal Railway the accommodation for the staff was largely increased, new good-sheds were built at the principal stations on the Northern Section, and the important station-yards at Kooshtea, Damukdea, and Parbatipur were remodelled. Additional water-way and bridge protection works had also to be provided on the newly-opened section of the Assam-Bihar State Railway.

On the Northern Section 1.85 miles were relaid with 50lb rails, making a total of 26.13 miles thus laid.

On the Tirhoot State Railway a new pier was built for the Dhanauti bridge in place of the old one, which showed signs of failing. Progress was also made in relaying the road with steel rails in place of the old iron ones.

On the Assam-Bihar State Railway the section from Raiganj to Katihar, 37½ miles, and from Kasba to Forbesganj, 36½ miles, were completed and opened to traffic on the 1st July and by the close of the year on the remaining 13 miles the rail-head was within two miles of Anchra, the ghât station on the Kosi river.

On the Nalhati State Railway the work of replacing the old 30lb iron rails by 40lb steel rails made satisfactory progress. Over 15 miles of the road has now been relaid. The traffic returns for the year in this small line were most satisfactory.

The traffic on the Bengal Central Railway shows signs of further improvement. This line is worked by the Eastern Bengal Railway at 40 per cent. of the gross receipts, but a question as to the charge for depreciation of rolling stock remains unsettled.

The Darjeeling line made satisfactory progress in relaying the Terai Section with 40lb rails, and several useful additions to the station buildings have been commenced. The result of the arbitration on the question of half profits over 5 per cent. was in favour of the Company, and the State will share the profits from 1st July 1889.

The Deoghur Railway showed a very satisfactory increase in receipts over last year.

On the Tarkeshwar Railway the traffic receipts showed the high average of Rs. 246 per mile per week.

The East Indian Railway have kept up to their usual high standard of working. By the failure of the Jyntee bridge on the Chord line in the middle of the monsoon, the whole of the up-country traffic for some months had to be passed over the single line of the Loop, but the excellent traffic arrangements of the Company allowed of the successful accomplishment of this feat. The Sahebgunge-Munihari ferry service was improved by the addition of the five cargo-boats and new landing-stages.

• On the Patna-Gya State Railway, worked by the East Indian Railway Company, there has been an increase in traffic over that for the previous year. The gross earnings averaged Rs. 175 per mile per week.

The survey of the Western Bengal Railway was commenced in November 1888 and completed by the 15th May 1889 by Mr. J. Ramsay.

The work done was—

- (1) A located line from Gya to near Hooghly on the East Indian Railway *via* Baidyanath and Soory.
- (2) Alternative line from Gya, *via* Baidyanath and Soory, to Ranaghat.
- (3) Branch line from Assensole to Soory.

Besides the above, a reconnaissance was made from Gya to Sasseram, and plans and estimates prepared.

The results of the survey show that a line from Mogul Serai *via* Gya, Soory and Mugra to Calcutta (Howrah) would be 458 miles, against 469 miles by the present East Indian Railway Chord line; while the alternative line *via* Ranaghat to Calcutta (Sealdah) would be 474 miles, and to Sealdah *via* Mugra 462 miles. The line *via* Soory to Mugra gives the most direct route, while the alternative line *via* Ranaghat appears to offer no advantages except that it would form a section of any line that may hereafter be constructed to Moorshedabad and Bhugwangola.

The estimated cost of the two lines is as follows:—

		Rs.
Mogul Serai to Mugra	...	5,11,42,430
Ditto to Ranaghat	...	5,20,69,204

Mr. E. J. Martin, M.I.C.E., F.R.I.R.A., was Secretary during the year. The office of Under-Secretary was held by Mr. T. E. Owen, A.M.I.C.E., and by Mr. H. B. Taylor, A.M.I.C.E., F.C.H., on the former officer taking furlough.

EASTERN BENGAL STATE RAILWAY.

ADMINISTRATION REPORT, 1889-90.

LINES OPEN FOR TRAFFIC.

The total length of line open on 31st March 1890 was as follows:—

LENGTH.		Railway distance in miles.	Steamer Service distance in miles.
From	To		
BROAD GAUGE, 5' 6".

GRAND TOTAL, EASTERN BENGAL STATE RAILWAY SYSTEM		872	174

The line was divided into the following districts:—

A District, Broad Gauge.—Eastern, Southern and Central Sections.

B District, Metre Gauge.—Northern Section, including Assam-Behar line and Kaunia-Dharla Railway.

C District, Metre Gauge.—Dacca Section.

The following portion of the Assam-Behar line was opened for goods and passenger traffic on the 1st July 1889, and included as part of the Northern Section under B district:—

		Miles.
Katihar to Rayganj	...	37½
Kasba to Forbesganj	...	36½
Total	...	74

The following new stations on other sections were opened during the year:—

Eastern Section.—Banpur between Kissengunge and Ramnagar.

Northern Section.—Jamalganj between Nawabganj and Jaypur Hât for passengers only. Nurpur between Kaliyaganj and Rayganj.

CAPITAL WORKS.

The chief capital works in progress or completed during the year were the Budge-Budge extension, the extension of the Assam-Behar line from Forbesganj to Anchra on the river Kosi, and the provision of extra waterway on the newly opened extensions of the Assam Behar line.

The extension to Budge-Budge was completed and passed for traffic, but not opened for passenger or goods traffic before the end of the year. The extension comprises the following lengths:—

	Miles.
Ballygunge Junction to Tolly's Nullah, completed in 1887	2.53
Tolly's Nullah to Akra Junction, constructed by the Port Commissioners, and taken over from them by the Railway	4.63
Akra Junction to Budge-Budge	6.46
Total	13.62

The earthwork of the extension of the Assam-Behar line from Forbesganj to Anchra Ghât, a length of 13.62 miles, was completed during the year, and the rails laid for 11 miles. The unusually high floods over the whole of the Assam-Behar line rendered it necessary to increase the amount of waterway originally allowed on this portion; some of the bridges which had been completed were endangered to such an extent that it became necessary to cut the bank in order to pass off the floods and save them. Additional waterway has since been provided.

Additional waterway and bridge protection works had also to be provided on the newly opened portion of line between Rayganj and Katihar, owing to many of the bridges between the 56th and 75th miles being in danger from scour on account of the high floods. The protection works have been vigorously pushed on during the year, and the substructures for a total additional length of 980 feet of waterway were in progress, and will be completed by the time the girders arrive from England.

The following is a list of other Capital works undertaken during the year:—

Staff-quarters.—Two double units for Guards at Narcaidanga. Quarters for Permanent-way Inspectors at Dinagepore and Sonarpur. House for Locomotive Superintendent at Kanchrapara. Quarters for native staff at Narcaidanga, Chitpore, Dum-Dum, Ichhapur, Naihati, Kanchrapara, Sultanpur, Domar, and Jaydebpur. Permanent-way gang huts between Sealdah and Naihati. Institute at Kanchrapara.

Goods Sheds.—New goods sheds at Chitpore, Sara, Saidpur, Domar, Chilhati, Haldibari, Siliguri, Rungpore, and Julpaiguri. Additions to goods sheds at Chirir Bandar, Kaugon, and Kaliyaganj.

Stations.—Extension of the station at Poradaha. Permanent station buildings at Sangrampur, Changripota, and Garia on the Southern Section. Brick platform walls at Basuldanga, Sangrampur, and Atrai. New delivery office at Chitpore over-bridge, and engine turn-table at Narayanganj.

Sidings.—Remodelling of yards at Kooshtea, Damukdia, and Parbatipur. Additional sidings at Sangrampur, Beliaghata, and Sealdah.

Bridges.—Bridge to replace level-crossing at Russapugla on the Budge-Budge Extension.

REVENUE WORKS.

Relaying.—On the Eastern Section, 5.66 miles were relaid with 73lb steel rails; the length now relaid is $77\frac{1}{4}$ miles; on the Northern Section, 1.85 miles were relaid with 50lb rails, making a total length of 26.13 miles thus relaid between Sara Ghât and Sultanpur. Arrangements have been made to push on this work vigorously during the current year.

Renewal of rails.—On the Eastern Section, 3.01 miles were renewed, and on the Northern Section, 7.52 miles.

Repairs.—The way and works on the line were kept in good repair during the year, and a large number of new minor works were carried out at the cost of revenue.

LINES UNDER SURVEY.

There were no surveys of any great importance made during the year; the extension to Rhyta was re-surveyed and staked out with a view to its early construction, and a survey about $\frac{3}{4}$ mile in length was made from Julpaiguri to the Teesta in order to connect with the Dooars tramway, which is shortly to be constructed by a private Company on the opposite bank of the river.

The project for crossing the Ganges by a bridge or tunnel did not make much progress during the year; some erosion of the sandy bank south of Rhyta took place, and the proposed site for the bridge was altered slightly. Further progress in the matter is postponed for the present, pending the completion of the boring operations now about to be commenced.

FLOODS.

The line was severely tried by extraordinary floods during the year. The Laltikuri bund was breached, and the water rose to within 2 feet 7 inches of the rails at Bogoola. The breach in the bund was not of so serious a nature as that which occurred in 1885, but the immunity from danger secured, and the comparative lowness of the water-level, were no doubt due to the largely increased waterway provided on this section of the line in 1887-88.

On the Goalundo Extension, from mile 116 to mile 120, special precautions were taken to protect the line, and although at one time the rails were submerged for two miles near Kumarkhali, no damage was done, and the traffic was carried on without interruption. At mile 131, however, the abutment of a small culvert was undermined, but no interruption to traffic was caused. Several of the bridges were slightly damaged by the floods, and it has been decided to raise the line between miles 116 and 121, and also between 138 and $141\frac{1}{4}$.

On the Behar Section the floods were extraordinarily high, and almost all the bridges between miles 56 and 75, with the exception of that over the Mahanuddi, were badly scoured and for a time in danger; traffic for a time was interrupted at one of the bridges on the 67th mile, which was all but carried away, and was saved by a very liberal use of block stone; passengers and mails had to be transhipped for 10 days. The effect of the floods will in future, it is hoped, be lessened by the provision of 20 spans of 40 feet additional waterway, and by an efficient system of protecting the pier abutments of the bridges and the ends of the embankment near them.

The Kaunia-Dharla line was breached near Jatrapur, but the damage was repaired without great inconvenience.

COAL SUPPLY.

The coal used during the year on the different sections was obtained from the following sources:—

On the Eastern, Southern, Central, and Dacca Sections	Burrakur coal supplied by Bengal Coal Company at Rs. 3-2 per ton, delivered in wagons at Burrakur. Sanctoria coal supplied by the Bengal Coal Company at Rs. 3 per ton, delivered in wagons at Burrakur.
On the Northern Section	Seebpore coal supplied by Messrs. S. K. Daw and Company at Rs. 2-13 per ton, delivered in wagons at Assensole.
On the Behar Section	Madhubpore coal supplied by the Bengal Coal Company at Rs. 2-12 per ton, delivered in wagons at Babasole.
On the Dhubri Steamer Service and for smithy purposes	Makum coal supplied by the Assam Railway and Trading Company at Rs. 14 per ton, delivered stacked on the bank at Dhubri.

The coal supplied under all the contracts has been of good quality, and the arrangements for delivery were satisfactory. The substitution of Bengal for Makum coal on the Dacca Section has been tried with satisfactory results, and the latter will, unless a reduction is made in the price, only be used in future for the Dhubri Steamer Service and for smithy purposes: possibly only for the latter.

WORKING AGREEMENTS.

The agreement with the East Indian Railway continued in force, and, with the exception of the coal traffic, which was satisfactory, very small quantities of goods were exchanged between the two lines at Naihati.

The revised agreement with the Bengal Central Railway was still under consideration during the year; the point remaining to be settled is the interest and depreciation charges due on stock lent by the Eastern Bengal Railway to the Company, or borrowed by the former from the latter. This matter is now before Government.

The revised agreement with the Darjeeling-Himalayan Railway for the working of Siliguri station was executed during the year, and effected considerable improvements in the arrangements at that place.

The River Delivery Service between the Gouripore Jute Mills and Budge-Budge continued to be largely used; the arrangements made by the Calcutta Landing and Shipping Company were more satisfactory than in the previous year.

No alteration was made in the agreement with the Port Commissioners; traffic passing on and off the Port Commissioners' line continues to be dealt with by the Port Commissioners, though it is considered that it would be more proper, as well as more convenient to trade, to revert to the practice formerly in force of allowing this railway to deal with its own traffic on the Port Commissioners' line.

The agreement with the India General Steam Navigation Company for the combined steamer and rail service continued to work satisfactorily, and the contracts with Messrs. Bird and Company for handling goods at the river-side and metropolitan termini remained in force during the year.

Some experimental steamer services were run by the India General Steam Navigation Company in connection with the railway, but they were not, as a rule, pecuniarily successful, and were abandoned. The one from Khoolna on the Central Section to Madaripur, from which considerable results were expected as regards goods traffic, was abandoned after a brief season, when no further cargo could be obtained; and a passenger service from Chandpur on the Megna, the proposed terminus of the Chittagong Railway, to Chandipur, a station on the Goalundo-Dacca steamer run, was discontinued for want of support from the public.

With the approaching completion of the docks, a committee was appointed, consisting of official, mercantile, and railway members, to consider the arrangement for working the docks on their opening. The committee's labours were not ended at the close of the year.

TRAFFIC.

The year has been financially a most prosperous one for the railway, and the net earnings amount to nearly 6½ per cent. on the whole Capital expended on the system. The jute crop was again a good one, and the railway succeeded in obtaining more than its normal share of the total despatches by agreements made for the carriage of baled jute by the combined Railway and Steamer Service from Narayanganj. The uninterrupted prosperity of the line during the past few years cannot be counted on as a permanency, and should a failure of the jute crop occur, as was the case in 1883, the present high percentage of interest earned cannot be expected to continue.

There is also the danger of water competition, which at one time assumed a very serious aspect during the past year, when the mill-owners threatened to construct and place their own fleet on the river, and to carry down raw material for themselves from the jute-producing districts. An arrangement was come to between the River Companies and the Mill Directors, by which the jute for the mills is secured to the former, either direct to Calcutta or by the railway *via* Goalundo, for a term of years at special rates, and it is satisfactory to find that a severe competition for the traffic, with tonnage in excess of requirements, has for the present been avoided; at the same time it is to be feared that the eventual outcome of the negotiations effected will be a permanent reduction of the rates for the carriage of jute, and for a time, at all events, a shrinkage in the earnings from this traffic will result.

The difficulties experienced by the Traffic Department in carrying on the work of transshipment at the ferry stations were greater than in any previous year since the line has been taken over by Government. On the 1st July, owing to the state of the river at Damukdia, the transshipment work had to be transferred to Kooshtea; on the 16th August it was retransferred to Damukdia, and again back to Kooshtea on 2nd October. On the 6th November Kooshtea had to be closed as a transshipment station owing to the river Gorai being no longer navigable for steamers and flats; and Damukdia being almost unworkable, it became necessary to work the bulk of the through goods traffic from the Northern Section in steamers and flats from Sara to Goalundo. This diversion of the Northern Section traffic necessarily interfered with and delayed ordinary through traffic from Narayanganj and Serajganj, which at the time was considerable; but was preferable to confining transshipments to the small quantity that could be dealt with at Damukdia, and running the risk of a serious block and detention to rolling-stock on the Northern Section. The new goods yard at Sara was at one time partly under water, and some of the lines had to be taken up owing to the sudden rise of the river and consequent erosion of the bank; but the river fortunately fell again before any great damage had been done.

ACCIDENTS.

The most serious accident during the year occurred on 15th April 1889, at a bridge at mile 23, a short distance north of Madhnagar station on the Northern Section. An up mixed train consisting of engine and tender, 11 coaching vehicles, 1 low-sided and 18 covered goods wagons, and one brake-van, 31 vehicles in all, was caught, while crossing the bridge, by a tornado, and the whole of the vehicles, with the exception of one third class carriage and the rear brake-van, were derailed and overturned; 10 vehicles being blown off the bridge into the river, and 19 down the embankment. There were about 140 passengers in the train, of whom 89 were emigration coolies; there were no first or second class passengers. Seven passengers were killed and 80 injured. Considerable damage was done to the rolling-stock, the cost of repairing which was estimated at about Rs. 11,000.

On the 9th July, at 3-45 in the morning, two buffaloes were run over by a down passenger train between Forbesganj and Arariya stations

on the Assam-Bihar Section. The speed of the train is said to have been about 15 miles an hour. The accident occurred near a bridge, between mileage 140 and 141, resulting in the derailment of three third class carriages attached next to the engine. The damages were slight, and the consequences of the derailment were far less serious than might have been expected; none of the passengers in the derailed carriages were injured.

On the 22nd July last, an East Indian Railway goods train from Assensole *via* Naihati was run into by the Eastern Bengal State Railway mail train from Khowla, at the Dum-Dum Junction station, where the Eastern and Central Sections of the Eastern Bengal State Railway are connected. The result of the collision led to no serious injury to any passenger. The Eastern Bengal State Railway engine and three carriages were derailed. Some of the East Indian Railway vehicles were also derailed, but the injuries to them were slight. The permanent-way suffered considerably for a length of about 100 yards, and two timber trucks belonging to the Eastern Bengal Railway line were almost completely destroyed. The driver of the East Indian Railway was responsible for the accident; he came within the distant signal, which, as well as the home signal, was against him, and fouled the crossing over which the Khowla mail was about to pass.

On the 26th October, flat No. AI, while being towed by the steamer *Soorma* together with another flat, grounded in the river Gorai, off Kooshtea, during a gale. The flat sank after a short time, in spite of efforts made to keep her afloat. The cargo on board, consisting partly of piece-goods, was a valuable one; salvage operations were commenced as soon as possible, and part has since been recovered; but the value of the flat has been charged off against revenue as a total loss.

PERSONS EMPLOYED.

The total number of persons of all classes employed on the system during the year was 14,804 as against 13,426 in 1888-89, the increase being chiefly due to the opening of a further portion of the Assam-Bihar State Railway.

RAILWAY POLICE.

The total number of cases of crime dealt with by the Railway Police was 503 against 526 in the previous year, the decrease being principally under "Minor offences against property."

The general result of the cases dealt with, as compared with the previous year, is as follows:—

	1888.	1889.
Cases reported	526	503
Do. declared false	65	52
Do. sent up for trial	323	313
Do. in which conviction was obtained	266	246
Number of persons arrested	421	456
Do. do. tried	395	422
Do. do. convicted	309	310
	Rs.	Rs.
Value of property stolen	16,570	11,627
Do. do. recovered	6,734	6,679

The following are the chief cases of offences against property. A native passenger was robbed of property to the value of over Rs. 300 while asleep in a railway carriage on the Northern Section, and the robbery was traced by the police to a man who entered the same carriage as the complainant at Nattore. On enquiry into this man's antecedents, it was found that two other charges, one of drugging and the other of theft, were pending against him. He was sent up for trial, convicted and sentenced to two years' rigorous imprisonment for the robbery on the railway.

In another case, a registration clerk in the Rajmehal post office extracted a railway receipt for some boxes of silk from a registered letter, and forwarded it to a friend in Calcutta, who obtained delivery of the silk at Calcutta and rebooked it over the railway to Dacca. Both men were sent up for trial, convicted, and sentenced to two years' rigorous imprisonment each.

In two cases of offences against property committed during the previous year, clues were obtained during this year, which enabled the police to bring the cases to a satisfactory issue. Both offences were found to have been committed by the same man; the property stolen being valued in one case at Rs. 514, and in the other at Rs. 1,783, of which property to the value of Rs. 440 and Rs. 1,500, respectively, was recovered. Both cases were sent up for trial, and the accused was convicted and sentenced to one year's rigorous imprisonment in the first case, and two years' in the second.

There were only nine cases in which railway servants were prosecuted for neglect of duty under the Railway Act, of which two only require notice: one, in which a driver was prosecuted for causing the death of a khalasie at Dattapukur, on the Central Section, by rash driving while shunting; the other, the prosecution of the assistant station-master of Halsa, on the Eastern Section, for negligently allowing a train to proceed on to a siding on which wagons were standing, thereby causing a collision and considerable damage to the rolling-stock. The driver was acquitted by the Magistrate, and the assistant station-master of Halsa convicted and sentenced to a fine of Rs. 60.

The only other serious case in which a railway servant was concerned was the prosecution of a shunter, under section 302A of the Indian Penal Code, for tampering with the brake of an engine standing in the Sealdah yard, and thereby causing the death of a native fireman who was working underneath the engine. The shunter was convicted and sentenced to four months' rigorous imprisonment.

SCHOOLS.

The following are the statements of the railway and district schools in the prescribed forms :—

Railway Schools.

RAILWAY.	Number of schools.	ATTENDANCE.				ANNUAL CONTRIBUTION.				Annual expenditure.
		Children.		Apprentices and workmen.		Government grant.	Railway grant.	School fees.	Total.	
		Number on the roll.	Average daily attendance.	Number on the roll.	Average daily attendance.

MEDICAL ARRANGEMENTS.

Nineteen thousand three hundred and fifty patients were treated at the various dispensaries on the line during the year, of which number 3,541 were Europeans and Eurasians, 11,335 Hindus, 3,817 Musalmans, and 657 other castes. The total number of patients admitted into the hospitals for treatment during the year was 329.

The general working of the Medical Department under the supervision of the chief medical officer, whose appointment was confirmed during the year, was satisfactory, though the department is not yet up to the sanctioned strength owing to the non-appointment up to the 31st March 1890 of five out of the six apothecaries for whom posts were provided in the scale of medical establishment sanctioned for the system in December 1888. The absence of the apothecaries, whose places had to be filled by civil hospital assistants, entailed considerable extra work on the chief medical officer, who, at the expense of his own duties of supervision, has had to attend cases and look after details, which men with higher qualifications and greater experience could have been safely left to deal with. As there appeared to be no likelihood at the end of the year of apothecaries being available, application was made to fill the posts sanctioned for them by appointing assistant surgeons, and it is hoped that the department will be brought up to its full strength in this way during the next year.

Railway cholera hospitals have, as in former years, been opened for the admission of emigration coolies attacked with cholera while *en route* to Assam; the total number of coolies treated at these hospitals during the year was 159.

STORES.

Nothing in the administration of the Stores Department during the year calls for special notice; the ordinary work of the department has been carried out satisfactorily; the verification of stores has made satisfactory progress, and the surplus store lists of the various depôts have been considerably reduced. The construction stores of the Behar Section were collected at Katihar and verified during the year.

The transactions of the department for the year were as follows:—

	Rs.	Rs.
Balance on 1st January 1889 (including Assam-Bihar and Kaunia-Dharla Sections)	24,45,390
<i>Add</i> —Receipts by purchase—

TRAFFIC AND WORKING.

The following gives the comparison of earnings for the years 1888 and 1889 :—

MAIN HEADS.	1888.	1889.	DIFFERENCE.	
			More.	Less.
	Rs.	Rs.	Rs.	Rs.
Coaching	34,10,103	36,43,839	2,33,736	...
Goods	62,21,155	64,46,104	2,24,949	...
Telegraph	26,789	27,850	1,061	...
Steam-boat earnings	6,72,064	7,65,492	93,428	..
Sundries	1,89,099	2,93,389	1,04,290	...
Total	1,05,19,210	1,11,76,674	6,57,464	...
		Increase	6,57,464	

Passenger traffic.—The most noticeable feature in the passenger traffic was a small decrease in the number of season ticket-holders during the second half of the year, though the earnings from season tickets showed a slight increase. This class of traffic has hitherto shown steady development, and the exact cause of the check it has now received is not known. When the automatic vacuum brake is fitted to the local trains, it will be possible to improve the local train service, and it is hoped that when this has been done the local traffic will recover.

Goods traffic.—The total quantity of jute carried over the railway was 356,809 tons, as against 334,431 during the previous year. At the most noticeable features in the jute traffic were the falling off in the despatches of drummed jute from the Goalundo and Pachooria local stations, and the very large increase in the despatches of baled jute from Narayanganj. There was a serious falling off in the rice traffic due to a partial failure of the crops from want of rain, and to the destruction caused to the crops later on by heavy floods; the total quantity of rice carried fell from 87,529 tons in 1888 to 53,727 tons in 1889.

Steamer traffic.—The increase in steamer earnings is due partly to the abolition of the off-day on the Goalundo-Narayanganj steamer service, the service having been made a daily one from the 1st January 1889, and partly to the large amount of traffic brought across the ferry from the Northern Section.

LOCOMOTIVE, CARRIAGE, AND WAGON DEPARTMENTS.

The total train mileage on the different Sections was as follows:—

1889.				
1. Eastern	1,294,544
2. Southern	148,402
3. Central	*303,444
4. Northern	853,513
5. Behar	161,381
6. Dacca	181,745
7. Kaunia and Dharla	27,256

On the broad-gauge portion of the line, three engines (H class, by Dubs and Company) were replaced at the cost of Revenue, making the total number on the line, at the end of the year, 92; the number of metre and 2 feet 6 inches gauge engines on the line was the same as in the previous year, viz. 74. The average mileage per engine of the total stock during the year, and the cost of repairs, were as follows:—

	Mileage per engine.	Cost of repairs per engine. Rs.
Broad gauge	... 23,914	2,857
Metre gauge	... 20,120	1,074

On the Northern Section the rolling-stock was increased by the addition of 320 metre-gauge covered goods wagons and 10 third class carriages, making the total number of metre-gauge coaching and goods vehicles on the Northern and Behar Sections (excluding Kaunia-Dharla Section) 241 and 1,367, respectively. The total number of vehicles on the line on the other sections was as follows:—

	Coaching	Goods.
Eastern Section broad gauge	... 447	1,888
Kaunia-Dharla Section, 2' 6" gauge	28	67
Dacca Section, metre gauge	... 85	241

The Canadian lubricating oil which was received at the end of 1888 was used throughout the year for lubricating the axles of vehicles, but was found to be unsuitable for locomotives and machinery, for which castor-oil is still used. The high price of castor-oil, due to partial failure in the oil-seed crop, neutralized the saving effected by the introduction of the Canadian oil,

* Exclusive of 11,713 miles run by ballast trains.

and the cost of oiling is therefore considerably higher than in the previous year ; naturally, however, the higher the price of castor-oil rises, the more economical is the partial substitution of the cheaper Canadian oil, and the saving during the year effected by its use has in reality been considerable.

Experimental trains fitted with the vacuum and Westinghouse brakes have been running on the local service throughout the year ; both systems have worked satisfactorily ; but as it has been decided to adopt the vacuum brake on all Indian railways, orders were issued at the end of the year to remove the Westinghouse brake. Estimates for fitting the Darjeeling and Goalundo mails, and the local service trains, with the automatic vacuum brake, were submitted for sanction shortly after the end of the year.

STEAMER SERVICE.

The total number of steamers on the list on the 31st December 1889 was 18, and the number of flats 34, including 1 cargo boat ; of these 1 steamer and 10 flats are chartered to the India General Steam Navigation Company. Four flats, costing Rs. 1,34,080, were added during the year to the railway flotilla, two of which were built in the Government Dockyard, and two transferred from the Tirhoot State Railway. One flat (AI) was lost in the Gorai river, near Kooshtea, in October, and the steamer *Tara* was dismantled and her hull sold.

TRAFFIC DEPARTMENT.

In spite of the very serious difficulties experienced by the Traffic Department in transshipping goods at the Sara-Damukdia ferry, there was at no time during the year such a serious block to the through traffic from the Northern Section as occurred in the previous year. At the time the transshipment had to be carried on between Sara and Goalundo, owing to the mouth of the Gorai silting up, despatches from stations on the Northern Section were necessarily limited, and goods waiting for despatch accumulated on the station registers ; but though there were delays, there was no absolute block, and the traffic was gradually worked off as the difficulties of transshipment were overcome. The metre-gauge rolling-stock, with the addition of 320 new metre-gauge wagons which were put on the line during the year, was found to be sufficient for the requirements of the traffic on the Northern Section, and on the Eastern Section the 230 new wagons built in the previous year enabled the traffic to be disposed of without borrowing wagons from the East Indian Railway, as in former years. The jute from the Northern Section was later than usual, and the tea traffic thus obtained unusually prompt despatch.

On the Goalundo-Narayanganj Service, the railway steamers were able for the first time to run continuously by the Pudma route, thus securing to the railway the traffic at the intermediate stations throughout the year. The Dacca Ghât station, from which the India General Steam Navigation Company used to run a flat to Goalundo in connection with the railway, was finally closed during the year, and the combined service discontinued. This measure met with considerable opposition from some of the Dacca traders ; but the service did not pay owing to the small amount of traffic they were able to contribute, and it was impossible for the railway to continue to keep it up, solely for their convenience, to deal with traffic which could be sent *via* Narayanganj ; the river route from Dacca to Narayanganj running parallel to the railway line between those places. To minimise the inconvenience caused to the traders by closing the Ghât station, the Post Gollah sidings near Dacca, which were constructed to facilitate the transport of stores for the Dacca line during its construction, were opened for public traffic.

The branch parcel offices in the Strand road and at the north end of Chowringhee, which were established last year, continued to be largely used ; but the earnings from the parcel traffic were less than in the previous year, owing to a falling off in the fish traffic from Goalundo.

HIRE OF ROLLING-STOCK.

Two hundred and fifty covered goods wagons were lent to the East Indian Railway in January 1889, and their return finally completed in March. No goods vehicles were hired from the East Indian Railway during the year.

RATES AND FARES.

The changes made during the year consist mainly of the usual alterations in the jute rates, which vary with the season, and the assimilation of the charges for grains and seeds and other staples with those in force on the East Indian Railway in cases of through-booking.

TIRHOOT STATE RAILWAY.

METRE GAUGE.

I.—LINES OPEN FOR TRAFFIC.

The total mileage open for traffic was the same as that of last year, viz. 273 miles. Heavy floods occurred during the rains, which caused great damage to the line, especially between Jhanjharpoore and Bhaptiahi, where, besides serious scour at many of the small culverts, a bridge at mile $\frac{9}{8}$ totally collapsed, which necessitated the erection at once of a temporary bridge to prevent the stoppage of traffic.

A new pier was built for the Dhanauti bridge at mile 118 in place of the old cast-iron cylinder pier, which also showed signs of giving way.

II.—STORES.

The Store Department was directly under the Locomotive Superintendent assisted by a Sub-Storekeeper; this arrangement has worked well and with economy.

There was one main depôt at Samastipur, under the direct charge of the Locomotive Superintendent assisted by a Sub-Storekeeper. For the construction work of the Durbhunga-Bairagnia Branch a store depôt was opened at Durbhunga, under the Store Department, in December 1889.

The balance of stores at the Samastipur and Durbhunga depôt at end of December 1889 amounted to Rs. 2,97,663 and Rs. 10,973 respectively, as detailed below :—

			Samastipur depôt.	Durbhunga. depôt.
			Rs.	Rs.
Bridge work	4,151	...
Engineer's plant	10,520	396
Workshop machinery, &c.	14,313	...
Ballast and permanent-way	50,863	3,146
Rolling-stock—Locomotive	45,823*	...
Ditto— Coaching and goods stock, iron-works	21,255	...
Station materials and fencing	20,700	1,581
Tools	10,094	297

Lamps and lamp fittings	11,546	41
Leather and India-rubber goods	5,350	...
Metals	30,512	2,880
Painters' stores	7,061	337
Timber	3,947	...
Fuel	4,730	...
Furniture	1,243	...
Cloth, clothing, &c.	1,532	2
Miscellaneous	22,024	1,945
Stationery	4,025	...
Press and printing materials	136	...
Stores in transit	5,536	...
Total			2,97,663	10,973

Represents value of spare parts of engines and not of complete engines.

The rolling stock on the line at the end of the year was as follows:—

	No.
Locomotive engines	45
Coaching vehicles	190*
Goods „	889

The following additions to the rolling-stock were made during the year:—

	No.
Coaching vehicles	9

III.—CAPITAL TRANSACTIONS.

	To end of the year.	For the year.
	Rs.	Rs.
The total capital expenditure to end of December 1889 amounts to	2,12,28,094	4,33,777
The following are the sections of the line under which it was expended:—		
1. Tirhoot State Railway open line (including Kunwa Ghât Extension)	2,10,61,923	2,83,671
2. Durbhunga-Bairagnia Branch	1,66,171	1,50,106
The interest for the year at 4 per cent. on the total capital outlay amounts to	8,41,932
Net revenue for the year	9,78,216
Showing a net gain to Government of	1,36,314

IV.—REVENUE TRANSACTIONS.

The following table compares the financial results of the year's working with those of the previous year:—

YEAR.	Mean mileage worked	Gross earnings.	Working expenses.	Net earnings.	Percentage of expenses on earning.	Percentage of net earnings on total capital outlay on open line
		Rs.	Rs.	Rs.		
1888	262.5	18,07,283	10,08,408	7,98,875	55.80	3.84
1889	273	18,96,671	9,18,428	9,78,246	48.42	4.66
Difference more +, less—	+ 10.5	+ 89,391	— 89,980	+ 1,79,371	— 7.38	+ .82

Owing to the opening of the Bhaptiahi-Pertabgunge Section (14 miles) of the Kosi Extension for goods traffic during the fourth quarter of 1888, the mean mileage worked during 1889 was 10.5 more than that of 1888.

The gross earnings of the year show an increase of Rs. 89,391, or 4.95 per cent., in comparison with the previous year; whereas the working expenses show a decrease of Rs. 89,980, or 8.92 per cent. The net earnings of the year amount to Rs. 9,78,246, or Rs. 1,79,371 more than those of the previous year, and yield a return of 4.66 per cent. on the total capital outlay, against 3.84 of the preceding year. The percentage of working expenses on gross earnings is 48.42 against 55.80 of the previous year.

* Twenty-five vehicles are adapted for military purposes.

V.—TRAFFIC AND WORKING.

Coaching traffic.—The number of passengers carried and the receipts realized therefrom compare as follows :—

	FIRST CLASS.		SECOND CLASS.		INTERMEDIATE CLASS.		THIRD CLASS.		TOTAL.	
	No.	Earnings.	No.	Earnings.	No.	Earnings.	No.	Earnings.	No.	Earnings.
1889	8,781	Rs. 26,187	10,003	Rs. 10,266	10,193	Rs. 7,052	2,140,947	Rs. 7,02,831	2,179,854	Rs. 7,53,176
1888	8,300	26,090	9,504	10,790	9,191	7,518	2,080,009	6,67,835	2,107,004	7,18,233
Increase	481	47	499	...	932	434	69,848	34,986	71,700	34,943
Decrease

The general increase in coaching traffic is due mainly to large use of return journey tickets and to the development of third class passenger traffic, which suffered greatly in 1888 owing to scarcity in the district.

The average sum received for carrying a passenger one mile amounted to 1·86 pias against 1·80 of the previous year. This increase is due to certain flag stations having been opened to public traffic during the year under review, which led to increase the receipts under third class, as a station-to-station rate is in force on this line for that class. The coaching receipts per train mile amounts to Rs. 3·18 against Rs. 2·71 of 1888.

Goods traffic.—The following is a summary of the number of tons lifted, and the receipts realized therefrom, during the year 1889 as compared with 1888 :—

YEAR.	General mer- chandise.	Military stores.	Railway mate- rials for con- struction.	Coal for the public, and construction.	Coal for Re- venue only.	Revenue stores other than coal.	Live-stock.	Rents, miscella- neous, &c.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.		
1889	299,223	18	6,024	12,230	6,002	7,978	59	...
1888	272,909	17	9,592	13,234	8,699	8,485	20	...
Increase	26,314	1	39	...
Decrease	3,568	1,004	2,697	507

Receipts.

	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1889	8,04,519	167	20,847	22,985	4,261	9,159	137	10,672
1888	7,53,007	146	31,032	27,625	5,931	8,947	224	17,067
Increase	51,512	21	212
Decrease	10,185	4,640	1,670	...	87	6,395

From the above it will be seen that there is an increase under general merchandise, but all other heads show a decrease in comparison with 1888. The import of cheap rice, grain and other food-grains owing to the scarcity that prevailed in the districts during 1888 and the first portion of the year 1889, and the bumper rice crops during 1889 which led to a large export during November and December 1889, the export of mustard and other oil-seeds, and the import of salt in large quantities, accounts for the increase under general merchandise.

The decrease under "railway materials for construction" is due to less materials carried in consequence of the Kosi extension having been completed as far as Pertabgunge, and under "coal for the public" to a smaller quantity of coal being used by factories consequent on the enhancement of rates at collieries.

The average sum received for carrying a ton one mile amounts to pies 7·25 against 6·64 of 1888. This is attributed to the enhancement of rate on edible grains and salt.

Five miles of 50lb steel rails have been laid between Silout and Mozufferpore in place of the old 40lb iron rails. These 50lb rails are found to give a far better road than 41½lb rails for the heavy trains now running, the greater depth of the rail making the road stiffer and causing less wear and tear to the rolling-stock running over it.

Besides several minor works, the following important works were completed:—

- (1) New machine shop, Samastipur.
- (2) Additional waterways on the Eastern Branch.
- (3) Additional goods shed accommodation with a total area of about 15,000 square feet.

Mineral resources.—The coal used during the year for locomotives was obtained from the Giridih Union Coal Company at Rs. 3·4 per ton, and that for flotilla and workshop boiler from the Alipore Coal Company at Rs. 2·8 per ton, and was of very good quality.

The total quantity consumed by locomotives was 8,807 tons, costing Rs. 54,112, or about Rs. 6·2 per ton delivered into wagons at the colliery. The average consumption per engine mile was 24·57lb, and per train mile 30·93lb.

VI.—RATES AND FARES.

With a view to encourage traffic, ordinary return journey tickets were issued in through booking with the East Indian Railway and the Bengal and North-Western Railway, the number of days for which they were available being reckoned according to the distance travelled; and on the Tirhoot State Railway return journey ticket-holders were allowed to travel with time-expired tickets on payment of the difference between one return and two single journey fares, provided they were used within a month from the date of expiry of the time. These concessions have been availed of by the public with benefit to the railway.

The reduced rate of 7 pies per 100 maunds per mile for salt booked through from Howrah to stations above 50 miles on this line *via* Mokameh Ghât, introduced last year in order to compete with the boat traffic, was withdrawn and a 20 pies rate introduced; this has not only contributed largely to increase the receipts, but the quantity carried has also increased.

Edible grains and pulses of all kinds and seeds, except indigo seed, when tendered in quantities of not less than 140 maunds and carried 70 miles or more over this railway, all special class conditions being fulfilled, were charged at 25 instead of 20 pies per 100 maunds, and helped to increase the receipts.

During the monsoon the rates were not generally reduced over several stations on the line. The only stations it was considered advisable to reduce and compete with the boat traffic were Bettiah, Durbhunga, and Haiya Ghât. This somewhat increased the monsoon earnings.

NALHATI STATE RAILWAY.

GAUGE 4 FEET.

I.—LINES OPEN FOR TRAFFIC.

The length of railway open for traffic on 31st March 1890 was the same as last year, 27·25 miles (exclusive of sidings) from Nalhati to Azimganj. The traffic was carried on throughout the whole year without interruption. No accident of serious nature occurred during 1889-90.

II.—STORES.

The procedure of obtaining ordinary small stores through the Port Store-keeper, by local purchase or from reserve stock, was maintained during the year. Castor-oil was not available from the Rajshahy Jail, and hence obtained from the local market through the Port Store-keeper, Calcutta.

There is no vehicle stock in this line adapted for military purposes.

The balance of stores in hand on 31st December 1889 was Rs. 14,848, as detailed below :—

CLASS.				Rs.
A.	Bridge-work	790
B.	Engineer's plan	977
C.	Workshop machinery and heavy tools	140
D.	Ballast and permanent-way	3,531
E.	Rolling-stock—Locomotive	1,597*
	Ditto Coaching and goods stock, iron-works, &c.	1,905
F.	Station materials and fencing	337
G.	(a) Tools	561
	(b) Stores	
	(1) Hardware, copper, tin and zincware	1,080
	(2) Lamps and lamp fittings	391
	(3) Leather and India-rubber goods	202
	(4) Metals	1,584
	(5) Painter's stores	358
	(6) Timber	469
	(7) Fuel	†—21
	(8) Furniture for stations, offices, and refreshment-rooms	4
	(9) Cloth, clothing, and equipments	54
	(10) Miscellaneous	753
	(11) Stationery	136
Total				14,848

III.—CAPITAL TRANSACTIONS.

The capital transactions on this line for 1889 were as follows :—

	To end of the year.	For the year.
	Rs.	Rs.
The total capital expenditure amounted to	3,40,252	—670
Expenditure during the year 1889 — Rs.		
Land (sale proceeds) ... —108		
Suspense transactions—		
(Reduction in balance) ... —562		
	—670	

The interest for the year at 4 per cent. on the total capital outlay to end of December 1889 was Rs. 13,929, and as the net revenue for the year was Rs. 22,699, the net gain to Government was Rs. 8,770.

IV.—REVENUE TRANSACTIONS.

The following table shows the final result of the year as compared with the previous year :—

YEARS.	Mean mileage worked.	Gross earnings.	Working expenses.	Net earnings.
1888	27·25	Rs. 1,04,268	Rs. 81,738	Rs. 22,530
1889	27·25	1,04,010	81,311	22,699
Difference	...	—258	—427	+ 169

* There are no engines in stock ; the balance represents value of spare parts.

† Due to issue of coal at a higher rate than the purchase rate. This has been adjusted in account of January 1890.

V.—TRAFFIC AND WORKING.

The following table shows the earnings under different heads as compared with the previous year :—

MAIN HEADS.				1888.	1889.
				Rs.	Rs.
Coaching		62,035	64,426
Goods		39,479	34,422
Electric Telegraph		695	983
Sundries		2,059	4,179
Total		1,04,268	1,04,010

Coaching traffic.—There has been a small increase under all classes of passenger traffic, which may be attributable to the general improvement of traffic.

Goods traffic.—This traffic shows a decrease of Rs. 5,057, which is chiefly due to less export of rice owing to less demand in North-Western Provinces this year, and to piece-goods being partly carried by steamers plying between Jeagunge and Calcutta.

Sundries.—There was an increase of Rs. 2,120 under this head during 1889, and this was due to the sale of unserviceable revenue stores, viz. rails and sleepers, at a better rate.

Engineering Department.

The total expenditure on maintenance during the year was Rs. 30,625.

Relaying.—The total length of line renewed with 41½lb steel rails during the year was 4 miles, bringing the total to nearly 15½ miles. The best of the old 31lb rails taken out of the road in course of relaying with 41½lb rails were used for renewals and repairs where required on the rest of the line. The total number of sleepers renewed during the year was 8,115, out of which 984 were new iron wood sleepers and 7,131 old East Indian Railway sāl sleepers.

Earthwork.—208,013 cubic feet of earthwork executed for making up formation of embankment.

Repairs.—The stations and buildings on the line were kept in good repair throughout the year. The cart road at Sagordighi station has been diverted to admit a new station building with proper platform being built in place of old one decayed.

Sidings.—An additional coal siding at Azimganj, commenced at the latter end of the year, is in progress.

Locomotive Department.

The expenditure during the year was Rs. 12,574. The total number of engines on the line was six, of which the two engines “Ada” and “Peterpiper” have had extensive repairs effected in the workshop at Kanchrapara. The remaining four engines have also undergone slight repairs. Engine “Peterpiper” has been transferred to the Eastern Bengal State Railway during the year, reducing the stock on the line to five engines.

Train and engine mileage.—The following table shows the number of train and engine miles performed by each engine:—

YEAR.	Number of locomotive engines on list.	Total engine mileage.	Average mileage per engine.	Total cost of repairs.	Average cost per engine.	Average cost per engine mile.
First half of 1888	6	26,385½	4,397.66	1,911	318.5	1.15
Second half of 1888	6	25,790½	4,298.33	7,419	1,236.5	4.60
First half of 1889	6*	26,602½	4,433.75	5,052	842	3.03
Second half of 1889	6*	26,854½	4,475.75	1,232	205.3	0.73

* The actual number of engines running on the line was four, and the average mileage per engine was 6,650.62 and 6,713.62 in first and second half of 1889 respectively.

The following statement will show the quantity of fuel consumed, and the cost incurred thereon, during the financial years 1887-88, 1888-89, 1889-90:—

YEAR.	Quantity.	Average rate per ton.	CONSUMPTION PER		COST PER		REMARKS.
			Train mile.	Engine mile.	Train mile.	Engine mile.	
	Tons. cwt. qr. lb.	Rs.	Rs.	Rs.	Rs.	Rs.	
1887-88 ...	433 5 3 0	7.25	21.32	19.64	1.10	0.90	
1888-89 ...	419 0 2 12	5.83	19.41	18.02	0.80	0.75	
1889-90 ...	450 16 0 0	4.65	20.30	18.72	0.67	0.62	

It will be observed that the cost of coal per train and engine mile in 1890 has fallen Rs. 13 per ton owing to a reduction in the freight over the East Indian Railway.

Carriage and Wagon Department.

The expenditure during the year was Rs. 10,671. During the year under reference one-third class carriage was constructed and placed on the line. The following statement will show the vehicle stock on 31st March 1890:—

PARTICULARS.	COACHING.						GOODS.	
	First class carriages.	Composite carriages.	Second class carriages.	Third class carriage.	Horse-box.	Passenger brake.	Covered goods wagons.	Open low-sided wagons.
Total stock on line on 31st March 1889 ...	2	2	1	5	...	2	15	13
Additions during the year 1889-90	1
Total ...	2	2	1	6	...	2	15	13
Reductions during the year 1889-90
Total stock on line on 31st March 1890 ...	2	2	1	6	...	2	15	13

The following statement will show the cost of repair to vehicle stock:—

	Per total train mile.		
	1888.	1889.	
Repairs to coaching vehicles ...	0.40	1.23	
Ditto goods ditto ...	0.31	1.73	
Cleaning carriage and wagons, &c. ...	0.09	0.11	
Total ...	0.81	3.08	Increase due to the construction of one-third class carriage and four low-sided wagons.

The ordinary repairs to engines and vehicles were executed in the Nalhati workshops.

Traffic Department.

The gross expenditure on this department during the year was Rs. 13,909 against Rs. 11,304 in 1888, being an increase of Rs. 2,605, principally due to a portion of Manager's pay and allowances being fairly debited to this department which were formerly charged wholly to Abstract E—"General Charges." There were also minor increases under "Fuel, lighting, and water, &c.," owing to thorough renewal of lamps in 1889, and under "Miscellaneous" to watches purchased for guards.

VI.—RATES AND FARES.

There was no alteration in rates and fares either in coaching or goods traffic during the year.

With a view to tap the grains, seeds, and salt carried over the Bhagirutty river by steamer and boats, efforts are being made in communication with the East Indian Railway to reduce the existing through rate between Azimganj and Howrah.

BENGAL CENTRAL RAILWAY.

 GAUGE, 5 FEET 6 INCHES.

I.—WORKS COMPLETED.

On Ranaghat Branch.

There has not been any work of importance completed on this branch during the year.

Main Line.

The work for ballasting $30\frac{1}{2}$ miles of line (reckoning from Dum-Dum Junction onwards) has been completed.

The ballasting under the estimate for ballasting 10 miles of the line at worst places in the Khoolna Division has also been completed.

WORKS IN PROGRESS.

The survey of a route from Maslandapur or Habra station to Taki via Baduria is being carried out with the object of ascertaining whether a light steam tramway could be laid with advantage as a feeder to the railway.

The construction of a permanent station building, platform and station-master's quarters at Maslandapur has been sanctioned and the work was commenced; but owing to information having been received from the Chairman of the Local Board, 24-Pergunnahs, that the construction of a feeder road from Maslandapur to Baduria had been deferred, the work has not been proceeded with further.

Jadubpore Nabharan.—The construction of a goods-shed and an approach road to it is in progress.

FEEDER ROADS.

At Majergram the road having been carried round past the front of the station building, an approach road and gate have been provided by the Company within railway limits.

GENERAL.

Goods Traffic.—The goods traffic of the Bengal Central Railway did not come up to expectation this year owing to the unfortunate falling off which occurred during the jute season, viz. in the autumn of 1889. The cause of this falling off in the carriage of jute over the railway was due in a great measure to the state of the Calcutta market, the rates having fallen to such an extent (as the result of over-speculation) that dealers in jute did not find it to their advantage to incur the expense of forwarding jute by rail to Calcutta.

The total amount of receipts for the carriage of jute over the line during 1889 is Rs. 89,130, whereas in 1888 the amount received was Rs. 1,07,156.

There has also been a considerable falling off in rice, the revenue from that commodity having sunk from Rs. 7,730 in 1888 to Rs. 2,008 in 1889.

Sugar shows a fair increase, as also seeds and coal; but the total receipts on account of principal commodities during the whole of 1889 are only Rs. 2,06,870 as against Rs. 2,20,705 in 1888.

II.—LINES UNDER SURVEY OR PROJECTED.

There are at present two lines under survey, viz.—

- (1) The extension from Singhia to Madaripur.
- (2) The feeder tramway to connect Takee with one of the stations of the Bengal Central Railway (not yet decided upon).

The proposal of the Board to construct a broad-gauge line of railway from Chittagong to Cachar, with a branch from Laksham to Chandpur, in order to effect a junction with the Bengal Central Railway's Madaripur extension, has not been definitely disposed of, no reply as to the Government of India's ultimate decision in the matter having as yet been received.

III.—MINERAL RESOURCES.

"Nil."

IV.—LINES OPEN FOR TRAFFIC.

The Bengal Central Railway continues to be worked by the administration of the Eastern Bengal State Railway.

The maintenance of the line, all engineering works, and the Company's stores, are in the charge of the Company's Agent and Chief Engineer.

V.—PERSONS EMPLOYED.

The Government Railway Police.

There are no schools or volunteers connected with the Bengal Central Railway Company's own staff.

The medical staff is maintained under a joint arrangement with the Eastern Bengal State Railway.

The total number of persons in the permanent employ of the Company during the year was 576, including the Agency, Engineering and Stores Departments. Out of this number, three were Europeans and one East Indian.

VI.—STORES.

There has not been any transaction or circumstance of importance in connection with stores.

The purchase of 8,000 sâl sleepers was sanctioned by the Board for renewal purposes in preference to creosoted pine sleepers, which were exclusively used hitherto on the line.

The grand total at debit of stores in general books up to 31st December 1889 is Rs. 99,794.

The Company's rolling-stock remains in the hands of the Manager of the Eastern Bengal State Railway, the depreciation charges on which stock from 1st July 1888 being now the subject of negotiation between the administrations of the two railways.

VII.—CAPITAL TRANSACTIONS TO 31ST DECEMBER 1889.

PARTICULARS.	Amount.	Total.	REMARKS.
<i>Expenditure—</i>	Rs.	Rs.	
On final heads of capital account ...	93,47,969		
By suspense account ...	99,785		
Total Capital Outlay	94,47,754	

VIII.—REVENUE TRANSACTIONS FOR THE YEAR ENDING 31ST DECEMBER 1889.

			Rs.
Gross revenue	7,37,191
Working expenses	4,41,203
Net earnings	<u>2,95,988</u>

IX.—TRAFFIC AND WORKING.

The following is the comparison of the earnings for the years 1888 and 1889:—

MAIN HEADS.	1888.	1889.	DIFFERENCE.	
			Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Coaching ...	4,80,035	5,15,070	35,035	...
Goods ...	2,25,744	2,10,440	...	15,304
Telegraph ...	1,790	1,903	113	...
Steam-boats
Sundries ...	5,332	9,778	4,446	...
Total ...	7,12,901	7,37,191	39,594	15,304
Increase	24,290	

The Locomotive, Carriage and Wagon, and Traffic Departments are under the management of the Eastern Bengal State Railway, who work the traffic of the Bengal Central Railway under a working agreement with the Company.

X.—RATES AND FARES.

There has not been any important alteration of the rates and fares during the year.

DARJEELING-HIMALAYAN RAILWAY.

GAUGE 2 FEET.

WORKS IN PROGRESS.

The relaying of 6½ miles of line on the Terai Section with 40lb iron rails has been finished.

A new station building, partly of brickwork and partly of timber work, is in progress at Sukna to replace the old timber structure.

An extension of the ladies' waiting-room at the Clarendon Hotel, Kurseong, has been sanctioned, and will shortly be put in hand by the Company.

Diversion of the cart road at Panchkhella to avoid the overhead bridge has been sanctioned by Government, and the work will be started at an early date.

The work of improving the line at the points of sharpest curvature is in progress and will be carried out when practicable.

MINERAL RESOURCES.

The Company obtained its supply of steam coal for the first nine months of the year from the Bengal Coal Company and the Damuda Coal Company at Rs. 15-12 and Rs. 15-6 per ton delivered at Siliguri, and for the remaining three months from the State Railway at Rs. 16-2 per ton delivered at Siliguri station.

LINES OPEN FOR TRAFFIC.

With the exception of a few days in July last, the passenger and goods traffic throughout the year was worked without interruption.

The revised working agreement with the Eastern Bengal State Railway for the joint working and interchange of traffic at Siliguri station has been brought into effect on and from the 1st July 1889.

PERSONS EMPLOYED.

The total number of persons in the permanent employ of the Company during the year was 532. Of these 16 were Europeans, 5 East Indians, and the remainder natives.

Police.—No Government or Railway Police is maintained. The railway staff do the necessary watch and ward duties on the station premises.

School.—There is no railway school in connection with this railway.

Medical arrangements.—The Company maintains a hospital and dispensary at Teendharia station, and a staff consisting of a European consulting physician, one native medical officer, and a compounder at a monthly cost of Rs. 155.

Provident Fund.—This Fund has been introduced, under certain rules and regulations, on and from the 1st January 1890, and the number of subscribers to the Fund is about 68. The Fund is under the management of a committee of officers under the control of the Board of Directors.

Volunteers.—The Company maintains no separate volunteer corps; but the major portion of the European and East Indian staff have joined the Northern Bengal Volunteer Corps.

STORES.

At the close of the year 1889 the balance of stores in hand was Rs. 1,26,189, including Rs. 22,360, value of permanent-way materials in store.

The receipts and issues of stores during the year were Rs. 2,24,797 and Rs. 1,66,780 respectively.

A statement showing in detail the value of stores in hand on 31st December 1890 is appended below—

CLASS OF STORES.	Opening balance this year.	Receipts this year.	Issues this year.	Balance at close of this year.
	Rs.	Rs.	Rs.	Rs.
Permanent-way ...	11,851	52,031	39,021	24,861
Building materials ...	5,944	10,810	8,966	7,788
Stores, General, including Locomotive ...	48,365	94,095	56,161	86,299
Fuel (coal) ..	1,016	58,334	55,838	3,517
Miscellaneous ..	1,056	3,290	562	3,784
Total ...	68,232	2,18,560	1,60,543	1,26,249

ENGINES AND ROLLING-STOCK.

Four engines of a more powerful type have been obtained from England during the year.

The following is a list of engines and rolling-stock in hand on the 31st December 1889 as compared with the previous year :—

	Number on 31st December 1888.	Added during the year 1889.	With- drawn dur- ing the year 1889.	Total on 31st Decem- ber 1889.
Engines ..	12	4	...	16
<i>Rolling-stock.</i>				
Saloon carriage ...	2	2
Invalid " ...	1	1
First class ...	3	3
Composite ...	1	1
Second class ...	7	1	...	8
First class trollies ...	8	8
Second " " ...	7	1	...	8
Third " " ...	12	12
	41	43
Miscellaneous coach- ing vehicles ...	5	...	1	4
Goods vehicles ...	105	26	...	131

The following vehicles have been adapted for military purposes :—

C Cars, Nos. 5, 8, 14, 20, for carrying mules.

C goods, Nos. 75, 85, 86, 125, 126, 127, 128, 132, 133, 141, 142 and 143 for carrying troops.

CAPITAL TRANSACTIONS.

The total paid up capital, including debenture stock, was Rs. 27,94,000 on the 31st December 1889.

The total capital outlay to the 31st December 1889 is Rs. 28,14,234, or an average cost per mile of Rs. 55,181.

The expenditure on capital account during the year under review was Rs. 1,10,480.

REVENUE TRANSACTIONS.

The following table shows the revenue transactions for the year as compared with the preceding year :—

Years.	Gross earnings.	Expen- diture, in- cluding debenture interest.	Net earn- ings.	Percentage of expendi- ture to gross earnings.	Percentage of net earn- ings to total capital outlay.	Train mileage.
	Rs.	Rs.	Rs.			
1888	6,14,893	3,31,566	2,83,327	53.92	10.22	141,323
1889	5,74,293	3,45,177	2,29,116	60.10	8.13	126,258

The gross earnings as compared with the previous year show a decrease of Rs. 40,600, or 6.60 per cent., and the expenditure shows an increase of Rs. 13,611, or 4.10 per cent.

The net earnings have decreased by Rs. 54,211, or 19.13 per cent.

The total weight of goods carried has decreased by 11.00 per cent.

The details of the gross earnings and working expenses for the year 1889, as compared with the previous year, are appended on the other side:—

	1888.		1889.		REMARKS.
	Amount.	Per train mile.	Amount.	Per train mile.	
<i>Earnings.</i>					
	Rs.		Rs.		
Coaching ...	2,14,442	5.55	2,18,364	5.69	
Goods ...	3,93,872	4.30	3,47,832	3.95	
Telegraph ...	3,202	...	3,092	...	
Sundries ...	3,377	...	5,006	...	
Total ...	6,14,893	...	5,74,293	...	
<i>Expenditure.</i>					
Maintenance ...	65,382	.46	59,727	.47	
Locomotive ...	1,11,170	.79	1,16,204	.92	
Carriage and wagon ...	26,858	.19	32,293	.26	
Traffic ...	45,414	.32	45,547	.36	
General charges ...	67,454	.48	66,156	.52	
Special and miscellaneous...	15,288	.11	25,250	.20	
Total ...	3,31,566	2.35	3,45,177	2.93	

TRAFFIC AND WORKING.

The passenger and goods traffic for the year under review compares as follows with that of the previous year:—

TRAFFIC.	1888.		1889.		INCREASE.		DECREASE.	
	Units.	Receipts.	Units.	Receipts.	Units.	Receipts.	Units.	Receipts.
Coaching ...	Passenger. 42,825½	Rs. 2,14,442	Passenger. 45,610	Rs. 2,18,364	Passenger. 2,784½	Rs. 3,922	Passenger. ...	Rs. ...
Goods ...	Maunds. 6,71,174	Rs. 3,93,872	Maunds. 5,97,495	Rs. 3,47,832	Maunds. ...	Rs. ...	Maunds. 73,679	Rs. 46,040

RATES AND FARES.

There have been no important alterations in the rates and fares during the year.

Six-monthly return tickets have been introduced with effect from 1st January 1890 in through booking with the Eastern Bengal State and the connected railways.

The period of ordinary return tickets between Calcutta and Darjeeling has been extended to 11 days in lieu of 9 days as heretofore.

DEOGHUR RAILWAY.

METRE GAUGE.

LINE OPEN FOR TRAFFIC.

The number of miles open on the 31st March 1890 is 4.79. There is no branch, nor has any new line been opened during the year, nor is any under construction; also no agreement was entered into for working branches or other lines.

STORES.

There is no important information worth giving about the administration of this department. The detailed balance in hand is as under—

Class of stores.			Balance at the close of the year.		
			Rs.	A.	P.
Permanent-way	320	1	10
Rolling-stock	688	5	4
Tools	20	0	0
Hardware, &c.	79	3	6
Lamps, &c.	64	7	3
Metals	9	0	3
Painters' stores	11	5	11
Fuel	238	0	0
Furniture for stations, &c.	186	4	6
Miscellaneous	79	1	3
Total			1,695	13	10

There are no vehicles adapted for military purposes.

CAPITAL TRANSACTIONS.

			Rs.	A.	P.
Share capital	2,75,000	0	0
Revenue expended on capital account	43	0	0
Reserve fund expended on	6,136	12	0

REVENUE TRANSACTIONS.

The revenue of the year was as follows :—

			Rs.	A.	P.
Traffic earning	28,331	6	7
Miscellaneous receipts	201	13	6
Total			28,533	4	1

Revenue expended as follows :—

Maintenance of way, works and stations	2,999	5	9
Traffic expenses	4,418	5	3
Locomotive expenses	5,333	6	7
Carriage and wagon expenses	345	1	6
Stores Department, salaries and expenses	178	8	0
Charges, general	2,564	0	8
			15,838	11	9

TRAFFIC WORKING.

The traffic has been conducted without delay or obstruction during the year. It shows an increase of 10 per cent. over last year.

		1st January to 31st December.	1st January to 31st December.
		1888.	1889.
Number of passengers	...	180,765	213,024
Weight of goods, maunds	...	1,61,701½	2,13,816½

FARES AND RATES.

There was no alteration made in the fares and rates, which are as follows :—

	1st class.	3rd class.	RETURN.	
			1st class.	3rd class.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Baidyanath Junction to Baidyanath ...	0 8 0	0 2 0	0 12 0	0 3 6
Baidyanath to Baidyanath Junction ...	0 8 0	0 2 0	0 12 0	0 6 3

EAST INDIAN RAILWAY.

GAUGE 5 FEET 6 INCHES.

PART II.

I.—WORKS COMPLETED.

Increased shed accommodation on the south side of the boat dock, Howrah.
 Accommodation for guards at Asansol station.
 Bungalow for District Traffic Superintendent at Sahebgunge station.
 Additions and alterations at Bankipur station.
 Accommodation for Traffic staff at Dinapur station.
 Hospital and out-houses at Dinapur.
 Extension of Mokameh Ghât branch line.

II.—WORKS IN PROGRESS.

Extension of Coal Jetty No. 2 at Howrah station.
 Junction with Hooghly bridge line, loop line, viaduct station, and flag station at Gorifa on the Naihati side.
 Extension of siding at west end of Burdwan station.
 Permanent station at Chattra at mile 146.
 Additions and alterations at Madhupur station.
 Protection of river bank at Monghyr.
 Landing-stages and cargo boats for Sahebgunge-Munihari Ferry Service.
 Additions and alterations at Sahebgunge Ghât station.
 Building additional piers and adding new triangulations to the Jynthee, Puthroo, and Adjai bridges in the Chord line district.
 Junction arrangements with Bengal-Nagpur Railway at Asansol station.
 Ganges branch line at Bankipur.
 Extension of goods-shed and wharf accommodation at Bankipur station.
 Transshipment accommodation at Digba Ghât station.
 Additions and alterations to the station yard at Mokameh station.
 Screen walls and enclosures to native quarters of stations.

PATNA-GYA STATE RAILWAY.

Constructing a bridge at mile 10½ in place of bridge No. 30.

COLLIERIES.

Sinking two pits south of Bhadna.
 Increased pumping power at 23 D shaft.

III.—LINES UNDER SURVEY AND CONSTRUCTION OR WHICH HAVE BEEN OPENED DURING 1889.

Surveys have been made of the Grand Chord Line from Moghal Sarai passing south of Gya to Barrakar; also from Moghal Sarai through Purulia to Howrah. Survey has been made of a branch line 13 miles in length from the main line into the Jherriah coal-fields.

IV.—MINERAL RESOURCES.

The fuel used on the East Indian Railway and on the branches worked by it consists solely of coal from the Kurhurbaree and Serampore collieries, which are the property of the undertaking.

The extension of the Barrakar Branch of the East Indian Railway has been put off for the present. The proposed line will cross the river Barrakar, and will be carried in a westerly direction for a distance of five miles. The new Barrakar coal is reported to be of very good quality, and the thickness of the seam varies from 60 to 70 feet.

During the year the working of the Sanctoria Coal Branch of the Bengal-Nagpur Railway was undertaken by the East Indian Railway Company in consideration of receiving 47 per cent. of the gross earnings. About 4,000 tons of coal were loaded weekly.

The following statement exhibits the results of the colliery operations during the year:—

				Kurhurbaree.	Serampore.
				Tons.	Tons.
<i>Stock on 31st December 1888—</i>					
Steam	8,660	4,000
Rubble	1,200	1,000
Smithy	<i>Nil.</i>	<i>Nil.</i>
Slack	29,916	15,328
Coke	220	390
Total				39,996	20,718
<i>Outturn during 1889—</i>					
Steam	1,22,923	57,309
Rubble	14,482	12,074
Smithy	29,664	20,167
Slack	18,047	21,044
Coke	10,716	18,184
Total				195,832	128,778
<i>Issues during 1889—</i>					
Steam	1,29,308	60,459
Rubble	15,603	12,841
Smithy	22,409	19,557
Slack	25,173	21,971
Coke	10,378	16,584
Total				202,871	131,412
<i>Stock on 31st December 1889—</i>					
Steam	2,275	850
Rubble	79	233
Smithy	7,255	610
Slack	22,790	14,401
Coke	558	1,990
Total				32,957	18,084

The quantity of serviceable coal (steam, rubble, and smithy) in stock on the 31st December 1889 was as follows:—

			Tons.
At Kurhurbaree	9,609
„ Serampore	1,693
Making a total of	11,302
Against a stock on the 31st December 1888 of	14,860

The outturn (excluding coke) was about 11,600 tons less than the consumption, reducing the balance on 31st December 1889 by about 9,700 tons. The quantity of coal raised was 295,710 tons against 308,796 tons in 1888.

The average cost of raising, including slack, was Re. 1-11 per ton against Rs. 1-11-10, the average cost in 1888.

The average issue price of coal to departments during the past year has been as follows:—

			Rs.	A.	P.
Steam	1	14	1
Rubble	2	0	0
Smithy	2	4	0
Soft coke	3	8	0
Hard coke, foundry and locomotive	3	8	0

The fire in 11A has become very troublesome. Dams have been built, and water arrangements are to be started as soon as sanctioned.

V.—LINES OPEN FOR TRAFFIC.

The length of railway open for traffic on the 31st of December (exclusive of sidings) was as follows:—

			Miles.	Feet.
East Indian Railway, including Dildarnagar-				
Ghazipur Branch	1,525	2,309
Tarakessur Railway	22	1,214
Patna-Gya State Railway	57	1,056
Bengal-Nagpur Railway	55	...
Rajputana-Malwa line, Agra	3	323
Eastern Bengal Railway	23	1,290
Total	1,686	912

Fifty-five miles of the Asansol-Purulia Section (Bengal-Nagpur Railway) were added to the length of the lines worked by the undertaking.

The total length of railway open for traffic, and of sidings maintained by the undertaking, at the end of the years 1888 and 1889, compare as follows:—

Years ending	Length of railway open for traffic.	Length of single track exclusive of all sidings.	Length of siding.	Total length of single track, inclusive of all sidings.
	Miles. Feet.	Miles. Feet.	Miles. Feet.	Miles. Feet.
31st December 1888	1,679 3,982	2,153 4,694	409 2,788	2,563 2,202
31st December 1889	1,604 4,579	2,079 11	407 2,208	2,486 2,219

The above table excludes 23 miles of the Eastern Bengal State Railway and 55 miles of the Bengal-Nagpur Railway worked, but not maintained, by the undertaking; 75 miles, Sindia State Railway, have been excluded only from the statement of the year ended December 1889, the line having been given over to the Rajputana-Malwa Railway Company during March 1889.

The following is a list of the more serious accidents which occurred during the year :—

Statement of Accidents to Life and Limb during the year.

Particulars of persons injured or killed.	Total.	Fatal.	Non-fatal.
Passengers	91	29	62
Company's servants	60	16	44
Labour-contractors' and ballast coolies	20	5	15
Trospassers and others	67	49	18
Suicides	43	40	3
Total	281	139	142

During the year there has been an increase by 50 in the number of accidents happening to passengers, while the number of fatal accidents has risen from 89 to 139.

DERAILMENTS.

There were 14 serious derailments during the year, the most serious being that on 16th December, when a down mixed train was turned into the catch siding at Bakulia Block hut, Bengal-Nagpur Railway. The engine travelled 96 feet beyond the end of the siding, and was embedded in the sand. The damage to rolling-stock was estimated at Rs. 2,000.

COLLISIONS.

On 27th October the down mail, when leaving Hathras Junction, was turned into a dead siding. The dead buffers were knocked down and the foremost carriages telescoped, with the deplorable result that 17 passengers were killed and 29 injured. The jemadar to blame was prosecuted and imprisoned.

VI.—PERSONS EMPLOYED.

The following is a statement of the number of employes of different nationalities in the service of the Company in India during the past year :—

Nationality.	Number.
European	972*
East Indian	548
Native	38,258
TOTAL	39,778

The details of the reduction of 4,260 employes from the figures of last year are—

Decrease in Engineering Department employes	4,542
Ditto General administration, &c.	130
			<hr/> 4,672
Increase in Locomotive, Carriage and Wagon, and Traffic Department employes	412
			<hr/> Net decrease ... 4,260

The following table shows the numbers of drivers, shunters, and firemen employed in the Locomotive Department on 31st December 1889 :—

		European and East Indian.	Native.	TOTAL.
Drivers	...	203	100	303
Shunters	...	25	125	150
Firemen	...	91	723	814
Total	...	319	948	1,267

Schools.—English schools aided by the Company and receiving grants-in-aid from Government have been established at Raneegunge, Asansol, Madhupur, Nawadih, Jamalpur, Dinapur, Buxar, Moghal Sarai, Mirzapur, Cawnpur, Tundla, Aligurh, and Ghaziabad. Of these the report of the school at Jamalpur was not favourable.

The average daily attendance during the year was 258 against 322·5 in 1888 and the same number in 1887. A number of children of European employes are now sent to the hill school at Mussoorie.

Native schools, similarly aided by the Company and Government, have been established at Burdwan, Raneegunge, Asansol, Rampore Haut, Rajmehal, Sahebgunge, Jamalpur, Moghal Sarai, and Tundla. The daily average attendance at the schools during the year has been 662 as against 616 in 1888 and 804 in 1887.

In addition to the above, there are 20 Native adult schools established at locomotive stations. These schools have been favourably reported on.

There are night schools for apprentices at Allahabad and Jamalpur. The daily attendance was 41 during the year. The result at Allahabad school is much the same as in 1888, while that at Jamalpur school is not at all encouraging.

The English and native schools at Howrah, though receiving a railway grant, do not, according to the Government circular No. 11 Railway, of 13th April 1885, come under the category of the railway aided schools, but are classified as district schools. The average daily attendance of the English school was 82, and that of the native school 242, during the year under review. The amount of the Railway Company's grant was Rs. 50 per mensem, or Rs. 600 for the year.

In addition to the five schools opened in 1888, two schools for boys and one for girls have been started at the Company's collieries.

Rupees 300 per annum in aid of these schools have been granted by the Board of Directors, and a Government grant-in-aid of Rs. 600 has been obtained for the year ending 31st March 1890.

Eleven boys were sent up for the lower primary examination.

Hill School.—The construction of the new school-house at Mussoorie was commenced at the end of the financial year 1885-86, and the work completed, and the boys' portion was opened in June 1888, at a cost of Rs. 1,11,592, including the cost of the land. The school is open to the children of East Indians as well as Europeans.

The financial position of the hill school shows Rs. 7,034 receipts in excess of expenditure.

There were at the end of the year 160 children on the rolls—115 boys and 45 girls.

Excluding rent of room allowed free (Rs. 8,755), the total receipts during the year from all sources were as follows :—

				Rs.
Grant from railway revenue	14,622
Government grant	12,042
Income from school-fees	23,652
Receipts from other sources	4,206
Total	54,522

Of the above, the sum of Rs. 2,393 was contributed from the Fine Fund.

Medical Department.—The line is divided into 12 medical districts.

The Consulting Physician to the Company reports that the health of employes has been on the whole satisfactory. The expenditure on this department for the East Indian Railway and branches during 1889 amounted to Rs. 1,29,615 against Rs. 1,40,978 for 1888.

Police.—The expenditure during the year was Rs. 1,14,368, which is Rs. 9,379 less than the expenditure of the previous year. This is mainly due to the transfer of the Sindia State Railway and recoveries from Government, North-Western Provinces and Oudh, of a portion of the salaries of the Assistant Inspector-General and of his office establishment, on account of police supervision of railways in those provinces from 1st October 1886 to 30th June 1889. The amounts paid as compensation for loss of goods were, for the two years 1888 and 1889, respectively, Rs. 10,317 and Rs. 9,239.

Volunteers.—During the year 1889-90 capitation allowance has been drawn for 1,071 extra efficient and 87 efficient, or 1,158 in all.

The number of members who have during the year either resigned, died, been dismissed the Company's service, or struck off the roll for non-attendance at drill, was 166 against 148 in the previous year.

The number of recruits enrolled during the year was 176.

The enrolled strength of the corps was 1,201 against 1,191 in 1888.

The number of non-efficient for the past season was 43, a decrease of 8 on the year 1888-89.

The attendance at the annual inspection was 529.

In the annual musketry course the figure of merit for the battalion was 183.07, and the percentage of marksmen 21.39 against 21.41 for the previous year.

There are 24 ranges belonging to the corps, and a band is maintained at the head-quarters, Jamalpur.

In the capitation cash account there was a credit balance of Rs. 6,907.

Provident Fund.—The number of subscribers to the Provident Fund on the 31st of December 1889 was 5,965, as compared with 6,153 on the 31st December 1888.

The total subscriptions amounted to Rs. 4,29,598 against Rs. 4,28,000 in 1888. The amount standing at the credit of the subscribers at the end of the year was Rs. 80,45,017.

The amount contributed by the undertaking for the year was Rs. 2,99,365. A bonus at the rate of cent. per cent. was credited on all compulsory deposits, and at Rs. 33 per cent on voluntary subscriptions. The interest realized from investments allowed of a dividend of Rs. 1-12-6 per cent. on the balances at credit of the members at the end of the first half-year, and a dividend of Rs. 1-14-6 per cent. on the balances at the end of the second half-year.

The valuation of the securities held by the institution on the 30th of June 1889, at their market value, resulted in a net gain of Rs. 2,78,780, or Rs. 3-8-6 per cent. on members' balances. There was a net loss on valuation on the 31st December of Rs. 2,53,535, which necessitated a proportional reduction of Rs. 3-1-3 per cent. on members' balances; so that, taking the two half-years together, the net gain has been Rs. 0-7-3.

Fine Fund.—The balance in hand on the 31st of December 1889 was Rs. 36,471. The amount realized from fines during the year was Rs. 3,773. The disbursements during the year amounted to Rs. 4,076.

VII.—STORES.

During the year under review the establishment of this department was worked at a reduced cost, which brought about a saving of about Rs. 17,000.

The Engineering and the Locomotive branch depôts at Jamalpur have been amalgamated, resulting in a monthly saving of Rs. 130. The depôt at Rampore Haut is also in the course of being abolished.

The total value of stores, excluding balance of charged off stores (unused stock), English stores in transit, and items adjustable, &c., which are not in the custody of the Controller of Stores, and which represent Rs. 23,45,065, amounted at the end of the year to Rs. 46,88,323. Of this sum, Rs. 43,20,726 represents the value of serviceable stores, and Rs. 3,67,596 that of condemned stores and scrap.

The serviceable stores consist of—

Permanent-way	Class	I	Rs.
Tools	"	II	10,66,636
Metals	"	III	86,698
Fittings	"	IV & V	2,62,097
Miscellaneous	"	VI	21,00,613
Total						8,24,682
						43,20,726

The Stores balances and the interest paid thereon for the seventeen half-years from 1st July 1881 to the 31st December 1889.

* Include cost of stores in transit remaining unpaid on the last day of the half-year.

It will be seen that the reduction in the stores balances in the eight years from the 1st of January 1882 to the 31st December 1889 amounted to Rs. 47,07,039, and represented a saving on interest to the last-mentioned date of Rs. 15,50,561.

Surplus Stores belonging to Government.—All these having now been got rid of, either by transfer to other lines or by sale, the account has been finally closed.

The following statement exhibits the store transactions for the year:—

EAST INDIAN RAILWAY COMPANY.

Statement showing Stores Balances on the 31st December 1889.

HEADS OF ACCOUNTS.	Balance on 1st January 1889.		Stores added to stock during 1889.		Total.		Stores issued during 1889.		Balance on 31st December 1889.

Rolling-stock.—The following is a list of the rolling-stock belonging to the undertaking on the 31st December 1889 :—

			Number on the list.	Actual number running.
• LOCOMOTIVES—				
Tank mail	5	4
Passengers	96	72
Tank goods	2	1
Goods	473	380
TOTAL	576	457
COACHING VEHICLES—				
Family carriages	23	22
Saloon (Royal)	4	4
First class	91	79
Composite	30	29
Second class	105	98
Intermediate class	61	56
Third class	748	706
Post Office vans	21	20
Through luggage vans	21	19
Horse boxes	75	74
Carriage trucks	39	37
Passenger brake-vans	132	122
TOTAL	1,350	1,266
GOODS VEHICLES—				
Covered goods wagons	5,930	5,722
High-sided	...	}	1,662	1,616
Open-sided	...			
Cattle vans	18	18
Sheep "	5	5
Powder "	31	31
Timber trucks	127	106
Coal hoppers	1,151	1,148
Coke wagons	12	11
Miscellaneous	18	16
Goods brake-vans	209	194
TOTAL	9,163	8,867
GRAND TOTAL	10,513	10,133

VIII.—CAPITAL TRANSACTIONS.

Capital of the Undertaking.—The old capital account of the East Indian Railway having been closed on the 31st December 1879, the transactions since that date may be thus stated :—

	£
The capital stock on 1st November 1879 ...	26,200,000
25 per cent. added thereto by the Purchase Act ...	6,550,000
Debenture stock on 31st December 1879 ...	1,500,000
Debenture debt	2,950,000
	<hr/>
	37,200,000
or excluding the terminable annuity ...	27,623,386
	<hr/>
	9,576,614
DEDUCT—	
Value of stores received from the old Company on 31st December 1879 ...	766,534
and cash and other assets of the old Company on 31st December 1879 ...	82,217
	<hr/>
	848,715
	<hr/>
	8,727,863
AND—	
Amount of overdrawn capital on 31st December 1879 ...	264,527
	<hr/>
	264,527
	<hr/>
Total on the 1st January 1880 ...	8,992,390
	<hr/>

Since January 1880 £2,950,000 of debentures have been paid off, costing Rs. 3,54,66,835-7-1, on which sum the undertaking pays interest at $4\frac{1}{2}$ per cent. per annum.

Additional expenditure.—The expenditure from Capital and Capital Advance Accounts from the 1st of January 1880, the date on which the Railway was taken over by Government, to the 31st December 1889, and during the year 1889, has been as follows :—

Heads of Charges.	1st January 1880 to 31st December 1889.		1889.	Rs.
	Rs.	Rs.		
I.—Preliminary expenses	82,784	64,879		
II.—Land	5,23,573	40,308		
III.—Construction of line	42,98,065	3,12,610		
IV.—Ballast and permanent-way	58,83,830	4,72,576		
V.—Stations and buildings	49,99,970	3,57,977		
VI.—Plant	9,26,071	17,935		
VII.—Steam ferries	1,13,937	Cr. 20,549		
VIII.—Rolling-stock { Locomotive Rs. 8,70,034 } { Vehicles Rs. 40,72,732 }	49,42,766	51,696		{ 1,276 50,420 }
IX.—Establishment	7,13,445	58,537		
X.—Collieries	7,48,044	21,520		
XI.—New minor works	36,799	1,101		
XII.—Loss by exchange	120	120		
TOTAL ...	<hr/> 2,32,69,404	<hr/> 13,78,713		

Expenditure on the Hooghly Bridge.—The expenditure on this work up to the 31st December 1889 was Rs. 51,41,568, which is in excess of the sanctioned amount by Rs. 1,84,888. The excess, however, has been sanctioned by Government of India in February 1890, and the account has been finally closed.

IX.—REVENUE TRANSACTIONS.

The annexed statement exhibits the Revenue transactions of the East Indian Railway (exclusive of State branches) during the years 1885 to 1889.

* This includes Rs. 25 outstandings realized in the first-half year of 1885.

The fixed preference charges consist of—

I.—The interest on debenture stock and on debentures paid off at $4\frac{1}{2}$ per cent per annum.

II.—The annuity on the purchase-money, less the amount deferred in respect of £6,550,000 capital.

III.—The interest on this £6,550,000 at 1 per cent. per annum.

IV.—The interest on the overdrawn capital to the 31st December 1879.

The interest on the additional capital sunk in the construction of the line since the 1st January 1880, and on the store balances, is reckoned at the rate of $4\frac{1}{2}$ per cent. per annum.

The rates per open and train mile of the earnings, expenses, preference charges, and surplus profits, also the percentages of the three last upon earnings, may be thus shown—

.. railway	4,72,687	4,15,697	4,50,252	4,02,492	228'63	228'54	234'96	228'27	240'63	231'73	219'51	
Total	3,17,74,525	3,10,48,078	3,01,22,011	3,92,68,815	231'95	211'58	231'54	218'40	215'98	203'04	206'35	

From the foregoing tables it will be seen that the average paying load of a train has increased since 1883 from 163·92 tons to 208·79 in 1889, and the wagon load from 5·71 tons to 5·93 tons. These results are due to the introduction of 1,000-ton trains and to the increase in the carrying capacity of wagons.

The net decrease is thus made up—

	Rs.
1. Traffic Manager, &c.	7,446
2. Station staff	31,395
3. Guards and Assistant Guards	12,472
	<hr/>
	51,313
Less increases in—	
4. Fire, lights, &c.	20,746
5. Credit for cost of working Sindia State Railway	16,765
6. Net increase of sundry items	2,270
	<hr/>
	39,781
	<hr/>
Net decrease	11,532
	<hr/>

The decrease in item 1 is due to a bonus paid to the District Traffic Superintendent, Allahabad, on the termination of his engagement in 1888, and to the reduction of staff in 1889 in consequence of the surrender of the Sindia State Railway. The decreases in items 2 and 3 were occasioned chiefly by the transfer of the Sindia State Railway and by the general falling off of traffic.

The increases are accounted for (item 4) by the enhanced issue rate of castor-oil and larger issue of other stores in 1889; item 5, chiefly by the amount recovered for working State Railway branches being less owing to the surrender of the Sindia State Railway and amalgamation of the Dildarnagar-Ghazipur State Railway with East Indian Railway.

Gross Earnings.—The gross earnings (coaching and goods) were Rs. 4,42,90,769 against Rs. 4,47,11,802 in 1888, being a decrease of Rs. 4,21,033.

Taking the East Indian Railway proper, we find that—

	In 1888.	In 1889.
	Pies.	Pies.
The cost of a ton-mile was	2·01	2·11
The "earnings" per ton-mile were	5·68	5·67
The average paying load of a train was ...	20·757	208·79
Ditto ditto wagon was	5·95	5·93

The earnings from coaching traffic was considerably increased. In the first half-year of 1889 the number of ordinary third class passengers carried exceeded by 100,000 the highest figures previously recorded, and brought to the Company Rs. 66,000 more than ever received from that class. In the second half-year there was also a considerable increase of the ordinary third class passengers, the figures being 239,541 in number and Rs. 1,44,895 in earning. During four years the proportion of coaching receipts to total earnings has advanced from 30 to 35 per cent.

In the merchandise traffic the result was not so encouraging. The falling off in earnings were chiefly noted in the traffic in linseed, rapeseed, rice, wheat, and iron. The decline in these important staples more than counterbalanced numerous increases in other staples.

Coal traffic in the first half-year was unprecedented, and brought a revenue of Rs. 6,64,528. In the second half-year there was a loss in this traffic, but this deficit was more than recovered by the credit of Rs. 1,50,000 on account of the increased rates to be allowed for the carriage of State Railway coal.

Kerosine oil appears to be still growing in favour.

XI.—RATES AND FARES.

In coaching traffic there was no alteration of fares.

In goods traffic there were changes in many of the items.

Owing to the opening through of the Indian Midland Railway, strong measures were found necessary in many instances in the endeavour to prevent the diversion of traffic at competing points. The whole scale of charges between Cawnpur and Jubbulpur to and from stations on the Great Indian Peninsular Railway beyond Itarsi has been reduced.

To assist wheat and seeds from far-off stations to reach Calcutta, reduction in rates for 100 maunds from Sehora Road, Katni and Sutna stations was found necessary.

A reduced through rate of $\frac{1}{8}$ pie per maund per mile was agreed to with the Oudh and Rohilkhund Railway for grain and seeds to Howrah from stations Bareilly and above. The kerosine oil rates received continued attention, and reductions were made in the quotations to Jubbulpur, to Delhi, and to other stations. In order to assist wholesale trade a charge was introduced, for wagon loads of the oil, of 10 per cent. below the charge of small consignments.

The charges for machinery, for water-works and for water-pipes were reduced, and special rates for the conveyance of the permanent-way material of the Delhi-Umballa-Kalka Railway were agreed to by the Board of Directors.

The Great Indian Peninsular Railway having further withdrawn the specially reduced charges hitherto quoted between Jubbulpur and Bombay for grain and seeds from the North-West Provinces, the East Indian Railway, in order to maintain an equality of rates by the two routes, has been forced to reduce to the same extent, as the rates have been enhanced between Jubbulpur and Bombay.

On and from 1st November 1889 a minimum mileage charge, being an additional charge of Rs. 1-8 per 100 maunds over and above tariff rates for all descriptions of goods, has been levied on goods booked from or to and *via* all junctions with foreign lines, when carried over the East Indian Railway for distances under 75 miles. The charges *via* Ghaziabad for Kheora rock salt were somewhat raised. This was possible, as the Oudh and Rohilkhund Railway management withdrew their very low competitive rates between Saharunpur and Mogul Serai.

A wagon mile rate of 3 annas was quoted for bones.

In connection with the opening through of the Assam-Bihar State Railway, rates were quoted from and to *via* Sahebganj, with the object of attracting traffic of the new line *via* the East Indian Railway, where distances are in its favour.

TARKESSUR BRANCH (22.23 MILES).

The receipts of this line from all sources were as follows:—

				Rs.
Coaching	2,68,420
Goods	16,051
Others	424
Gross Receipts				2,84,895

As compared with last year, there has been an increase in earnings from passenger traffic of Rs. 2,144, and in goods earnings of Rs. 2,980.

Out of the total receipts for the year, Rs. 2,43,868 were due to third class passenger traffic. The average earnings per mile open per week amounted to Rs. 246.

PATNA-GYA STATE RAILWAY (57.20 MILES).

YEARS.		Receipts from Coaching.	Receipts from Goods.	Total Coaching and Goods.
		Rs.	Rs.	Rs.
1885	...	3,38,465	1,74,354	5,12,819
1886	...	3,73,093	1,59,276	5,32,369
1887	...	3,70,691	1,53,919	5,24,610
1888	...	3,68,123	1,26,557	4,94,680
1889	...	3,85,774	1,31,089	5,16,863

The earnings from both coaching and goods traffic have increased, and the earnings per mile open per week were Rs. 175.

BENGAL AND NORTH-WESTERN RAILWAY.

METRE GAUGE.

I.—WORKS IN PROGRESS.

Digha Transhipment Yard.—A third goods shed, 240 feet long, and an engine-shed with ash-pits were built and completed during the year, as also a coal platform for the transhipment of coal from the standard to the metre gauge wagons.

Rolling-stock.—The addition of spiral springs to all the bogie wagons has been completed, and since then the running of this stock has been quite satisfactory.

Four road vans were converted during the year into third class carriages.

Ganges Ferry.—The new flotilla commenced to work on the 1st April 1889, and has since worked uninterruptedly and satisfactorily. It is likely to be able to cope with the requirements of the traffic, and its use enables goods to be transferred across the river without loss or damage in handling. It should thus greatly help the development of the traffic.

II.—LINES UNDER SURVEY.

A branch line to Revilganj, 7 miles long, and a line between Gonda and Bahram Ghât, $31\frac{1}{2}$ miles long, were sanctioned during the year, and both have been surveyed. The land plans for the Revilganj Branch have been submitted to Government, and those for the Bahram Ghât Branch are under preparation and nearly ready.

III.—MINERAL RESOURCES.

The fuel used is Bengal coal from the Giridih collieries, and costs, delivered at Sonapore, Rs. 11·47. The consumption per train mile averaged in the first half-year 29·95lb, and cost 2·43 annas. In the second half-year the consumption was 27·29lb per train mile, and cost 2·26 annas.

The consumption per 1,000 gross ton miles in the first half-year was 139·67lb and cost Rs. 0·71, and in the second half was 147·35lb and cost Rs. 0·76.

Wood fuel has been used with satisfactory results on the Uska Branch, and it is now proposed to use it between Gorakhpur and Naipalganj.

IV.—LINES OPEN FOR TRAFFIC.

Sonapore to Bahraich	273·58 miles.
Ajodhya Branch	20·10 "
Ganges Loop Line	9·34 "
Uska Branch	39·25 "
Naipalganj Extension	33·52 "
Total			375·79 miles.

Accidents.—Nine accidents occurred to the staff, of whom three were killed and six injured, owing to their own carelessness. Of trespassers on the line, 20 were killed and nine injured. Of the trespassers killed, six were suicides; two were village chowkidars sent to protect the line during the flood, but instead of going to their destination they stopped half-way and went to sleep with their heads on the rails and were run over. Three others were unlawfully grazing cattle on the railway during the night and went asleep, and were run over.

One passenger was killed whilst crossing the rails at Sahjanwa station during the night.

Thirteen deaths of passengers from natural causes occurred in the trains.

There have been 19 cases of vehicles leaving the rails, chiefly at stations whilst shunting, and 29 cases of cattle being run over.

The total accidents of all kinds during the year amounted to 103 against 113 in the previous year.

Flood damages.—On the night of the 8th August the villagers in the vicinity cut the line on the loop between the Ganges and Bunwar Chak, but the breach was noticed in time before much damage was done, and stopped.

Again, on the evening of the 9th August a body of villagers, estimated to number from 500 to 1,000, assembled on the railway, mobbed the police and

the railway guards, and cut the bank at the site of the bridge which has been blocked up near Bunwar Chak. This was a serious breach, and it took nine days, with large gangs of men working night and day, to repair. It was the 18th August before trains could be sent over the line to the Ganges ferry. Whilst the breach was open the trains ran *via* Sonapore.

Some 37 villagers have been prosecuted and punished for being ring-leaders in this riot and cutting the railway bank.

On the 22nd September a villager made a small breach in the line near Campierganj station. He was found out and punished.

The floods during the year were high and abnormal, and continued for an unusual length of time. The rainfall was upwards of 50 per cent. more than the average.

V.—PERSONS EMPLOYED.

The police restrict their duties to keeping a watch on the general behaviour of the public, and give no other assistance, such as checking or collecting tickets, to the railway.

School.—The railway school for the children of European and Eurasian employes at Gorakhpur was attended by 16 children. The school was inspected by the Government Inspector, who recommended that it should get a grant from Government of Rs. 273 for the year. The expenses of the school during the past year were Rs. 821-11, of which the Railway Company contributed Rs. 589, and Rs. 221 were obtained from fees.

Volunteers.—The Railway employes who are volunteers number 75, of whom 67 belong to the Gorakhpur Rifles, and 8 to the Oudh Rifles.

Medical.—The medical and sanitary arrangements have continued the same as previously reported.

Provident Fund.—At the end of December 1889 the number of depositors was 453 against 434 in the previous year.

The following table shows the progress of the Fund :—

PERIOD.	Number of staff depositing.	DEPOSITORS.		AMOUNT AT CREDIT ON THE 31st DECEMBER.			
		Voluntary.	Compulsory.	Voluntary.	Compulsory.	Bonus.	Total.
On 31st December 1886	438	16	438	Rs. 2,300	Rs. 36,923	Rs. 21,932	Rs. 61,155
Add during 1888 ...	15	...	15	—875	13,614	9,025	21,764
Total on 31st December 1889 ...	453	16	453	1,425	50,537	30,957	82,919

Staff employed.—A memorandum of the staff employed on the open line on the 31st December 1889 is given below:—

	Europeans.	Eurasians.	Natives.	Total.	Number of miles open.	Number of stations.
General Administration, including Agency, Audit, Accounts, Pay-masters, Stores, Medical, Printing and Stationery, and Police establishments ...	7	7	246	260	} 376	61
Traffic and Telegraph Departments ...	16	19	649	684		
Engineering Department ...	7	1	1,433	1,441		
Locomotive, Carriage and Wagon Department, including Steamboat Service ...	21	8	701	730		
Total ...	51	35	3,027	3,115	376	61
Total number employed on 31st December 1888 ...	63	56	3,422	3,541	376	65

VI.—STORES.

Balance of Stores.—The value of stores in hand on the 31st December 1889 amounted to Rs. 5,08,078 as against Rs. 5,24,487 in the previous year. The reduction of the store balances to a minimum is being steadily kept in view.

Rolling-stock.—The following is a memorandum of the rolling-stock on the line. No additions have been made during the year, but four road-vans have been converted into third class carriages.

The stock of engines is larger than required, and 10 could be spared.

	Total stock authorised.	Total stock constructed against authorised.	Addition to stock during the year.	Total stock on the line. 31st December 1889.
Locomotive engines, E class	2	2	...	2

* Four road vans have been converted into third class
† Fifty low-sided wagons altered into timber trucks.

VII.—CAPITAL TRANSACTIONS.

Capital Accounts.—The capital accounts for the year ending 31st December 1889 are annexed.

The total Capital expenditure during the year on final heads was Rs. 1,90,279, and the total expenditure to end of December 1889 has been Rs. 2,47,43,780, exclusive of interest charges amounting to Rs. 10,90,014, and suspense balance amounting to Rs. 5,08,078.

VIII.—REVENUE TRANSACTIONS.

Earnings and Expenditure.—The gross earnings during the year amounted to Rs. 22,11,825 against Rs. 22,09,543 in the previous year, and the working expenses to Rs. 11,57,860 against Rs. 12,20,699 in the previous year.

The net earnings of the past year were thus Rs. 65,121 better than in 1888, although the gross earnings were only Rs. 2,282 better.

The net earnings give a dividend of 4·18 per cent. on the capital expenditure calculated in rupees, and of 3·82 on the paid-up capital.

Traffic during the year was dull. The seed, wheat, rice and Indian-corn crops were failures, and the earnings from these staple articles of freight were greatly diminished. The bad harvest also affected the passenger traffic and prevented its expansion.

The following table gives the earnings and expenditure since the line was opened for traffic :—

PERIOD.	Mileage open.	Gross earnings.	Gross expenditure.	Net earnings.	Percentage of expenditure to gross earnings.	Percentage of net earnings on capital expenditure.
	Miles.	Rs.	Rs.	Rs.		
1885	294	12,05,541	6,16,334	5,89,207	51·12	3·04
1886	306	18,54,074	10,44,885	8,09,189	56·35	3·63
1887	376	19,44,002	11,06,997	8,37,005	56·94	3·42
1888	376	22,09,543	12,20,699	9,88,844	55·24	3·95
1889	376	22,11,825	11,57,860	10,53,965	52·34	4·18

IX.—TRAFFIC AND WORKING.

Engineering.—The rainfall during the past season was unusually great and the floods abnormally high; but, with the exception of the breach cut in the line near Bunwar Chak, nothing of special importance in the up-keep of the line happened, and the road and works were everywhere maintained in good order.

The following table gives the cost of maintenance for the past four years :—

PERIODS.	Per mile of line maintained.	Per mile of track including sidings.	Per total train mile.	Per 1,000 gross ton miles.
	Rs.	Rs.	Rs.	Rs.
1885 { 1st half-year	... —27·30	... —24·63	... —0·42	... —0·19
1885 { 2nd half-year	... 116·21	... 105·43	... 2·04	... 0·75
1886 { 1st half-year	... 292·57	... 265·42	... 3·69	... 1·21
1886 { 2nd half-year	... 459·80	... 416·96	... 6·94	... 2·25
1887 { 1st half-year	... 286·49	... 258·94	... 4·67	... 1·46
1887 { 2nd half-year	... 268·15	... 242·37	... 4·97	... 1·84
1888 { 1st half-year	... 323·45	... 292·35	... 4·64	... 1·39
1888 { 2nd half-year	... 339·57	... 306·92	... 6·13	... 2·02
1889 { 1st half-year	... 310·95	... 281·05	... 4·54	... 1·32
1889 { 2nd half-year	... 319·82	... 289·07	... 5·65	... 1·91

The cost of locomotive working since the line was opened is detailed below :—

Items.	1885.		1886.		1887.		1888.		1889.	
	1st half.	2nd half.	1st half.	2nd half.	1st half.	2nd half.	1st half.	2nd half.	1st half.	2nd half.
	Per train mile.	Per 1,000 gross ton miles.	Per train mile.	Per 1,000 gross ton miles.	Per train mile.	Per 1,000 gross ton miles.	Per train mile.	Per 1,000 gross ton miles.	Per train mile.	Per 1,000 gross ton miles.
	As.	Rs.	As.	Rs.	As.	Rs.	As.	Rs.	As.	Rs.
Superintendence ...	0.24	0.10	0.41	0.16	0.72	0.24	0.80	0.28	0.77	0.25
Running expenses ...	2.03	0.90	2.30	0.84	1.93	0.83	2.04	0.67	1.93	0.60
Fuel ...	2.62	1.17	2.51	0.98	2.35	0.77	2.64	0.80	2.36	0.74
Water ...	0.13	0.06	0.16	0.06	0.14	0.04	0.15	0.06	0.11	0.04

Maintenance ...	0.34	0.16	0.41	0.23	0.56	0.18	0.79	0.25	0.49	0.15
New minor works	0.02	0.01	0.01
Unclassified expenditure ...	0.48	0.21	0.34	0.20	0.51	0.17	0.71	0.23	0.60	0.19
Total ...	6.33	2.82	6.86	2.33	6.65	2.17	7.54	2.45	6.63	2.07

Engine-drivers.—There are a total of 25 engine-drivers on the line, of whom 12 are Europeans and Eurasians and 13 natives. There are also 10 native shunters. The number of native drivers has decreased from 14 in 1888 to 13 during the past year.

The drivers, both European and native, gave satisfaction with their work and in their conduct.

Fuel.—The coal used is Bengal coal from Giridih. The consunption per 1,000 gross ton miles was less than in the previous year, and amounted on the average of the whole year to 143.50lb.

Workshops.—All construction and repairs of stock continue to be carried out at the temporary workshops at Sonapur.

Traffic.—The strength of the Traffic staff remained practically unchanged during the year, and there were fewer changes than formerly in the native members of the staff. The work of the department was on the whole carried on satisfactorily. The training class for signallers was continued, and the vacancies in the telegraph staff during the year were filled up by men who had successfully passed through the school.

The traffic expenses since the line was opened have been as below :—

PERIODS.			Per total train mile.	Per cent. of traffic earnings.
			Annas.	Per cent.
1885	1st half	...	2.87	9.48
	2nd half	...	4.78	16.01
1886	1st half	...	3.53	9.44
	2nd half	...	3.50	9.60
1887	1st half	...	3.84	9.19
	2nd half	...	4.71	13.83
1888	1st half	...	3.99	9.31
	2nd half	...	4.35	11.65
1889	1st half	...	3.70	8.30
	2nd half	...	4.70	13.03

Coaching Traffic.—During the year the coaching receipts amounted to Rs. 8,66,875 as compared with Rs 8,08,403 in 1888, and thus show an increase of Rs. 58,472. The increase took place in both half-years, but chiefly in the first half, and as usual is chiefly in third class passengers.

The deficiency in the harvest of 1888-89 affected the passenger traffic and prevented its natural development.

The total coaching receipts since the opening of the line have been as below :—

	1885.	1886.	1887.	1888.	1889.
	Rs.	Rs.	Rs.	Rs.	Rs.
First half ...	2,31,724	3,25,894	3,88,534	4,16,173	4,62,954
Second half ...	2,61,620	3,38,068	3,88,749	3,92,230	4,03,921
Total ...	4,93,344	6,63,962	7,77,283	8,08,403	8,66,875

The number of passengers carried and the receipts derived from them have been as under :—

	1885.		1886.		1887.		1888.		1889.	
	No.	Receipts.	No.	Receipts.	No.	Receipts.	No.	Receipts.	No.	Receipts.
		Rs.		Rs.		Rs.		Rs.		Rs.
First class ...	3,206	9,002	3,217	10,904	4,774	13,422	5,308	13,848	5,141	13,258
Second class ...	6,816	11,183	8,372	14,839	11,048	17,542	10,365	14,440	10,469	14,718
Intermediate class ...	5,077	3,938	7,853	4,811	5,673	4,449	4,720	3,914	7,447	5,189
Third class ...	9,15,598	4,48,234	14,59,617	5,90,764	19,11,595	6,90,531	20,95,552	7,31,420	21,87,575	7,87,431
Total ...	9,30,788	4,73,348	14,78,738	6,21,397	19,33,067	7,26,154	21,16,945	7,67,025	22,10,632	8,20,570

Goods Traffic.—In the goods traffic the tonnage carried was 293,378, earning Rs. 10,49,173, whilst in 1888 the tonnage was 2,85,520 and the earnings Rs. 10,92,329. This shows an increase of tonnage of 7,858, but a loss in revenue of Rs. 43,156 during the past year.

The decrease took place under—

Piece-goods ...	669 tons.
Wheat ...	22,308 "
Rice ...	11,228 "
Seeds ...	6,193 "

whilst in other grains there was an increase of 30,249 tons.

The crops all over the districts served by this railway were a partial failure in 1888-89, and the wheat and rice crops were very bad in the Sarun, Gorakhpur and Basti districts, and the export of these articles was greatly diminished. On the other hand, the scarcity in the Tirhoot and Sarun districts during July, August, and September stimulated the trade in cheap food-grain, and there was a large increase in the tonnage of these. The increase in the earnings from the latter, however, fell considerably short of what was required to make up for the loss in wheat, rice, and seeds.

The goods earnings since the line was opened are given below :—

	1885.	1886.	1887.	1888.	1889.
	Rs.	Rs.	Rs.	Rs.	Rs.
First half ...	3,23,338	5,72,435	5,75,232	7,06,257	6,84,277

The large decrease in the receipts from wheat, rice, and linseed during the past year are most marked.

STEAM-BOAT SERVICE.

Ganges ferry.—The total earnings of the Ganges ferry during the year amounted to Rs. 1,94,935 as compared with Rs. 2,17,361 in 1888. The failure in the wheat and seed crops, and the diminished export of these articles, accounts for the falling off in receipts. The passenger traffic improved, as also did the inward goods traffic.

The tonnage carried by, and the earnings of, the ferry since the line was opened are given below :—

		1885.	1886.	1887.	1888.	1889.
Tonnage ...	Tons.	60,502	115,306	110,097	153,591	125,046
Coaching and goods receipts ...	Rs.	98,332	1,67,974	1,80,909	2,17,361	1,94,936
Average number of tons crossing the ferry daily ...	Tons.	165.76	315.91	301.64	420.80	342.60
Average number of passengers crossing the ferry daily ...	No.	473	736	1,022	1,166	1,179

Gogra ferry.—The receipts from the ferry and bridge of boats at Ajodhya amounted to :—

		Rs.
First half of 1889	...	42,003
Second half of 1889	...	25,659
Total	...	67,662

and the expenditure to—

		Rs.
First half of 1889	...	15,205
Second half of 1889	...	19,788
Total	...	34,993

The net earnings have thus been Rs. 32,669 as against Rs. 33,979 in 1888. The decrease is due to the failure of the rice and Indian corn crops.

The following table gives the earnings and expenditure for the past four years :—

Periods.	Earnings.	Expenditure.	Profit.	Loss.
	Rs.	Rs.	Rs.	Rs.
1886 ...	52,577	42,077	10,500	...
1887 ...	74,228	41,527	32,701	...
1888 ...	75,085	41,106	33,979	...
1889 ...	67,662	34,993	32,669	...

General.—The following table gives some statistics of the traffic since the line was opened:—

ITEMS.	1885.		1886.		1887.		1888.		1889.

NEW PROJECTS.

A reconnaissance has been sanctioned by Government of a new proposed route for a line from Panchpara to Pooree on the south side of the Mahanuddee. This is now being done.

A reconnaissance of a line from Sini, 20 miles from Chakardarpur, to Howrah *via* Midnapur, was made during last cold season by Government. The result is not yet known.

Some good coal was found at the Eeb river during the construction of the Eeb bridge. The Government of India have been asked to provide funds to explore the area.

CAPITAL TRANSACTIONS.

The capital of the Company has, since the administration report of 1888-89 was issued, been raised by a further sum of £1,200,000. The total capital at end of December 1889 therefore stands at £5,705,781 as follows:—

Share capital	£	3,000,000
Debenture loan sanctioned by Secretary of State, bearing 3½ per cent. interest	1,000,000
Debenture loan sanctioned by Secretary of State, bearing 3½ per cent. interest	500,000
Under Victoria 51, c. 5, bearing interest at 3½ per cent.	1,200,000
Capital not bearing interest	4,781
Total			...	5,705,781

Converted at Rs. 13 per £ equals ... Rs. 7,41,75,153

The following is the capital expenditure on the line during the year 1890:—

HEAD OF ACCOUNT.	Open line.	Construction.	Total.
	Rs.	Rs.	Rs.

Suspense ...	—48,18,734	10,26,021	—37,92,713
Total expenditure ...	—34,11,616	2,22,63,226	1,88,51,610

TRAFFIC WORKING.

The gross earnings of the line amounted during the year to Rs. 19,96,930 against Rs. 16,09,198 for the previous year, or an increase of 24·09 with an increased open mileage of 30·59 over last year. There was great improvement in working the traffic, as the total train mileage for the year was 509,214 against 558,279 for 1888, showing that 49,065 miles were run less, and yet there was an increase in the receipts. The attached statement gives the financial results of the working of the line for the year 1889 as compared with 1888, and includes the Kutni Branch:—

YEAR.	Miles open.	Train miles run.	Gross earnings.	Working expenses.	Percentage of expenditure on earnings.	FINANCIAL RESULTS.		PER TRAIN MILE.			REMARKS.
						Net profits.	Percentage of profits on Capital expenditure.	Gross earnings.	Working expenses.	Profit.	
1888	224·50	558,279	Rs. 16,09,198	Rs. 10,87,220	67·56	Rs. 5,21,978	1·42	2·88	1·95	0·93	
1889	293·18	509,214	19,96,930	16,15,044	80·88	3,81,886	1·14	3·92	3·17	0·75	

From the following statement of revenue expenditure for the year 1889 as compared with 1888 (and including the Kutni Branch), it will be seen that

with the exception of carriage and wagon expenses and special and miscellaneous expenditure, increases appear under all heads :—

Head of account.	Outlay of 1888.	Outlay of 1889.	Difference.		REMARKS.
			Increase.	Decrease.	
	Rs.	Rs.	Rs.	Rs.	
Maintenance of Way and Works ...	1,88,778	4,23,101	2,34,323	...	
Locomotive expenses ...	4,28,008	5,30,006	1,01,998	...	
Carriage and wagon expenses ...	1,09,385	88,662	...	20,723	
Traffic expenses ...	1,75,816	2,36,083	60,267	...	
General expenses ...	1,68,640	3,21,042	1,52,402	...	
Special and Miscellaneous expenses ...	16,593	16,150	...	443	
Total ...	10,87,220	16,15,044	5,48,990	21,166	

The increase under Maintenance of Way and Works is due to several causes, viz.—

- (1) Extension of the line, and all establishment being charged to Revenue (principally subordinate establishment and office).
- (2) Additional Public-Works gangs employed, due to bad road.
- (3) Increased expenditure on stations and buildings and staff quarters.
- (4) Heavy outlay incurred in renewing Sheonath and Kumhari banks, which had entirely failed and sunk during the months of July and August.

Increased length of line worked accounts for the increase under traffic, and to some extent that of locomotive expenses.

The increase appearing under general expenses is in part owing to the adjustment of a heavy item made in the current year's account on account of home expenditure in past half-years.

From the accompanying statement of earnings for the year 1889 as compared with 1888, it will be seen that there have been satisfactory increases under all heads. The increases in the goods earnings would have been much greater if the first half of the year's traffic had been up to the average of the traffic of the previous half-year, the extensions of the line being the main cause of the increase.

There is a very marked increase under the head of sundry earnings, the bulk of which was obtained from mileage and demurrage of home stock running over foreign lines, and points to a fruitful source of revenue in the future.

Details.	Earnings in—		Difference.		REMARKS.
	1888.	1889.	More.	Less.	
	Rs.	Rs.	Rs.	Rs.	
Coaching earnings ...	2,81,570	3,78,546	96,976	...	
Good earnings ...	12,86,675	14,40,309	1,53,634	...	
Electric telegraph ...	7,471	8,962	1,491	...	
Sundry earnings ...	33,482	1,69,113	1,35,631	...	
Total ...	16,09,198	19,96,930	3,87,732	...	

In the statement showing the amounts earned by each class of coaching traffic during 1889 as compared with 1888, though there is a falling off in the number of first and third class passengers, the receipts from all classes show a

satisfactory increase. The falling off in the numbers of third class passengers is probably due to the following causes:—(1) night running of trains between Nagpur and Rajnandgaon; (2) bad harvests. The different classes show a money increase to the following extent:—

First class	63·99 per cent.
Second „	91·49 „
Intermediate „	77·53 „
Third „	31·01 „

and these increases are almost entirely due to the greater length of line open.

Statement of result of Passenger Traffic during 1889 as compared with 1888.

(a) The sum of Rs. 1,50,611 (amount of stores in transit at Asansol depôt) was included in the balance on 31st December 1888, now shown separately under the sub-head "Stores in transit."

ROLLING-STOCK.

The following are details of the coaching and goods stock erected and turned out:—

- 2 Composite carriages (first and second class).
- 4 Horse boxes.
- 1 Brake van.
- 4 Powder vans.
- 2 Carriage trucks.
- 2 Timber trucks.
- 56 Covered goods wagons.

In addition to the above the following stock has been completed, but not delivered to Traffic Department for the reasons noted against each:—

- 8 Composite carriages (first and second) ...
 - 48 Third class carriages ...
 - 12 Ditto (ambulance) ...
 - 199 Covered goods wagons ...
 - 14 Timber trucks ...
 - 15 Covered goods wagons ...
- } Awaiting supply of drawbar springs.
- ... Under-frames in use by the Engineering Department.
- ... Under-frames fitted with wooden sides for use on the Kutni Branch.

Only 12 ambulance carriages have been erected to meet military purposes. The balance of stock yet to be erected will meet all the requirements of the Government of India in this respect, viz.—

720 covered goods wagons for carrying horses,
549 open wagons suited for carrying guns,
and 11 more ambulance third class carriages.

PERSONS EMPLOYED.

(Open Line.)

The following statement gives the number of persons of all races employed on the open line :—

YEAR ENDING	NUMBER OF EMPLOYEES.				Number of miles open.	Number of stations.
	Europeans.	East Indians.	Natives.	Total.		
31st December 1889	178	317	2,942	3,437	292.85	36

MEDICAL ARRANGEMENTS.

The year under review has been a very unhealthy one for most of the districts, but it was particularly so as regards the Pendra, Brahmini and Saranda.

The medical arrangements were the same as in the previous year, that is, each district has an Assistant Surgeon with two, and in the case of the Pendra four, Hospital Assistants, the local Civil Surgeons advising.

In addition to the fever, dysentery and ulcers that are prevalent more or less throughout the year in the abovenamed districts, cholera made its appearance at Pail, a station on the branch line, in the early part of May, and spread over the entire length from Umaria to the Eeb. The mortality was very heavy, the Umaria and Raigarh districts being the greatest sufferers. The scare there was so great that people hurrying away at the first sign of its approach, were left to die all along the line, and their bodies had to be disposed of by the railway staff. The railway works along the infected districts were completely paralysed during the epidemic. The civil district of Bilaspur itself, in the four months during which the cholera lasted, i.e. from May to August, had more than 5,000 deaths out of the 7,000 who were attacked. During this period the Company lost one of its Engineers from cholera.

Of the districts east of the Eeb, the Brahmini and Saranda are by far the most unhealthy, and this is owing in a great measure to the thick sâl jungles through which these districts pass.

During the months of September, October and November, the percentage of fever cases in these districts is as high as 50, and it has often risen to 60. The next five months, from December to April, find as great a scourge in dysentery. April, May and June were especially unhealthy months this year. In the Saranda district alone, which is but 21 miles in length, during the month of April more than 1,500 cases of work-people were treated, of which 500 were for fever and 450 for dysentery, with nearly 70 deaths. The next two months of May and June were little better, there being more than 1,000 cases under treatment, fever and dysentery forming the majority, with over 100 deaths. In these districts one month is scarcely better than another. If it is not fever it is dysentery, and if it is neither of the above, it is ulcers. These last are caused by the slightest abrasion of the skin from a flying stone or other slight cause, and in a short time, whatever may be the reason, the part becomes a foul and sloughing ulcer which, unless treated at once, takes months

to cure, if indeed they do not prove incurable ; men may be seen with their legs or arms almost rotting off with these ulcers.

VOLUNTEER CORPS.

The attached statement shows the enrolled strength and number of efficient in the Bengal-Nagpur Rifle Corps on the 31st March 1890 :—

Corps.	Enrolled strength.	EFFICIENTS.				Non-efficient.	Sergeant Instructors, 1st and 2nd class.	Drill Instructors.	Head-quarters.	REMARKS.
		Officers.	Non-com-missioned officers.	Volunteers.	Total.					
Bengal-Nagpur Railway Rifles. }	539	19	51	380	450	89	5	Nil	Nagpur.	

NATIVE DRIVERS AND SHUNTERS.

The following is a comparative statement of the number of natives employed as drivers and shunters during the calendar years 1888 and 1889 :—

RAILWAY.	Drivers.		Shunters.		Total.		REMARKS.
	1888.	1889.	1888.	1889.	1888.	1889.	
Bengal-Nagpur Railway ...	2	1	5	4	7	5	

PROVIDENT FUND.

The draft rules and regulations submitted by the Agent for the maintenance and management of the Provident Institution which it is proposed to establish, have, with certain exceptions, been generally approved by the Government of India. The final settlement of the rules, with the suggestions made by the Home Board, is now under consideration between the Secretary of State for India in Council and the Government of India. Early introduction of the rules may be expected.

RATES AND FARES.

From the 1st August 1889 the East Indian Railway classification and rates were adopted on this railway with certain exceptions.

The following are some of the principal alterations, viz.—

CLASS RATES.

Old rates.							Present rates.						
1st class, 10 pies per ton per mile.							9 pies per ton per mile.						
2nd	14	"	"	"	"	"	13½	"	"	"	"	"	
3rd	24	"	"	"	"	"	18	"	"	"	"	"	
4th	34	"	"	"	"	"	22½	"	"	"	"	"	
5th	48	"	"	"	"	"	27	"	"	"	"	"	

It is difficult to say exactly how far the earnings of the line have been affected by the changes in the classification, and especially by the reduction in class rates ; but by the statistics available the loss to the Company is approximately estimated at Rs. 30,420, which is partly counterbalanced by the more remunerative rate for carriage of grain and seed, salt, cotton, &c., leaving a net loss of Rs. 12,576.

SYNOPSIS OF MILEAGE OF RAILWAYS WITHIN THE BOUNDARIES OF THE PROVINCE OF BENGAL ON THE 31st OF MARCH 1890.

SYSTEM.	RAILWAY.	MAIN SECTIONS AND BRANCHES.		GAUGE.	MILES OPEN.		UNDER CONSTRUCTION.		State Railways under survey.	REMARKS.
		From	To		State.	Assisted.	State.	Assisted.		
East Indian Railway and State Branches, and connected lines worked by the Agency of the East Indian Railway Company.	East Indian main line	5 6	In addition to the 729 miles of East Indian Railway which are here detailed as lying <i>within</i> the boundaries of the Province of Bengal, there are 777 miles of main and branch lines of the same railway which lie <i>outside</i> the province. The main and chord lines through the province, and as far as Mogul Serai, the future junction with the Oudh and Rohilkund Railway, are laid double; the branches are single. The Oudh and Rohilkund Railway traffic is caught at Mogul Serai, that of the Bengal and North-Western Railway at Dacca Ghât, that of the Patna-Gya State Railway at Bankipur, of the Tirhoot State Railway at Mokumeh, and of the Tarkeswar Railway at Sheoraphuli. In addition to the branch lines here shown there are some colliery branches belonging to Coal Companies.

Eastern Bengal State Railway and connected lines worked under the same management.	Eastern Bengal main line.	5 8	This whole system, containing 872 miles of railway open to traffic, is now worked by the Eastern Bengal State Railway management. The system consists of the Eastern Bengal State Railway, the Bengal Central Assisted Railway, the Calcutta and South-Eastern State Railway, the Northern Bengal State Railway, the Kaunia-Dhuria State Railway, the Assam-Bihar State Railway, Assam-Bihar Section, and the Dacca State Railway.
	Eastern Bengal southern section.	231½	
	Central Bengal	125	
	Ramghat-Bhugwan-gola.	21½	...	93	No work, except earthwork between Ramghat and Krishnagarh. Work long since stopped.
	Dacca Railway	3 3½	475½	
	Northern section	3 3½	If the Kaunia-Dhuria Section of the Assam-Bihar State Railway should ever be constructed on the metre gauge, the existing Kaunia-Dhuria line would get little or no traffic, and would probably cease to be kept up. Besides the 57 miles of Kaunia-Dhuria State Railway, there are 40½ miles of ferries.

Bengal paid no interest on this Imperial money.

Ra. 25,35,797 Provincial money spent in this and former years.

Government of India pays Bengal Rs. 30,000 per annum in lieu of receipts, and 4 per cent. interest upon Rs. 25,35,797, the Provincial share of the capital. In 1884-85 a nine months' share of this accrued to the Province; and in the first three months of that year Rs. 94,654 were received as earnings, against which Rs. 81,066 were working expenses.

Telegraph and Post Offices.

TELEGRAPHS.

THE mileage of lines at the close of the year 1888-89 was 5,348. Seventy-three miles were added during the year under review, making a total of 5,421 miles at the end of the year 1889-90. The mileage of wires at the close of the previous year was 17,202, and 533 miles were added, making a total of 17,735 miles of wire at the end of the year 1889-90.

The number of messages despatched from Government offices during the year was 540,245, which shows an increase of 45,012 over that of the previous year. The Indian share of the collections was Rs. 8,27,319-3-5.

The following statement shows the number of telegraph offices open at the end of the previous year, and the number opened and closed during the year:—

		Number of telegraph offices open at end of previous year.	Add number opened during the year.	Deduct number closed during the year.	Number open at end of the year.
Government offices	...	167	18	3	182
Railway and canal offices	...	285	17	2	300

THE POST OFFICE.

The following statement shows the total number of post offices, letter-boxes, postmen and village postmen in the Lower Provinces of Bengal. The statement includes

Post offices, etc.

those paid from District Dāk Funds and contributions received from Native States :—

POSTAL CIRCLE.	Year.	Post offices.	Letter-boxes.	Postmen.	Village postmen.
Bengal ... {	1888-89	1,349	3,849	1,875	456
	1889-90	1,359	3,970	1,893	453
Behar ... {	1888-89	535	520	632	263
	1889-90	559	565	647	267
Eastern Bengal ... {	1888-89	365	865	396	106
	1889-90	366	959	409	120
Total ... {	1888-89	2,249	5,234	2,893	825
	1889-90	2,284	5,494	2,949	830

There were, in the year 1889-90, 25,677 $\frac{1}{2}$ miles of postal lines maintained from both Imperial postal and district dāk revenues, as compared with 25,365 $\frac{1}{2}$ miles existing in the previous year: there was thus an increase of 312 $\frac{1}{2}$ miles.

The statement below shows the different kinds of lines maintained :—

Y F A R.	Railway lines.	Mail cart lines.	Runner and boat lines.	Steamer lines.	Total.
1888-89 ...	2,042	194	19,270	3,859 $\frac{1}{2}$	25,365 $\frac{1}{2}$
1889-90 ...	2,206 $\frac{1}{2}$	118	19,394	3,959 $\frac{1}{2}$	25,677 $\frac{1}{2}$

The total number of postal articles of all classes, including parcels and money-orders, received for delivery at post offices in Lower Bengal in 1889-90 was 72,318,350, as compared with 67,639,052 in the previous year, resulting in an increase of 4,679,298 articles, or nearly 7 per cent. in the year under review.

The figures given below show the number and value of insured and value-payable articles posted in the Lower Provinces and the fees and commission realized :—

ARTICLES.	Number.	Value declared.	Fees and commission.
Insured ...	51,759	Rs. 1,68,61,386	Rs. 41,226
Value-payable ...	497,882	51,68,078	96,296

Of the total number of insured articles posted, 24,644, representing Rs. 1,13,43,289 in value, were posted in Calcutta, and of the total number of value-payable articles posted, 464,143, representing Rs. 48,63,829, were posted in Calcutta alone.

The number and value of money-orders of all classes issued and paid during the year under report as compared with the previous year are shown in the following statement :—

YEARS.	ISSUES.			PAYMENTS.		TOTAL.		REMARKS.
	Number.	Value.	Commission.	Number.	Value.	Number.	Value.	
1888-89 ...	2,215,687	Rs. 4,07,62,770	Rs. 5,52,598	2,304,160	Rs. 4,22,59,803	4,519,847	Rs. 8,30,22,573	
1889-90 ...	2,479,019	4,73,13,667	6,10,200	2,621,660	4,91,45,969	5,100,679	9,64,59,660	
Difference ..	+ 263,332	+ 65,50,897	+ 63,008	+ 320,504	+ 68,86,166	+ 580,832	+ 1,34,37,087	

The number of revenue money-orders issued in the Lower Provinces was 146,726, representing Rs. 11,50,111, and the number paid was 144,532, representing Rs. 11,25,004. The number of official money-orders other than revenue money-orders paid during the year was 49,886, amounting in value to Rs. 8,41,046. The values of these money-orders were paid by book transfer. The total number of money-orders paid by book transfer was 194,418, amounting in value to Rs. 19,66,050. From the 1st September 1889 the rent money-order system, authorising tenants to pay rent by postal money-order, was introduced as an experiment in the Burdwan Commissionership with the sanction of His Honour the Lieutenant-Governor. The number of rent money-orders issued in the seven months of the year in which the system was in operation was 5,001 with an aggregate value of Rs. 44,290, while the number of these money-orders refused was 2,223, or 44 per cent., their value being Rs. 15,825. The proportion of refusals is very high; but there is reason to hope that when the system is better understood, and landlords recognize that the acceptance of a rent money-order does not involve forfeiture or surrender of interest and lawful claims, the proportion of refusals will diminish considerably.

The number of British postal orders sold during the year 1889-90 was 2,610 as compared with 2,395 sold in the previous year. The orders most in demand were those of 20, 10, and 5 shillings respectively, in the order in which they are here mentioned.

Savings Banks.

The following figures show the transactions of the Savings Banks in the year under report:—

Number of accounts opened	34,400
Ditto ditto closed	18,494
Ditto deposits	191,866
Amount of deposits	Rs.	80,30,921
Number of withdrawals	122,034
Amount of withdrawals	Rs.	79,43,683
Number of accounts open at the close of the year	113,267
Value of account open at the close of the year	Rs.	3,87,99,062

A statement of Government securities purchased, sold, and deposited with the Comptroller-General for safe custody is given below:—

Government securities.

	Number.	Value.
		Rs.
Purchased	427	2,35,400
Sold	11	8,200
Deposited	88	39,500

The number of policies granted to postal employés during the year was 43, amounting in value to Rs. 36,450, against 59 of the aggregate value of Rs. 54,200 in the previous year. Six policies of the value of Rs. 3,061-12-10 were paid.

Postal Life Insurance.

A classification of the employés of the Post Office Department whose lives were insured in the year under report is given below:—

Inspectors.	Postmaster.	Deputy Postmaster.	Sub-Postmasters.	Clerks.	Postal signallers.	Overseer.	Postmen and Village Postmen.	Total.
2	1	1	7	23	5	1	3	43

The number of policies granted to employés of the Telegraph Department during the year 1889-90 was 10, amounting to Rs. 25,000, as compared with 17 policies, aggregating Rs. 29,400, granted in the previous year. No policies were paid during the year. A classification of the employés of the Telegraph

Department whose lives were insured during the year under review is given below :—

Inspector.	Telegraph-master.	Accountants.	Clerk.	Signallers.	Peon.	Total.
1	1	2	1	4	1	10

Sixty-one newspapers adopted the privileged publication system during the year, and 52 renounced the privilege of advance payments of postage. The total number of privileged newspapers at the close of the year was 181.

On the 1st April 1889 there were 120 combined post and telegraph offices, worked by postal officers, in the Lower Provinces. Twelve were opened during the year and two were closed, thus leaving a balance of 130 offices in existence on the 31st March 1890. The number of messages despatched was 123,086, and the total charges realized for messages sent was Rs. 1,38,825. The cost of establishment and contingencies amounted to Rs. 33,212, leaving a credit balance of Rs. 1,05,613, against Rs. 77,974 in the previous year. The number of messages received for delivery at these offices and the number which passed through them in transit were 124,696 and 49,736 respectively.

There were 54 prosecutions of postal servants during the year, against 49 in the previous year, convictions being obtained in 41 cases. Of the remaining 13 cases, 6 were pending at the close of the year. There were in all 4 cases of highway robbery during the year.

At the beginning of the year there were 230 post offices in the Lower Provinces maintained by funds raised under the District Dāk Act and by contributions received from Native States. Of these offices, 176 are in Bengal, 91 in Behar, and 23 in the Eastern Bengal Postal Circle. During the year 24 new offices were opened and 10 closed, leaving 304 offices open at the close of the year. Of these, 183 are in the Bengal Postal Circle, 92 in Behar, and 29 in the Eastern Bengal Circle. Of the 329 district dāk letter-boxes existing at the commencement of the year, 12 were withdrawn, while 23 others were set up in fresh localities. There were thus 340 letter-boxes at the close of the year, viz., 273 in the Bengal Circle, 63 in Behar, and 4 in the Eastern Bengal Circle. The number of miles of runners' lines maintained during the year from funds raised for the purposes of the district dāk was 12,366 $\frac{3}{4}$, against 12,210 in 1888-89.

The number of postal articles estimated to have passed through the district post was 4,617,721, against 3,890,109 in 1888-89, resulting in an increase of 727,612 articles in the year 1889-90. The number of articles undelivered was 114,602, against 97,348 in the previous year.

The receipts and charges on account of the district post, according to figures received from the Accountant-General, Bengal, are as follows :—

Postal Circles.		Receipts.	Charges.
		Rs.	Rs.
Bengal	...	2,29,857	2,15,695
Behar	...	1,05,010	1,01,867
Eastern Bengal	...	53,396	49,248
Total		3,88,263	3,66,810

REVENUE AND FINANCE.

Total	13,51,18,000	13,66,13,000	19,61,000	4,66,000

The following remarks explain the principal items of increase and decrease in Imperial receipts in 1889-90 as compared with those of 1888-89.

INCREASE.

Land Revenue.—The increase in 1889-90 was due to the payment of the balance of revenue of the Burdwan Raj due on account of the preceding year.

Opium.—The increase was due chiefly to higher prices obtained at opium sales. The average price realised per chest amounted to Rs. 1,135, against Rs. 1,120 in 1888-89. There were also larger recoveries of advances consequent on the failure of crops.

Stamps.—The increase was chiefly under “Court fee stamps.”

Customs.—The increase was under “Import duty,” and was attributed to increased imports of petroleum and arms and ammunition. Against this increase there was a decrease in the “Export duty,” owing to smaller shipments of rice.

Assessed Taxes.—The increase was chiefly contributed by Calcutta as the result of careful revision of assessment of the commercial class.

Forests.—The increase was mainly under the head “Timber and other produce removed by consumers or purchasers.”

Registration.—The increase was attributed to the unfavourable harvests of the year, which raised the price of food-grains, and necessitated the execution of a larger number of deeds.

Interest.—The increase was chiefly owing to the additional loan taken by the Calcutta Port Trust on account of the Kidderpore Docks.

Miscellaneous.—The increase was due to larger recoveries on account of Percentage on English stores.

DECREASE.

Salt.—The decrease was due to the influence of the English Salt Syndicate, which raised the price of salt considerably; to the rise in freight which checked imports to a large extent; and to the importation of Indian manufactured salt into areas formerly supplied by Liverpool salt.

Excise.—The large falling off is due partly to scarcity in Behar and partly to changes in the system of excise administration.

Receipts in aid of Superannuation, etc.—The decrease was mainly under “Subscriptions to the Military Orphan Fund,” which represents the net proceeds of the Orphanganj Bazar at Kidderpore. The actual realisations in 1889-90 exceeded those of 1888-89, but owing to larger outlay for improvements, the net result showed a diminution in the receipts as compared with that year.

Stationery and Printing.—The decrease was due to smaller supplies of stationery made to State Railways.

Statement showing the Imperial Expenditure in 1889-90 as compared with that of 1888-89.

MAJOR HEADS.	Actuals, 1888-89.	Actuals, 1889-90.	Increase.	Decrease.

Total ...	3,01,77,000	2,08,57,000	5,98,000	99,18,000

The following remarks explain the principal items of increase and decrease in Imperial charges in 1889-90 as compared with those of 1888-89.

INCREASE.

Assignments and compensations.—The increase was due to the payment of arrears of compensation.

Excise.—The increase represented the cost of the additional establishment sanctioned in 1889-90. The office of the Excise Commissioner, Bengal, was created from the beginning of the year.

Registration.—The increase chiefly occurred under “Commissions to Sub-Registrars and *ex-officio* Registrars,” and was due to larger collections made in the year.

General Administration.—The increase was under the head of “Civil offices of Account and Audit.”

Political.—The charges for 1889-90 included salary of the Political Agent, Gantock, and the cost of the construction of a house for him at that place.

Territorial and Political Pensions.—The increase was due to the debit under this head of the pensions payable to the Oudh family. The charges on this account were formerly adjusted in the India books.

Stationery and Printing.—The increase was due to increased demands by the presses for country-made paper.

DECREASE.

Refunds and drawbacks.—The charges are of a fluctuating nature. The decrease was due to smaller payments under “Customs” and “Assessed taxes.”

Opium.—The decrease was due to smaller payments owing to failure of crops.

Interest on ordinary debt.—The sale of stock-notes having proved unsuccessful, orders were passed by the Government of India in August 1888 for the discontinuance of the further sale of stock-notes. No interest and commission was therefore paid on these notes in 1889-90.

Interest on other obligations.—The decrease was chiefly under “Interest on Savings Bank deposits,” and arose from the orders reducing the limit of deposits.

Ecclesiastical.—The decrease was due to the absence of chaplains on leave out of India.

The following statement shows briefly the transactions in currency notes in the Bengal treasuries during the year ending 31st March 1890. The figures given in this statement do not include the transactions at the Bank of Bengal, Calcutta, and its branches at Dacca and Patna, nor those of the Reserve Treasury and Currency Office, Calcutta, the Calcutta figures being those of the Collectorate only; but remittances made from the Bank of Bengal, Calcutta, to district treasuries, and by them to the Bank of Bengal, Calcutta, and Reserve Treasury, are included in the receipts and issues of the treasuries:—

Transactions with				Receipts from.	Issues to.
				Rs.	Rs.
(1) Bank of Bengal	30,96,400	69,58,030
(2) Reserve Treasury	Nil.	1,22,06,120
(3) Other treasuries	83,710	83,710
(4) Currency chests	4,26,500	9,38,330
(5) Public in payment of Government dues—					
			Rs.		
Home Circle	2,66,30,135	2,68,61,395	1,26,53,350
Foreign „	2,31,260		
(6) Public in exchange for silver	85,50,425	64,70,255
(7) Ditto for notes of other values	8,88,655	8,88,655
Total				3,99,07,085	4,01,98,450
Balance as per cash balance reports				37,97,145	35,05,780
GRAND TOTAL.				4,37,04,230	4,37,04,230

The amount of currency notes and of coin in the treasuries at the beginning of the year was Rs. 37,97,145 and Rs. 1,23,82,428, and at the close Rs. 35,05,780 and Rs. 1,08,19,714, respectively. The aggregate balance of coin and notes on 1st April 1889 was Rs. 1,61,79,573 and on 1st April following Rs. 1,43,25,494.

The receipts in notes during the year aggregated Rs. 3,99,07,085 and the issues Rs. 4,01,98,450, against Rs. 3,73,56,415 receipts and Rs. 3,74,69,595 issues of the previous year, showing an increase in the receipts and issues of 1889-90 of Rs. 25,50,670 and Rs. 27,28,855, respectively.

The receipts from the Bank of Bengal amounted to Rs. 30,96,400, against Rs. 22,36,925 of the previous year, showing an increase in the remittances made by the Bank in 1889-90 to the extent of Rs. 8,59,475. The larger supply was due chiefly to the special remittance of Rs. 4,00,000 made to the Burdwan Treasury to enable it to meet the requisition of the Court of Wards in connection with the compromise to the succession suit of the Burdwan Raj; to the larger remittances to Singbhoon and Manbhoon to obviate the necessity of making remittances in specie to them, these two treasuries having had to meet large drawings of the Public Works Department on account of the Beugal-Nagpore Railway; and to Chittagong to enable the treasury to meet the requisitions for notes of the Military Department.

The issues to the Bank of Bengal, which aggregated Rs. 69,58,030, against Rs. 63,77,100 in 1888-89, represent the surplus of the Calcutta Collectorate, 24-Pergunnahs and Howrah treasuries, remitted to the Bank.

The issues to the Reserve Treasury represent the remittances of surplus notes made every month by all local treasuries. Currency notes of the denominations of Rs. 100 and upwards form the principal items of the remittances made from the mofussil to Calcutta.

The largest amounts remitted were from Burdwan Rs. 23,30,965, Hooghly Rs. 8,70,340, Julpigoree Rs. 8,10,075, Mozufferpore Rs. 7,33,590, and Rungpore Rs. 7,22,640; the remittances from the other districts were below seven lakhs. Tipperah, Noakhally, Cuttack, Hazaribagh, Lohardugga, and Manbhoom made no remittances.

The receipts and issues of other treasuries represent note remittance transactions between districts, instead of, as under the usual rule, with the Bank of Bengal in the case of receipts and the Reserve Treasury in the case of issues. In the year under report the transactions of this nature had been between the Sunderbuns and the 24-Pergunnahs and Manbhoom and Lohardugga, the receipts and issues being necessarily equal.

The receipts from currency chests represent the notes drawn from the chests in exchange for silver paid into them from the treasury, or to supplement the treasury balance and the issues, and the notes paid into the chest in exchange for cash drawn from them by the treasury, or transferred to them, to reduce the balance of the treasury. The transactions with the chest in the year under report were larger than those in 1888-89. This was owing to the more frequent use made of currency agencies in order to place funds at short notice at the disposal of the Comptroller-General.

The note transactions with the public are arranged under three heads, [entries (5), (6), and (7) in the statement above]. The receipts and issues under the several heads since the year 1880-81 are exhibited in the statement given below—

RECEIPTS.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.

To the public in payments ...	85,60,716	86,31,070	1,06,11,000	1,02,06,710	1,08,09,175	1,08,91,540	1,01,14,020	1,02,07,810	1,17,21,860	1,26,68,820
Ditto in exchange for silver ...	48,76,035	51,34,700	58,10,000	68,85,925	65,41,510	67,19,450	62,31,440	66,63,970	61,54,405	64,85,040
To the public in exchange for notes ...	2,65,735	3,61,290	4,88,000	5,30,210	5,47,865	8,16,540	9,17,875	8,15,125	8,85,725	8,88,055
Total ...	1,37,03,136	1,41,27,060	1,69,09,000	1,77,12,945	1,79,98,550	1,82,27,530	1,72,63,335	1,76,86,905	1,87,62,060	2,00,62,515

The receipts of notes from the public in payments have steadily increased since 1880-81, except in 1883-84, when they received a check; but since that year they have continued to rise. The receipts in 1889-90 were, however, slightly below those of the preceding year.

The issues of notes to the public in payments were considerably larger than in any year since 1880-81.

The receipts and issues from and to the public in exchange for notes of other values exceeded those of all years since 1880-81 excepting 1886-87.

(b)—Provincial and Local Finance.

PROVINCIAL.—The following statement shows the actual receipts and expenditure on account of Provincial Services for 1889-90 as compared with those of 1888-89:—

			Provincial surplus (+) or deficit (—)	(—)6,68,000	(+)11,36,000

Receipts.—The total *Land Revenue* collections for the year 1889-90 amounted to Rs. 3,89,05,000, against Rs. 3,73,73,000 for 1888-89. The 10 per cent. on collections from Government estates during the year under report amounted to Rs. 4,14,000, against Rs. 3,26,000 in 1888-89, so that the total Provincial share of land revenue was one-fourth of (Rs. 3,89,05,000—Rs. 4,14,000) + 4,14,000, or Rs. 1,00,37,000. The increase is attributable to the realization of revenue of 1888-89 due from the Burdwan Raj, of revenue which remained unrecovered in 1888-89 owing to scarcity chiefly in the districts of Khoolna and 24-Pergunnahs, and to larger collections of arrears in Chittagong, Midnapore, Backergunge, and Pooree. The adjustments between the Provincial revenues and the revenues of the Government of India and of other Provinces resulted in a net credit for Rs. 2,71,000 in favour of the former.

The increase in Provincial receipts from *Salt* arose from larger receipts on account of rent of warehouses consequent on the reduction in the rate of rent from Rs. 5 to Rs. 3 per 1,000 maunds, and from the fact that the rise in the price of salt caused unusually large quantities to be bonded during the year. The Provincial receipts from *Stamps* amounted to Rs. 1,06,78,000, against Rs. 1,03,79,000 obtained in 1888-89. The increase was chiefly under “Court-fee stamps.” The decrease under *Excise* was chiefly under country spirits owing to the scarcity in Behar and to changes in the system of excise administration. The receipts from *Provincial Rates* amounted to Rs. 43,06,000, against Rs. 41,56,000 collected in the previous year. The increase was chiefly in Public Works Cess collections, and was due to the same causes as affected the land revenue collections. The increase under *Customs* was due to larger recoveries on account of demurrage. The greater portion of the increase under *Assessed Taxes* was contributed by Calcutta as the result of careful revision of assessment. The increase under *Registration* was under “Fees for registering documents,” and was ascribed to the unfavourable harvests, which caused a larger number of documents to be presented for registration.

The increase under *Law and Justice—Courts of Law* was due to larger magisterial fines imposed during the year. The improvement under *Jails* was owing to the sale of larger supplies of manufactured articles, chiefly to the Military Department. The increase under *Police* was due chiefly to the receipts of the Presidency and Suburban Police having been brought into the accounts for the first time owing to their administration having been taken over by Government in 1889-90. There were also larger recoveries for police supplied to Railways and Cantonment Funds. The decrease under *Marine* was mainly under “Pilotage receipts,” which fluctuate with the tonnage of vessels visiting the port. The increase under *Medical* was due to larger receipts from paying patients. The decrease under *Scientific and other Minor Departments* was accounted for by reduced issues of cinchona bark and alkaloids. The decrease under *Stationery and Printing* arose from smaller receipts from the sale of rent receipt forms, and from a diminution in printing work undertaken for local funds and municipalities. The decrease under *Miscellaneous* was under “Unclaimed deposits.”

The increase in Provincial receipts from *Railways* was due to the opening of the entire length of the Assam-Bihar Section, to the improvement in traffic on the Dacca Section of the Eastern System, to a favourable jute season, and also to improvement in traffic on the Tirthoot State Railway. The increase under *Irrigation, Major Works*, was general, but was most marked in the case of the Orissa and Sone projects. The decrease under *Irrigation, Minor Works and Navigation*, was due to short realizations from the Calcutta and Eastern Canals owing to the competition of the Bengal Central Railway, and to the unsatisfactory condition of the rice market; and also to the reduction in the rates of freight of the East Indian Railway, which attracted a portion of the traffic from the Nuddea rivers. The difference between the receipts of the two years under *Civil Works in charge of the Public Works Department* was very nearly the difference between the profits realized in 1888-89 from the Barakar Iron Works and their sale proceeds in 1889-90. The increase under *Civil Works in charge of the Civil Department* arose from recoveries of the amounts wrongly credited to District Boards on account of the income from certain ferries which had not been transferred to their control.

Expenditure.—There was an increase of Rs. 16,000 under “Malikana,” subordinate to *Assignments and Compensations*, due to the payment of arrears.

The increase under *Land Revenue* was chiefly under "Survey and Settlement charges." The increase under *Salt* was due to the purchase of Kilby's patent scales for the weighment of salt, the introduction of which into the port of Calcutta was sanctioned by Government in July 1889. The increase under *Stamps* was chiefly under the head "Stamps supplied from central stores." The increase under *Excise* occurred chiefly under the heads of "Establishment" and "Petty Construction" owing to the re-introduction of the distillery system in several districts. The increase under *Customs* arose from larger expenditure for temporary preventive establishment and from larger payments for rents, rates and taxes. The increase under *Assessed Taxes* was due to the cost of additional establishment sanctioned during the year. The increase under *Registration* was chiefly under "Commissions to Sub-Registrars and *ex-officio* Registrars," which was due to larger collections in the year.

The increase under *General Administration* occurred under the heads "Board of Revenue" and "Commissioners." The increase under the latter head was due partly to the appointment of an additional officer in place of the permanent incumbent deputed on special duty, and partly to privilege leave absences. The increase under *Courts of Law* was due chiefly to the appointment of an additional Sub-Judge and Munsiffs and their establishment, and partly to larger expenditure on account of salaries of Puisne Judges. The increase under *Jails* was for larger outlay for rations and raw materials. The increase under *Police* mainly resulted from the conversion into a Provincial charge of the Calcutta and Suburban Police charges with effect from the 1st April 1889. There was also larger expenditure on account of cost of supplying, conveying, &c., of provisions of the Special Police of the Chittagong Hill Tracts. The increase under *Marine* represented the cost incurred in the purchase of the steamer *Guide*. There was also larger expenditure on account of labour and materials for repairs to pilot vessels. The increase under *Education* was due partly to increased expenditure on English Colleges, and partly to larger outlay for materials and tools for the Civil Engineering College, Howrah. The increase under *Medical* was chiefly under "Government hospitals and dispensaries," for diet and clothing of patients and travelling allowances, and partly under "Medical colleges and schools," for larger expenditure on medical stores and supplies and services and contingencies. The increase under *Superannuations*, &c., was due to larger admissions to the pension list, chiefly in the Land Revenue, Opium, Police, and Education branches of the public service. The decrease under *Stationery and Printing* was ascribed to smaller supplies of stationery to Government presses. The increase under *Miscellaneous* was due to the adjustment under this head of the cost of periodicals supplied to officers in the Civil Department, which was formerly debited under the various heads concerned.

The increase under *Working expenses of State Railways* was chiefly on the narrow gauge section of the Eastern Bengal System. The decrease in "Working expenses" under the head *Irrigation, Major Works*, was on the Tidal and Sone canals. The increase under *Civil Works in charge of the Civil Department* represents the amount of ferry collections written back from Local to Provincial accounts. The increase under *Contributions* was due to the payment of arrear contributions to District Funds for 1887-88 and 1888-89, as well as of additional grants to the District Boards for the maintenance of provincial roads transferred to their charge.

LOCAL.—The following table shows the receipts and expenditure of the Incorporated Local Funds for the year 1889-90:—

	Opening balance.	Receipts.	Total.	Expenditure.	Closing balance.
	Rs.	Rs.	Rs.	Rs.	Rs.
The District Road Fund ...	1,03,873	2,33,734	3,37,597	2,52,414	85,183
The District Road Account ...	23,637	1,11,957	1,35,594	1,06,708	28,886
The District Fund ...	24,09,080	75,18,753	99,27,833	74,30,681	24,97,152
The District Post Fund ...	1,51,643	3,88,263	5,39,906	3,66,810	1,73,096
The Inland Labour Transport Fund	28,124	28,124	28,124	...
Total ...	26,88,233	82,80,821	1,00,69,054	81,84,737	27,84,317

The "District Road Fund" survives only in Hazaribagh, Lohardugga, Manbhoom, and Darjeeling, where the Local Self-Government Act has not been introduced.

The "District Road Account" exists in Singbhoom, the Sonthal Pergunnahs, and the Chittagong Hill Tracts, where the Cess Act is not in force, except in one pergunnah in Singbhoom, viz. Dalbhoom. The Government grants, which compose the chief resources of the fund, amounted to Rs. 73,820 of which Rs. 10,577 were given to the Chittagong Hill Tracts, Rs. 53,241 to the Sonthal Pergunnahs, and Rs. 10,000 to Singbhoom.

The "District Fund" existed, as in the previous year, in 38 districts in which the Local Self-Government Act was in force. In none of the district were the accounts of the District Boards overdrawn, except in Bankura, in which the deficit balance of the previous year continued up to June 1889, when the contribution for Educational purposes sanctioned by Government was credited to the fund. The balance in each of the districts of Burdwan, Tipperah, Mymensing, Chittagong, and Gya exceeded one lakh.

The aggregate receipts of the "District Post Fund" continued to be in excess of the total charges. The balance in the districts of Backergunge, Durbhunga, Midnapore, Mozufferpore, and Patna much exceeded the average expenditure for six months, which may be taken as a fair working balance.

The actual receipts of the "Inland Labour Transport Fund" amounted to Rs. 11,157, and the disbursements to Rs. 28,124. Under the orders of the Government of India, the deficit was charged to the Assam portion of the fund.

The transactions of the Excluded Local Funds were as follows:—

	Opening balance.	Receipts.	Total.	Expenditure.	Closing balance
	Rs.	Rs.	Rs.	Rs.	Rs.
(1) Police Fund—					
Railway Police clothing ...	1,050	3,745	4,795	3,627	1,168

Total ...	48,042	1,81,012	2,29,054	1,74,677	54,377
(7) Cantonment Funds ...	17,321	53,575	70,897	54,758	16,139
GRAND TOTAL ...	1,92,698	3,89,262	5,81,960	4,16,361	1,65,609

The "Orissa Ports Funds" closed the year with a deficit of Rs. 44,708, notwithstanding the grant-in-aid of Rs. 10,000 made from Provincial Revenues. A further grant of Rs. 40,000 has been provided in the budget for 1890-91 to meet the deficit. The Cuttack and Pooree Fund has been relieved for the present of the charges for medical establishment and contingencies at Hookey-tollah, and the port dues at the ports of Pooree and False Point have been enhanced to two annas per ton.

Out of the accumulated surplus balances at credit of the "Hindu College Fund," a Government Promissory note for Rs. 3,000 has been purchased, and the interest on the note will be allowed to accumulate until the investment made from the savings of the fund be sufficient to create a new scholarship. The actual receipts of "Durga Churn Laha's Fund" amounted to Rs. 2,027 and the payments under the fund to Rs. 3,013. The deficit of Rs. 986 was made up by a contribution from Provincial Revenues.

The "Wahabee Fund" has practically ceased to exist. A grant of Rs. 5,000 was made from this fund to meet the cost of acquiring a new site for the Patna Anglo-Arabic School. A further grant of Rs. 10,725 has been sanctioned for completing the survey of the city of Patna for the purpose of drainage and water-supply.

The "Christian Burial Board Fund" was kept solvent by a grant from Provincial Revenues, amounting to Rs. 6,136. A new fund, called the "Mahomedan Burial Board Fund," was created during the year for providing better management and control of the Mahomedan burial grounds. The management of the fund has been placed under a Board consisting of the Chairman of the Corporation of the Town of Calcutta, the Health Officer of Calcutta, the Executive Engineer of the 1st Calcutta Division, and nine Mahomedan members appointed by Government.

The "Cantonment Funds" closed the year 1889-90 with a balance of Rs. 16,139, thus:—

DISTRICTS.		Opening balance.	Receipts.	Total.	Expenditure.	Closing balance.
		Rs.	Rs.	Rs.	Rs.	Rs.
Cuttack	..	2,164	3,942	6,106	5,637	169
Darjeeling	...	393	2,249	2,642	1,977	665
Lohardugga (Dorunda)	...	1,496	1,537	3,033	1,410	1,623
Patna (Dinapore)	...	3,080	18,236	21,316	16,948	4,368
24-Pergunnahs (Alipore)		651	2,198	2,849	2,336	513
Ditto (Barrackpore)		1,319	17,188	18,507	17,173	1,334
Ditto (Dum-Dum)		8,218	8,226	16,444	9,277	7,167
Total	...	17,321	53,576	70,897	51,758	16,139

The Darjeeling and the Alipore Cantonment Funds were, as in previous years, kept solvent by contributions from the Military Department, amounting to Rs. 2,885, of which Rs. 1,665 were granted to the Alipore Fund and Rs. 1,220 to the Darjeeling Fund. In Dorunda the expenditure was well within the receipts, but in Cuttack, Barrackpore, Dinapore, and Dum-Dum the expenditure exceeded the receipts, and the deficiency was met partly from the surplus of the previous year, and partly from grants from Government. The contribution to the Dinapore Fund amounted to Rs. 6,855. In order to place the fund in a sound financial condition, orders have been issued to raise the tax on holdings from 5 per cent. to 7½ per cent., the maximum allowed by the Bengal Municipal Act III (B.C.) of 1884, and the Cantonment Committee has been authorised to charge rent, tolls, and fees for the right to expose goods for sale in the Cantonment market and for the use of the shops, stalls and standings therein.

The transactions of the Buxa Cantonment Fund in Julpigoree do not appear in the treasury accounts owing to the distance of the cantonment from the treasury, but the money belonging to the fund is kept in the Military chest there, and its account regularly audited by the Accountant-General's office. The fund closed the year with a surplus balance of Rs. 258, the receipts and expenditure amounting to Rs. 2,241 and Rs. 1,933 respectively.

The accounts for the year of the three remaining heads of Excluded Local Funds, viz., Municipalities, Unions, and the Chittagong Port Trust, which bank with Government treasuries, but which are not under the financial administration of Government, are as follow:—

	Opening balance.	Receipts.	Total.	Expenditure.	Closing balance.
	Rs.	Rs.	Rs.	Rs.	Rs.
Municipalities ...	3,19,522	17,36,656	20,56,178	17,75,564	2,80,614
Unions ...	4,531	160	4,691	244	4 447
Chittagong Port Trust ...	67,958	56,232	1,24,190	33,170	91,020

Of the 139 municipalities which bank with Government treasuries, and of which the above is the account for the year, all have credit balances in the treasuries, with the exception of three in Midnapore, which are, apparently by mistake, shown in the Accountant-General's books as having overdrawn their accounts. Of the four unions which survived at the beginning of the year, the account of one in Jessore has been closed and only three in Bankoora have accounts still outstanding.

During the year under review the cesses continued to be levied at the maximum rates in all the districts in, which Act IX (B.C.) of 1880 is in force, except Backergunge, where the Public Works cess was levied at full rates and the Road cess at half rates. The current demand for the year amounted to—

	Rs.
Road Cess ...	37,81,538
Public Works Cess ...	38,79,001
Total ...	76,60,539

In the subjoined table the figures for the past year are compared with those of the two preceding years:—

	DEMAND.			Collections.	Remissions.	Balances.	Percentage of balance on gross demand.
	Current.	Arrear	Total.				
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1887-88 ..	76,13,146	16,61,553	92,74,699	75,35,113	16,498	16,98,409	18.3
1888-89 ...	76,19,896	17,20,662	93,40,558	74,86,777	20,925	17,98,912	19.2
1889-90 ...	76,60,539	18,01,134	94,64,673	77,54,684	76,885	16,58,728	17.5

The percentage of arrear collections on arrear demand was 76.8, that of current collections on current demand was 82.2, and that of total collections on current demand was 101.2. With a larger demand the collections have been larger, and the balances have been reduced. The item of remissions, however, shows a large increase, which is due to a sum of Rs. 65,896 having been written off in Burdwan as irrecoverable arrears of petty rent-free holdings.

The following table shows the demands, collections and arrears of the Road and Public Works cesses on lands and mines for the cess year 1889-90.

Statement of Demands, Collections, and Balances of Road Cess and Public Works Cess on Lands and Mines for the year ending 31st March 1890.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22

In the following districts the arrear collections fell short of 90 per cent. —

		Percentage of arrear collections on arrear demand.	Percentage of current collections on current demand.
Shahabad	...	40·7	85·9
Burdwan	...	43·4	83·7
Furreedpore	...	46·6	66·4
Bankoora	...	47·2	81·
Khoolna	...	65·	81·2
Moorshedabad	...	71·8	92·5
Gya	...	73·8	74·1
Mozufferpore	...	74·6	61·7
Jessore	...	75·4	74·9
Hooghly	...	77·1	66·3
Bhagulpore	...	80·	88·4
Cuttack	...	80·5	90·
24-Pergunnahs	...	82·8	80·4
Durbhunga	...	83·4	86·
Pooree	...	86·	97·6
Sarun	...	86·7	72·8
Patna	...	89·3	75·7

The districts of Furreedpore, Gya, Mozufferpore, Jessore, and Hooghly show short collections of both current and arrear demands. The indifferent results in Furreedpore are primarily attributable to the confused state of the revenue-roll, which facilitated the frauds noticed in last year's report. In Gya the short collections are said to be due to the postponement of the date of new assessment from the 1st April 1889 to the 1st April 1890, and to the adoption of the tehsildari system under section 99 of Act IX (B.C.) of 1880 in preference to the certificate procedure. The unfavourable results in Shahabad are ascribed to the lax system of realizing arrears. The Collector has been asked to adopt, as suggested by the Board, stringent measures to reduce the increasing balance. A large arrear balance has become chronic in Burdwan since the assessment of its rent-free tenures. Measures have not been adopted to remedy the defective system of keeping accounts which hitherto retarded the collections, and the realizations during 1889-90, though far from satisfactory, show an improvement on the percentage of previous years. In Bankoora heavy defaults were made as usual by the sardar ghatwals, and to prevent this the assessment of the ghatwali lands is being revised. The short percentage of arrear collections in Khoolna and Moorshedabad is attributed to the accumulation of the arrears of three years to be recovered from rent-free holdings under section 70 of the Cess Act.

In the following districts, though the arrear collections were not less than 90 per cent., the current collections fell below that amount:—

		Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.
Chumparun	...	68·	99·8
Lohardugga	...	72·2	96·9
Monghyr	...	73·9	90·5
Dacca	...	78·3	90·
Midnapore	...	79·1	90·
Pubna	...	80·8	93·5
Rajshahy	...	81·8	98·5
Dinaghpore	...	81·9	99·8
Backergunge	...	82·	94·3
Maldah	...	87·3	99·8
Balasore	...	88·1	95·
Tipperah	...	89·3	95·9
Manbhoom	...	89·8	99·6

In Chumparun, Lohardugga, and Monghyr the short current collections are ascribed to the 15 days' grace allowed for payments, and in Dacca to the difficulty of realizing the dues from holders of petty estates. In Midnapore the cesses due from some large zemindaries were not paid until the last coercive measures under the Public Demands Recovery Act had been resorted to.

Arrears to the extent of Rs. 1,06,435 have become barred by limitation. The total amount barred in Burdwan was calculated to be Rs. 1,63,267, out of which Rs. 65,896 were remitted during the year, and there still remain

Rs. 97,371, which will be written off as soon as pending objections to the original assessment have been disposed of.

The collections on both the current and arrear demand exceeded 90 per cent. in 11 districts—

		Percentage of arrear collections on arrear demand.	Percentage of current collections on current demand.
Hazaribagh	100·	97·1
Singbhoom	100·	99·9
Bogra	99·8	93·5
Purneah	99·2	95·6
Nuddea	98·2	92·1
Noakhally	98·	94·
Beerbhoom	97·5	91·3
Julpigoree	95·7	93·2
Mymensing	94·7	92·5
Rungpore	93·9	90·6
Chittagong	92·3	92·9

Darjeeling had no arrears to collect, and realized its current demand in full. In these 12 districts the results are satisfactory and reflect credit on the officers concerned.

The number of certificates filed for the recovery of arrears was 71,076, which, with the 35,260 pending on the 31st March 1889, gave a total of 106,336 for disposal. Of these, 73,115 were disposed of, leaving 33,221 pending at the end of March 1890. The outturn of work compares favourably with that of the previous year. Sales actually took place in only 583 cases, of which 54 were subsequently cancelled. The number of institutions was smallest (428) in the Chota Nagpore Division, and largest in the Burdwan, Patna, and Presidency Divisions—20,018, 14,560, and 10,921 respectively. In Gya and Mozufferpore the certificate procedure was set aside in favour of the tehsildari system under section 99 of the Cess Act, with the result that collections fell off. As remarked by the Commissioner, more active measures should have been taken, or certificates should have been filed to realize the Government dues.

Complete revaluations of the district of Shahabad, resulting in an increase of Rs. 1,05,477 in the annual demand, and of Gya, resulting in an increase of Rs. 50,423, were brought to a close during the year. Partial valuations and revaluations were completed in the Khoolna, Backergunge, Mymensingh, Maldah, Bogra, and Tipperah districts.

Land Revenue.

COLLECTION.

THE following statement shows the current demand on account of the Demands, collections, remissions, four classes of estates, in comparison with the two preceding years:—

Classes of estates.	Current demand.		
	1887-88.	1888-89.	1889-90.
	Rs.	Rs.	Rs.
I.—Permanently settled estates	3,22,91,720	3,22,90,777	3,22,92,924
II.—Temporarily ditto ...	26,48,556	26,54,561	26,15,488
III.—Government estates ...	22,32,370	23,08,688	23,32,339
IV.—Ryotwari tracts ...	8,43,757	8,59,079	8,62,077
Total ...	3,80,16,403	3,81,13,105	3,81,02,828

The total demand, collections, remissions, and balances, similarly compared, were as follows:—

YEAR.	DEMAND.			COLLECTIONS.			Remissions.	BALANCES.			Percentage of total collections to total demand.	Percentage of total collections to current demand.
	Current.	Arrear.	Total.	Current.	Arrear.	Total.		Current.	Arrear.	Total.		
1	2	3	4	5	6	7	8	9	10	11	12	13
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.		
1887-88 ...	3,80,16,403	19,17,014	3,99,33,417	3,62,58,301	15,81,740	3,78,40,041	23,896	17,56,538	3,13,018	20,69,556	91.75	99.53
1888-89 ...	3,81,13,105	20,44,566	4,01,57,671	3,64,36,974	17,22,143	3,81,59,118	30,882	20,73,355	2,84,216	23,57,571	93.56	97.52
1889-90 ...	3,81,02,828	20,20,128	4,01,22,956	3,62,05,507	24,60,256	3,86,65,763	96,349	18,79,668	3,80,917	22,60,585	91.25	101.48

The moderate decrease of Rs. 10,277 in the revenue demand is more than accounted for by the fact that the owner of the Jellamoota estate in Midnapore, who for many years declined to accept the settlement of his property, has done so at last, thereby becoming entitled to a sum of Rs. 58,344 a year for collection expenses, which is deducted from the income of Government.

The collections, which were comparatively good, being in excess of the regular income, and the best for ten years, were to some degree facilitated by the general adoption of the system of remittance by money-orders, of which 139,535 were issued during the year for an aggregate sum of over 11 lakhs.

The large increase in the remissions was due mainly to the loss of crops caused by floods in Midnapore, Pooree, and the 24-Pergunnahs. There was a decrease of Rs. 6,96,786 in the balances, the percentage of the total balance on the total demand being 5.51, against 7.36 in 1888-89. In permanently-settled estates the balance amounted to Rs. 10,29,338 out of a total demand of Rs. 3,36,73,926. The total amount due from wards' estates under this class at the close of the year was Rs. 20,793, against Rs. 4,80,052 in 1888-89, the large decrease being due to the adjustment of a temporary default of over four lakhs in the previous year by the Burdwan Raj. In the temporarily-settled estates, with a larger demand, the collections were also larger, and the balances, which amounted to Rs. 5,56,988, were smaller than in the year previous. In the ryotwari tracts the balances, being Rs. 66,162 out of a total demand of Rs. 9,39,899, show a reduction.

The collections of the year on Government estates were good, being 104 per cent. on the current demand. The total Government estates. balances were, however, Rs. 6,08,297 out of a total demand of Rs 31,42,188. Although there was thus a decrease in comparison with the year 1888 89, the percentage of balances on the gross demand was, as usual, the largest in this class of estates, being 19·35. The large uncollected balances in the Midnapore district are accounted for by the severe floods from which the Majnamoota estate suffered in 1888. This estate is not the property of Government, but managed until the proprietor thinks fit to imitate the owner of Jellamoota by accepting settlement.

Rupees 1,78,085 were collected as miscellaneous revenue, against Rs. 1,63,232 in 1888-89.

The total number of estates under direct management was 1,915 with an annual rental of Rs. 27,73,065. Though there was an increase in the number of estates, the rental decreased, owing mainly to the settlement of the Jellamoota estate with its proprietors. The total collections amounted to Rs. 28,88,068, or 104·1 per cent. on the current demand, against 85·3 of the previous year and 98·7 of 1887-88. The general results attained during the year may be regarded as satisfactory, although the realisations compared with the gross demand of Rs. 38,52,221 were still below the standard of 90 per cent. The collections exceeded the current demand in all the Divisions, except Burdwan and Bhagulpore. The highest percentage obtained was 111·2 in the Chittagong Division, and the lowest (94·3) in the Burdwan Division. In the Burdwan and Bhagulpore Divisions the percentages, however, rose from 51·4 and 90·2 in 1888-89 to 94·3 and 95·4 respectively. The total cost of management was Rs. 2,04,313, or 7·3 per cent. on the demand, against 6·9 of the previous year.

Redemption of land revenue. The figures under this head are as follow :—

YEAR.			Number of estates.	Government revenue.	Price realised.
1888-89	391	Rs. 390	Rs. 11,479
1889-90	552	397	11,379

The attempt to induce the people of Chittagong to redeem small properties by offering them at ten years' purchase proved a failure. The term to which the reduced offer extended ended on 1st April 1890, and only 72 out of 13,791 estates capable of redemption have been redeemed. The failure is ascribed mainly to the fact that road cess cannot also be redeemed.

Both the number of orders and the amounts showed an increase, which is indicative of the growing popularity of the system. These money-orders are chiefly used by proprietors of petty estates, and it is in districts where these estates are most numerous that the development of the system is most rapid. The payment of rent by money-order was also introduced experimentally into the Burdwan Division with so much success that its further extension to other districts will be authorised in the ensuing year.

Out of 159,852 estates on the roll, 13,656 estates or shares in estates became liable to sale during the year, and 1,273 were actually sold, the others being exempted in almost every instance on account of the payment of revenue after the latest day fixed for that purpose, but on or before the day of sale. This practice of exemption requires regulation, too much being at present left to the discretion of individual Collectors, who have very little to guide them. The subject has been under the special consideration of Government during the year, and a Bill has been framed and circulated for opinion which has for one of its objects the framing of conditions under which payments made after the latest day of payment and before the day of sale may be received. There were 193 appeals, and the number of cases in which sales were annulled on appeal is 30.

The following is a statement of the working of the Public Demands Recovery Act by which claims of the State other than those for land revenue are realised :—

	Number pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	PENDING —		
					More than six months.	Less than six months.	Total.
Demands of all kinds under section 5 ...	2,048	3,104	5,152	4,191	381	540	901
Arrears of rent due to Government, clause 6, section 7 ...	14,058	21,970	36,028	25,731	6,201	4,040	10,301
Embankment dues, section 50, Act VI (B.C.) of 1873 ...	1,590	4,351	5,941	3,980	550	1,401	1,951
Water-rates, Act III (B.C.) of 1876 ...	10,216	20,517	45,733	32,226	4,354	9,151	13,507
Cess Act, IX (B.C.) of 1880 ...	36,455	72,224	107,679	74,003	9,486	24,191	33,677
Demands of the Court of Wards, clause 7, section 7 ...	23,014	15,307	38,415	17,024	14,546	2,241	20,787
All other certificates under section 7 ...	21,831	20,342	33,213	21,514	4,243	7,105	11,348
Total ...	105,204	168,951	272,155	179,002	43,843	48,710	92,553

There was a decrease of 2,121 in the total number of certificates filed. The general result was somewhat more satisfactory than in the previous year, inasmuch as while fewer certificates were filed, more were executed, and the balance left pending was considerably reduced. The great majority of the certificates—as many as 72,224—were on account of the demand for road and public works cesses under Bengal Act IX of 1880—a demand as fixed and well known as that for the regular land revenue; and in nearly all such cases the default must have been wilful. During the year under report rules were passed under which, when the cost of realisation of a petty demand appears to a Collector to be excessive in comparison with the amount of the original demand, he is authorised, in his discretion, to remit any portion of the costs which may be found to be unreasonable with reference to the circumstances of the case. In many of the districts the discretion thus vested is reported to have been wisely exercised. The number of cases in which it was necessary to have actual recourse to sale has risen from 5,735 to 5,848.

ADMINISTRATION.

No important change was made in the agency and mode of administering estates under direct management. In addition to a sum of Rs. 57,004 expended on miscellaneous works of improvement in the nine Divisions, Rs. 17,992 were spent in improving the Orphangunge market in the 24-Pergunnahs, Rs. 17,453 on repairs of gramdheris and clearance of khals in the Majnamoota and Jellamoota estates in Midnapore, and Rs. 1,259 (out of the Darjeeling Improvement Fund) on the clearance of jungle and drains, improvement of hâts, sinking of wells, planting and rearing of trees, and maintenance of roads and dispensaries in Darjeeling. Primary schools are maintained in Government estates in most districts, the largest expenditure being reported from Darjeeling (Rs. 5,077), Chittagong (Rs. 4,839), Julpigoree (Rs. 3,224), and Pooree (Rs. 3,329). Expenditure on roads and communications in Government estates from the one and-a-half per cent. grant is reported from many districts, the largest being in Julpigoree (Rs. 40,739). The tehsil registers and accounts in the different districts were inspected as usual, and the ryots' receipts tested in many cases, the results being in general satisfactory. The condition of the ryots throughout the Government estates in Dacca, Bhagulpore, Patna, and Chota Nagpore Divisions, as well as in Chittagong, Cuttack, and Khoorda, is reported to have been generally good. In parts of the 24-Pergunnahs, Moorshedabad, Nuddoa, Rajshahye, and Midnapore there was some distress caused either by flood or drought, and remissions had to be granted.

Embankments.

Under this head the Board observe :—

“In Bankoora an embankment was constructed during the year in the Government estates Pithaipore and Rajarbari, to protect them from the floods of the river Darkessur, at a cost of Rs. 2,060. The Bhagirathi embankment in Moorshedabad was breached during the year at a place called Rampal, four miles above Lalitakuri, and the results were serious. The breach was caused by malicious cutting. Much damage was also caused by a breach at Bairamgunge, also the result of deliberate mischief. In Chittagong a sum of Rs. 5,849 was spent on the Kutabdia embankment in turfling the new banks put up last year.”

The question whether existing embankments should be retained, or new works of the kind constructed, is of vital importance in many districts, and more especially in Midnapore; and the Board have been requested to pay special attention to it next year.

Completion reports having been received from the districts of the 24-Pergunnahs and Chittagong, the initial work of registration is now complete, except as regards

Land registration.

some office details, in all the districts save Moorshedabad, Cuttack, Pooree, and Balasore. Of these latter, the work in Pooree and Balasore has practically been concluded, and the Commissioner has been requested to submit the completion reports without delay. The revision and rewriting of the first registers under the Act are still going on in many districts, the number of districts in which the registers are complete being 29, against 25 of the previous year. The institution of mutation cases under section 42 of the Act is increasing every year. During the year 50,440 applications of this class were filed, against 44,797 in the preceding year. This represents a percentage of 5·2 on the total number of interests registered under initial registration, and is a decided improvement on the percentage (4·6) of 1888-89.

During the year under report, 624 partitions were effected, against 579 in the preceding year. The following statement

Partitions.

shows the number of cases instituted, disposed of, and pending in the three heaviest Divisions—Patna, Bhagulpore, and Dacca:—

DIVISION.	Pending at close of 1888-89.	Instituted during 1889-90.	Total.	Disposed of during 1889-90.	Pending at close of 1889-90.
Patna ...	1,616	456	2,071	434	1,637
Bhagulpore ...	120	34	154	50	104
Dacca ...	337	153	490	93	397

The number of cases disposed of fell short of the institutions in the districts of Gya, Shahabad, Mozufferpore, and Chumparun, while in the Monghyr district of the Bhagulpore Division the file has been considerably reduced. In the Dacca Division, the number of cases instituted increased in Mymensingh, while the number disposed of fell considerably short of the institutions. The Commissioners of Dacca and Patna have been asked for reports as to the special measures they would adopt for the speedy disposal of the large number of butwarra cases which have accumulated in those Divisions.

Altogether 4,448 acres of land were acquired during the year at a cost of Rs. 17,48,683, and, subject to an abatement of revenue

Land acquisition.

amounting to Rs. 1,122 a year, Government has received a sum of Rs. 3,601 as the capitalised value of the revenue abated in the cases in which land has been acquired for municipalities and other public bodies. During the year, proceedings for the acquisition of land were confirmed in the case of the following important railway projects, viz., for eighteen projects in connection with the several sections of the Eastern Bengal State Railway, for 28 miles of the Bengal Central Railway, for four miles of the Diamond Harbour extension, for the Bankipore-Ganges branch of the East Indian Railway, for purposes of the Bengal and North-Western Railway at the Digba Ghât station, and for the Tirhoot section (Kusi extension) of the Assam-Bihar State Railway from Majhari to Gurheea; and orders were issued for the acquisition of land required for the central road in Calcutta from Hooghly Bridge to Sealdah, at an estimated cost of Rs. 44,27,500, as also for the following large railway works:—the Sitamarhi branch of the Tirhoot State Railway, extension of the Tirhoot section (Kusi extension) of the Assam-Bihar State Railway from Pertabgunge to Kunwa Ghât, the portion of the Burrakur division of the Bengal-Nagpore Railway from Ramkanali to Raghoonathpore, and sidings connected with this railway. An important rule has been approved by which the adoption of cheques for the payment of all sums of compensation, save in certain exceptional cases, has been provided for. The revised land acquisition rules have, however, not as yet been approved by Government.

RENT.

The Board of Revenue observe that, "judging from the year's experience the Act appears to have worked smoothly, and it may be remarked again that the flood of litigation, which was foretold as likely to be one of the first results of the passing of the Act, has happily not yet occurred." The sale of printed forms of receipt on the part of Government continues to be large, amounting to Rs. 12,87,625, although private presses issue the forms at cheaper rates and presumably do a much greater business. These figures indicate that much is being done in the direction of silently establishing a record of existing rents where all was previously in confusion. In illustration of the evils which this part of the Act is intended to remedy, the following account may be quoted of one large estate on which a record of rights is being made at the request of the owner :—

"The Settlement Officer reports that the Rajah's zemindari papers were in such a state of disorder that it has been extremely difficult to ascertain facts. The *jama-icasil-baki* papers, with some exceptions, show the rent of each holding in the village separately ; but the ryots alleged that they made lump payments, though the lands comprised in their respective holdings lay scattered in two or more villages, and stated that the Rajah's *g-mastas* or collecting agents granted them rent receipts accordingly. In ascertaining the existing rent with a view to the settlement of fair rents, it came to light that while a ryot cultivated no land in a village, a certain amount of rent was entered against his name in the *jama-icasil-baki* papers of that village ; and, on the other hand, while a ryot did cultivate a certain area in a particular village, his name did not appear in the *jama-icasil-baki* of that village. The Settlement Officer has in numerous instances found that ryots cultivating land in one village have got their rents entered in another, and the confusion was made the greater by the absence of any record of mutation of holdings, subdivisions of tenancy, or distribution of rent in the Rajah's *shepusta*. The result is that in many villages neither the names of ryots nor the amount of their rents, as entered in the zemindari paper, correspond with the entries in the *khatams*. The road cess papers of 1880, which, it was agreed, should be the basis for ascertaining the existing rents, were prepared from these zemindari papers, and consequently are incorrect. It has, therefore, been a work of time and much labour to ascertain the correct rent payable by each ryot."

The only part of the Act to which general exception has been taken on the basis of actual experience of its operation is that which enables those transferring tenures to give notice of the transactions to their landlords, paying certain fees through the courts, and the force of the objection made under this head has been much diminished during the year by the reduction in the number of such notices from 63,372 to 29,898. In dealing with agrarian questions in Chota Nagpore, Orissa, and the Sonthal Pergunnahs, which are administered under special laws, the Lieutenant-Governor has had occasion to regret the absence of the powers conferred by the Bengal Tenancy Act in the rest of the Lower Provinces.

The relations between landlord and tenant were fairly satisfactory on the whole, and though petty instances of discord between the two classes occurred in some districts, serious manifestations of ill-feeling were not numerous. In Jessore there was ill-feeling which led to cases of riot in the zemindaris belonging to the Nowhatta and Sindooria Indigo Concerns. The settlement of rents and record of rights in the estate of the Rajah of Dubulhati, in Rajshahye, are approaching completion, and may lead to better relations with his ryots, but a dispute which has lasted so long is not easily made up. In the Chittagong Division, the Commissioner writes as follows :—

"So far as the survey in Chittagong has added to our knowledge of existing relations, it seems to show that in many cases the ryots have the landlords very much at their mercy, and the question of 'tamadi dakhalkar,' or cultivator who has for twelve years successfully evaded payment of rent, promises to give rise to a good deal of difficulty, and is a serious one for Government, as it threatens in the future to affect the revenue."

In the south-west of the Palamow subdivision of the Lohardugga district there have been some disputes regarding the rendering of predial service. The ryots, who are mostly relations of the Kol Christians of the Sudder subdivision, followed their example and refused to perform such service for their landlords. In the Sudder subdivision numerous conversions to Christianity were effected by

the Roman Catholic Missions. The converts were actuated by the hope and belief that they would escape the exactions of their landlords in the shape of rents, cesses, and predial services. No outbreak or serious disturbance occurred, though at one time there was room for anxiety. As a temporary expedient, pending a more permanent settlement of disputes, the Commissioner, with the approval of Government, issued a proclamation specifying the amount of predial service hitherto regarded as customary among certain ryots, who have been called upon to render it ungrudgingly, while zemindars have been warned against demanding more. In Manbhoom the agent of Mr. C. B. Grogson, who has succeeded in his appeal to the Privy Council for an ijara of the entire pergunnah, is endeavouring to raise rents, and, as a consequence, a large number of applications to deposit rent under Act VI (B.C.) of 1862 have been received from this pergunnah, and the reasons commonly given are that the proprietor demands an increase of 50 per cent. in the rent and refuses to grant receipts. In Burrabhoom, where Messrs. R. Watson and Company have a farming lease of the whole pergunnah, a number of villagers refused to sow indigo, and the Deputy Commissioner, after an enquiry made in the presence of both parties in October last, effected with difficulty a compromise which both parties accepted at the time, but which the ryots for their part failed to act up to a little later.

There were altogether 52 applications for survey and settlement, against 40 in the previous year. Of this number, 17 related to Government estates, 6 to wards' estates, and 29 to private estates. The Director of the Department of Land Records and Agriculture, by whom the larger settlements are supervised, observes:—

“There were 83 estates* containing an area of 7,285 square miles, in 20 separate districts, under survey and settlement operations during the year. Of these, 51 are Government estates, with an area of 4,294 square miles, of which a resettlement of land revenue is being made; 9 are wards' estates, with a total area of 2,868 square miles, of which a survey, with a record of rights and settlement of fair rents, has been undertaken; and 23 are private zemindars' estates, with an area of 123 square miles, the owners of which applied for survey, record of rights and settlement of rents, either on the ground of disputes existing between them and their tenants, or on the ground that they were new auction-purchasers and unable to ascertain the amounts of the rentals payable to them.

“It will be observed that survey and settlement operations under the Bengal Tenancy Act have extended over a vast area, comprising Government, wards' and private estates, in many districts and in every Division in which the Act is in force; that these operations have affected a large number of tenants, aggregating at least four hundred thousand; that an increase of rent and revenue amounting to more than a lakh of rupees has been actually obtained, with the consent of the ryots concerned, in the estates of which settlement has been completed or is approaching completion, yet in no single case has any rioting or disorder been reported, nor has anything like opposition of a formidable character been experienced. The number of appeals to the Special Judges from the decisions of Settlement Officers compared with the number of such decisions was exceedingly small. It may therefore, I think, be said that the anticipations of those who thought that these operations would lead to confusion and disorder have been wholly falsified by events. The cost of the professional survey operations has in some cases been in excess, and the cost of the settlement operations has been generally less than was estimated. On the whole, the cost has been about 8 annas per acre. Where highly-paid and efficient officers like Mr. Collin have been in charge of the operations, they ultimately cost less than where, as in some of the wards' estates in Dinagepore, lowly-paid and inefficient officers were employed. The status was recorded and the rents were settled of 171,647 tenants, of whom 5,604 are cultivating tenure and under-tenure-holders, 1,503 were recorded as ryots at fixed rates, 102,727 as settled ryots, 3,363 as settled but non-occupancy ryots, 20,894 as non-occupancy ryots, and 37,556 as under-ryots. These figures show that the number of—

<i>Tenure and under-tenure-holders</i> is	...	3 per cent. of the whole.
<i>Settled ryots</i>	...	60 ” ”
<i>Non-occupancy ryots</i>	...	12 ” ”
<i>Ryots at fixed rates</i>	...	1 ” ”
<i>Occupancy but not settled</i>	...	2 ” ”
<i>Under-ryots</i>	...	22 ” ”
		100

* The word “estates” is here used in the sense of separate properties, not in the technical sense, according to which every area with a separate towjee number is an estate. Each of these properties includes many “estates” in the latter sense.

Sources of Revenue other than Land.

CUSTOMS.

THE following statement shows the gross and net customs duty, inclusive of the duty on imported salt, collected in Bengal during the last five years :—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.

Since the year 1882-83, when the reduction of salt duty and the remission of all import duties, except those leviable on arms, ammunition, liquors and opium, came into operation, there have been considerable fluctuations in the revenue. The increase in 1888-89 was, however, maintained in the year under review, but this was almost entirely due to the levy of a duty of 6 pies per gallon on mineral oil, the importation of which continued to expand in a remarkable manner, thus amply justifying its selection as a suitable article for taxation. Import duties levied on most other articles than petroleum showed a falling off, and there was also a decrease in export duty due to a falling off in the rice trade.

OPIUM.

The year under review, in regard to the administration of the Opium Department, embraces the twelve months commencing from the 1st of September 1888 to the 31st of August 1889.

In the Behar Agency the season commenced well, and when rain fell at the end of January, an excellent crop was expected. In February, however, there was heavy rain and hail, which caused considerable damage to the poppy plants in the Allegunge, Patna, Monghyr, Gya and Shahabad Sub-Agencies. In the Benares Agency, owing to the failure of the regular rains, irrigation had to be resorted to largely and the sowings were therefore delayed, but the crop promised well. In January, however, heavy rain fell, accompanied in many places by hail, and caused some damage. In February the damp and cloudy weather and heavy showers of rain and hail, together with the appearance of blight, added considerably to the injury; while early in March, immediately after the collection of juice commenced, dry and hot weather set in, accompanied by strong winds, which scorched the plants and affected the secreting powers of the capsules, which did not bear as many incisions as in more favourable seasons. The result was a very bad season.

Owing to the bumper crops of the years immediately preceding, and the consequent accumulation of a large stock, it was found necessary to further curtail the cultivation during the year of 1888-89 under review. The unfavourable character of the

weather also contributed to produce the desired result. Settlements were accordingly curtailed by 1,39,641 bighas, while the area actually cultivated in the two Agencies showed a still further decrease, being 1,22,792 bighas short of that of the preceding year. The contraction of cultivation was followed by decrease in produce, amounting to 27,958 maunds in the Behar and 27,350 maunds in the Benares Agency. The following statement gives a comparative view of the area of land engaged for, that sown, and that actually cultivated, together with the produce of both the Agencies:—

SEASON.				Area engaged for.	Land sown, including falluirs.	Net cultivation, excluding failures.	Produce at 70° consistence.		
BEHAR.				Bighas.	Bighas.	Bighas.	Mds.	s.	c.
1887-88	4,57,105	4,60,511	4,47,763	60,191	39	6
1888-89	4,12,530	4,19,139	4,05,866	32,233	27	8½
Increase					
Decrease				41,575	41,372	41,897	27,958	11	13½
BENARES									
1887-88	4,27,569	4,17,591	4,10,813	62,850	22	6½
1888-89	3,32,503	3,34,878	3,29,918	35,499	36	0½
Increase					
Decrease				95,066	82,713	80,895	27,350	26	5½

The policy of Government in reducing the area of cultivation has been noticed in the report of last year, and the experience of this year shows that several advantages have accrued in consequence of the change introduced, and not the least is the opportunity it has afforded for redistributing the establishments employed in abandoned tracts, and so strengthening in other and more profitable quarters a staff which was sanctioned years ago, and has had to bear the strain caused by a hitherto steady increase in the extent of operations. The reduction has also rendered possible other improvements, and it is observed with satisfaction that an attempt has been made in the Benares Agency to render more thorough and effective the supervision of cultivation by requiring that each license shall contain the khasra number of the land to which it relates; while in Behar the system of granting a separate license to each cultivator, and taking from him a separate receipt, has been introduced successfully, and is said to maintain the influence of the khattadar without sacrificing the individual responsibility of the ryot. Another probable result of the exercise of discrimination in the selection both of land and of cultivators is a distinct advance in the quality of the drug. At Ghazipore the opium produced was unusually free from pussewah and other impurities, and of exceptionally high consistence; so much so that, for the first time on record, the season's deliveries were so high that none could be manufactured at the Agency standard of 70 per cent.; while the quality and consistence in the case of Behar are declared to have been too high, and to have necessitated an inconvenient increase in the caking consistence of over 300,000 cakes.

In the Benares Agency only 5,349 bighas were unirrigated out of a total cultivation of 329,918; and in Behar, notwithstanding the feeling against the Sone canal water, the existence of which is still noticed, there was a considerable advance in this respect, and 325,130 out of 405,866 bighas were under irrigation last season. The sums advanced in the latter Agency during the year for the construction and repair of wells were largely in excess of those of 1887-88, but in Benares there was a falling off to the extent of Rs. 9,319-15-7. It has been explained that this was another effect of the concentration and confinement of the cultivation to tracts where the poppy has always flourished, and where there is in consequence less need for help from the Department in any form.

Owing to the poor outturn and the extensive failures of the year, the outstanding balances were heavy and their incidence almost universal. The considerate policy inculcated by Government in connection with the recovery of these was duly observed, but, nevertheless, the realizations in Behar were complete, except only in the district of Monghyr. In the Benares Agency it is sufficiently satisfactory in all the circumstances that out of a balance of Rs. 11,65,493-14-3 the amount that now remains unadjusted is Rs. 4,945-7-6 only.

As regards breaches of the opium laws, there was an insignificant increase in the number of cases instituted, and the percentage of convictions was unusually high for both Agencies. No heavy smuggling cases were reported, but a few comparatively important seizures were made.

The following statements show the receipts, charges, and net revenue of the Opium Department during the official year 1889-90 as compared with the official years 1873-74, 1874-75, 1883-84, 1887-88, and 1888-89. Some of the figures for 1888-89 will be found to differ from those given last year owing to the accounts for that year not having been finally closed when the Accountant-General submitted the statement from which the figures were taken:—

1889-90 ...	15,76,504	11,591	15,64,913	

* Including Assam figures.

With regard to these figures it is to be noted that they are furnished by the Accountant-General and are for the financial year ending 31st March, and therefore differ from those already quoted, which are for the opium year ending 31st August.

It will be seen from the above statements that the number of chests of provision of both Agencie sold during the year under review amounted to 57,000, being the same number as was sold during the previous twelve months. The total receipts amounted to Rs. 6,54,01,640, and the charges to Rs. 1,61,07,879, leaving a net revenue of Rs. 4,92,93,761, being Rs. 1,07,69,571 in excess of that of the previous year, and Rs. 1,24,81,331 more than that of 1887-88. The average price realized per chest amounted to Rs. 1,135-11-5, against Rs. 1,119-15-11 $\frac{1}{4}$, showing an increase of Rs. 15-11-5 $\frac{1}{4}$.

SALT.

The following statement shows the receipts and charges of the Department since 1884-85 :—

HEADS.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	Increase in 1889-90 compared with 1888-89.	Decrease in 1889-90 compared with 1888-89.

The results of the year under report, as compared with the previous year, show a decrease of Rs. 2,33,974 in receipts and an increase of Rs. 34,750 in charges. The decrease in the revenue from import duty is attributed to smaller clearances of duty-paying salt, while the manufacture of excise salt in Orissa has not recovered from the change of system under which the administration has been transferred from the Government of Bengal to that of Madras. On the other hand, it is to be remembered that large quantities of Ganjam salt, on which the duty is paid in Madras, are now consumed in Orissa. The increase in the receipts from "Rent of warehouses" is due to increased bonding operations, induced partly by the larger steamer traffic, and partly by the reduction of the rate of rent from Rs. 5 to Rs. 3 per 1,000 maunds. The rent was reduced in April 1887, and although in the first instance it was followed by a reduction in receipts, the result in the long run has fully justified the change of policy then introduced. A further help to bonding operations will be afforded by the erection of pontoons in front of the Golahs, and the construction of a shunting line connecting them with the Howrah terminus, recently sanctioned by Government. The increase in charges is due principally to the purchase of Mr. Kilby's patent scales for weighing salt and to larger refunds of customs duty.

The total quantity of salt in stock at the commencement of the year was 20,46,288 maunds, comprising 18,99,649 maunds of imported salt and 1,46,639

maunds of excise salt. During the year 1,00,72,857 maunds were imported and 70,293 maunds were manufactured, against 1,04,80,285 and 2,44,512 maunds in the previous year. The falling off in imports was occasioned by smaller importations of Liverpool salt, due to the large stocks in bond, and the raising of the price by the Salt Syndicate, which has led to a larger consumption of salt manufactured in this country. There can be no doubt that the action of the Syndicate has been prejudicial to the Liverpool trade, the exports from the United Kingdom having decreased from 83 lakhs of maunds to 70 lakhs, while there has been an increase in the trade from Hamburg, amounting to 4,44,000 maunds, from the Arabian and Persian Gulfs, amounting to 2,70,000 maunds, and from Aden, amounting to 4,44,000 maunds. The large increase in steamer traffic is also a point deserving special consideration. Three years ago the whole of the salt imported came in sailing vessels, but during the past year 27 steamers brought 10,51,557 maunds. The Collector of Customs observes that the tendency of this change in the trade is to limit the quantities imported to actual requirements.

The decrease in the clearances of salt from shipboard, amounting to 10,24,796 maunds in Calcutta and 1,06,748 maunds in Chittagong, has been partly counterbalanced by larger clearances from bond, which amounted to 32,64,318 maunds, against 23,85,541 maunds in 1888-89. The consumption in saliferous districts, other than Orissa, showed a decrease of 33,880 maunds as compared with the previous year. The decrease chiefly occurred in Midnapore, and to a lesser extent in the 24-Pergunnahs, and is attributed to the prevailing scarcity. The proportion of seizures to unsuccessful searches (1,476 to 363) was not so good as last year, but the actual number shows a very large increase. In the two districts of Midnapore and Backergunge, however, the number of unsuccessful searches exceeded that of seizures, and this result, which is far from satisfactory, has attracted the careful attention of the Board of Revenue. Last year it was pointed out by Government that the police, instead of hunting for trivial cases of illicit manufacture, should rather direct their attention to cases of illicit manufacture for sale, and although manufacture of salt without a license duly obtained must be considered illegal, yet the policy of Government in this respect has always been a liberal one; for while, on the one hand, as regards manufacture for sale there can be little doubt that the salt revenue is continually defrauded by persons who carry on illicit manufacture with comparative impunity, and it is essential that the police should not relax their exertions to put a stop to systematic manufacture with a view to sale, on the other hand manufacture for consumption must be treated on a different footing, and it must be remembered that the poorer country folk have from time immemorial been in the habit of manufacturing salt, the materials of which lie at their very doors, for their own use, and that the rigorous prosecution of the law in prevention of this practice might very easily create suffering and distress among them, in comparison with which the loss of revenue incurred would be but a trifling matter. The question is one of acknowledged difficulty, and much must depend on the discretion and capacity of individual officers in dealing with the penal provisions of the law.

The despatches of salt into the interior by the different water routes and railways are shown in the following table:—

YEAR.	Via Bali Khali.	Via Sankrail.	Via Gewankhali.	Via Kidderpore.	Via Ballinghat.	Total carried by water.	By the East Indian Railway.	By the Eastern Bengal and Calcutta and South-Eastern Railways or via Chitpore.	Via Butholla Ghat.	Total carried by rail.	GRAND TOTAL.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
1898-80	10,81,604	6,40,576	2,79,498	3,62,140	16,66,266	40,38,984	35,56,027	10,23,303	17,625	45,96,955	86,35,939
1899-90	10,20,388	5,32,051	2,45,332	2,07,320	17,00,557	38,02,068	35,43,163	9,82,780	9,606	45,34,608	83,36,976
Increase	34,291
Decrease	55,216	1,16,025	34,166	64,820	...	2,36,916	13,865	40,523	7,959	62,347	2,99,263

There was some discussion during the past year regarding the abolition or modification of the present rowannah system, but it has eventually been decided that no alteration in it is at present necessary.

The proposal made last year to extend the Indian Salt Act to the whole of the province has been abandoned; but the Act has been extended to the town of Calcutta, as well as the area included in a radius of two miles from its limits, and the control of the saltpetre refineries within this locality has been entrusted to the Commissioner of Northern Indian Salt Revenue.

Mr. Kilby's scales for the weighment of salt have now entirely superseded the old scales in the port of Calcutta, and the proposal to introduce them in the Chittagong port has recently been sanctioned by Government.

EXCISE.

Mr. Westmacott took charge of his appointment as Commissioner of Excise on the 4th April 1889, and has worked in direct communication with district officers under the general supervision and direction of the Board of Revenue. During the past year seven additional Deputy Collectors have been sanctioned for the better administration of excise work. There were previously 14

Special Deputy Collectors employed on excise duty, and the total number sanctioned is therefore now 21. With reference to financial considerations, however, only four out of the seven new appointments have been filled up, and the remaining three appointments are in abeyance.

* One Special Deputy Collector is employed as Personal Assistant to the Excise Commissioner. There are at present 17* districts in which the excise control is placed in the hands of a Special Deputy Collector, who is also made responsible for the administration of the income-tax, but who is, as a general rule, not entrusted with other revenue or any magisterial functions.

In other respects the Department of Excise has been materially strengthened during the year. The dual appointments of Assessor-Subordinate establishment. Inspectors employed partly on excise and partly on income-tax work have now been abolished, and, as regard excise, a Sub-Inspector has been appointed in the room of each. As vacancies occur in the ranks of Inspectors of Excise, or as these officers are otherwise provided for, they are being replaced by Sub-Inspectors receiving from Rs. 50 to Rs. 70 per mensem. By these means a larger number of Sub-Inspectors can be employed, while at the same time it is found that the duties of detection, prevention, and inspection of retail shops and outstills can be as well performed by Sub-Inspectors as by Inspectors.

The financial results of the administration of the Department during the year show a decrease in the revenue of Rs. 4,15,547 and an increase in the charges of Rs. 44,974, leaving a decrease of Rs. 4,60,521 in the net revenue. If to the charges is added the salary of the Excise Commissioner and his establishment, the increase becomes Rs. 85,000 in round numbers, and the percentage of charges on revenue is raised to five per cent. The decrease in revenue occurred in all divisions except Rajshahye and Chota Nagpore. The figures for each division compared with those of 1888-89 are shown below:—

Division.	1888-89.	1889-90.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Burdwan ...	11,69,671	11,26,936	42,735
Presidency ...	29,72,143	29,02,896	69,247
Rajshahye ...	7,50,612	7,83,233	32,621
Dacca ...	8,03,582	7,76,974	26,608
Chittagong ...	2,87,896	2,27,259	60,637
Patna ...	26,14,265	23,76,193	2,38,072
Bhagulpore ...	11,98,293	11,76,995	12,298
Orissa ...	5,22,438	5,04,908	17,530
Chota Nagpore ...	5,70,173	5,98,032	27,859

The fluctuations in the total collections under the different heads of revenue are shown in the following table:—

ARTICLES OF EXCISE.	REVENUE.			IN 1889-90 COMPARED WITH 1888-89.		IN 1889-90 COMPARED WITH 1884-89.	
	Average of 1884-89.	In 1888-89.	In 1889-90.	Increase.	Decrease.	Increase.	Decrease.

Spirits used for arts	244	119	143	24	103
Ganja	21,16,000	23,18,353	22,59,690	58,663	1,43,860
Opium	19,20,455	20,08,134	19,69,496	48,648	30,031
Miscellaneous	5,798	4,131	0,430	2,399	632
Total	1,03,50,351	1,08,88,973	1,04,73,426	86,301	5,01,848	3,65,079	2,42,004

The population being taken at 66,700,000, the total excise revenue, exclusive of the customs duty on imported liquors, was at the rate of $2\frac{2}{3}$ annas per head.

The statement of charges in the Excise Department amounts to Rs. 4,77,739 (excluding the cost of the Excise Commissioner and his establishment), against Rs. 4,32,765 in the previous year. The increase occurred chiefly under the heads of Establishment and Petty constructions connected with the gradual re-introduction of the distillery system.

The settlements for the current year show a decrease of Rs. 1,32,270 as compared with those of the year under review. This result is attributable in the Burdwan and Dacca Divisions to the abolition of outstills, and the loss will be recouped in a large measure in stillhead duty. Elsewhere it is due to combination among the abkars and to the prevailing scarcity and high price of food.

The figures given in the margin show in an abstract form the results of the working of the outstill and sudder distilleries during the past two years. In 1887-88 the revenue was Rs. 52,05,042; in 1888-89 it was Rs. 50,90,315: it has now fallen in the past year to Rs. 47,07,132. There is a large decrease, therefore, of Rs. 3,83,183, of which Rs. 2,19,603 occurred in the Patna Division alone. The Board observe: "Generally speaking the decrease in revenue under this head may be attributed partly to the reduction in the number of outstills, partly to resistance on the part of the abkars to the excise policy of increasing taxation, partly to the falling off in advance collections

Country spirits.			
	Average of 1884-89.	1888-89.	1889-90.
<i>Under the Sudder Distillery system.</i>			
Number of shops	599	576	652
Consumption	Gallons. 891,993	Gallons. 1,057,119	Gallons. 853,259
License fees	Rs. 5,11,002	Rs. 5,40,609	Rs. 5,76,512
Distillery fees	52,431	70,108	55,009
Stillhead duty	12,10,578	13,44,977	13,00,696
	17,74,071	19,55,754	19,32,207
<i>Under the outstill system.</i>			
Number of shops	3,633	3,437	2,957
License fees	Rs. 31,63,004	Rs. 31,31,561	Rs. 27,74,925
Total receipts under both systems	49,37,075	50,90,315	47,07,132

owing to the introduction of the distillery system, and in no small degree to agricultural scarcity."

The year was an eventful one in the history of Bengal excise. Upon the Re-introduction of central distilleries. 1st April 1889 outstills were abolished throughout the whole of the district of the 24-Pergunnahs as well as in Howrah and the Serampore sub-division of Hooghly. This change has resulted in a decrease of revenue, and, what is more important to observe, a decrease in consumption also. The revenue from country spirits throughout the whole of the metropolitan area affected, including Calcutta, fell from Rs. 14,19,384 to Rs. 13,32,888. The consumption of liquor throughout the

supplied from outstills the consumption fell from 50,913 gallons, as shown in the outstill accounts, to 13,079 gallons issued from the central distilleries. These calculations are in gross gallons in each case, and although the central distillery liquor in Calcutta is of high alcoholic strength, while the outstill spirit was exceedingly weak, there can be no doubt that there has been in this area a satisfactory reduction in the consumption of country spirits. The retail price was more than doubled. *Per contra* there was an increase in the consumption of country rum.

The total revenue realized under the central distillery system during the past year was Rs. 19,32,207 against Rs. 19,55,754 in the previous year. There was thus a small falling off notwithstanding the extension of the distillery area. The statistics of consumption show, however, a large decline from 1,057,119 gallons in 1888-89 to 853,259 gallons in 1889-90. The decrease was almost entirely in the Patna Division, of which the figures, district by district, are given in the margin. As both the system and the distillery area in these districts remained unchanged, there can be no explanation of this decrease other than that the year was one of general depression and bad trade.

	1888-89.	1889-90.
	Gross gallons.	Gross gallons.
Patna	400,408	325,643
Gya	105,262	69,233
Shahabad	55,344	44,892
Mozufferpore	21,345	11,765
Durbhanga	10,349	8,519
Saran	91,828	41,765
Chumparum	8,980	6,587
Total	700,546	507,256

The figures are unaffected by any action of the Excise Department.

The total revenue derived from outstill license fees decreased from Rs. 31,34,561 to Rs. 27,74,925. Great attention has been paid to limitation of capacity of stills and fermenting vessels. In the districts of the Chittagong Division the capacity of stills has, with regard to local considerations, not been reduced. For the rest of the province in which outstills still exist, that is to say, in the Patna, Bhagulpore, Chota Nagpore, and Rajshahye Divisions, the following figures will show the number and aggregate capacity of the outstills allowed during the past five years:—

	Number of outstills allowed.	Liquid capacity of outstills in gallons.
Open in 1886-87	2,409	76,230
„ in 1887-88	2,410	53,632
„ in 1888-89	2,359	45,874
„ in 1889-90	2,141	38,147
Sanctioned for 1890-91	1,798	30,492

The number of outstills is being reduced wherever they appear to be more numerous than is necessary to satisfy the local demand for liquor; and as the fees are being gradually raised so as to force the retail price up to the price fixed by the distillery rate of duty for each district, the abkars in many cases refuse to accept settlement. The changes involve an increase in the retail price of liquor which is stubbornly resisted. The experiment must be allowed a full and fair trial: it was always anticipated that it would entail an immediate loss of revenue, and the deliberate intention throughout has been to force the abkars to increase their retail prices and so reduce consumption. If this result is attained, a temporary loss of revenue is comparatively a small matter; and unless the demand for liquor has been artificially stimulated by an undue cheapening of outstill liquor (as compared with the price maintained by distillery spirit), it is certain that the normal demand will re-assert itself and the revenues will recover. Sir Steuart Bayley has no doubt that the policy is a sound one. It must be introduced gradually and with discretion, and there should, in his opinion, be no going back from it, though the effects of bad seasons render its influence on the revenue more conspicuous than it would otherwise have been. The consumption of outstill liquor has materially decreased in the 16 districts of Bengal where what is known as the Patna system prevails, and outstills and central distilleries are allowed in the same district. The figures are obtained by the district officers from the abkars, and cannot be altogether relied on as accurate; but the errors of a particular year are balanced by the errors of another, and for purposes of comparison the

result is one which may be generally accepted. The figures are in London-proof gallons, and show a decreasing consumption during the past three years as follows:—

					Gallons.
1887-88	1,396,537
1888-89	1,188,123
1889-90	755,553

	Rs.
1887-88	18,64,727
1888-89	18,06,366
1889-90	15,91,178

The outstill revenue from these districts also shows a decrease as noted in the margin, but the proportion of the decrease in revenue is much less than that of the decrease in consumption.

Selections of sites for outstill shops.

During the course of the year special rules were issued by Government and published for general guidance on the subject of the selection of sites for excise shops. Distinct instructions have been given to the licensing officers to ascertain and consider local opinion, and it has been ordered that where municipalities exist the Municipal Commissioners should be consulted in determining the location of shops. The procedure prescribed is one of old standing in these provinces; but it has now for the first time been promulgated in the form of rules. It is reported that there has been some loss of trade and consequent loss of revenue from fees on account of the more careful observance of the principles now enforced. The question of the location of shops in the vicinity of tea-gardens is one of special difficulty and importance. Under the orders of the Secretary of State a most careful and exhaustive enquiry was made into the facts connected with the excise administration in the tea districts in Bengal. The papers then submitted afford conclusive evidence of conscientious and successful endeavours to organize the department in accordance with the recognized principles on which a proper excise policy must rest. It was shown that the coolie population had enormously increased owing to the establishment of new gardens, that the coolies all belonged to tribes who habitually consume spirituous liquor, and that the increase in drinking was certainly not more than commensurate with the increase in number of the drinking classes. The tea districts are surrounded by foreign territory, and foreign outstills pour their contraband liquor across the British frontier at half or even a quarter the price at which it is obtainable from the licensed shops. In such cases it is probably true that from want of licensed facilities for obtaining liquor there has been a great deal of illicit manufacture and smuggling. At the same time it is obvious that unnecessary shops must not be retained. It is drunkenness which the Government desires to put down rather than the moderate use of liquor. If shops are too far off from a tea garden, it is probable that the coolies will get drunk on every occasion of a visit. The problem is to place them not too near and not too far off, and especially not in such a position as to suggest drinking to anybody. In deference to the objection of certain tea associations, the selection of sites recommended by the local authorities has in some cases been abandoned, and special arrangements have been sanctioned to prevent the importation of smuggled liquor.

The revenue from country rum has fluctuated in recent years, as the following figures will show:—

Country rum, &c.

						Rs.
1885-86	77,091
1886-87	1,08,111
1887-88	88,885
1888-89	72,851
1889-90	1,00,675

The increase in the past year is principally due to the reduction in the rate of duty from Rs. 5 to Rs. 4 per gallon London-proof. At first this led to a falling off in the receipts, but afterwards it resulted in a largely increased consumption which, with a diminished duty, gave an increased revenue. The consumption increased from 24,318 gallons to 44,535 gallons, entirely in the

metropolitan area. Of this increase no less than 13,620 gallons is due to rum consigned from Shahjehanpore. The total of Shahjehanpore rum consumed in Bengal during the year is 28,770 gallons, and the duty on this being credited locally is not shown in the Bengal excise accounts. The revenue derived from license fees for selling imported spirits and wines has again fallen from Rs. 2,21,453 to Rs. 2,14,090. Under tari the revenue has risen from Rs. 7,88,901 to Rs. 8,26,314. The revenue derived from licenses for the sale of pachwai increased from Rs. 2,15,191 to Rs. 2,32,682.

The statistics of ganja during the past three years are as follows :—

			Number of shops.	Consumption.	Revenue.
				Mds.	Rs.
1887-88	2,949	6,550	22,45,020
1888-89	2,922	6,413	23,18,353
1889-90	2,819	6,101	22,59,690

The decrease in consumption is satisfactory, and, although there is during the past year a small decrease also in revenue, it is to be observed that the receipts are greater than those of 1887-88 and of all previous years. The report on the subject of Gurjat ganja, to which allusion is made by the Board and the Excise Commissioner, is awaited by Government.

The consumption of abkari opium decreased from 1,925 to 1,905 maunds, and the revenue from Rs. 20,08,134 to Rs. 19,59,486. The largest decrease occurred in

the Chittagong district, and is attributed to the more successful prevention of smuggling into Arracan. The Excise Commissioner enumerates several important cases of opium-smuggling detected during the year.

The number of arrests for offences against the excise laws was 4,441 against 3,879 in the previous year, and the number of convictions 3,747 against 3,324. There was a decided improvement in the work of the excise officers, but a falling off in the number of convictions obtained by the police.

STAMPS.

In the present year the first triennial report was submitted under the orders of the Government of India, No. 4417 of 23rd August 1887, statistical information only with brief explanatory notes having been supplied in the two previous years. The Acts under which the stamp revenue was collected during the three years ending 31st March 1890 were the Indian Stamp Act I of 1879 and the Court-fees Act VII of 1870 as modified by subsequent enactments. Under the orders of the Government of India, the copying fee has been reduced from four to three annas per folio from 1st April 1890. From 1st April 1888 the rate of discount on the sale of court-fee stamps of all values above one rupee has been reduced from 3 pias to 1½ pic per rupee. The other changes in the law and rules issued by Government are not of sufficient importance to call for special notice.

The financial results of the administration of the Stamp Department during the past four years, according to the returns furnished by the Accountant-General, are shown in the following table:—

YEAR.	STAMPS UNDER ACT I OF 1879.			COURT FEES UNDER ACT VII OF 1870.			TOTAL.		
	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Charges.	Net revenue.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1886-87	34,72,902	1,80,253	32,92,649	99,80,750	4,21,010	95,59,740	1,34,62,561	6,10,303	1,28,52,258
1887-88	35,51,253	2,55,232	32,96,021	1,02,61,742	3,60,835	99,00,907	1,38,16,038	6,16,077	1,31,99,961
1888-89	37,59,471	2,76,042	34,74,829	1,09,88,114	3,39,691	107,48,423	1,39,38,945	6,15,703	1,33,23,242
1889-90	38,58,945	2,88,659	35,70,286	1,03,48,824	3,30,556	1,00,18,268	1,42,37,709	6,28,244	1,36,09,465
Average of 1887-88 to 1889-90	37,30,366	2,73,324	34,57,042	1,02,33,907	3,40,684	98,93,223	1,39,64,343	6,20,008	1,33,44,235

The gross average annual revenue collected under both the Acts during the three years under review was Rs. 1,39,64,263 against Rs. 1,34,62,561 in 1886-87. Both judicial and non-judicial stamps contributed to the increase; the total realizations during 1889-90 exceeded those of any previous year. The average receipts were highest in Calcutta (Rs. 19,51,882) and lowest in Singbhoom (Rs. 10,833). The incidence is highest throughout East and Central Bengal, where trade is brisk and the population most prosperous. The general incidence of stamp revenue on the population of Bengal, estimated at 66 millions, is 3 annas 4 $\frac{1}{4}$ pies per head.

Another table which has been compiled in the office of the Superintendent of Stamps shows the receipts from sales of the different descriptions of stamps during the same period. The figures will differ from those given in the previous statement, inasmuch as they do not include miscellaneous receipts or receipts from the sale of plain paper prescribed by the High Court for use with court-fee stamps. They show stamp sales only, but apart from these differences there is a small discrepancy with the Accountant-General's figures which is under adjustment:—

YEAR.	SALES OF NON-JUDICIAL STAMPS USED UNDER THE INDIAN STAMP ACT.										SALES OF JUDICIAL STAMPS OR STAMPS USED UNDER THE COURT-FEE ACT.			Total of both kinds of stamps.
	Impressed sheets, including certificate stamps, salt bond, P. W. D. forms, bills, and kabuli-yat form stamps.	Impressed labels.	Receipt or one-anna revenue stamps.	Share transfer stamps.	Foreign bill stamps.	Hundi or bills-of-exchange stamps.	Notarial stamps.	Advocate, vakel, and attorney stamps.	Impressed one-anna stamps for cheques, bills, &c.	Total of non-judicial stamps.	Adhesive and impressed court-fee stamps.	Stamps for copies.	Total of court-fee stamps.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1886-87	23,71,386	5,85,492	2,32,638	17,771	39,003	86,643	1,573	10,000	41,616	33,92,184	91,06,760	5,06,303	98,13,128	1,32,05,312
1887-88	24,12,972	5,76,348	2,22,353	32,634	50,981	96,210	3,320	7,250	49,283	34,51,251	95,39,446	5,48,850	1,00,79,295	1,35,30,556
1888-89	25,71,263	6,32,463	2,29,704	44,840	51,318	1,11,754	3,014	12,750	48,207	37,04,403	93,23,219	5,71,915	98,95,134	1,35,00,547
1889-90	26,80,643	6,41,927	2,40,757	26,668	42,731	1,18,673	3,114	15,750	47,360	38,26,523	95,71,539	5,79,575	1,01,51,114	1,39,77,927
Average of three years, 1887-88 to 1889-90.	25,57,920	6,10,879	2,30,634	34,714	48,313	1,08,879	3,149	11,916	48,250	36,60,725	94,75,908	5,60,883	1,00,41,951	1,37,02,676

There has been a steady increase in non-judicial stamp sales, which was shared by almost all classes of stamps. The average yearly receipts of impressed sheets, which are the most important of non-judicial stamps, show an increase of Rs. 1,86,573, or 7·8 per cent., as compared with the receipts in 1886-87. The increase was contributed by 39 districts, notably Mymensingh, and is ascribed to the normal growth of business and a growing tendency to substitute written agreements for verbal contracts. Impressed labels, which are available only in Calcutta, show an increase of Rs. 31,387, or 5·3 per cent. The sale of one-anna revenue stamps, commonly known as receipt stamps, shows a falling off of Rs. 2,003, or 8 per cent., as compared with 1886-87, but an increase of Rs. 11,963 in 1889-90 as compared with the preceding year. The other classes of non-judicial stamps, which are of minor importance, show increases of Rs. 16,943 under share transfer stamps, Rs. 9,278 under foreign bill stamps, and Rs. 22,236 under hundi or bills-of-exchange stamps, and a decrease of Rs. 1,424 under notarial stamps.

4. The average income of the past three years from the sales of judicial stamps is Rs. 91,67,320 under court-fee stamps, Rs. 2,333 under High Court service stamps, Rs. 3,05,415 under Calcutta Small Cause Court stamps, and Rs. 5,66,883 under stamps for copies, making a total of Rs. 1,00,41,951, an increase of Rs. 2,28,823, or 2·3 per cent., over the income from the same sources in 1886-87. The largest increases were in Midnapore (Rs. 52,511), Tipperah (Rs. 46,256), Monghyr (Rs. 40,500), Rungpore (Rs. 29,054), Calcutta (Rs. 23,996), Mozufferpore (Rs. 23,037), Mymensingh (Rs. 20,608), Khoolna (Rs. 15,693); and the largest decreases were in Pubna (Rs. 33,635),

24-Pergunnahs (Rs. 28,990), Nuddea (Rs. 12,753), Bhagulpore (Rs. 11,592), and Gya (Rs. 10,069). Taking each denomination of court-fee stamps sold during the period under review, there was an increase of nearly 3 lakhs in the sale of one-anna stamps, $2\frac{1}{2}$ lakhs in that of $\frac{1}{2}$ -rupee stamps, $2\frac{1}{2}$ lakhs in that of 12-annas stamps, and $2\frac{1}{2}$ lakhs in that of 1-rupee stamps, and a decrease of a lakh under 6-annas, Rs. 49,579 under 2-rupees, and Rs. 16,123 under 4-rupees stamps. The decrease in the sales of stamps of higher values, accompanied by an increase in the sales of stamps of lower values, is probably due to the fact that stamps of lower values on which the higher rate of discount is still allowed are used in combination for stamps of higher values on which the discount has been reduced.

The revenue from the sale of stamps of all classes has increased from Rs. 87,88,026 in 1874-75 to Rs. 1,27,76,907 in 1884-85 and to Rs. 1,39,77,937 in 1889-90.

The number of cases in which deficient stamp duty and penalty were levied by Civil and Revenue Courts during the last four years, and the amount realized in these cases, are exhibited in the following table :—

YEAR.	NUMBER OF CASES.		AMOUNT OF DUTY AND PENALTY REALIZED.		TOTAL.	
	Civil Courts.	Revenue officers.	By Civil Courts.	By Revenue officers.	Cases.	Amount.
			Rs.	Rs.		Rs.
1886-87	1,371	2,173	12,337	21,613	3,544	33,950
1887-88	1,400	2,122	10,555	23,010	3,522	33,565
1888-89	1,277	2,076	11,107	22,022	3,353	33,129
1889-90	1,338	2,360	11,127	24,869	3,737	35,996
Average of three years, 1887-88 to 1889-90 ...	1,334	2,199	10,952	23,208	3,633	34,250
Average increase in the triennium compared with 1886-87	25	1,455	250
Average decrease in the triennium compared with 1886-87	37	1,385	7	

The average number of prosecutions instituted for various breaches of the stamp law was 816. The average number of persons brought to trial was 929, of convictions 740, and of acquittals 116. The average amount of fines imposed by Magistrates was Rs. 6,626, while Rs. 1,756 were disbursed as rewards to informers. The Board bring to notice the fact that not a single rupee was paid as reward in the Patna, Orissa, and Chota Nagpore Divisions, in three out of the four districts of the Bhagulpore Division, in five out of the seven districts of the Rajshahye Division, in four out of the six districts of the Presidency Division, and in three out of the five districts of the Burdwan Division. This would seem to show that this important subject has not met with due attention on the part of local officers, for it is on the encouragement afforded by a liberal distribution of rewards that detection of infringements of the stamp law must largely depend.

INCOME-TAX.

Previous annual reports have shown collections up to the end of the year, and all other operations up to the 30th June. The present report deals only with operations up to the end of March, a change which has enabled the report to be submitted at a much earlier date than was formerly possible. The scheme of amalgamating the posts of Excise Inspector or Sub-Inspector and Income Tax Assessor continued in operation in 20 districts during the year under report, but has since been discontinued. Service in the Income-tax Department was during the year declared permanent and pensionable, and this step, together with the separation of excise and income-tax establishments, has led to a complete revision of the assessing agency.

The total demand for the year under all parts of the Act stood at Rs. 44,89,476 against Rs. 42,41,806 in the previous year, while the total collections, exclusive of advance payments and excess collections, were Rs. 41,44,257 against Rs. 38,88,388. The receipts, charges, and net revenue are compared as follows:—

		Receipts.	Charges.	Percentage of charges.	Net revenue.
		Rs.	Rs.		Rs.
1888-89	...	39,11,616	1,56,470	4	37,55,146
1889-90	...	41,66,798	1,66,778	4	40,00,020
Increase		2,55,182	10,308		2,44,874

The net revenue shows an increase of 6·1 per cent. against 5 per cent. in the previous year.

The amount originally assessed was Rs. 39,38,829, which was reduced to a final demand of Rs. 37,12,130 against Rs. 35,53,678 in 1888-89. By far the larger portion of the increase was as usual contributed by Calcutta, but it was shared by every Division except Chittagong and Bhagnulpore. The percentage of collection on the final demand was the same as in the previous year, viz. 92·5. In six districts the entire demand was collected within the financial year. The outstanding balance on account of the tax, with penalties and costs, amounts to Rs. 3,45,219, of which Rs. 1,46,143 are reported to be good, Rs. 1,31,162 doubtful, and Rs. 67,914 irrecoverable.

There was a falling off of 6,893 in the number of villages visited by the assessors, the decrease being attributed in many cases to their desire to concentrate their attention on towns and marts, which offer a more fruitful field for enquiry. In Calcutta a marked improvement appears in the number of streets visited by the assessors. The number of persons finally assessed was 102,265 against 102,407, the percentage of exemption on revision being 3·1 against 4·01 in 1888-89.

The petitions of objection numbered 15,027 against 16,770 in the previous year. The number of successful objections was 6,361 against 6,934, or 42·3 per cent. against 41·3 per cent. in 1888-89. The percentage was highest in Maldah (60·8), Chittagong (55·2), Calcutta (54·6), Patna (53·7), and Tipperah (52·1).

The average incidence of the tax on the whole population of the province (excluding the assessments on salaries of Government servants and on Government securities) was Re. 1 to every 17·9 persons, and excluding Calcutta, the average incidence in the districts was Re. 1 to every 36 inhabitants. The proportion of the number of persons assessed to the whole population was 1 to 650. The Board have furnished Government with some interesting statistics illustrating the proportion of the tax contributed by Calcutta and the whole of the province under the present Act and under former Income-tax and License-tax Acts. Of the entire amount of the present tax nearly one-half is paid in the metropolis alone. The productiveness of the tax bears a larger proportion in Calcutta under the present Income-tax Act because agricultural incomes are exempted under it and the great bulk of large incomes due to other sources than agriculture is to be found in Calcutta.

There has been a steady decline in the number of cases in which coercive measures were necessary for the recovery of the tax. In only 267 cases out of 102,265 assessments was actual sale resorted to. The number of sales was comparatively large in Rungpore (51), Purneah (24), and Singbhoom (21). The percentage of warrants issued has declined from 11·9 in 1886-87 and 6·3 in 1888-89 to 4·6 in 1889-90. In Calcutta distress warrants were issued in only 112 cases against 1,243 in the previous year.

The expenditure of the year amounted to Rs. 1,66,778 against Rs. 1,56,470 in the previous year, while the percentage of the cost on the net collections stood at the same figure as in 1888-89, viz. 4·02.

The largest share of tax paid (Rs. 5,73,728) was, as usual, from assesses under Class I (incomes from Rs. 500 to Rs. 750); Rs. 5,19,082 were paid by assesses in Class XV (Rs. 1,00,000 and more), Rs. 4,84,807 were paid by assesses in Class VIII (Rs. 2,500 to Rs. 5,000), and Rs. 4,00,999 by assesses in Class IX (Rs. 5,000 to Rs. 10,000). The lowest contribution was from Class XIII (Rs. 40,000 to Rs. 50,000). Classified according to trades and professions, the largest contributions to the tax were the following:—

		Rs.	Percentage of total collection.
Class 44.	Money-lending and changing ...	5,72,092	14·6
„ 1.	Salaries paid by Government ...	3,93,059	10
„ 45.	General merchants ...	3,63,550	9·3
„ 69.	Dealers in other articles ...	1,96,671	5
„ 46.	Piece-goods merchants ...	1,59,973	4·1
„ 9.	Clerks paid by companies, &c. ...	1,52,828	3·9
„ 85.	Taxable estate-holders ...	1,28,081	3·2
„ 35.	Barristers, &c. ...	1,23,254	3·1
„ 82.	House proprietors ...	1,16,050	2·9
„ 7.	Managers, &c. ...	1,06,135	2·7
„ 22.	Jute and hemp ...	1,05,606	2·7
„ 47.	Grain merchants ...	1,04,677	2·6

That the tax continues to be unpopular is notorious; but a larger revenue, however, is annually obtained with less friction and less necessity for having recourse to coercive measures.

VI.—VITAL STATISTICS AND MEDICAL SERVICE.

Vital Statistics, Sanitation, and Vaccination.

BIRTHS were registered in 137 municipal towns with an aggregate census population of 2,422,994. The ratio of registered births was 22·76 per thousand, the ratio of male births being 12·05, against female births 10·70.

Registration of births.
The registered mortality was 25·03 per thousand, against 24·86 per thousand in 1888. The statistics recorded vary very widely in different municipalities, as the following figures show :—

	1889.	1888.	Mean of 1884-88.		1889.	1888.	Mean of 1884-88.
Pooree	71·4	32·9	50·8	Cuttack	20·0	16·2	17·6
Purulia	49·5	50·3	28·8	Furcedpore	19·0	8·8	21·3
Rungpore	47·2	33·6	33·7	Arrah	16·6	21·6	16·7
Serampore	46·0	40·6	38·6	Krishnaghur	16·3	14·8	23·5
Raneegunge	42·3	45·1	30·9	Patna	15·9	21·0	22·5
Gya	42·2	49·3	49·8	Chittagong	15·0	18·7	21·7
Jamalpore	38·5	38·7	39·0	Santipore	11·7	9·1	13·5
City Moorshedabad	37·9	33·8	39·4	South Suburban	11·2	12·7	14·7
Utterpara	37·7	29·0	23·7	Ranaghat	10·9	6·6	11·4
Baranagore	36·8	30·6	21·4	Kishoregunge	10·9	5·4	17·5
Dinagapore	33·4	31·5	21·9	Baduria	8·6	10·5	11·9
Hooghly	31·8	27·5	39·1	Tangail	5·3	9·2	18·9

It is obvious that these figures supply very little scope for any observation on the comparative health of municipalities during the year. The registration of deaths is, however, effected throughout the whole province, and not in towns only, and when the whole area is taken into consideration, it is possible, notwithstanding the imperfection of registration, to deduce some important results. The total number of deaths registered in Bengal during 1889 (excluding still-births) amounted to 1,597,478, against 1,515,735 in 1888, giving an annual death-rate of 24·25 and 22·94 respectively. As, in the opinion of the local medical officers, the year under review was not on the whole a more unhealthy one than 1888, the higher death-rate can only be ascribed to better registration, and the improvement, so far as it goes, is therefore satisfactory. Of the total number of deaths, 856,574 were males and only 740,904 females, the ratio being 26·2 males and 22·3 females respectively.

In none of the districts of Bengal was the total registered mortality below 15 per thousand, which is an improvement over previous years. The registration was worst in Mozufferpore (15·78), Chumparun (16·52), and Durbhunga (17·64). In the 24-Pergunnahs the ratio was only 18·74. The districts in which registration was most successful are Pooree (44·4), Balasore (38·9), Darjeeling (36·2), Julpigoree (33·2), Noakholly (32·0), and Purneah (31·0).

During the year under review 171,103 deaths were registered in the province from cholera, showing the high ratio of 2·59 per thousand of the population. The disease prevailed with much severity during the hot weather, especially in the month of April, when there were 33,003 deaths. The most remarkable feature in the cholera history of the year is the excessive mortality in the Orissa Division, especially in Pooree. The ratio of deaths from cholera in the Pooree district was no less than 20·01 per thousand, in Balasore it was 13·74, and in Cuttack it was 8·29. With the exception of Purneah, in which the cholera mortality was

9·5 per thousand, the Orissa Division stands out in marked prominence as the home of cholera during the past year.

The total number of deaths from small-pox during the year was 8,665, or 13 per thousand of the population. The ratio was higher in towns than in rural areas. The disease prevailed with the greatest severity in Pooree, Chumparun, and Bankoora.

The total number of deaths from fever was 1,101,521, or 16·72 per thousand of the population. The ratio of urban mortality was 10·84, and of rural mortality 16·02.

The death-rate was highest in the 14 districts noted in the margin, and the cause, in all districts alike, is attributed to impeded drainage.

Districts.	Ratio per mille.	Districts.	Ratio per mille.
Julpigoree	... 29·19	Jessore	... 21·44
Noakholly	... 25·77	Gya	... 21·31
Dinagepore	... 25·74	Mal'dah	... 21·20
Mouglhyr	... 24·54	Bhagulpore	... 20·93
Darjeeling	... 22·93	Hazaribagh	... 20·84
Rajshahye	... 22·74	Purneah	... 20·59
Rungpore	... 22·07	Shahabad	... 20·45

The province of Orissa was remarkable for the comparative absence of fever, and the district of Pooree, which in other respects has attained the unenviable notoriety of being the most unhealthy district in Bengal, showed the smallest fever mortality.

After making the necessary adjustments on account of the amalgamation of the Suburban municipality with the town of Calcutta, the total sanitary expenditure incurred in mofussil municipalities during the year is reported to have been Rs. 12,81,031, against an expenditure of Rs. 11,30,081 incurred in 1888. The principal increase was under the head of conservancy and water-supply.

The Sanitary Commissioner's report does not touch on the work of sanitation under District Boards. The truth is that, although the promotion of sanitation is a duty entrusted under the Local Self-Government Act to District Boards, little or no progress is made in this direction, because the Boards possess no funds for the purpose. The Boards in Bengal are not vested with powers to impose local taxation to meet the requirements of local sanitation. And yet no grievance presses more hardly on the people than those which are created by the insanitary condition of the country. Constant complaints come to the notice of Government, through the vernacular press and elsewhere, of the necessity of improved drinking water, and in a hardly less degree of improved drainage, from almost every district of these provinces. The agency for the execution of sanitary reform in rural areas, and the means by which such reforms may be executed, are questions now under the consideration of Government.

Since the close of the year a Sanitary Board, consisting of Sir Henry Harrison, Member of the Board of Revenue, as President, and Colonel McNeile, Chief Engineer and Secretary to Government in the Irrigation Branch of the Public Works Department, and Dr. Gregg, the Sanitary Commissioner, as members, has been appointed, and a whole-time officer has been placed at the disposal of the Board as Sanitary Engineer. The function of this officer will be to accompany the Sanitary Commissioner on his tours; to work in concert and concurrence with him in the preparation of designs, plans and estimates; to guide the municipalities in getting up projects, and, after these have been approved by the Board and under the advice of the Chief Engineer, to inspect the works while in course of construction and report to the Board on the progress made. It is intended that he should be the right-hand man of the Sanitary Commissioner in all matters involving engineering knowledge and experience. The Sanitary Board will be the executive agency through which the Government will act in the Sanitary Department, and it is hoped that, if judiciously worked, it will exercise a powerful initiative and a valuable control in all departments of sanitary work.

Under instructions contained in the Resolution of the Government of India, Home Department, No. 28—1579-95, dated 15th July 1887, a report on the working of the Vaccination Department is required to be submitted triennially. The following is a summary of the working of the Department during the past three years.

Vaccination.

The system of administration of the Department remained unchanged but during the past year the amalgamation of the Sonthal Pergunnahs' Circle with the Darjeeling Circle reduced the number of circles from eight to seven. The following table shows the number of officers and vaccinators working under the Department during each of the past three years:—

		Superintendents.	INSPECTING STAFF.				OPERATORS.				Total.
			Deputy Superintendents.	Inspectors.	Head Vaccinators, &c., &c.	Total of Inspecting Officers.	Vaccinators.		Apprentices.		
							Government or paid.	Licensed.	Government or paid.	Licensed.	
In vaccination circles	1887-88	8	12	93	21	126	219	1,321	41	598	2,189
	1888-89 ...	8	12	93	19	124	192	1,319	18	731	2,320
	1889-90 ...	7	14	110	21	145	179	1,180	31	588	2,278
In municipalities and dispensaries.	1887-88	200	11	211
	1888-89	210	4	214
	1889-90	215	7	222
GRAND TOTAL	1887-88 ...	8	12	93	21	146	419	1,335	40	598	2,393
	1888-89 ...	8	12	93	19	124	402	1,353	18	731	2,504
	1889-90 ...	7	14	110	21	145	424	1,187	31	588	2,230

The average annual number of operations performed during the past three years was 1,790,098, or 719 to each vaccinator employed; and the average annual percentage of persons vaccinated to the whole population was 2.9. Of the two agencies, the paid and the licensed, the former were far the more active, performing on an average 1,475 operations each to 671 of the licensed vaccinators—a result which is probably due to the fact that the people obtain their services free and are therefore more willing to employ them. The reported proportion of successful operations was in the case of primary operations 99.38 and 95.30 in vaccination circles and municipalities, dispensaries, &c., respectively, and in the case of secondary operations 34.08 and 64.04. The following table shows the number of operations checked by supervising officers during each of the three years under report:—

	Number of operations.	SUPERINTENDENTS.		DEPUTY SUPERINTENDENTS.		ALL OTHER INSPECTING OFFICERS.	
		Number of cases inspected.	Percentage.	Number of cases inspected.	Percentage.	Number of cases.	Percentage.
1887-88	1,639,694	155,924	9.50	144,917	8.83	930,002	56.67
1888-89	1,758,354	133,851	7.61	168,025	9.44	1,033,553	58.72
1889-90	1,703,283	80,502	4.72	180,936	11.15	973,344	57.14

The following table shows the proportion of deaths from small-pox during the last seven years in areas under vaccination compared with those not under vaccination:—

	Number of areas which were under vaccination in—							Death-rate from small-pox per mille of population.						
	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
Areas under vaccination	430	463	472	488	507	512	548	12	15	10	10	14	10	14
.. not under vaccination	149	110	107	91	72	35	29	23	55	26	16	16	10	15

Though the death-rate in protected areas was, as a rule, much lower than in those which were not under vaccination, the results of the last two years were far from satisfactory. The table shows, moreover, a marked increase in the mortality from small-pox in protected areas in each of the last three years.

The total cost of vaccination during the three years was Rs. 4,97,833-0-11, giving a yearly average of Rs. 1,65,944-5-7. The average cost of each successful operation was 1 anna 6 pie, against 1 anna 8 pie in the three years 1884—87. It was highest in Calcutta, where each successful operation cost 15 annas 7 pie, and lowest in the Eastern Bengal Circle, where the cost was only 7 pie.

The issue of lymph in tubes from the Animal Vaccination Dépôt in Calcutta to the mofussil proved a failure owing rather to carelessness in storing at the dépôt than to any physical causes. It is hoped that, when the projected Darjeeling dépôt is in working order, the supply of animal lymph from Darjeeling and Calcutta will be sufficient to enable the Bengal vaccine establishment to dispense with lymph obtained from the human subject.

Emigration.

COLONIAL EMIGRATION. DURING the past year colonial emigration from Bengal has been marked by an unusual activity, arising from the fact that the colonies have now been obliged to make up for the small importation of labour caused by the uncertainty of the sugarcane industry in the preceding years. The increased demand is not, however, regarded as indicative of any probable revival of the industry. The requisitions in the year 1889 amounted to 9,945 as against 7,180 in 1888, the increase of 2,765 being attributed generally to the cause above mentioned, and more particularly to the renewal of emigration to the colonies of Natal and Mauritius, which did not indent for coolies during the previous year. The larger requisitions gave rise to an increase in the number of recruiters from 511 to 717, and in the number of registrations from 10,325 to 16,813. The number of adults actually despatched was 10,041, against 6,544 in 1888 and 4,563 in 1887. The two leading districts of Shahabad and Benares maintained their places on the list, the former having supplied 2,630 and the latter 2,085 emigrants. The district of the 24-Pergunnahs, which shows on paper the largest number of registrations, cannot be compared with the others, owing to the fact that a large proportion of the recruiting in that district is carried on among coolies brought to Calcutta by unlicensed emigration agents under the pretence that they are destined for Assam. This practice is objectionable, inasmuch as it is a breach in spirit of the Colonial Emigration Act, which provides for all emigrants being registered for the colonies in the district of recruitment. Under the law, as it at present stands, there is no means of remedying the evil, but the question is under consideration in connexion with the amendment of the Inland Emigration Act (Act I of 1882).

Depôts. The standard attained in the management of the depôts in Calcutta has, with the single exception of the Mauritius depôt at Bhowanipore, been all that could be desired, both as regards the sanitary arrangements and the comfort of the emigrants while awaiting embarkation. The slight increase in the rates of depôt sickness and mortality was not more than would naturally follow on a much increased depôt population. The Mauritius depôt, which was only re-opened during the course of the year, having scanty accommodation and deficient ventilation, will be removed to a more convenient site on the river bank at Garden Reach. The frequent occurrence of sickness, especially measles, in the Bhowanipore depôt, was a principal factor both in increasing the general average mortality and in causing delay in the departure of emigrant ships.

Outward voyages. During the year under report 21 vessels left Calcutta for various colonies, of which five were steamers bound either to Natal or Mauritius. In every case the women carried were in excess of the prescribed number, and in the case of Surinam more than half of the women embarked were married. The mortality on the voyages, though showing a slight increase in the average, calls for no particular notice. Careful enquiry is made in each case in which the result of the voyage seems to indicate unusual sickness.

Return emigrants. Five thousand one hundred and two emigrants were reshipped from the different colonies, as against 3,908 in the preceding year. Of these 109, or a percentage of 2.14, died on the voyage—a moderate percentage, looking to the age and decrepit condition of many of the returning emigrants. In future reports the question of the return of lepers from the colonies will be particularly noticed. Instructions have been issued for preventing the despatch, as emigrants, from Calcutta of any persons

open to the slightest suspicion of incipient leprosy. From correspondence subsequent to the report now under review it appears that no less than 38 lepers were returned from the colonies during the year 1889, of whom 18 came from Demerara and 12 from Mauritius. The Bengal Government is not disposed to accept the position that colonies should be allowed to return emigrants who have contracted the disease during the period of their expatriation.

Enquiries for heirs of deceased emigrants were completed in 257 cases, or 67·1 per cent. of the number of estates under administration during the year.

Estates of deceased emigrants.

During the year 1,835 labourers were engaged by contractors, of whom only 1,442 actually started, a number small by comparison with the results obtained on the rival systems, but considerably greater than that returned

INLAND EMIGRATION.

Contractors' coolies.

for the previous year. The increase is due to the opening of a new depôt, and also to the reaction among exporters of labourers in favour of increased control by Government in this department. Eighty-two recruiters were licensed during the year—a number which appears large, as the majority of the emigrants are strangers who come to the 24-Pergunnahs and Burdwan before engaging, having in all probability been previously recruited in their own districts by men who have not taken out licenses. Two licenses were cancelled for very sufficient reasons. The number of desertions (168) is considerable, as also that of discharges from depôt (132), and they suggest that the original work of selection was not performed with sufficient care in the interest of employers. The mortality—4 persons in depôt, or ·27 per cent., and 3 persons on the journey, or ·17 per cent.—is not excessive. The contractors' coolies, whether bound for the Surma Valley or for Assam Proper, follow the Goalundo route only.

In the case of labourers engaged by garden sirdars, the employer is primarily responsible for the character of the recruiter, and the arrangements for healthy depôts are less elaborate; but Government supervises the execution of labour contracts and the general arrangements for the journey. The number of labourers engaged by garden sirdars was 10,822, against 12,225 in 1888—a decline which, as the Superintendent observes, is undoubtedly due to the exceptional facilities afforded by the system of Assam contracts. The number of desertions is not known, or the total mortality, as the rule requiring the return of the way-bills, which would afford information on these heads, is still very generally neglected. But such way-bills as have been received back from Cachar and Sylhet show that the losses on that route have been very great, 80 deaths having occurred among 2,564 emigrants, being 3·97 per cent. of the whole.

Sirdari coolies.

The great majority of the emigrants proceed under the free system, that is to say, without supervision on the part of the State. Of these, 44,401 arrived during the year in Assam, making, with the members of the classes referred to above, a total of 57,058. The emigrants classed as "free" in the Bengal returns generally execute contracts under Act I of 1882 on entering Assam. Of 28,948 of this class of emigrants who passed through Dhubri, all but 780 made such engagements there. A certain amount of sanitary supervision is now exercised over emigration of this class under Bengal Act I (B.C.) of 1889, and the measure has worked satisfactorily.

Free emigrants.

A rule was introduced during the year to ensure the provision of a cooked meal for emigrants at Parbatipore—a matter to which the Government attaches great importance. The rules on the subject of the food to be supplied on the railway journey are not, it seems, enforced with sufficient strictness; the agents do not seem to be always aware of their responsibility in the matter, and the subordinate medical officers who inspect at certain stations do not notice instances of neglect. Since the close of the year a rule has been passed definitely imposing this duty on such officers. The following sanitary measures were adopted during the year:—

- the remedying of the sanitary defects of the depôts at Rancegunge and in Chota Nagpore;
- the construction of a cholera shed at, and the deputing of medical establishment to, Kurigram;

the transference of the medical agency from Magra to Naihati; arrangements for the proper treatment of emigrants travelling by rail; report by telegram of cases of cholera on the railway line, and at Goalundo for cases occurring on steamers; and the supervision of the medical establishments provided for coolies at Kurigram and Kaunia was entrusted to the Medical Officer in charge of the Eastern Bengal State Railway.

It was further ordered that the private depôts in Calcutta and Raneegunge should be inspected and sanitary defects remedied; that arrangements should be made at Raneegunge for the disposal of the dead; that a cholera hospital should be built at Raneegunge, and that a medical officer should be deputed to the Raneegunge and Sealdah Railway stations to examine the emigrants, to prevent those infected from starting, and to ascertain the depôt from which the infected coolies came. Similar inspection and medical assistance to the sick were afterwards ordered at Parbatipore, and it was arranged that the number of coolies to be despatched from stations on the East Indian Railway should be limited to 320 daily; that the carriage of coolies by goods train should be discontinued, and that the conveyance of coolies in goods wagons should not be allowed until suitable wagons had been approved of by a Committee.

Sanction was also given to—

- the posting of a Civil Hospital Assistant to the charge of the coolie depôt at Raghunathpore in the Manbhoom district;
- the construction at Raghunathpore of a cholera mat hospital and the sinking of a masonry well;
- the adoption of similar measures at the municipal town of Jhaldah in Manbhoom;
- the placing of the Assistant Surgeon of the Giridih subdivision in charge of all the coolie depôts there, and the construction at that place of a cholera mat hospital, also to be in charge of that officer; an extra allowance of Rs. 20 being granted him on this account during the recruiting season;
- the adoption of similar arrangements at the subdivision of Govindpore, an extra allowance of Rs. 10 being likewise granted to the Civil Hospital Assistant during the recruiting season;
- the appointment of the Assistant Surgeon at Sara on a special allowance of Rs. 20 per mensem, with a compounder on a salary of Rs. 8 per mensem, to supervise the sanitary arrangements of rest-houses there.

A Committee having been formed to consider the question of the use of goods wagons for the conveyance of coolies, certain pattern wagons with improvements in ventilation and as to inlet and exit for passengers were inspected at Kaunia and pronounced suitable for coolies, and the use of such wagons was sanctioned.

It was also arranged that an uniform fee of eight annas per head should be charged for the treatment of sick coolies of all classes in railway hospitals; that all casual coolies proceeding to Assam *via* Goalundo should be inspected by the Assistant Surgeon of Goalundo before embarkation; and that the same arrangements as regards duration of halt and food, which were prescribed for coolies proceeding *via* Dhubri, should be adopted for coolies proceeding by this route.

Medical Relief.

CALCUTTA MEDICAL INSTITUTIONS.

THE year 1889 was not remarkable for any great increase or decrease in the recorded mortality; but changes have been recently made in the boundaries of the suburbs, and the figures relating to this area cannot be accurately compared with those for former years. The number of deaths from cholera in Calcutta and Howrah was far less numerous than in 1888, and in the suburbs the decrease in the figures has been so large as to justify the belief that, even allowing for the change in boundaries, there was a real and substantial decrease in the actual prevalence of the disease. The mortality from small-pox, which in the years 1886, 1887, and 1888 had been trifling in comparison with that of former years, suddenly increased, though not sufficiently to cause serious anxiety. The death-rate from all causes in the town was 26·9, as against 26·97 in 1888, and in Howrah 22·71, against 21·68.

The following table shows the number of persons treated, as indoor or outdoor patients, in the several hospitals during the past two years —

	1889.				1888.			
	TOTAL TREATED.			Died per mile of treated.	TOTAL TREATED.			Died per mile of treated.
	Indoor.	Outdoor.	Total.		Indoor.	Outdoor.	Total.	
Medical College Hospital ...	6,665	50,182	56,847	89·82*	6,194	45,500	51,694	102·1*
General Hospital ...	3,190	..	3,190	30·91	2,968	...	2,968	37·39
Mayo Institutions ...	2,279	137,419	139,697	126·86	2,833	174,769	177,602	97·42
Campbell Hospital ...	8,252	...	8,252	203·95	6,407	...	6,407	215·94
Municipal Police Hospital ...	2,432	...	2,432	8·22	2,735	...	2,735	10·9
Total Calcutta Hospitals ...	22,517	187,601	210,418	119·91*	21,227	220,569	241,796	115·82*
Howrah General Hospital ...	1,513	9,609	11,122	217·44	1,385	10,525	11,910	247·65
GRAND TOTAL ...	24,330	197,210	221,540	126·13*	22,612	231,094	253,706	124·05*

* Reckoned on cases treated, exclusive of cases treated in the ophthalmic ward of the Medical College Hospital.

The increase in the number of indoor patients, although distributed among all the charitable institutions, except the Mayo Hospital and its dependencies, was very considerable in the Campbell Hospital, which is resorted to by paupers, and is attributed to the high price of food-grains which prevailed in Calcutta and the surrounding districts for a great part of the year. The falling off in the number of outdoor patients amounts to 37,350 in the Mayo Hospital, and is said to be due to the operation of a new rule under which the institution is closed on Sundays. In Howrah there was a decrease of 916 in the attendance of out-patients.

Only 31,338 women and 51,439 children were treated in the various institutions in 1889 as compared with 36,030 women and 59,404 children in 1888. This falling off is undoubtedly due in no small measure to the very successful management of the Lady Dufferin Hospital by Mrs. Foggo. The death-rate in all hospitals, excluding the Eye Infirmary, rose from 124 to 126, the rates for the Campbell and Howrah Hospitals, where paupers are treated, and into which many moribund and incurable cases are admitted, being, as

usual, very high. Though the general death-rate was slightly higher than in the preceding year, which again showed a slight increase on the years 1887 and 1888, it was still much below the average of the years 1879 – 85.

The number of admissions into the hospital for cholera fell from 905 in 1888 to 795 in 1889, but the mortality from this disease is still very high, being about one-half of the number admitted. The experiments made with the new medicine, salol, which has been tried with success by Dr. Nicholson in Patna, were not followed by encouraging results. Cases of enteric fever still continue rare in Calcutta, and remittent fever appears to be on the decrease.

The number of important surgical operations in the Calcutta institutions rose from 1,719 in 1888 to 1,926, and the minor operations from 20,264 to 20,933. There were 80 deaths after operation, the rate of mortality being 39 per mille (including the cases left over from the previous year) as compared with 46 per mille in 1888. These results are satisfactory evidence of the skill of the operators and of the care taken of the patients.

In the Eden Hospital 2,435 women and children were treated, against 2,668 in the previous year, showing a decrease of 233 cases. Owing to want of accommodation when the building was under repairs, many applicants had to be refused admission. Of the 2,435 patients treated, 832 were Europeans and 1,603 natives. The deaths among the former amounted to 29, and among the latter to 56. The number of confinement cases fell from 513 in 1888 to 497; the mortality among this class of patients being 18, against 20 in 1888. The very few cases of septicæmia which occurred in the hospital show that antiseptic precautions were carefully enforced in all cases of labour. The importance of these precautions has been fully impressed on the nurses, and it is hoped that no pains will be spared to eliminate this dangerous and fatal disease. The steam laundry sanctioned for this institution is not yet ready for use, owing to some delay in fitting it with the requisite machinery.

In the Ezra Hospital 1,438 out-patients and 236 in-patients, most of whom were Jews, were treated during the year. Of the indoor patients 153 were cured, 43 relieved, 26 otherwise discharged, and 3 died. These figures show that the benefits conferred by this institution are fully appreciated by the Jewish community.

The nurses employed in the hospitals continue to discharge their duties thoroughly and well, and the services rendered by the ladies of the Clewer Sisterhood are spoken of in the highest terms. Four permanent nurses were appointed this year to the Eden Hospital, as it was considered dangerous to rely exclusively on temporary nurses, many of whom do not possess sufficient experience in the work. Twelve European and Eurasian nurses passed their examination, two of them with great credit.

The invested capital of the Calcutta institutions shows a decrease of Rs. 8,500; securities to the value of Rs. 12,000 were withdrawn, and applied to the construction of a new moribund ward in the native department of the Howrah Hospital. The total income during the year, including the opening balance, amounted to Rs. 5,21,390; of this sum Rs. 3,46,858 were contributed by Government. The total expenditure, excluding the amount invested, was Rs. 5,01,970, against Rs. 4,27,082 in 1888. The increase was mainly due to a large expenditure on buildings and repairs in the Campbell Hospital, while the increase in the amount contributed by Government is due to the entire cost of the Police Hospital having been met from provincial funds.

EDEN SANITARIUM, DARJEELING.

The following statement shows the number of patients with their relatives and attendants admitted into the Eden Sanitarium during the past five years:—

	1885.	1886.	1887.	1888.	1889.
Patients	192	273	311	336	370
Relatives and attendants	68	120	81	107	122
Total	260	393	428	443	492

The Institution was opened as usual on the 1st March, and closed on the 16th November. Of the 492 persons admitted during the year, 93 were in the first, 103 in the intermediate, 171 in the second, and 125 in the third class. Of the 370 persons treated, 165 were males, 109 females, and 96 children. The improvement in numbers is wholly satisfactory, and shows that the great advantages offered by the Institution are fully appreciated by the classes for which it was intended.

The daily average number of patients in the Sanitarium during the nine months it was open was 37·85, against 39·17 in the previous year. The decrease is due to the fact that the season of 1889 was rather a shorter one than usual, the first admission being on 16th March, and the last departure on 16th November. The average period of stay of each patient was 23 days as compared with 24 days in 1888. Most of the patients admitted were suffering from malarious and other fevers, debility, diarrhoea, and dyspepsia. There were seven deaths during the year—one from dysentery, one from fever of a severe type, one from obstruction of the bowels, one from abscess of the spleen, two from diseases of the liver, and one from chronic (Hodgkin's) disease of the lymphatics.

The receipts from paying patients amounted to Rs. 32,613, against Rs. 33,579-2 in 1888. The decrease was due to the reduction in the working period of the Institution in consequence of the late admission and early departure of patients. The total receipts, including a cash balance of Rs. 1,217-13-2 in hand at the beginning of the year, amounted to Rs. 35,179-5-8, and the expenditure incurred was Rs. 31,923-0-6. The expenditure under the heads furniture, crockery, &c., included certain extraordinary items, which are not likely to recur during the next two years. There was a cash balance of Rs. 3,256-5-2 to the credit of the Institution at the close of the year. The Superintendent and the Committee are to be warmly congratulated on the financial success of this year's working; it is noticeable that the present is the first year in which the Institution has really paid its way.

At the instance of the Superintendent the Committee decided to provide in the Institution four free beds in the third class from the beginning of the current season, and to place two of these at the disposal of the Superintendent of the Presidency General Hospital, and two at that of the Principal of the Medical College, Calcutta, to enable these officers to send up at their discretion such cases as would be most likely to benefit by change to a hill climate.

CHARITABLE DISPENSARIES.

The total number of dispensaries in Bengal has increased from 234 in 1886 to 261 in 1889; of this last number 125 are in class II and are under the management of local bodies, 71 are in class IIIA and 59 in class IIIB. There are six institutions entirely supported by Government.

The figures of attendance, both outdoor and indoor, have steadily increased in the past three years, as is shown in the following table:—

YEAR.	DIVISIONS.									GRAND TOTAL.
	Burdwan.	Presidency.	Rajahmundry.	Orissa.	Dacca.	Chittagong.	Patna.	Bhagalpore.	Chota Nagpore.	
1887 ... { Indoor ...	3,528	2,581	2,422	1,638	3,701	625	6,650	1,006	949	24,474
... { Outdoor ...	140,217	138,244	136,703	62,680	106,327	31,059	316,513	80,214	28,464	1,055,465
1888 ... { Indoor ...	3,890	2,812	2,494	1,950	3,745	781	6,842	2,435	1,102	25,751
... { Outdoor ...	143,372	142,382	154,346	65,242	65,242	33,918	34,082	91,651	27,800	1,106,700
1889 ... { Indoor ...	3,980	2,970	2,858	2,770	4,135	851	7,088	2,648	1,141	26,281
... { Outdoor ...	162,313	159,873	155,270	74,708	115,333	35,193	364,544	94,361	30,180	1,179,845

The proportion of persons treated, both indoors and out of doors, to population is very low, and it is only in a few exceptional areas that it touches 3 per cent.; the total for the province being in 1889 1,208,824 persons treated out

of a population of 69,536,861, or 1·73 per cent. But, on the other hand, it may be added that the returns from dispensaries are becoming more accurate year by year, and the steady increase in numbers, in spite of the elimination of many fictitious returns of large attendance, is clearly a matter for congratulation.

The increase in the number of outdoor patients from 1,106,700 in 1888 to 1,179,843 is very satisfactory, and speaks well for the improved management and popularity of the charitable dispensaries in the mofussil. There is no doubt that the professional qualifications of the officer in charge of a dispensary greatly affect its popularity, and local municipalities and others who have the management of these institutions would do well to bear in mind that an excellent building and a full stock of medicines and medical comforts will not be of much service if the officer in charge is not a skilled practitioner, who is earnest and devoted to his work.

Very few cases of small-pox are treated in dispensaries, although the disease continues to be prevalent in several districts. Cholera is dealt with in almost all such institutions, but they are not sufficiently large or adequately equipped to deal with anything approaching to an epidemic of this disease. The number of cases of malarial fever increased from 202,933 in 1887 to 232,582 in 1889, and in the latter year formed a percentage of 19·24 of the total number of cases treated. This disease is most prevalent in the Burdwan, Presidency, and Rajshahye Divisions. The proportion of cases of malarial fever in the Presidency Division has increased from 26·68 per cent. in 1887 to 30·28 per cent. in 1889. It is remarkable that very few lepers resort to charitable dispensaries for relief, the average number treated in these institutions in the past three years being only 2,525.

It is satisfactory to notice that the number of major surgical operations increased from 4,457 in 1888 to 5,174, as successful surgery adds much to the popularity of mofussil dispensaries. The very large attendance at the Chupra and Monghyr dispensaries, where the Assistant Surgeons, the late Babu Aghore Nath Bose and Babu Upendro Nath Sen, especially distinguished themselves by their success in surgical work, tends to support this view, and every encouragement should be given to such medical subordinates as may show good results in the exercise of this branch of their profession. These remarks more especially apply to cases of cataract, and there can be no doubt that success in restoring failing sight has great influence on the popular mind.

The following statement shows at a glance the financial position of the charitable medical institutions of Bengal for the past three years:—

The variations in the figures shown as closing balance on 31st December and opening balance on 1st January are due to the correction of the accounts of various dispensaries at the close of the year. The figures are very satisfactory, and show that these medical charities are well and liberally supported and are in a flourishing financial position.

The increase in expenditure is inevitable in the face of the extension of medical aid to the poorer classes. In many cases desire for economy has led to restriction of the pay of the officers employed to that of the lowest grade of Assistant Surgeons—a form of economy which is open to criticism. It is, however, not improbable that in some cases not more than this scale of pay can really be afforded, and that an effort is made in order to obtain the services of an officer of qualifications superior to those of a Hospital Assistant.

LUNATIC ASYLUMS.

The population of the five lunatic asylums in Bengal, the increase of which in recent years has severely strained the resources of the asylums to provide accommodation, again increased in the year under report. There were 957 persons detained in them on the 1st January, and during the year 225 were admitted and 22 re-admitted, giving a total of 1,204 persons treated, while the discharges numbered only 130 and the deaths 87, so that on the 31st December 1889 there was a population of 987. The daily average of patients was 972·63 as compared with 932·8 in 1888, and the percentage of recovery on the daily average strength rose from 7·18 in 1888 to 9·45 in 1889. At Dacca and Cuttack further accommodation for the inmates of the asylums has already been provided, and a proposal is now under consideration for the enlargement of the institution at Berhampore.

Of this population at the end of 1889, those classed as “criminal lunatics” numbered 440 as against 276 in 1879 and 363 in 1884, an increase of 59·42 per cent. in ten years, or 21·21 in five. The Inspector-General of Civil Hospitals, Bengal, has instituted a comparison between the figures he has obtained of the proportion of criminal lunatics admitted to the asylums of other provinces, which shows that the proportion in Bengal is far higher than in any of those provinces, and he has been asked to follow up the question and ascertain in what respect the rules of admission and discharge of criminal lunatics in other parts of India differ from those in force in Bengal.

The difficulty of classifying the different forms of insanity has not been removed by the new nomenclature given by the College of Physicians of London, and it is clear that uniformity of classification will not be secured until some arbitrary definition of the various types of insanity is prescribed. The figures that are dependent on the new nomenclature are consequently useless, and certain inconsistencies which were noticed by the Government of India in 1888, still exist. The Inspector-General of Civil Hospitals has shown how impossible it is, under the present conditions, to place any reliance on the returns made on this subject. As far as can be ascertained, the use of intoxicating drugs

is as potent a cause of insanity as ever, no fewer than 89 admissions being traced to this cause.

The year under review was unhealthy, the rate of admissions to hospital being generally higher than in 1888, and the daily average number of sick being 69·55, which is certainly high. The mortality rose from 7·93 in 1888 to 8·94 in 1889, and this rise is largely due to the heavy death-rate in the asylums at Patna and Berhampore. In Patna it is suggested that the dampness of the wards in connection with the repairs may have had something to do with its unhealthiness, and at Berhampore the Inspector-General attributes it to the defective sanitary condition of the asylum, and to some extent to overcrowding during the year.

The total expenditure on the asylums was Rs. 79,163-15-8, against Rs. 74,067-8-1 in 1888, showing an increase of Rs. 5,096-7-7, which is said to be due to the increased number of patients treated, and to the comparatively high price of food. The expenditure on account of public works rose from Rs. 6,668-14-4 in 1888 to Rs. 10,224-6-2 in 1889, owing to certain additions and alterations in the Patna and Cuttack Asylums, and to the quadrennial repairs of the buildings at Berhampore. The figures given of receipts and expenditure under the head of Manufactures are not satisfactory. The total credits show a surplus over the total debits of only Rs. 3,491-13-8.

The past year was an uneventful one with the European Asylum at Bhowanipore. The population was slightly smaller than in the previous year, and the proportion of recoveries among the patients showed a serious diminution, due, it is said, to the admission of a larger number of females during the year. The Superintendent reports that they are found to suffer more frequently than males from the chronic and incurable forms of insanity. The asylum has been financially well managed, the increase in expenditure being more than covered by the increase in the receipts from paying patients, and the expenditure debitable to Government has been proportionately reduced. The health of the inmates was excellent.

CHEMICAL EXAMINER'S DEPARTMENT.

The following table shows the general nature of the work done during 1889 as compared with 1888:—

	1888.	1889.
<i>Medico-legal—</i>		
Human viscera tested for poison	199	209
Animal ditto for do.	122	144
Fowls' ditto for do.	2	1
Substances suspected to be or to contain poison, including cattle poison	591	663
Articles tested for blood stains	246	299
Ditto for seminal stains	61	62
Human hair	4
Asses' hair	1
Muscular tissue	1
<i>Articles tested for purity and quality—</i>		
Potable water	61	74
Petroleum and inflammable oils	268	292
Lime juice	9	25
Opium confiscated	52	47
Opium from the Board of Revenue, Lower Provinces	6	13
Salt	186	57
Ghee	37	54
Spirit for deleterious adulterations	18	63
Spirit determinations for the Collector of Customs, Calcutta	172	255
Small Arms Ammunition Factory, Dum-Dum ..	373	488
Fort William Arsenal	4	5
Medical Store Department	1	7
Telegraph Store Department	10	12
Commissariat Department	117	120
Other Departments	78	81
Total	2,613	2,977

The above figures show that the work of the Chemical Examiner is increasing in every direction. Since 1880-81 there has been an increase of 1,507 in analyses, or an increase of over 100 per cent. In addition to the analyses above enumerated, nine opinions on technical questions were submitted during the year under report, and 31 applications for leave to file specifications for patent rights were reported on for the Government of India. Some work was also done for the Department of the Collector of Customs, Calcutta, in connection with the introduction of the new Excise rules for determining the real alcoholic strength of imported spirits. Two hundred and nine human viscera were examined for poison as against 199 in 1888. Poison was detected in 48·3 per cent. of these cases as against 44·2 in the previous year. In 50 cases opium was found, and in 29 cases arsenic, and there were 22 cases in which traces of other poisons were discovered. In commenting on the large number of cases in which the two first-named poisons are found, the Chemical Examiner remarks: "These figures very clearly demonstrate that opium and arsenic, the two most commonly known poisonous drugs, are still the favourite agents for suicidal and homicidal purposes respectively, while the more easily procurable, and in many instances as deadly, vegetable poisons are comparatively still very little used in spite of the advance of civilization."

The following remarks of the Chemical Examiner in connection with the examination of spirit for deleterious adulterations are worthy of special note: "Sixty-three samples were examined, compared with 18 during the previous year. The object of the examination was to ascertain whether or not noxious drugs were added to increase the intoxicating effects of the spirit. The following drugs were especially sought for:—Indian hemp, opium, nux-vomica, datura, aconite, and in some cases tobacco. In every case negative results were obtained. Bearing in mind that some of the drugs supposed to be used are highly toxic, and not usually credited with producing intoxicating effects, and having very distinctive and unpleasant tastes, and also remembering that others are costly, it seems highly probable that the idea regarding the adulteration of country liquor with noxious drugs is based on incorrect deductions made by persons not possessed of any technical knowledge. There is no doubt that drugs are added in some cases to the contents of the *fermenting vats*, as, for example, nux-vomica seeds in *bakur pills*, and the incorrect conclusion has been arrived at that the distilled spirit must also contain the same drugs. But this inference, as I pointed out some years ago, is founded on a misconception. The active principles of such drugs as aconite, datura, nux-vomica, Indian hemp, are non-volatile, and, though the fermented liquid may be saturated with such poisons, the distillate under ordinary conditions will be harmless." These remarks go far to prove that the popular opinion that country liquors are rendered noxious by the infusion of drugs of the nature of datura, hemp, aconite, and the like, is founded on an altogether mistaken basis.

VII.—INSTRUCTION.

Education.

THE total number of pupils under instruction in the educational institutions of all classes rose by only 9,773 in comparison with the previous year. This increase was secured among private as distinguished from public institutions, the latter on the whole having shown some decline. The falling off in the number of college students was slight, and, generally speaking, the figures betoken the same eagerness as has been previously noticed on the part of the upper and middle classes of the community to avail themselves of the advantages of education. The chief factor in the decrease of public institutions is to be found in the loss of aided lower primary schools, whereas the gain in the number of private institutions is partly attributable to the discovery of 1,750 elementary Koran schools hitherto unrecorded in the Dacca and Chittagong Divisions, and partly to an increase of elementary indigenous schools. These latter, however, present endless difficulties in the way of accurate classification, so that primaries disappear in many instances only to be counted in another category as Koran schools, while hundreds, or even thousands, situated on the lowest fringe of primary schools, are set up, carry on feebly and intermittently for a period, and then disappear, leaving no trace. The anxiety of Government to extend elementary education has been constantly declared and is an established principle of the educational policy; but this policy cannot be sustained by a mere superficial extension, with a view to show larger numbers on the list of pupils, without any depth or conformity with the existing standard being required. While, therefore, the progress of education cannot be gauged by the test of numbers alone, on which the changes in the schools of the lowest grade have an effect so disproportionate to their real importance, the increase of 26,909 schools and 672,893 pupils in 10 years undoubtedly represents a real advance in the demand for education.

The expenditure as verified by the Accountant-General's figures again exceeded the sanctioned estimate. The excess of Rs. 51,182 was, however, balanced to a great extent by a surplus of Rs. 33,506 over the estimated receipts. After allowing for certain charges to be debited to the Public Works Department, the net deficit amounted to Rs. 6,295. The total sum spent in Bengal on education of all descriptions, from the highest to the lowest, amounted to Rs. 87,43,000, an increase of Rs. 75,000 over the preceding year. The contribution from public sources declined from Rs. 32,44,000 to Rs. 32,37,000, while private expenditure rose from Rs. 54,24,000 to Rs. 55,06,000. Collegiate, secondary, primary, female, and special education were all more costly than in the previous year, whereas comparative economy was exercised in the item of buildings to the sum of a lakh and-a-half of rupees. The municipal contributions stood at exactly the same sum, Rs. 83,000, as last year.

The educational functions delegated to the District Boards constituted under Act III (B.C.) of 1885 include the management of Government primary and middle schools, the distribution of the grant-in-aid allotment for middle schools under private management, the administration of the primary grant, the conduct of the annual examinations of primary schools for rewards, and the award of lower primary scholarships. The Boards are also authorised to establish and maintain, with the sanction of Government, schools

District Boards as controlling agencies.

of technical instruction, and some have already taken up this question with interest and energy. The Technical Institute, for example, established by the District Board of Rungpore has attained considerable success. With the object of defining more clearly the functions of the Boards and their relations to the officers of the Department, revised educational rules under the Act were under consideration and public criticism during 1889-90, and finally promulgated by Government on the 18th April last. Experience has already shown the new rules to be greatly superior to the old. They give somewhat larger powers to the District Boards than they had previously enjoyed, while any departure from the existing system in regard to the administration of funds or the control of schools is made conditional on the sanction of Government. The power of the Inspector and his position as a controlling officer are more clearly defined. In accordance with the views of Government, Deputy Inspectors of Schools have in nearly every district been appointed *ex-officio* members, not only of the District Boards, but also of the Education Committees to which these bodies have generally delegated their ordinary executive duties.

During the last three years there has been an increase of nine private collegiate institutions, of which four sprung into existence in 1889-90. There are now 38 in all, namely, Government 11, municipal 1, aided 8, unaided 18. The increasing demand for such education, and the development of private enterprise, are gratifying. The number of collegiate students fell (for the first time since 1886) from 5,184 to 4,882—the result, it is evident, of fewer passed candidates at the Entrance Examination of 1889 being available to supply the places of those who had left the colleges after taking their degrees or otherwise. The number of successful candidates at the University Examinations again increased, and have for the last three years been as follows:—

	1888.	1889.	1890.
First Arts	481	629	996
Bachelors of Arts	323	366	399
Masters of Arts	43	58	62

The number of Mahomedan candidates increased in a marked degree, viz. 57 in First Arts as against 21 and 19, 21 in the B.A. against 18 and 12, and 3 Masters of Arts against 1 and 1 in the two preceding years. The percentage of success achieved by the Government colleges was well maintained. The total expenditure upon collegiate education rose during the year from Rs. 6,38,954 to Rs. 6,91,079, of which Government contributed a fraction over 40 per cent. In the Government colleges the total cost also rose from Rs. 3,83,365 to Rs. 4,09,955, and the cost to provincial revenues from Rs. 2,30,409 to Rs. 2,52,465. The annual cost of each student in a Government college increased from Rs. 233 to Rs. 244, and the cost of his education to Government from Rs. 140 to Rs. 150. The increase in the Government expenditure is attributed partly to the absence of fewer officers than usual on furlough, and partly to the loss of students and their fees—a loss from which all colleges suffered alike. This is borne out by the following figures relating to the entire body of collegiate students:—

	1888. Rs.	1889. Rs.	1890. Rs.
Average cost of each student in a college in Bengal	143	124	138
The Government share thereof	63	50	55

Though the total number of secondary schools of all classes rose from 2,319 to 2,366, *i.e.* by 2 per cent., the number of pupils only rose from 200,124 to 201,452, *i.e.* by .6 per cent. This absence of corresponding increase in the number of pupils betokens an unnecessary multiplication of schools and an unhealthy competition among them for pupils. There is a decrease of 9 in the number of middle vernacular schools and of 1,704 in the number of pupils, which, however, is confined to schools managed by Municipal or District Boards or aided by those bodies or by Government. All middle schools in extra-urban tracts, whether maintained or aided by the Department, have been transferred to

the control of District and Local Boards under the Government rules, in accordance with the Local Self-Government Act. The expenditure on secondary instruction varied in the last two years as follows :—

			No. of schools.	Public funds.	Private funds.	Total.
				Rs.	Rs.	Rs.
1888-89	2,319	6,01,539	19,34,506	25,36,045
1889-90	2,366	6,08,294	20,11,672	26,19,966

At the University Entrance Examination 2,156 boys passed in 1890 as compared with 1,153 in 1889, the percentage of success being 50 instead of 24. The schools have profited by experience, greater attention has been paid to their studies by the many unsuccessful candidates of the preceding examination, and schoolmasters have recognised the necessity of more systematic and careful teaching before a candidate has any chance of passing. The results of the Middle English and the Middle Vernacular Scholarship Examinations were far worse than in the preceding year.

Measures were adopted during the year for giving effect to the views of the Government of India in regard to discipline in schools and colleges. The establishment of a special training college for teachers has been sanctioned and will be carried out as soon as funds are forthcoming. Principals of Government colleges were addressed on the subject of elevating the moral tone of the students, and the Lieutenant-Governor drew attention to the many opportunities which the study of ethics, and other occasions of college life, afforded to Professors for moral instruction of a character such as to influence their pupils and make a permanent impression. The adoption of suitable moral text-books for schools of all classes has been kept in view, and the example set by the University in preparing a book of selections for the Entrance Examination is to be followed, so as to meet the requirements not only of the junior classes of high schools, but also of middle and primary schools through the medium of works in the vernacular. The maintenance in every school of conduct registers, with a record of the head-master's opinion of each boy's character and behaviour, based upon personal knowledge, has been insisted upon, and special attention is to be paid to the entries in the conduct registers of candidates for employment in Government offices. The appointment of monitors under proper safeguards has been authorised, and the system is being tried in institutions to which hostels are attached. The attention of school authorities has also been drawn to the necessity of encouraging outdoor games and exercises, such as parallel bars, dumb-bells, cricket, football, and indigenous games, including athletic sports, running, jumping, &c., and no reasonable outlay will be refused for the purpose of setting up gymnastic appliances, or of aiding cricket and football clubs. At the same time, in default of such exercise, it is considered desirable that some form of drill should be adopted, and this will be made compulsory. The discipline of schools has been found to be better in proportion as the school is more closely connected with the Education Department, and in most cases it is not so much the absence of morality as of good manners in the boys and the junior teachers that requires to be corrected. Cases of actual misbehaviour towards teachers have been punished with rustication for a period of a year or more, and this has had a salutary effect; but instances of rudeness in a lesser degree and want of respect to superiors are still unfortunately common, and are attributable generally to the unhealthy state of public opinion in regard to discipline, and also in special cases to the disorganising effect of the establishment of new speculative schools in the vicinity of old and established institutions. The operation of the transfer rules has been entirely wholesome, and the revised rules recently issued are likely to check many irregularities that formerly prevailed, and simple rules for the transfer of pupils in middle and primary schools, in the spirit of those approved by Government for high schools, are being framed. Having regard to these measures, the Lieutenant-Governor was of opinion that a very considerable advance had been made in the direction desired by the Government of India.

The same features which were noticed in the Resolution on the report for 1888-89 have reappeared this year in the numerical statistics of primary education. There

are more upper primary schools, and they have more pupils; but the gain is more than met by the loss in the lower primaries. The net result is a diminution in the number of schools by 449 and of pupils by 12,178, confined to the Presidency, Chittagong, and Orissa Divisions. Excluding payments made to primary schools from the grant-in-aid and circle fund allotments, the expenditure on primary education, controlled by the Department and by District Boards, amounted to Rs. 7,29,851, divided into Rs. 1,46,178 from provincial revenues and Rs. 5,83,673 from district funds. The following statement shows by divisions the administration and expenditure of the primary grant upon aided schools in 1889-90:—

Division.	Allotment.	Expenditure.	Number of schools.	Number of pupils.	Cost per school in rupees.	Cost per pupil in annas.
	Rs.	Rs.				
Presidency ...	91,440	89,346	4,340	126,493	20·5	11·3
Calcutta ...	9,000	9,000	201	9,485	44·7	15·1
Burdwan ...	1,20,124	1,21,144	8,704	218,763	13·9	8·8
Rajshahye ...	73,670	70,093	2,571	65,578	27·2	17·1
Dacca ...	1,00,349	88,884	4,575	113,908	19·4	12·4
Chittagong ...	71,050	67,304	4,547	98,200	14·8	10·9
Patna ...	1,02,913	98,947	5,414	118,054	18·2	13·4
Bhagulpore ..	75,234	69,965	2,540	57,995	27·5	19·3
Chota Nagpore ...	54,767	54,937	1,509	45,567	36·3	19·6
Orissa ...	60,203	59,157	4,758	73,340	12·4	12·9
Orissa Tributary Mehals...	2,800	1,074	67	695	16·03	24·7
Total ...	7,61,550	7,29,851	39,226	928,078	18·6	12·6

The average annual cost was Rs. 18·6 per school and annas 12·6 per pupil, against Rs. 18·3 and annas 12·2 in the preceding year. The lowest cost per pupil was again in Howrah 7·3 annas, and the highest in the Chittagong Hill Tracts, 92 annas, and 55 annas in Darjeeling; but, apart from such abnormal areas, it was about 22 annas in Durbhunga, Shahabad, and Monghyr. The municipal contribution to primary schools for boys and girls was Rs. 20,827, against Rs. 20,303 and Rs. 16,355 of the last two years. The grants sanctioned were not in all cases utilised to the full extent, the departmental grant, which is administered by the District Committees of non-Board districts, and, as regards Government estates, municipalities, and cantonments, by the Magistrate or Deputy Commissioner, having shown large savings, while in Board districts a sum of about Rs. 10,000 was unspent. The lower primary schools have fallen off in two years from 45,505 to 44,146, and the pupils from 991,099 to 960,865, owing to various causes in connection with the vicissitudes of season, which accounted for the loss of no less than 334 schools in Orissa alone; but the case of Chittagong, where 555 schools of this description have disappeared from the list, is special, and is attributed to inaccurate classification. These figures are important enough to affect the total figures of the whole province, and have been referred to above. In some cases the number of schools is said to have fallen off in consequence of frequent and harassing delay in the payment by District Boards of the sums earned by gurus at the examinations. The expenditure on lower primary schools for native boys from all sources amounted to Rs. 20,13,050, of which the public funds contributed Rs. 3,81,377. The people, therefore, bear more than four-fifths of the total cost of the primary pathshalas. The falling off in the lower primary schools from 7,467 to 6,784 successful schools, and from 20,617 to 17,614 successful pupils, is ascribed to several reasons, chief among which is a constant tendency, especially in Bengal Proper, to raise the standard of examination.

There were 242 training schools for teachers, *i.e.* masters, mistresses, and gurus, with 1,993 persons under instruction, and as a general rule those who passed out of

Special instruction.

Government training schools were sought after as teachers, and seldom found difficulty in obtaining employment.

The other class of schools of special instruction includes the institutions for professional, technical, art, and industrial education, and schools of a special character. The statistics relating to their numbers and cost are given in the following table:—

	Number of institutions.	Number of pupils on the rolls on 31st March 1890.	Average monthly roll number.	EXPENDITURE.				AVERAGE ANNUAL COST PER PUPIL.	
				From public funds.		From Private funds.	Total.	Cost to public funds.	Total cost.
				From Provincial revenues.	From District and Municipal funds.				
				Rs.	Rs.	Rs.	Rs.	Rs. A. P.	Rs. A. P.

<i>V.—Other Schools of Special Instruction.</i>									
Government Schools	1	54	42	4,167	4,167	92 3 5	50 3 5
Aided Schools	7	307	234	930	509	2,973	4,172	2 15 2	7 13 3
Unaided Schools	7	250	220	930	930	...	4 4 0
Total	15	611	496	4,857	509	3,909	9,275	9 12 8	15 11 3
GRAND TOTAL	54	3,996	3,658	3,70,025	1,748	90,822	4,62,585

The variations in the numbers of students following the different professions will appear from these figures:—

YEARS.	Law.	Medicine.	Engineering.	Arts and industry.	Other special schools.	Total.
1888-89	935	999	518	651	172	3,275
1889-90	912	1,016	652	795	611	3,986

The figures are hopeful as indicating that a fair proportion of the youth of Bengal are seeking to devote their talents to professions comparatively new to them. The attendance at the Seebpore Civil Engineering College, 265, was the largest yet recorded. The Government School of Art continues to attract students, 178 having attended it as compared with 158 and 172 in the last two years. The need of a new building for the accommodation of the school and the attached Art Gallery in place of the dilapidated and altogether unsuitable houses now rented for the purpose has been recognised by Government as a matter of pressing urgency.

Towards the end of the official year a valuable report submitted by Mr. E. W. Collin, c.s., on the existing arts and industries in Bengal, in connection with technical education, came before Government. A number of his suggestions have been under consideration, and in due course practical measures will be selected for adoption.

The attendance and expenditure in schools for native girls are shown in the following statement, in which the total figures for the previous two years are given for comparison:—

CLASS OF SCHOOLS.	Number of schools.	Number of pupils on the rolls on 31st March 1890.	Average number on the rolls monthly.	Average daily attendance.	EXPENDITURE.					Total.
					From public funds			From private funds.		
					Provincial Revenues.	District Funds.	Municipal Funds.	Fees.	Other sources.

For 1889-90	1,20,171			2,00,788		...
Figures for 1887-88 ...	2,247	46,038	1,17,214			1,90,630		3,07,873
Do. for 1888-89 ...	2,302	47,888	1,21,103			1,88,916		3,10,021

The number of girls' schools declined from 2,302. to 2,153, and their pupils from 47,888 to 45,690. These figures are the lowest for the three years under examination. The number of girls reading in boys' schools, which had fallen from 37,785 to 35,079, again decreased to 32,673. The net result therefore was a loss of 149 schools and 4,604 pupils. Two young native ladies were admitted to the degree of Bachelor of Medicine, and another passed the Preliminary Scientific L.M.S. examination. Eleven young ladies of the certificate class of the Medical College also obtained the College license to practise medicine and surgery: eleven more were in the certificate class at the close of the session. There were 22 female students in the Campbell Medical School and five in the Cuttack Medical School. From the Bethune College three native candidates out of four passed the First Arts Examination, and all three candidates at the B.A. Examination were successful. The second examination for the award under the new standards of the special girls' scholarships sanctioned for Calcutta and the neighbourhood was held during the year. As the extension of these standards to the mofussil has been sanctioned, they would be very widely adopted, if it could be found possible to create a certain number of special scholarships for girls in each district: at present they have to compete for scholarships on equal terms with the boys at the primary scholarship examinations.

The statistics of European education at the end of the last three official years may be exhibited as follows:—

		1887-88	1888-89.	1889-90.
Schools	...	72	71	68
Pupils	...	6,541	6,682	6,710

In the last year the number of boys increased by 40, while there were 12 girls fewer under education. The boarding school at Kurseong is still the only Government school in the province. Out of the 6,710 scholars, 3,383 were in schools under Roman Catholic management and 1,646 under the Church of England. The total cost of European education in Bengal was Rs. 6,50,812, of which Government paid Rs. 1,72,168. Several important changes in the Code came into force during the year. A set of inter-school transfer rules was introduced, which have been very beneficial in preventing capricious transfers, and have improved the financial condition of the schools by compelling parents to pay the schooling fees. Provision was also made for the substitution of fixed grants in place of payment by results in selected schools. The imposition of fines for uncorrected errors in the keeping of attendance registers was also sanctioned. The recognition of the high school examination by the University has not induced any of the boys' schools to substitute this examination for the Entrance Examination, the probable reason being that no scholarships are awarded on the result.

The total number of Mahomedan pupils again rose from 423,564 to 436,653, and the percentage on the total number of pupils from 28.5 to 29.06, the proportion of Mahomedans to the whole population being 31.5 per cent. This increase was

Mahomedan education.

altogether due to a rise of 22,024 pupils in private institutions teaching the Koran only. In public institutions the number of Mahomedan pupils decreased by 10,624, the loss of Mahomedan pupils in lower primary schools being 14,889. As already explained, the large increase in the number of Koran schools, and the corresponding decrease in lower primary schools, were largely due to a change of classification in parts of Eastern Bengal. The number of Mahomedan college students fell from 240 to 179, and percentages show that candidates of this creed suffered at the Entrance Examination of 1889 more severely than others. At the Entrance Examination of 1890 the successful candidates increased from 54 to 125. The first reports furnished by the recently appointed Assistant Inspectors for the supervision of Mahomedan education in Eastern Bengal and in Behar have been received, and show that the special requirements and difficulties of this branch of the community are now receiving and will receive adequate attention. The annual income of the educational portion of the Mohsin Fund continues to be about Rs. 63,160, and the actual expenditure debited to this account is stated at Rs. 61,067. The comparative success of the Mahomedans in the University examinations in the last two years is shown by the following figures :—

			M.A.	B.A.	F.A.	Entrance.
1888-89	1	18	21	54
1889-90	3	21	57	125

There was also a large increase in the number of middle and upper primary examination certificates gained by Mahomedan students, though somewhat fewer passed at the lower primary examination. The total number of pupils at the madrasahs under Government management remained exactly the same as in the preceding year, viz. 1,456, but the total expenditure rose from Rs. 58,865 to Rs. 61,700, the increase being nearly all at the cost of Government.

The number of pupils from among the aboriginal races rose from 27,246 to 29,749, *i.e.* by 2,233. This is more than a recovery of the loss recorded in the last year's report. This increase was shared by most of the tracts of country inhabited by these races. The greatest gain of 1,559 pupils was in Chota Nagpore, of whom 1,390 were non-Christians and 169 Christians. The pupils in the Missionary schools in that division increased from 3,127 to 3,582, and the expenditure from Rs. 38,703 to Rs. 39,011, of which Government contributed less than one-fifth. No aboriginal pupil passed any University Examination as in the previous year, but 427 passed the departmental examinations. Of these, 367 succeeded in the lower primary scholarship examination (a falling off from the 378 last year) and 36 (as compared to 15) in the upper primary scholarship examination.

The development of indigenous institutions during a triennial period is apparent from the subjoined figures :—

				1887-88.	1888-89.	1889-90.
Schools	10,048	11,709	13,867
Pupils	96,721	117,284	139,603

This is a remarkable and continuous rise. Analysing the figures, it appears that there was a considerable decrease in advanced Arabic or Persian schools, and a gain in Sanskrit tols. The increase in the number of elementary pathshalas and of Koran schools was very large, and has been already noticed.

Art, Literature, and the Press.

THE principal English newspapers published in the Lower Provinces during the year 1889-90 were, as before, *The Englishman*, *The Indian Daily News*, *The Statesman and Friend of India*, *The Hindu Patriot*, *The Indian Nation*, *The Bengali*, *The Indian Mirror*, *Reis and Rayyet*, *The Indian Planters' Gazette and Sporting News*, *The Anglo-India*, *The Asian*, *The Saturday Herald*, *The Indian Empire*, *The Western Wit and Wisdom* (Calcutta), *The Darjeeling News* (Darjeeling), *The East* and *The Bengal Times* (Dacca), and the *Behar Herald* (Patna). The total number of English newspapers was 30, and the total number of periodicals (exclusive of Government Gazettes and departmental lists) was 14.

Publications of the Bengal Secretariat.

The following important publications, other than annual reports, were published during the year by the Bengal Secretariat Press:—

- (1) Code of Regulations for European Schools in Bengal for the year 1889-90.
- (2) Pilot Meteorological and Telegraphic Code.
- (3) Regulations and Suggestions as to the Survey of the Hull, Equipments, and Machinery of Sea-going Steam-ships carrying passengers and of Inland Steam-vessels.
- (4) History of Services of Gazetted Officers employed under the Government of Bengal, corrected up to 1st July 1889.
- (5) Annals of the Royal Botanic Garden, Calcutta, Volume II—The Species of *Artocarpus* Indigenous to British India; the Indo-Malayan Species of *Quercus* and *Custanopsis*, by George King, M.B., LL.D., F.R.S., F.L.S.
- (6) A comparative Dictionary of the Behari Language, Part II.
- (7) Report on the System of Agriculture and Agricultural Statistics of the Dacca District, by A. C. Sen, Esq., C.S., M.R.A.L.
- (8) Report on the Existing Arts and Industries in Bengal, by E. W. Collin, c.s., 1890.
- (9) Papers relating to Chota Nagpore Agrarian Disputes.

The number of vernacular newspapers supplied to the Bengal Library during the year, including two newspapers published in Assam, was 74 against 68 in the preceding year. Eight newspapers came into existence, while one was discontinued and two were amalgamated. Of the 74 papers, 6 were monthly, 9 fortnightly, 55 weekly, and 4 daily. All were published in Bengali, with the exception of 20 weekly papers (1 in English and Bengali, 6 in Hindi, 1 in Persian, 8 in Urdu, and 4 in Uriya) and 6 monthly papers (2 in Hindi and 4 in Uriya). Twenty-nine papers were published in Calcutta, 5 elsewhere in the Presidency Division, 10 in the Dacca Division, 3 in the Burdwan Division, 6 in the Patna Division, 4 in the Chittagong Division, 4 in the Rajshahye Division, 8 in the Orissa Division, 2 in the Bhagulpore Division, and none in the Chota Nagpore Division. Of the remaining 3, 1 was published at Chandernagore and 2 in the province of Assam. The leading papers were the *Suhachar*, the *Navavibhakar*, the *Sadharani*, the *Sanjivani*, the *Bangabasi*, the *Dainik*, the *Samaya*, and the *Som Prakash* (Calcutta), the *Burdwan Sanjivani* (Burdwan), the *Dacca Prakash* (Dacca), and the *Education Gazette* (Hooghly).

Of the daily newspapers, one (the *Dainik*) had a circulation of 1,500, one of 800, and the remaining two 500 and 300. Of the weekly papers, one (the

Bangabasi) is said to have had a circulation of 20,000, one of 4,000, two of upwards of 3,500, one of 3,000, one of 2,580, one of 1,653, two of 1,500, one of 1,200, two of 1,000, and the rest of under 1,000. Of the fortnightly papers, one had a circulation of 700 and one of 450.

The number of publications received in the Bengal Library during the year 1889 was 2,603, or 90 less than 1888. Of these publications 396 were in English. Their distribution as regards the place of publication was as follows:—

					Number published.
Town of Calcutta	1,824
Burdwan Division	61
Chittagong	43
Dacca	210
Bhagulpore	4
Orissa	112
Patna	135
Presidency	173
Rajshahye	41
					<hr/> 2,603 <hr/>

No publications were received from the Chota Nagpore Division.

Of the total number of publications received 310 were periodicals, and of the remainder 289 were bi-lingual and 2,004 uni-lingual. The uni-lingual books are classified, according to the languages in which they were written and the subjects of which they treat, as follows:—

No.	LANGUAGE.	Originals.	Republi- cations and transla- tions.	No.	SUBJECT.	Originals.	Republi- cations and transla- tions.
1	Arabic	7	1	1	Art	24	1
2	Assamese	16	2	2	Biography	11	2
3	Bengali	1,053	118	3	Drama	102	3
4	English	273	64	4	Fiction	129	13
5	Garo	1	2	5	History (including Geogra- phy).	90	6

14	Urdu	34	6	14	Science (Mathematical)	112	...
15	Uriya	84	9	15	Do. (Natural and other)	86	1
				16	Travels and Voyages	4	...
Total		1,672	332	Total		1,672	332

Of the publications received under this head, only the following, which treat of Hindu music, deserve notice, viz., (1) *Mridanga Badyárnab*, by Gokulámanda, a follower of Chaitanya, who made the *Mridanga* popular in Bengal in his *Kirtans*; and (2) *Bádyá Shikshá*, by Krishnadhan Chatterji, treating of the art of playing on the *setár*, a well-known instrument with seven strings.

Of the publications received under this head during the year, the following deserve notice, viz.—

Drama. *Praphulla*, by Babu Grish Chandra Ghose, who depicts middle-class life in Calcutta and tries to show that the influence of high English education without religious and moral training is bad.

Rájá o Rání, by Babu Ravindra Náth Tagore, which shows the peculiarities of Rajput character, their pride, obstinacy, and heroism, their indolence in times of peace, and the keen sense of honour that will not allow them even to think of submission.

Dharma Bijaya, by Babu Nagendra Náth Basu, in which the author attempts to explain and confute the doctrines of the various religious sects in India and

of the various schools of philosophy, orthodox and heterodox, against whom the great Shankaracharya levelled his arguments in his "Conquest of the World."

Fiction.

None of the publications received under the head of fiction deserve any special notice.

Of the Bengali works under this head, *Kulatattva Darshana*, giving a genealogy of the *Bárhí* Brahmins of Bengal, by

History.

Janamejaya Ghatak, deserves notice; as also *Dhákur*, containing the genealogy of the Várendra Káyastha community, or the Káyasthas belonging to the North Bengal distribution. Of historical works in English, Mr. R. C. Dutt's *History of Civilization in Ancient India*, of which only the first two volumes were received during the year, may be specially mentioned. It gives a connected narrative of all the facts and events relating to the Vedic and Rationalistic periods of Indian History made known to the world by the researches of Oriental scholars both in India and in Europe.

Language.

The educational works received under this head do not call for any remark.

Barát's *Pronouncing and Etymological Dictionary of the English and Bengali Languages* and the revised edition of the *Shabdakalpadruma*, by the late Sir Rájá Rádhákánta Deb, which, as noticed last year, were in progress, have been nearly completed.

Among the legal publications of the year, Mr. Kelleher's *Possession in Civil Law and Principles of Specific Performance and Mistake* deserve special notice.

Law.

The only medical work which need be referred to is the *Banga Sena*, an ancient and long-lost treatise on Hindu Medicine by Banga Sen, by whose name the book is known.

Medicine.

The most important works received under this head are the editions of the *Hitopadesha* and the *Chánakyashlokas* by Pundit

Miscellaneous.

Tará Kumár Kaviratna, and *Manihári* by Babu Prafulla Chandra Banerji. The last-named book contains a number of very thoughtful essays on grave and weighty subjects. A book entitled *Galpa Svalpa*, by Svarnakumári Deví, may also be noticed. It contains a number of interesting anecdotes of original composition, imparting lessons of the highest morality.

Of the works received during the year, Dr. Richard Garbe's edition of the *Sánkhya Aphorisms*, with the commentary of Aniruddha, may be specially mentioned. The Doctor is

Philosophy.

the Professor of Sanskrit in the University of Königsberg in Prussia, and was sent by his Government with one year's leave to study the Sánkhya philosophy at Benares. He made the best use of his opportunities by availing himself of the tuition of two of the most renowned Sánkhya Pundits at that place. His edition of the work has been executed with great care, and he has given Aniruddha's commentary in full, but only such portions of Vedantí Mahádeva's as differ from Vijnána Bhikshu's *bhášhya*, from which Mahádeva has largely borrowed.

A number of political pamphlets in Urdu were received in the Library, directed against the Congress movement.

Politics.

Poetry.

None of the works received during the year under this head call for any special remark.

The publications under the head of religion are numerous, consisting of translations and republications of the *Puranas*, the *Vedas*, the *Smritis*, and the *Tantras*. Of these, the

Religion.

Bhaktiratnákár, issued in fourteen parts, by Pandit Ram Narayan Tarkaratna, may be specially noticed. It is a standard work with the Vaishnavas.

No works in science, mathematical, natural, or physical, other than educational, were received in the Library during the year.

Science.

Under this head three books deserve notice, viz., an account of a visit to Europe by Mr. T. N. Mookerjee, and another account of such a visit by Mr. A. K. Ray; and *Travels*, by

Travels and Voyages.

Mr. A. L. Ray.

Of the periodicals, the *Navajivan*, the *Bhárati*, and the *Navya Bharat* with conducted with ability.

Periodicals.

The number of publications registered under Act XXV of 1867 was 2,627 in 1889-90 against 2,491 in 1888-89. Of this number, 1,846 were registered in the office of the Inspector-General of Registration and 781 in district offices.

The cost of books purchased under section 10 of the Act amounted to Rs. 4,677-6-6 against Rs. 4,649-15-9 in the preceding year. The fees levied under section 18 amounted to Rs. 168 against Rs. 170.

Act XXV of 1867 was amended by Act X of 1890, which came into operation on the 21st March 1890, on which date it received the assent of the Governor-General.

VIII.—ARCHÆOLOGY.

IN view of the approaching termination of the period for which the scheme of the Archæological Survey of India was sanctioned, on the retirement in 1885 of Major-General Sir Alexander Cunningham from the Directorship of the Survey, the Archæological Surveyor of Bengal was directed to close field operations, and devote himself to the completion of the reports on the field operations of past years. The field operations of the Assistant Surveyor were almost entirely confined, according to the programme which was arranged by the Director of the Survey, to taking impressions of the more important inscriptions in Northern Bengal. These are chiefly from the Asoka pillars, and have never yet been thoroughly edited by a competent scholar. Dr. Burgess has arranged with Professor G. Bühler, C.I.E., who has given years of study to this special branch, that he should edit all the Asoka inscriptions procurable. They will be published, together, with collotype reproductions of the originals, in the "*Epigraphia Indica*," and be accessible to the public.

Three new Asoka inscriptions have been discovered,—one by Mr. Carlyle and the others by the Assistant Surveyor. The one discovered by Mr. Carlyle is on a large monolith situated near the village of Rampurwa, in the district of Chumparun. In shape and size this pillar resembles those at Lauriya Ararāj and Lauriya Navandgarh; but owing to its position (it being buried almost wholly under ground) the inscription which it bears has never been thoroughly copied. The other two are long records incised on large rocks near the village of Mansera in the Hazara district, and are no doubt among the longest and most important of the Asoka series hitherto discovered. Major-General Sir Alexander Cunningham, to whom a hand copy of the larger of the two inscriptions was sent by the Assistant Surveyor, was able to read it, and identified the lower lines as belonging to Edict 8.

The Executive Engineer of the Nuddea Rivers Division has reported the existence of a group of four Hindoo temples in the village of Burranuggar, pergunnah Moraripore, in the district of Moorshedabad, situated on the right bank of the river Bhagiruthee, about two miles above Azimgunge. The temples, which are of masonry, are built on a raised platform on four sides of a rectangular masonry tank, measuring 37 feet by 29½ feet. Each temple is about 30 feet long, and 16 feet in width, and about 30 feet high. The roofs are of curved segmental form, as found at Gaur, and do not present any novel feature. The walls, however, of two of the buildings are richly ornamented with terra-cotta tiles, each containing a figure or group of Hindoo gods, very excellently moulded and in perfect preservation. Two of the temples are unfinished, the recesses for the tiles never having been filled. They are said to belong to the Rajah of Nattore, and to be about 200 years old, but the Executive Engineer was unable to ascertain when and by whom they were built. The Commissioner of the Presidency Division has been asked if he can give any information regarding the history and archæological value of these temples.

The measurements and drawings of the buildings in the old fortress of Rohtasgarh, and of the principal remains, consisting of the tombs of Hasan Khan, Sher Shah, and Selim Shah, at Sasseram were completed by the Assistant Surveyor. He has also completed a separate set of photo-plates of inscriptions and sculptures, and a report on these is in course of completion. No report has been received from the Archæological Surveyor, who retired on the 31st March 1890.

The conservation of the tomb at Maner, which was commenced by the Public Works Department in 1887-88, was in progress. A sum of Rs. 929 was spent during the year in making secure the dome and the wall supporting the

plinth on the tank side, and on improvements to the drainage of the tomb. Measures were also taken for the renewal of the broken chāja, and for the protection of the southern chattri on the west side of the tank.

Dr. Burgess, the Director of the Archæological Survey, retired from the 1st June 1889, and the appointment was abolished. The appointment of the Assistant Surveyor and staff of the Bengal Circle will not be continued after the 30th September 1890. From the 1st October 1890 the Archæological Survey will consist of only two parties, and, as at present arranged, each of these parties will, as the work of the province in which it is at present employed is completed, be transferred to the next and placed under the general orders and direction of the Local Government of that province.

IX.—MISCELLANEOUS.

Ecclesiastical.

THE Ecclesiastical establishment, paid entirely or in part by Government, consisted of the Lord Bishop of Calcutta, the Archdeacon of Calcutta, the Domestic Chaplain to the Lord Bishop, the Registrar of the Diocese, the Archbishop of Calcutta, 16 Chaplains of the Church of England, 1 Chaplain of the Church of Scotland, 12 Ministers of the Additional Clergy Society, and 7 Priests of the Roman Catholic Church. Services are conducted at the principal stations by Chaplains and elsewhere by Ministers of the Additional Clergy Society, to whom special allowances on this account are made.

Twenty-four marriages were registered during the year under the *Brahmo Marriage Act*, viz., 15 at Calcutta, 1 at Mymensing, 1 at Bhagulpore, 3 in Backergunge, 2 at Hooghly, 1 at Cuttack, and 1 at Balasore, as against a total of twelve in the preceding year.

Working of the Brahmo Marriage Act. There is nothing of importance to note under this head, except that the pauper fee was reduced during the year and the monumental rate raised. For the proper construction of masonry graves, the Board have issued a rule making the undertaker who erects a monument responsible for its preservation for five years.

Burial Board under Act V (B.C.) of 1887. There is nothing particular to note under this head, except that under the Act the Board was formed during the year for the superintendence and management or control of Muhammadan burial-grounds.

Muhammadan Burial Board under Act IV of 1889.

Stationery and Printing.

THE value of the stocks, receipts and issues of the year under report
compare as follows with the figures for 1888-89:—

	1888-89.	1889-90.
	Rs.	Rs.
Value of stores at the beginning of the year	13,13,688	11,46,468
Value of stores received and credited during the year	15,98,402	15,24,956
Total	29,12,090	26,71,424
Value of stores issued	17,65,622	18,66,000
Balance	11,46,468	8,05,424

There has been a satisfactory decline in the value of stores received from the India Office, and a steady corresponding increase in the proportion of articles purchased in India, as the following figures will show:—

	Value of stores received from Secretary of State.	Percentage.	Value of stores purchased in India.	Percentage.
	Rs.		Rs.	
1887-88 ...	5,03,109	35	9,21,314	65
1888-89 ...	3,37,348	26	9,56,788	74
1889-90 ...	2,03,536	16	10,75,660	84

The cost of the stores issued to departments and offices under Local Governments free of charge amounted to Rs. 8,42,855 during 1889-90, against Rs. 8,19,705 in the previous year.

	1888-89.	1889-90.	
	Rs.	Rs.	
* Cost of water-marked paper ...	1,22,674	1,74,836	items noted in the margin† from the total issues, the actual cost of <i>ordinary</i> stationery supplied by the Stationery Office amounted to Rs. 6,11,724, against Rs. 5,27,395 in the preceding year, showing an increase of Rs. 84,329. The number of indenting officers increased by 60 during the year under review.
† Value of stores supplied to presses for blank books, &c. ...	22,929	30,654	
Value of unserviceable stores ...	18,054	Nil.	
Value of stores transferred to Bombay and Madras ...	113	Nil.	
Value of deficiencies in stock-taking ...	23,308	3,398	
Value of other miscellaneous adjustments ...	3,509	4,914	
Loss to Imperial Government by revaluing the closing balance at the issue rates of 1888-89	7,538	
Supplies to presses ...	10,47,640	10,32,936	
Total	12,38,227	12,51,276	

“printing paper” was chiefly on account of the Burmah presses, and under other items the increase was due to higher rates.

In the Form Store Department there was a reduction of 20,956,974 and 9,883,770, respectively, in the total receipts and issues of forms. The total number of indents for forms was also less than in the previous year by 639, while the number of indents remaining uncomplished with increased by 436. The decrease in the receipt of forms is attributed to the reserve stock

having been reduced during the year under review from 25 to 12½ per cent. under the orders of Government. The total cost of printing and paper for the forms supplied to Government offices was Rs. 4,10,018 during 1889-90, against Rs. 4,68,288 during 1888-89.

The system of supplying newspapers and periodicals through the Calcutta Stationery Office appears to be working well, and there is every reason to hope that the supply of rubber stamps and inks through the same agency, introduced during the current year, will be found to have equally satisfactory results.

PRINTING.

The following statement exhibits the operations of the Printing Department during the year:—

OUTTURN.	1888-89.		1889-90.

Difference	1,48,955	...	1,43,593

The outturn of the Jail Press amounted to Rs. 1,14,543, against Rs. 1,24,124 of the preceding year, and the expenditure to Rs. 37,172, against Rs. 36,860. The profits of the Jail Press amounted to Rs. 82,658, against Rs. 79,893 in the previous year. The decrease in the outturn was due to a decrease in the demand for forms and books by the Superintendent of Stationery, the excessive demands of the previous year having caused an accumulation of stocks that had to be worked off. The outturn of the Third Division, which embraced the type foundry, amounted to Rs. 45,178, the value of type cast being Rs. 20,051.

The outturn of the Secretariat Press amounted to Rs. 2,05,931, against Rs. 2,08,752 in the previous year, and the expenditure to Rs. 1,83,539, against Rs. 1,94,112; the difference, after deductions for wear and tear and house-rent, being Rs. 2,706, against Rs. 6,562. The receipts in the Publishing Department amounted to Rs. 61,008, against Rs. 69,157 in the previous year, while the expenditure was Rs. 27,668, against Rs. 25,734.

The following statements show the profit and loss and the cash actually received and disbursed:—

Zoological Gardens.

THE receipts from private sources amounted to Rs. 18,126, the Government contribution was Rs. 19,504, making a total income of Rs. 37,630, while the expenditure was Rs. 46,285, leaving a deficit of Rs. 8,655. Of this Rs. 6,523 were spent on original works of construction; but, even excluding that sum, the cost of ordinary administration exceeded the income. The balance was reduced from Rs. 11,279 to Rs. 2,624.

A very useful tropical aviary was constructed during the year, which bears the name of the Nawab Bahadur of Moorsshedabad in recognition of his large subscription to the Gardens of Rs. 10,000.

The number of visitors who paid entrance fees was 109,569, against 111,573 in the previous year; but this number was exclusive of a large number of students and children under eight years of age who were admitted free of charge. The most important additions made in the course of the year were a pair of adult African lions, two African leopards, one African caracal, and one hunting leopard presented by His Excellency the Viceroy; a pair of young Indian lions presented by the Nawab of Junagarh, Katteywar, and two tigress cubs presented by Sir Steuart Bayley. One zebra was obtained by exchange from the Zoological Society's Gardens, London, and a pair of jaguars from Mr. Carl Hagenbeck of Hamburg. The birth of a pair of tiger cubs was recorded as an unusual event during the year. Of the presentations made, there were 60 mammals, 34 birds, and 4 reptiles. The total number of presentations during the year was 98 as against 42 in the previous year, and is indicative of the interest taken by the public in the institution.

The institution continued to maintain its popularity with the students and teachers of the various schools and colleges of Calcutta and its suburbs.

Economic and Art Museum.

As in previous years, the work was mainly confined to preserving specimens from the influences of climate and the ravages of insects, the insecure condition of the present building and the insufficient number of show-cases making this a difficult task. In spite of every care, some samples of woollen goods and raw materials were so damaged as to be unfit for display. It is considered that air-tight glass-cases, with the air inside fully impregnated with naphthaline, afford the only means of securing efficient protection, and provision for such cases has accordingly been made in the estimate of fittings for the new building now under construction.

The arrangements referred to in the last year's Report as to the exchange of specimens between the Economic Museum and the Jaipur Museum were effected. An interesting series of specimens was received from Jaipur, and the return collection is reported to be almost ready for despatch. A number of valuable specimens, not represented before, was added to the Artware Court during the year, partly by donation and partly by purchase. Additions were also made to the exhibits in the Ethnological and Economical Courts. The total number of specimens in the register of each Court stood as follows on the 31st March 1890 :—

		Last number on 31st March 1889.	Last number on 31st March 1890.	Number of articles damaged during 1889-90.	Net increase during the year.
Artware Court	...	10,090	10,526	Nil.	436
Economic "	...	16,818	16,954	13	123
Ethnology	...	6,972	7,145	Nil.	173

The most important works in which the Assistant Curator and his staff were engaged during the year were (1) the formation of a large and exhaustive collection of the fibres and mat and paper grasses of India for distribution to several institutions in the United Kingdom; and (2) the formation of comprehensive collections of the whole of the economic products of India for the Imperial Institute, London, the Indian Museum, and any other museums in India which Provincial Governments may recommend, and for which they may be prepared to purchase a set of specimens. No actual collecting was done during the year, but tabular statements of all the products required from the various provinces during 1890-91 were prepared, and the preliminary correspondence issued. The trustees propose to make the collections *pari passu* with Dr. Watt's Dictionary of the Economic Products of India, which will thus form an analytical and descriptive catalogue of the specimens. The Government have approved the proposal.

On the recommendation of the Bengal Committee of the Colonial and Indian Museum, who brought their work to a close during the year, a sum of Rs. 7,025, being the balance of the sale proceeds of exhibits, was placed at the disposal of the Trustees for the purchase of good specimens of Bengal artware to form a collection under the name of the "Asanullah and Swarnamayi" collection in commemoration of the liberal donations of the Nawab Asanullah of Dacca and the Maharani Swarnamayi of Cossimbazar towards the cost of the Bengal Screen.

FISCAL.

Provinces for Season 1889-90, or from 1st October 1889 to end of Field Season.

Average size of village circuits in acres.	Approximate total area in square miles.	Estimated total cost of all kinds, including contingencies, for season 1889-90, or from 1st October 1889 to 30th September 1890.	Probable rate per square mile in surveyed area.	REMARKS BY EXECUTIVE OFFICER.
		Rs. A. P.	Rs. A. P.	
				<i>On maps of previous surveys used as guides to boundaries.</i>
				The 4-inch maps in Dakkhin Shabazpore and Serail have been used as a guide to village boundaries.
				<i>On demarcations in the field.</i>
596	259	66,761 11 1	257 12 3	In Serail and Dakkhin Shabazpore there was practically no demarcation of villages. An endeavour had been made to commence the work in both districts, but no headway had been made. The whole attempt in this direction in both districts may be characterized as abortive.
				<i>General.</i>
1,280	270	95,104 7 0	352 3 9	The survey received no assistance in any of the districts, but were met everywhere with a passive opposition or apathetic indifference.
				The Settlement Officer of Chittagong, Mr T. A. Slack, has been of the greatest assistance in all matters in that district.
2,150	171	14,251 11 9	258 12 6	The native settlement officer in Serail was very willing and assisted in many ways; the same cannot be said of the official in Dakkhin Shahbazpore.
				<i>On maps of previous surveys used as a guide to boundaries.</i>
...	5 71			Survey maps compared with old settlement joto maps on 16' scale.
...	31 24			Through the assistance of the settlement officer, the maps of the former survey of the jotes on the 16' scale were obtained for comparison. The boundaries of the mal jotes (or the oldest jotes) were found, with very few exceptions, to agree very fairly well, the differences, where they existed, being due either to the transfer, &c., of proprietary rights by purchase or otherwise, or when in adjacent jotes, having the same owners, the intermediate boundaries were changed either to suit local requirements or the convenience of the cultivator and proprietors, by the latter, and lastly where rivers and waste lands existed on the boundaries. It was decided by the settlement officers that all such changes could be accepted, and the present survey of the boundaries upheld, traces of the differences being, however, retained. The comparison of the boundaries of the "time-expired jotes" was not quite so satisfactory owing to the encroachments on 'khas land' in a large number of jotes; the extreme difficulty in identifying them owing to the change of limits, and the faulty character of the information, as to fauzi numbers, &c., obtained in the field from the jotedars. When jotedars held land in various small plots scattered over a taluk, very often the wrong numbers were given for the jotes under survey, and these mistakes could only be traced on comparison with the old maps, and when the latter did not quite agree in shape with those of the present survey, the power of identification proved, as may be imagined, embarrassing in the extreme. With the "arable waste land jotes," however, the greatest trouble has been experienced. Very few of the boundaries agree

Provinces for Season 1889-90, or from 1st October 1889 to end of Field Season—continued.

Average size of village circuits in acres.	Approximate total area in square miles.	Estimated total cost of all kinds, including contingencies, for season 1889-90, or from 1st October 1889 to 30th September 1890.	Probable rate per square mile in surveyed area.	REMARKS BY EXECUTIVE OFFICER.
		Rs. A. P.	Rs. A. P.	
...	42.29			<p>in shape, and from the changes in names of jotedars, encroachments, want of distinguishing numbers, and various other causes, the comparison with the former records is very tedious, and that progress very slow. Without this rigid examination, however, it would be impossible to ensure the accuracy of the records submitted, or of an agreement with those of the Settlement Department, and the receipt of these records must therefore be looked upon as most important. They have materially helped to remove doubts and afford means of checking what would otherwise have had to be accepted on faith.</p> <p><i>On demarcations in the field.</i></p> <p>The demarcation is reported to have been found very faulty owing to the absence generally of pillars at the several bends and turns of the boundary. The pillars erected during the previous year were more or less destroyed during the past rainy season. The positions of the trijunctions were, however, as a rule generally defined by simul trees, and, with the assistance of the jotedars, easily traced. In the jungly tracts demarcation was practically non-existent, for in many places the jotedars themselves could not point out the limits of their holdings owing to the high grass and jungle. The demarcation carried out by the Settlement Department during the current season in the jote lands was complete, but in the waste lands somewhat defective, especially where the jotes were scattered. The boundaries in the grass waste lands could only be ascertained, and that with difficulty, after the boundary lines had been fired and the grass burnt down, as it is annually done by the jotedars.</p> <p><i>General.</i></p> <p>The outturn has again suffered heavily from the same cause that affected it last year. Sickness in every branch of the establishment, apathy of and obstruction, both passive and active, offered by jotedars; heavy line clearing through dense jungle; and lastly (during the last week of May and the first week of June) incessant and heavy rain, which has prevented the completion of the survey of tracts nearly traversed, and hence caused their exclusion from the area constituting the season's outturn. The sickness too during the latter end of May and the commencement of June was abnormal. Not a sub-surveyor of the traverse camp was quite fit for work through illness during that period.</p> <p><i>On maps of previous surveys used as guides to boundaries.</i></p> <p>In the Kanika and Kujung estates there were no maps showing village boundaries. In districts Pooree and Cuttack the one-inch published sheets of the revenue survey of season 1837-42 were used as guide maps for the traverse surveyors, and were found useful.</p>

FISCAL.—continued.

Provinces for Season 1889-90, or from 1st October 1889 to end of Field Season—concluded.

Average size of village circuits in acres.	Approximate total area in square miles.	Estimated total cost of all kinds, including contingencies, for season 1889-90, or from 1st October 1889 to 30th September 1890.			Probable rate per square mile in surveyed area.	REMARKS BY EXECUTIVE OFFICER.
		Rs.	A.	P.		
...	<i>On demarcations in the field.</i> In the Kanika estate temporary mud marks were put up to define the village boundaries by the Manager, and these were taken up on the 16-inch sheets by the amins. The survey theodolite stations, and most of the trijunction points of villages, were permanently marked by stones—the former by the survey agency, and the latter by the Manager; with the exception of some villages on the north-eastern corner of the Kanika estate, the theodolite stations and trijunction points of which have been marked by pegs. In the Pooree district the settlement officer put up mud marks along the village boundaries, and these were taken up on the 16-inch sheets by the amins. The theodolite stations and trijunction points of villages were permanently marked by stones by the Survey agency. In the Cuttack district mud marks were put up by amins under the Survey agency, with the aid of the patwaris and kammgoes. The theodolite stations and trijunction points of village boundaries have been permanently marked by stones. In a few villages baked clay cylinders with charcoal have been placed to mark theodolite stations and trijunction points, but these will be replaced by stones on taking the field next season.

...						<i>General.</i> In the Kujung and Kanika estates, and in the Pooree district, the khasras were written up by amins trained by the Survey agency. The preparation of the writing of records of rights was done under the supervision of the officers in charge of camps. Written instructions were given to each amin, after consultation with the Manager of Kanika, Settlement Officer of Pooree, and Collectors of Cuttack and Pooree. Records (viz. tracings, khatians, and other papers) were furnished to the Settlement Officers of Kujung, Kanika, and Pooree from time to time during the field season. In Kanika, district Cuttack, and district Pooree survey training schools were established for the teaching of local agency. This agency has been employed in surveying the fields, &c., on the 16 inches to the mile scale and writing up the khasras. <i>On maps of previous surveys used as guides to boundaries.</i> No maps were used as guides to boundaries. The utmost confusion prevails regarding old boundaries in district Bankoora. <i>On demarcations in the field.</i> There were no demarcations. <i>General.</i> The work in hand will most probably be completed at the end of the current recess season. It is not yet known if more work in the Burdwan Raj estate is likely to be found for the detachment. Survey of the boundaries of about 4,056 holdings, all in the Suttanuttee taluk.

PART II.

STATISTICS OF PROTECTION.

A—LEGISLATIVE.

Statement of Bills proposed or pending in the Legislature of the Province of Bengal in 1889-90.

TITLE OF BILL.	By whom proposed.	Object and character of Bill.	If pending, why, and in what stage.
Nil.			

Statement of Acts passed by the Legislative Council of Bengal in 1889-90 and sanctioned as required by law.

TITLE OF ACT.	By whom proposed.	Object and character of Act.	Date on which sanctioned.
ACT No. I (B.C.) OF 1890.			
1. An Act to consolidate the Calcutta and the Suburban Police Superannuation Funds.	The Hon'ble Sir Henry Harrison.	The Superannuation Funds of the Police Forces of Calcutta and the Suburbs had hitherto been distinct. In order to ease the burdens imposed upon these funds to be more equitably distributed, it was considered desirable to amalgamate them; and this Act has been passed with that object.	Lieutenant-Governor's assent on the 20th January 1890. Governor-General's assent on the 18th February 1890.
ACT No. II (B.C.) OF 1890			
2. An Act to amend the Bengal Vaccination Act, 1880.	The Hon'ble Sir Henry Harrison.	The necessity arose for amending the Bengal Vaccination Act of 1880, so as to extend the application of the rules and orders in respect of the town of Calcutta as defined in that Act to that portion of the Suburbs which, by a later Act, viz. the Calcutta Municipal Consolidation Act of 1888, had been incorporated within that town. This has been effected by making appropriate alterations in some of the definitions and expressions which occur in the Bengal Vaccination Act of 1880.	Lieutenant-Governor's assent on the 1st February 1890. Governor-General's assent on the 4th March 1890.
ACT No. III (B.C.) OF 1890.			
3. An Act to consolidate and amend the law relating to the Port of Calcutta and to the appointment of Commissioners for the said Port.	The Hon'ble H. J. Reynolds.	This Act is in the main a consolidating measure, but occasion was taken to introduce some amendments which were found by experience to be necessary. Among the more prominent innovations introduced is one which increases the number of Port Commissioners from thirteen to fifteen; sections have also been inserted which prescribe the manner in which the Port property shall be valued for purposes of municipal assessment. Persons feeling themselves aggrieved through being debarred the use, or by the removal or destruction of any private wharf, quay, or other construction by the Commissioners under the provisions of this Act, are empowered to institute a civil suit for compensation for any lawful injury occasioned by such action. The Act also provides for the grant of pensions to the Port employes, and defines more clearly the position and duties of the Port Police. Some sections have also been introduced relating to the mode of preparing the budget, and there is also a provision defining the liability of the Commissioners in respect of goods whilst in their custody.	Lieutenant-Governor's assent on the 22nd March 1890. Governor-General's assent on the 15th May 1890.

II.—Account of Expenditure from the Net Income of the Province of Bengal for the year 1889-90.

MAJOR HEADS.			AMOUNT.		EXPLANATORY REMARKS.
			Past year 1888-89.	Present year 1889-90.	
			Rs.	Rs.	
<i>Civil and Political salaries and establishments.</i>					
DETAILS.					
	1888-89.	1889-90.			
	Rs.	Rs.			
12. Registration	5,62,136	5,91,816			The increase is due to larger payments on account of commission to Sub-Registrars and <i>ex-officio</i> Registrars.
18. General Administration	16,33,315	16,84,502			The increase is due partly to payment in the Presidency of the salary of a junior member of the Board of Revenue, North-Western Provinces, and partly to privilege leave absences.
23. Ecclesiastical	1,48,151	1,38,171			The diminution in 1889-90 arises from savings from absence of chaplains on leave out of India.
24. Medical	11,23,672	11,33,921			The increase is due to privilege leave absences.
25. Political					
26. Scientific and other minor Departments.	1,57,630	1,63,970			The increase is due to larger expenditure incurred for agricultural purposes.
	36,24,904	37,12,686	36,24,904	37,12,686	
<i>Civil and Political contingencies.</i>					
DETAILS.					
12. Registration	37,323	37,207			} No remarks.
18. General Administration	2,91,306	2,92,776			
23. Ecclesiastical	25,672	29,114			The increase arises from larger expenditure incurred on account of medical stores, supplies, and services and contingencies, as also to increased charges for diet and clothing of patients and travelling allowances.
24. Medical	3,63,761	3,92,551			
25. Political	83,252	94,497			The increase is chiefly due to the construction of a house at Guntuck for the Political Agent, Mr. J. C. White, and to payment to the Chinaman engaged as interpreter during the negotiations in Sikkim and Chinese Amban.
26. Scientific and other minor Departments.	1,52,380	1,45,693			The decrease is due to larger payment in 1888-89 for silk experiments.
Total	8,66,694	9,01,838	8,66,694	9,01,838	
13. Interest on ordinary debt			51,391	68,320	The increase is due to larger payment of interest on provincial advances and loan accounts.
14. Interest on other obligations			1,21,925	1,12,297	The decrease is due to a special charge in 1888-89 on account of refund of interest on the unpaid portion of purchase money of waste lands in the Sunderbans.
16. Telegraph			884	868	
19A. Law and Justice—Courts of law			79,51,269	80,53,118	The increase is due chiefly to the appointment of an Additional Sub-Judge, and Munsifs and their establishments.
19B. Ditto—Jails			17,95,136	18,99,595	The increase is due chiefly to larger expenditure for purchase of raw materials and rations.
20. Police			48,69,920	53,25,975	The increase chiefly appears under Presidency Police, and is due to the administration of the Presidency and Suburban Police having been taken over by Government in 1889-90 from the Calcutta Municipality.
21. Marine			10,70,991	12,62,875	The increase is chiefly due to the purchase of the steamer <i>Guide</i> , the cost being paid for in England by Her Majesty's Secretary of State.
22. Education			24,48,873	24,93,270	The excess appears chiefly under Government colleges and schools, and is due partly to increased expenditure on English colleges and partly to the larger outlay for materials and tools by the Civil Engineering College, Howrah.
28. Civil furlough and absentee allowances.			6,511	1,519	
29. Superannuations, allowances, and pensions.			13,71,559	14,37,471	The excess is due to large admissions to the pension list, chiefly in the Land Revenue, Opium, Police, and Education Departments of the public service.

A.—FINANCE—concluded.

II.—Account of Expenditure from the Net Income of the Province of Bengal for the year 1889-90—continued.

MAJOR HEADS.	AMOUNT.		EXPLANATORY REMARKS.
	Past year 1888-89.	Present year 1889-90.	
	Rs.	Rs.	
30. Stationery and Printing ...	19,43,806	21,06,589	The increase is chiefly due to larger expenditure for the purchase of country-made paper.
32. Miscellaneous ...	2,58,412	2,93,905	The increase is due partly to the adjustment under this head of the cost of periodicals supplied to officers in the Civil Department, and partly to expenditure incurred for the purchase of koonki elephants in Julporee and capture of wild elephants in the Doars.
33. Famine Relief ..	51,338	1,39,884	The increase is due to larger expenditure for charitable relief, public works, and establishment and contingencies.
38. State Railways—Interest on debt. .	32,61,382	34,33,007	The increase is due to the larger payment of interest on the outlay on account of State Railways.
42. Irrigation—Interest on debt ..	23,39,849	23,61,042	The increase is due to larger payment of interest by Public Works officers.
43. Irrigation—Minor Works and Navigation.	28,95,717	27,76,685	The decrease is due to larger expenditure in 1888-89 by Public Works officers.
46. Civil Works ..	10,23,961	31,78,356	The excess in 1888-89 represents <i>white-Jack</i> of ferry collections transferred from Provincial to Local Revenue.
State Railways ..	60,80,530	61,72,765	The increase is due to larger outlay on account of working expenses of the Eastern Bengal State Railway.
Total ..	4,50,31,322	4,56,75,395	
Municipalities ..	16,78,256	17,76,877	No remarks.
LOCAL FUNDS.			
Incorporated Local Funds ..	56,89,713	62,64,437	The excess arises from increased outlay on original works and repairs chiefly in the districts in which scarcity prevailed.
Excluded Local Funds ..	5,00,559	4,18,993	The decrease is due to the transfer in 1889-90 of the Chittagong Port Fund to the Port Commissioners.
Total ..	61,90,272	66,83,430	
GRAND TOTAL ..	5,28,99,830	5,40,74,702	
Surplus ..	10,43,18,699	11,63,94,738
